**Creating Good Jobs** Paul Osterman. 2020-01-28 Experts discuss improving job quality in low-wage industries including retail, residential construction, hospitals and long-term healthcare, restaurants, manufacturing, and long-haul trucking. Americans work harder and longer than our counterparts in other industrialized nations. Yet prosperity remains elusive to many. Workers in such low-wage industries as retail, restaurants, and home construction live from paycheck to paycheck, juggling multiple jobs with variable schedules, few benefits, and limited prospects for advancement. These bad outcomes are produced by a range of industry-specific factors, including intense competition, outsourcing and subcontracting, failure to enforce employment standards, overt discrimination, outmoded production and management systems, and inadequate worker voice. In this volume, experts look for ways to improve job quality in the low-wage sector. They offer in-depth examinations of specific industries—long-term healthcare, hospitals and outpatient care, retail, residential construction, restaurants, manufacturing, and long-haul trucking—that together account for more than half of all low-wage jobs. The book's sector view allows the contributors to address industry-specific variations that shape operational choices about work. Drawing on deep industry knowledge, they consider important distinctions within and between these industries; the financial, institutional, and structural incentives that shape the choices employers make; and what it would take to make more jobs better jobs. Performance Consulting Dana Gaines Robinson, James C. Robinson, Jack J. Phillips, Patricia Pulliam Phillips, Dick Handshaw. 2015-06 NEW EDITION, REVISED AND UPDATED In America, organizations spend \$175 billion in training initiatives and more than \$500 billion in human resource solutions every year yet often have little to show for it. One reason is that people “jump to solutions” before they identify the causes of the problem. Performance consultants are effective because they partner with clients to clarify business goals and determine root causes for gaps between desired and current results. Only then are specific solutions agreed upon and implemented. This third edition of the classic book that introduced performance consulting adds a wealth of new material. There are new case examples throughout and four new chapters providing detailed steps for measuring results from performance consulting initiatives on five different levels, including ROI. The book includes a never-before-published Alignment and Measurement Model, allowing you to connect organizational needs and performance consulting initiatives designed to address those needs with the appropriate level of measurement. This remains a profoundly practical book, featuring tools,

models, and checklists. It will enable you to make a difference in your organization that is valued, measurable, and sustainable.

**The Empathy Exams** Leslie Jamison.2014-04-01 From personal loss to phantom diseases, *The Empathy Exams* is a bold and brilliant collection, winner of the Graywolf Press Nonfiction Prize A Publishers Weekly Top Ten Essay Collection of Spring 2014 Beginning with her experience as a medical actor who was paid to act out symptoms for medical students to diagnose, Leslie Jamison's visceral and revealing essays ask essential questions about our basic understanding of others: How should we care about each other? How can we feel another's pain, especially when pain can be assumed, distorted, or performed? Is empathy a tool by which to test or even grade each other? By confronting pain—real and imagined, her own and others'—Jamison uncovers a personal and cultural urgency to feel. She draws from her own experiences of illness and bodily injury to engage in an exploration that extends far beyond her life, spanning wide-ranging territory—from poverty tourism to phantom diseases, street violence to reality television, illness to incarceration—in its search for a kind of sight shaped by humility and grace.

*World Protests* Isabel Ortiz,Sara Burke,Mohamed Berrada,Hernán Saenz Cortés.2021-11-03 This is an open access book. The start of the 21st century has seen the world shaken by protests, from the Arab Spring to the Yellow Vests, from the Occupy movement to the social uprisings in Latin America. There are periods in history when large numbers of people have rebelled against the way things are, demanding change, such as in 1848, 1917, and 1968. Today we are living in another time of outrage

and discontent, a time that has already produced some of the largest protests in world history. This book analyzes almost three thousand protests that occurred between 2006 and 2020 in 101 countries covering over 93 per cent of the world population. The study focuses on the major demands driving world protests, such as those for real democracy, jobs, public services, social protection, civil rights, global justice, and those against austerity and corruption. It also analyzes who was demonstrating in each protest; what protest methods they used; who the protestors opposed; what was achieved; whether protests were repressed; and trends such as inequality and the rise of women's and radical right protests. The book concludes that the demands of protestors in most of the protests surveyed are in full accordance with human rights and internationally agreed-upon UN development goals. The book calls for policy-makers to listen and act on these demands.

*Transportation Decision Making* Kumares C. Sinha, Samuel Labi. 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming

transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals. Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decision making. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

**Railtown** Ethan N. Elkind.2014-01-22 The familiar image of Los Angeles as a metropolis built for the automobile is crumbling. Traffic, air pollution, and sprawl motivated citizens to support urban rail as an alternative to driving, and the city has started to reinvent itself by developing compact

neighborhoods adjacent to transit. As a result of pressure from local leaders, particularly with the election of Tom Bradley as mayor in 1973, the Los Angeles Metro Rail gradually took shape in the consummate car city. Railtown presents the history of this system by drawing on archival documents, contemporary news accounts, and interviews with many of the key players to provide critical behind-the-scenes accounts of the people and forces that shaped the system. Ethan Elkind brings this important story to life by showing how ambitious local leaders zealously advocated for rail transit and ultimately persuaded an ambivalent electorate and federal leaders to support their vision. Although Metro Rail is growing in ridership and political importance, with expansions in the pipeline, Elkind argues that local leaders will need to reform the rail planning and implementation process to avoid repeating past mistakes and to ensure that Metro Rail supports a burgeoning demand for transit-oriented neighborhoods in Los Angeles. This engaging history of Metro Rail provides lessons for how the American car-dominated cities of today can reinvent themselves as thriving railtowns of tomorrow.

**Sustainable Urban Transport** Maria Attard, Yoram Shiftan. 2015-05-14 This publication brings together an international group of researchers and presents work from different countries dealing with issues related to transport policy, attitudes and mode choice, car sharing and alternative modes of transport, and discusses the future of non-motorized modes of transport.

**Better Buses, Better Cities** Steven Higashide. 2019-10-10 Imagine a bus system that is fast, frequent, and reliable--what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. Transit expert Steven Higashide uses real-world stories of reform to show us what a

successful bus system looks like. Higashide explains how to marshal the public in support of better buses and argues that better bus systems will create better cities for all citizens. With a compelling narrative and actionable steps, *Better Buses, Better Cities* describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city.
