Sustainable Tourism on a Finite Planet Megan Epler Wood. 2017-02-28 Sustainable Tourism on a Finite Planet challenges readers to consider the new skills, tools and investments required to protect irreplaceable global resources from the impacts of escalating tourism demand in the next 50 years. This volume documents how technology is driving a travel revolution and propelling the growing global middle class to take leisure trips at unprecedented rates. Travel and tourism supply chains and business models for hotels, tour operators, cruise lines, airlines and airports are described with key environmental management techniques for each sector. This book recommends that decision makers assess the current and future value of natural, social and cultural capital to guide investment in destinations and protect vital resources. Case studies illustrate why budgets to protect local destinations are consistently underestimated and offer guidance on new metrics. Innovative approaches are proposed to support the transition to green infrastructure, protect incomparable landscapes, and engage local people in the monitoring of vital indicators to protect local resources.

Urban Development in India Pablo Shiladitya Bose. 2015-03-05 Indian diaspora has had a complex and multifaceted role in catalyzing, justifying and promoting a transformed urban landscape in India. Focussing on Kolkata/ Calcutta, this book analyses the changing landscapes over the past two decades of one of the world's most fascinating and iconic cities. Previously better known due to its post-Independence decline into overcrowded poverty, pollution and despair, in recent years it has experience a revitalization that echoes India's renaissance as a whole in the new millennium. This book weaves together narratives of migration and diasporas, postmodern developmentalism and neoliberal urbanism, and identity and belonging in the Global South. It examines the rise of middle-class environmental initiatives and Kolkata's attempts to reclaim its earlier global status. It suggests that a form of global gentrification is taking place, through which people and place are being fundamentally restructured. Based on a decade's worth of field research and investigation in multiple sites - metropolitan centers connected by long histories of empire, migration, economy, and culture - it employs a multi-methods approach and uses ethnographic, semi-structured interviews as well as archival research for much of the empirical data collected. Addressing urban change and policies, as well as spatial and discursive transformations that are occurring in India, it will be of interest to researchers in the field of urban geography, urban and regional planning, environmental studies, diaspora studies and South Asian studies.

Smart Tourism as a Driver for Culture and Sustainability Vicky Katsoni, Marival Segarra-Oña. 2019-01-31 This book explores the latest developments in the field of smart tourism, focusing in particular on the important cultural and sustainability synergies that have emerged during the digital era. The aim is to elucidate how ICTs can promote innovation and creativity in the tourism and leisure sector in ways that take into account cultural and social responsibilities, foster sustainable tourism management, and enhance cultural tourism, cultural heritage, and sustainable development. The book is based on the proceedings of the Fifth International Conference of the International Association of Cultural and Digital Tourism (IACuDiT), attended by academics and industry practitioners from cultural, heritage, communication, and innovational tourism backgrounds, and is edited in collaboration with IACuDiT. It will have broad appeal to professionals from academia, industry, government, and other organizations who wish to learn about novel perspectives in the fields of tourism, travel, hospitality, culture and heritage, leisure, and sports within the context of a knowledge society and smart economy in which sustainability is becoming ever more important.

International Tourism Development and the Gulf Cooperation Council States Marcus L. Stephenson, Ala Al-Hamarneh. 2017-07-14 This book examines the challenges facing the development of tourism in the six member states of the Gulf Cooperation Council (GCC): Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates (UAE). This region, which largely comprises the Arabian Peninsula, possesses some of the fastest growing economies in the world and is remarkably unique. It shares similar associations and affinities: tribal histories, royal kinship, political associations, Bedu cultural roots, Islamic heritage, rapid urbanization, oil wealth, rentier dynamics, state capitalist structures, migrant labour, economic diversification policies and institutional restructuring. Therefore, this volume takes the study of tourism away from its normative unit of analysis, where tourism in the region is being examined within the context of the Middle East and the wider Islamic and Arab world, towards an enquiry focusing on a specific geo-political territory and socially defined region. Although international tourism development in the region embodies a range of challenges, complexities and conflicts, which are deeply contextualized in this volume, the approach overall does not endorse the normative 'Gulf bashing' position that has predominated within the critical enquiries in the region. It presents a forward-looking and realistic assessment of international tourism development, examining development potentialities and constructive ways forward for GCC states and the region as a whole. This edited volume provides a real attempt to examine critically ways in which tourism and its development intersect with the socio-cultural, economic, political, environmental and industrial change that is taking place in the region. By doing so, the book provides a theoretically engaged analysis of the social transformations and discourses that shape our contemporary understanding of tourism development within the GCC region. Moreover, it deciphers tourism development's role within the context of the GCC states undergoing rapid transformation, urbanization, ultra-

