Black Belt Karate Hirokazu Kanazawa.2013-06-21 In Black Belt Karate, Hirokazu Kanazawa, the most respected figure in the karate world, offers a systematic approach to basic karate, and provides an intensive training course. Using meticulously detailed explanations and illustrative photos, Kanazawa provides readers with an intensive self-study training course designed to be accessible to beginners, as well as to those already at an intermediate level. If practiced continuously and diligently over the course of a year, a practitioner will be able to attain black-belt-level proficiency. Praise for Black Belt Karate: By following each and every page of this book as if receiving instruction directly from Mr. Kanazawa, I believe that over time, with careful practice, gaining proficiency is all but guaranteed. The Sword in the Age of Chivalry Ewart Oakeshott.1998 The Resplendent image of the medieval knight is concentrated in the symbolism of his sword. The straight, two-edged, cross-hilted knightly sword of the European middle ages was an object of vital importance, a lethal weapon on the battlefield and a badge of chivalry in that complex social code. Ewart Oakeshott draws on his extensive research and expert eye (and hand, for he has a special sense for the feel of a sword) to develop a typology for and recount the history of the sword, from the knightly successors of the Viking weapon to the emergence of the Renaissance sword - that is, roughly from 1050 to 1550. Within this time-span, two distinct groups of swords successively evolved. Problems of dating are acute, and evidence is adduced from literature and art as well as from archaeology, for a sword (or some parts of a sword) could have been in use several generations after it first saw battle. To deal with such overlap, Ewart Oakeshott develops, refines and illustrates a detailed typology of swords which takes in entire swords, pommel-forms, cross-guards, and the grip and scabbard.

The Medieval Art of Swordsmanship Jeffrey L. Forgeng.2018 Jointly Published with the British Royal Armouries Medieval fighting has long been thought to be rough and untutored. Visions of men madly slashing to and fro and hoping for the best still dominate not only popular culture but modern histories of fencing as well. In recent years, the survival of more than 175 fighting treatises from the Middle Ages and Renaissance has provided a whole generation of enthusiasts, scholars, reenactors and stage choreographers with a wealth of new information. This text represents the earliest known text on swordsmanship anywhere in the world. Royal Armouries MS I.33 presents a system of combat that is sophisticated and demonstrates the diffusion of fighting arts beyond the military classes. Within the manuscripts richly illustrated full-color illustrations lie still-potent demonstrates of sword techniques, surprisingly shown by a Priest and Scholar. Most surprisingly, however, is the presence of a woman practicing in the text, the only one illustrated in any European fighting treatise. This full color facsimile & translation has been long-awaited and promises to become an important resource for years to come
