Passing the Certified Bariatric Nurses Exam Andrew Loveitt,Margaret M. Martin,Marc A. Neff.2017-01-03 The Certified Bariatric Nurse (CBN) designation was created by the American Society for Metabolic and Bariatric Surgery to fill the rapidly growing need for nurses specialized in the care of patients undergoing weight loss surgery. This book approaches this subject area to assist nurses interested in passing the CBN exam. It can also be used as a general resource for those interested in a comprehensive but concise review of the rapidly growing field of Bariatric Surgery. This would include medical students, residents, dietitians, and other allied health professionals. Dr. Marc Neff is a recognized expert in the field of Bariatric Surgery. In his current position, his hospital is fortunate to have several CBNs caring for the Bariatric patients. With his guidance, along with several nurses who successfully completed the CBN designation, the authors have created a concise, quick hit review of the material required to successfully pass the exam. The format is short chapters followed by 5-10 review questions with in-depth explanations. Where appropriate, graphics are provided to highlight the essential anatomy and surgical procedures. Questions are in multiple choice format to simulate the actual CBN exam.

Medical-Surgical Nursing, 7th Edition covers both medical-surgical and psychiatric mental health conditions and disorders while building on the fundamentals of nursing. This essential text focuses on nursing roles, settings, trends, body systems and their disorders, and emergency and disaster management. Unique to this edition is the gerontologic nursing unit which addresses physiologic and psychosocial changes in the older adult, along with related disorders common to the elder patient - the primary patient group population you'll encounter in practice. It also emphasizes culturally competent care and holistic nursing, while thoroughly covering all relevant NCLEX-PN® test plan content. With updated guidelines on diabetes, heart failure, asthma, COPD, and cancer treatment protocols, no other resource offers the breadth of topics at a level that is so perfectly tailored to the LPN/LVN student. Nursing care plans reinforce the nursing process and focus on critical thinking. Get Ready for the NCLEX-PN® Examination! sections at the end of chapters include key points, review questions, and case studies that address the various NCLEX® Client Needs categories. Coordinated Care boxes highlight team approach to patient care, helping you to prioritize tasks and assign them safely to assistive personnel. Patient Teaching Plans provide bulleted lists of nursing instructions for patients, stressing the role and responsibility of the LPN/LVN to reinforce patient education. Health Promotion Considerations boxes highlight timely wellness and disease prevention topics. Cultural Considerations boxes discuss the importance of providing culturally competent care related to various clinical situations. Put on Your Thinking Cap boxes allow you to pause and consider the practical implications of what you have just read. Nutritional Considerations boxes are spotlighted at appropriate points throughout the text to emphasize the role that nutrition plays in disease and nursing care. Complementary and Alternative Therapies focus on nontraditional therapies along with precautions and possible side effects. Key terms with phonetic pronunciations help improve terminology and language skills of English-as-a-Second-Language (ESL) students and students with limited proficiency in English before they enter clinical practice. NEW! Organization of disorders units consolidates anatomy and physiology, nursing assessment/data collection, and diagnostic tests into one chapter. NEW! Updated guidelines on diabetes, heart failure, asthma, COPD, and cancer provides you with latest treatment protocols.