modernization, internationalization and globalization. In addition to state-specific illustrations and destination case studies, the work provides insights into relatable themes associated with international tourism development in the region, such as tourism's relationship with religion, heritage and identity, the environment and sustainability, mobility and cross-border movements, the transport industry, image production and destination branding, mega-development and political stability and instability. The book combines theory with diverse case study illustrations, drawing on disciplinary knowledge from such fields as sociology, political economy and social geography. This timely and original contribution is essential reading for students, researchers and academics in the field of tourism studies and related subject areas, along with those who have regional interests in Middle East studies, including Gulf and Arabian Peninsula studies.

Political Ecology and Tourism Sanjay Nepal, Jarkko Saarinen. 2016-02-26 Political ecology explicitly addresses the relations between the social and the natural, arguing that social and environmental conditions are deeply and inextricably linked. Its emphasis on the material state of nature as the outcome of political processes, as well as the construction and understanding of nature itself as political is greatly relevant to tourism. Very few tourism scholars have used political ecology as a lens to examine tourism-centric natural resource management issues. This book brings together experts in the field, with a foreword from Piers Blaikie, to provide a global exploration of the application of political ecology to tourism. It addresses the underlying issues of power, ownership, and policies that determine the ways in which tourism development decisions are made and implemented. Furthermore, contributions document the complex array of relationships between tourism stakeholders, including indigenous communities, and multiple scales of potential conflicts and compromises. This groundbreaking book covers 15 contributions organized around four cross-cutting themes of communities and livelihoods; class, representation, and power; dispossession and displacement; and, environmental justice and community empowerment. This book will be of great interest to students and scholars in tourism, geography, anthropology, sociology, environmental studies, and natural resources management.

Sustainable Tourism VIII S. Syngellakis, U. Probstl-Haider, F. Pineda. 2018-07-23 This volume includes papers from the 8th International Conference on Sustainable Tourism. Today tourism is becoming accessible to a growing number of people and is an important component of development, not only in economic terms but also for knowledge and human welfare. This collection of research aims to find ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism. The phenomenon has many more advantages than disadvantages. New forms of economic development and increasing wealth of human societies depend on tourism. Our knowledge of the world now includes a strong component due to tourism. Human welfare has physiological and psychological elements, which tourism promotes, both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures. The tourism industry has nevertheless given rise to some serious problems, including social costs and ecological impacts. Many ancient local cultures have practically lost their identity. Their societies have oriented their economy only to this industry. Both the natural and cultural - rural or urban - landscapes have also paid a high price for certain forms of tourism. These problems will persist if economic benefit is the only target, leading to economic gains that eventually become ruinous. It is also a grave error to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms. The 'Global Change' is a set of natural environmental changes that are strongly affected by technological and social developments. Natural changes are inherent in the Earth's ecosystem (the 'ecosphere'). Also, technological and social changes are inherent to mankind (the 'noosphere'), and are now becoming widespread. Cities are growing rapidly and industry requires increasingly larger areas. Many traditional rural areas are being abandoned. Tourism should also play an important role in this context. Thus, interestingly, many historic agricultural districts have maintained, or even recovered, their local population numbers through intelligent strategies of tourism focused on nature and rural culture. Natural landscapes and biodiversity are becoming increasingly appreciated. The tourism industry must be able to respond to these aspirations.

