Modern Mexico James D. Huck Jr..2017-12-01 This single volume reference resource offers students, scholars, and general readers alike an in-depth background on Mexico, from the complexity of its pre-Columbian civilizations to its social and political development in the context of Western civilization. How did modern Mexico become a nation of multicultural diversity and rich indigenous traditions? What key roles do Mexico's non-Western, pre-Columbian indigenous heritage and subsequent development as a major center in the Spanish colonial empire play the country's identity today? How is Mexico today both Western and non-Western, part Native American and part European, simultaneously traditional and modern? Modern Mexico is a thematic encyclopedia that broadly covers the nation's history, both ancient and modern; its government, politics, and economics; as well as its culture, religion traditions, philosophy, arts, and social structures. Additional topics include industry, labor, social classes and ethnicity, women, education, language, food, leisure and sport, and popular culture. Sidebars, images, and a Day in the Life feature round out the coverage in this accessible, engaging volume. Readers will come to understand how Mexico and the Mexican people today are the result of the processes of transculturation, globalization, and civilizational contact.

Psychology and Covid-19 in the Americas Nelson Portillo,Melissa L. Morgan,Miguel Gallegos.2023-11-25 This book is the first of two volumes that bring together the works presented at the congress Contributions of Psychology to COVID-19, organized by the Interamerican Society of Psychology in 2020. This was one of the first virtual international meetings on psychology and COVID-19 in the world and brought together researchers and professionals from South, Central and North America in a single online event. The content of both volumes includes many of the first issues addressed by researchers, scholars, and practitioners across the Americas at the start of the pandemic - before vaccines, before knowledge of treatment and impact, before our worlds and daily lives were forever changed. Chapters in the first volume focus on the impacts of the pandemic in mental health, social and family dynamics, educational processes and the work of health professionals. Chapters in the second volume are dedicated to studies addressing the impacts of the pandemic in vulnerable populations; proposals of psychological interventions to deal with the distress caused by COVID-19; strategies of coping, resilience and adaptation; and the development of psychological instruments of measurement and assessments during the pandemic. The content of these two volumes marks a baseline for the collective work initiated by psychologists who came together to answer the call to combat the pandemic across the Americas. In that sense, both volumes are truly a "snapshot in time" that could help us assess in the future how much progress we have made to apply psychology to the pressing demands of our time.

They address the special challenges of establishing and maintaining these institutions; the role of information technology; how research universities train leaders and foster scientific innovation; and the extent to which the private sector can and should be involved in funding and development.
