demands have led younger generations to ask if it is all worth it. Can the middle class continue to thrive, or will it falter under the stresses of automation, consumerism, pollution, and political strife? *The Rise of the Global Middle Class* traces the history of the middle class from its origins in Victorian England to present day India. Along the way we meet knocker-uppers who have been displaced by alarm clocks. We learn how the Chinese Communist Party drew legitimacy from its ability to enlarge the Chinese middle class. Kharas proposes a new middle-class manifesto that addresses the pressing issues of inequality, climate change, and technological advances.

Food Security and Global Environmental Change

John Ingram,Polly Ericksen,Diana Liverman.2012-07-26 Global environmental change (GEC) represents an immediate and unprecedented threat to the food security of hundreds of millions of people, especially those who depend on small-scale agriculture for their livelihoods. As this book shows, at the same time, agriculture and related activities also contribute to GEC by, for example, intensifying greenhouse gas emissions and altering the land surface. Responses aimed at adapting to GEC may have negative consequences for food security, just as measures taken to increase food security may exacerbate GEC. The authors show that this complex and dynamic relationship between GEC and food security is also influenced by additional factors; food systems are heavily influenced by socioeconomic conditions, which in turn are affected by multiple processes such as macro-level economic policies, political conflicts and other important drivers. The book provides a major, accessible synthesis of the current state of knowledge and thinking on the relationships between GEC and food security. Most other books addressing the subject

concentrate on the links between climate change and agricultural production, and do not extend to an analysis of the wider food system which underpins food security; this book addresses the broader issues, based on a novel food system concept and stressing the need for actions at a regional, rather than just an international or local, level. It reviews new thinking which has emerged over the last decade, analyses research methods for stakeholder engagement and for undertaking studies at the regional level, and looks forward by reviewing a number of emerging 'hot topics' in the food security-GEC debate which help set new agendas for the research community at large. Student Development and Social Justice Tessa Hicks

Peterson.2017-09-28 This book weaves together critical components of student development and community building for social justice to prepare students to engage effectively in community-campus partnerships for social change. The author combines diverse theoretical models such as critical pedagogy, asset-based community development, and healing justice with lessons from programs promoting indigenous knowledge, decolonization, and mindfulness. Most importantly, this book links theory to practice, offering service-learning classroom activities, course and community partnership criteria, learning outcomes, and assessment rubrics. It speaks to students, faculty, administrators, and community members who are interested in utilizing community engagement as a vehicle for the development of students and communities towards wellbeing and social justice.

be seen as the first major effort to give substantive meaning to the Third World's desire not only for a new regime for the world's raw commodity trade but also for a New International Economic Order. Yet various obstacles have impeded successful North-South bargaining, and the negotiations remain at a stalemate. Focusing on the bargaining process between developed and developing countries in the United Nations Conference on Trade and Development, Robert Rothstein analyzes the factors that have inhibited successful negotiation and suggests ways in which these obstacles might be removed. The first part of the book focuses on the specifics of the commodity debate, while in the second part the author attempts to explain the causes of delay, misunderstanding, and mistrust within the negotiating process. Assessing the possibility of devising an effective bargaining policy among unequal parties with conflicting values and interests, Professor Rothstein suggests a number of structural, institutional, and conceptual reforms. 2030 Agenda and India: Moving from Quantity to Quality Sachin Chaturvedi, T. C. James, Sabyasachi Saha, Prativa Shaw. 2019-10-19

This book presents a selection of multifaceted development issues involving social, economic and environmental aspects, in order to inspire and guide implementation of the United Nations' SDGs. It focuses on economic development, human well-being and sustainable pathways, with special attention to financial and knowledge resources, as well as measurement concepts. In doing so, the book draws a distinction between sustainability and sustainable pathways by refraining from dealing with broader and more direct environmental sustainability issues like climate change, environmental degradation and sustainable energy. The choice of topics, apart from their relevance for India, was guided by their importance in connection with multiple SDG goals. In addition to revealing the intricacies of systemic relationships and the dilemmas they create in policy choices, the book examines the role of actors and the critical importance of partnerships to help readers comprehend the breadth of diversities and inter-linkages involved. The roles of the central and state governments, the parliament and the state assemblies, the civil society, UN agencies and district-level authorities are separately explored in depth. Sharing valuable insights, the book encourages policymakers, practitioners and scholars to move towards a sustainable and equitable economy, and supports them in their efforts.

Nuclear Disarmament in International Law Haralambos

Athanasopoulos.2000-02-01 When German physicists Otto Hahn

and Fritz Strassman first split the uranium atom in 1938, they might have little imagined the potential power their experiments

had unleashed. Since the United States successfully detonated the first atomic weapons in 1945, the entire world has lived in

fear of annihilation. Technological advances in weaponry and, importantly, their delivery systems have only heightened the

sense of dread. Yet, since the end of World War II, world

governments have been unable to agree on a strategy for nuclear

disarmament. This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world. This work

examines the nuclear question within the framework of

international law. The advent of the nuclear age and its impact on postwar peace and law is first covered. This is followed by

analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start. The globalization of

the Cold War, the expansion of the nuclear arms race, and the START treaties and the legacy of 1970s-era detente efforts in the

years leading up to the end of the Cold War are then detailed.

How the United Nations reacted to the end of the Cold War and

the prospects for disarmament in the 21st century are the subjects of the concluding section.

of current issues of migration, climate change and UN reform, with a focus on gender and social movements, provides a timely intellectual resource to strengthen shared commitments' - Mary Robinson 'These annual volumes have themselves become an occasion for enacting global civil society: each Yearbook is a project that involves hundreds of people around the world in various ways... and they often fight it out around divergent understandings of critical issues. This volume enters the extreme zones we face today - the growing injustices which increasingly are only addressed by global civil society actors, but also the powerful innovations brought about by new technologies that can construct whole new global spaces for global civil society' - Saskia Sassen 'It is increasingly difficult to recall memorable analyses of international social movements before GCS. But after half a decade each annual issue is not only a magnum opus but is also definitive, distinctive & comparative. The study of global civil society can never be the same!' - Timothy M Shaw, Professor of Commonwealth Governance & Development & Director, Institute of Commonwealth Studies, School of Advanced Study, University of London The annual Global Civil Society Yearbooks provide an indispensable guide to global civil society or civic participation and action around the world. Each yearbook includes commissioned contributions from leading commentators across the social sciences on the latest issues and developments. Each yearbook also explores and presents the latest approaches to measuring and analyzing global civil society and provides a chronology of key global civil society events in the year. The 2005/6 Yearbook explores the role of gender in global civil society and investigates the core issues of labour migration, climate change and UN reform. In part three, contributions consider the impact of social forums and wireless technology, as well as reviewing the discussion of networks from the 2004/5 Yearbook. Illustrated throughout with summaries, maps, figures, tables and photographs and encompassing regular features such as updates

on previous editions and the annual data reports, the Global Civil Society Yearbook remains the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike. It is essential reading for anyone seeking a deeper understanding of the key actors, forms and manifestations of global civil society around the world today.