Trends in Tourist Behavior Andrés Artal-Tur, Metin Kozak, Nazmi Kozak. 2019-01-17 This book examines both how tourist behavior is being shaped by the new tourism products and segments that are appearing on the European market and how the tourist experience influences post-trip evaluation of destinations and of tourism and hospitality businesses. On this basis, practical implications and recommendations are highlighted that will help destination management organizations to improve the performance of their destinations and particular businesses. The first part of the book explores visitor engagement with a range of new products relating to sports activities and events, city tourism, wine tourism, and youth tourism. In the second part, the focus is primarily on the ways in which tourist experiences influence subsequent trip recommendations, revisiting attitudes, and reviewing behavior on social media. Other topics to be addressed include the factors affecting tourism expenditure on accommodation in World Heritage Cities and the impacts of experience on the motivation of participants in recreational sports tourism events. The book will be of interest for researchers, industry professionals, under- and postgraduate students, and others who wish to learn about new trends in tourist behavior and emerging tourism products.

Globalized Authoritarianism Koenraad Bogaert. 2018-03-20 A rich investigation into Morocco's urban politics Over the past thirty years, Morocco's cities have transformed dramatically. To take just one example, Casablanca's medina is now obscured behind skyscrapers that are funded by global capital and encouraged by Morocco's monarchy, which hopes to transform this city into a regional leader of finance and commerce. Such changes have occurred throughout Morocco. Megaprojects are redesigning the cityscapes of Rabat, Tangiers, and Casablanca, turning the nation's urban centers into laboratories of capital accumulation, political dominance, and social control. In *Globalized Authoritarianism*, Koenraad Bogaert links more abstract questions of government, globalization, and neoliberalism with concrete changes in the city. Bogaert goes deep beneath the surface of Morocco's urban prosperity to reveal how neoliberal government and the increased connectivity engendered by global capitalism transformed Morocco's leading urban spaces, opening up new sites for capital accumulation, creating enormous class divisions, and enabling new innovations in state authoritarianism. Analyzing these transformations, he argues that economic globalization does not necessarily lead to increased democratization but to authoritarianism with a different face, to a form of authoritarian government that becomes more and more a globalized affair. Showing how Morocco's experiences have helped produce new forms of globalization, Bogaert offers a bridge between in-depth issues of Middle Eastern studies and broader questions of power, class, and capital as they continue to evolve in the twenty-first century.

Socio-Cultural Mobility and Mega-Events Rodanthi Tzanelli. 2015-04-10 In June 2014, Brazil opened the twentieth FIFA World Cup with a spectacular ceremony. Hosting the World Cup was a strategic developmental priority for Brazil: mega-events such as these allow the country to be ranked amongst the world's political and economic leaders, and are supposed to propel the country to its own unique modernity. But alongside the increased media attention and publicity, came accusations of governmental 'corruption' and overspending. In *Socio-Cultural Mobility and Mega-Events*, Tzanelli

uses Brazil's 2014 World Cup to explore how mega-events articulate socio-cultural problems. Critically examining the aesthetics and ethics of mobilities in the mega-event, this book explores these socio-cultural issues and controversies: the background of staging mega-events, including the bidding process and the host's expectations for returns; ceremonial staging and communications between artistic representations and national symbolism; the clear reaction mega-events almost always generate in national, regional and global activist circles, including accusations of overspending and human rights violations. This interdisciplinary study will appeal to scholars and students of the sociology of mobility, sociology of globalisation, cultural sociology, social and anthropological theory, as well as the sociology of sport, human and cultural geography, and leisure and tourism studies.

Business and Post-disaster Management C. Michael Hall, Sanna Malinen, Rob Vosslamber, Russell Wordsworth. 2016-01-29 This book provides a comprehensive examination of the effects of a natural disaster on businesses and organisations, and on a range of stakeholders, including employees and consumers. Research on how communities and businesses respond to disasters can inform policy and mitigate the cost and impacts of future disasters. This book discusses how places recover following a disaster and the vital roles that business and other organisations play. This volume gives a detailed understanding of business, organisational and consumer responses to the Christchurch earthquake sequence of 2010-2011, which caused 185 deaths, the loss of over 70 per cent of buildings in the city's CBD, major infrastructure damage, and severely affected the city's image. Despite the devastation, the businesses, organisations and people of Christchurch are now undergoing significant recovery. The book sheds significant new light not only on business and organisation response to disaster but on how business and urban systems may be made more resilient.

Children, Young People and Dark Tourism Mary Margaret Kerr, Philip R Stone, Rebecca H. Price. 2022-08-31 This book is the first its kind to offer an innovative examination of the intersecting influences, contexts, and challenges within the field of children's dark tourism. It also outlines novel conceptualizations and methods for scholarship in this overlooked field. Presently, tourism research, and in dark tourism specifically, relies primarily on adult-centered theories and data collection methods. However, these approaches are inadequate for understanding and developing children's experiences and perspectives. This book seeks to inform and inspire research on children's experiences of dark tourism. Designed to appeal to students and scholars, it brings together insights from leading experts. The book focuses on five themes, to explore the conceptual and historic origins of children's dark tourism, developmental contexts, child perspectives, specific contexts relevant to children's encounters, and methodological approaches. This book is aimed at an international array of scholars and students with inherent research interests in the contemporary commodification of death and 'difficult heritage' within the visitor economy. Thus, the book will provide a multi-disciplinary scope within the fields of history, heritage studies, childhood studies, psychology, education, sociology, human geography, and tourism studies. The volume is primarily intended for undergraduate and postgraduate study, as well as scholars and tourism professionals.

Tourism in Transitions Dieter K. Müller, Marek Więckowski. 2017-08-21 This book explores the relationship between transition and tourism geographies on a global scale, discussing how tourism has been used as a tool to recover from decline or to manage change caused by event-driven, rapid transitions in a region's economy, politics or environment. With case studies from Europe, America, Asia and Africa, it provides examples of how specific communities and industries around the globe have reacted for better or worse. It also includes analyses of shifts within the tourism industry itself and examines the complex issues arising for localities that have to face the demands and standards of an increasingly globally interlinked tourism industry. From Whistler to Angola, casino gaming in Colorado to art tourism in Japan, the contributors investigate such factors as tourism-induced community change; the social and economic impacts second-home owners have on rural communities in the developing world; reconstruction of local tourism systems after crisis events such as wars; and the competitiveness of ski areas in light of climate change. Overall, the book offers a thoughtful study of the role of geographical and temporal scales for tourism during periods of unprecedented transition, equipping readers with new ways of conceptualizing change and adaptation.

Religious Tourism in Northern Thailand Brooke Schedneck. 2021-06-18 Temples are everywhere in Chiang Mai, filled with tourists as well as saffron-robed monks of all ages. The monks participate in daily urban life here as elsewhere in Thailand, where Buddhism is promoted, protected, and valued as a tourist attraction. Yet this mountain city offers more than a fleeting, commodified tourist experience, as the encounters between foreign visitors and Buddhist monks can have long-lasting effects on both parties. These religious contacts take place where economic motives, missionary zeal, and opportunities for cultural exchange coincide. Brooke Schedneck incorporates fieldwork and interviews with student monks and tourists to examine the innovative ways that Thai Buddhist temples offer foreign visitors spaces for religious instruction and popular in-person Monk Chat sessions in which tourists ask questions about Buddhism. *Religious Tourism in Northern Thailand* also considers how Thai monks perceive other religions and cultures and how they represent their own religion when interacting with tourists, resulting in a revealing study of how religious traditions adapt to an era of globalization.

North Korea, International Law and the Dual Crises Morse Tan. 2015-04-24 The Democratic People's Republic of Korea (DPRK) has a reputation as one of the worst human rights situations in the world. This book utilizes a unique international law perspective to examine the actions and inactions of North Korea with regard to international security and human rights. Adopting political, military, historical and legal perspectives, the book explores how the two issues of nuclear weapons and the human rights abuses in North Korea are interconnected, and why the international community should apply the same international law framework to find a solution for both. Drawing on eyewitness accounts, such as refugee and defector testimony, Morse Tan offers a real-life story of North Korea that covers the pertinent law, and constructive approaches of its regime. Tan examines the specific objectives and actions of the North Korean government, and measures these according to international legal obligations such as applicable treaty law, jus cogens norms, and customary international law. The book concludes by offering solutions for dealing with international security surrounding the Korean Peninsula, and forwards a proposal for the creation of a tribunal to prosecute those at the top of the regime for international crimes and human rights abuses. As a project exploring the extremes of international law violation, this book will be of great interest and use to readers interested in the history, and political and legal implications of the strategies employed by the North Korea government.
