**The Civic Renewal Movement** Carmen Sirianni, Lewis A. Friedland. 2005 This book explores innovation in various forms of civic engagement, while documenting the renewal of the civic movement and analyzing the power of citizens in their communities. From civic environmentalism to public journalism, Sirianni and Friedland offer unique insights into the future methods and directions of American self-rule while providing a resource-rich guide for future research in the field. Carmen Sirianni is professor of sociology and public policy at Brandeis University. Lewis A. Friedland is professor of journalism and mass communication and sociology at the University of Wisconsin-Madison. About the Kettering Foundation The Kettering Foundation is a nonpartisan, nonprofit operating foundation rooted in the American tradition of cooperative research. Kettering's primary research question is: What does it take to make democracy work as it should? Kettering's research is distinctive because it is conducted from the perspective of citizens and focuses on what people can do collectively to address problems affecting their lives, their communities, and their nation. For more information about Kettering research and publications, see the Kettering Foundation's website at [www.kettering.org](http://www.kettering.org).

**Climate Change and Tourism** Susanne Becken, John Hay. 2012-06-25 The contribution of tourism to climate change, and the likely consequences of climate change for key tourist destinations, has been well reported and discussed. Yet, there is a lack of evidence-based systematic practical advice as to how the tourism industry should respond to the challenge of climate change. Building on a sound conceptual understanding of the links between climate change and tourism, this book shows how the tourism sector might best respond. It not only focuses on the roles of supportive policies and institutions in ensuring a strong enabling environment for practical responses, but also on the practical responses themselves. This practical approach is presented through a large number of case studies and examples which illustrate how policy and industry initiatives have been implemented in tourism, and if or why they were successful. The majority of examples come from places such as the Caribbean, Spain, the Maldives, Nepal, and the UK, as well as Australia, New Zealand and other parts of the Pacific. The examples are presented within an overall framework that facilitates the translation of adaptation and mitigation policies into practice. This book offers the tourism industry, students and academics the opportunity to advance from the earlier, more conceptual texts on tourism and climate change by taking a much more practical approach. Its global coverage, through the use of international case studies, fosters a cross-fertilisation of ideas and initiatives. This text provides a detailed analysis of best practices in the face of climate change, across countries and geographically diverse tourist destinations and operations.

**The Genius Prince's Guide to Raising a Nation Out of Debt (Hey, How About Treason?), Vol. 4 (light novel)** Toru Toba. 2020-09-22 IT AIN'T EASY BEING A GOOD BROTHER! It's time for the three Imperial princes to meet and argue their way to the throne in the city of merchants, Mealtars. Sounds like a good opportunity for Wein to take a breather since this gathering obviously has nothing to do with him...until Imperial Princess Lowellmina goes out of her way to invite him to Mealtars, too. But Wein's already learned that it's always better to decline her offers. Turns out, things would have gone smoother if he'd just attended, because now he has to deal with a whole new problem: his sister, Falanya, going in his stead!

**Understanding New York's Crime Drop** Richard Rosenfeld, Karen Terry, Preeti Chauhan. 2020-09-10 This book explores New York City's historic crime drop over the past quarter of a century. New York City's dramatic crime decline is a real brainteaser: no one predicted it and, as of yet, no one has explained it, at least to the satisfaction of most social scientists who study crime trends. Three strategic lessons emerge from the contributions to this volume on New York's crime drop. It is suggested that future research should: • go wide by putting New York in comparative context, nationally and internationally; • go long by putting New York's recent experience in historical context; • develop a strong ground game by investigating New York's crime drop across multiple spatial units, down to the street segment. The contributors to *Understanding New York's Crime Drop* aim to provoke expanded and sustained attention to crime trends in New York and elsewhere. This book was originally published as a special issue of the journal, *Justice Quarterly*.

**Constructing the EU's Political Identity** Sabine Saurugger, Mark Thatcher. 2022-10-23 This book examines the construction of the EU's political identity (or identities), variations in its strength, and the nature of its content. Drawing on studies both on European nation-state formation and on the EU's identity, the chapters take a top-down approach and analyse how EU institutions in different major policy domains have themselves sought to create political identity through policy making. The authors define the construction of EU political identity and set out empirically applicable indicators to assess political identity in policy making. They analyse the construction of identity through a process-oriented approach that explicitly includes contestation and the existence of rival political identities. Comparing across policy domains, the contributions suggest that the ability of EU institutions to construct an EU political identity has been limited not only by existing national identities but also by the coexistence of rival EU political identities within policy domains. Hence, it has been difficult for EU institutions to establish a strong identity, with identity being strongest where there are clear external alternatives and limited rival identities within the EU.

**Changing Face of the Law** Riddhi Dasgupta. 2006-02 Abstruse legal phrases often inform our understanding of intricate cases. But those situations are also led, not outpaced, by basic equity principles of life itself. What statisticians call the law of large numbers and intelligence analysts in the world of science fiction know as the Bergofsky Principle is our structural faith in empirical knowledge. In this day, this process of experience and learning has moved into an international and interdisciplinary scale. That idea cannot be lost on us. Around the world, business and political leaders work together to realize common goals. But how does the rule of law impact these developments in strategy and technology, sustainable development, and access to justice? Armed with realism, *Changing Face of the Law: A Global Perspective* actively explores the legal traditions of the United States, India, and other commonwealth nations. A budding lawyer, author Riddhi Dasgupta provides an insider's look at the link between the rule of law and corporate ethics, the law's imagination, and our global dialogue. Lawful governance, or Gandhi's swaraj, is our linchpin. It appreciates the complexities of life and insightfully examines the modern perspectives of law. Giving us examples of this approach in the areas of free thought, federalism and development, and the law's role as a teacher, Dasgupta pinpoints the 'active liberty of the world's citizens-their own governance-as the key issue. Every generation has its challenges, and ours lie in combating the emergent economic, health, corruption, and terrorism crises through the rule of law. Each sector in our society (from multinational corporations to social groups) is a vital piece of the puzzle. There is no doubt that the success or failure of this collaboration will measure our legacy.

**The Politics and Policy of Wellbeing** Ian Bache, Louise Reardon. 2016-08-26 Government interest in wellbeing as an explicit goal of public policy has increased significantly in recent years, leading to new developments in measuring wellbeing and initiatives aimed specifically at enhancing wellbeing. This book provides the first theoretically informed account of the rise and significance of this agenda, drawing on the multiple streams approach, to consider whether wellbeing can be described as 'an idea whose time has come'. It reflects on developments across the globe and provides a detailed comparative analysis of two political arenas: the UK and the EU.

**Climate Change and Conflict in the Pacific** Ria Shibata, Seforosa Akata Carroll, Volker Boege. 2023-10-20 Shibata, Carroll and Boege address the various dimensions of the climate change-conflict nexus and shed light on the overwhelming challenges of climate change in the Pacific Islands region. This book highlights the multidimensionality of the problems: political, technical, material, and emotional and psychological. Written by experts in the field, the chapters highlight the centrality and importance of opening up a dialogue between researchers involved in the large-scale global modelling of climate change and the local actors. Both scholars and civil society actors come together in sharing about the complexities of local contexts and the conflict-driving potential of climate change adaptation and mitigation strategies on the ground. The book brings together indigenous Pacific approaches with broader international debates in the climate change-security discourse. Through various accounts and perspectives, current gaps in knowledge are bridged, contributing to the development of more grounded, conflict-sensitive climate change policies, strategies, governance and adaptation measures in the Pacific region. An important resource for students, researchers, policymakers and civil society actors interested in the multi-faceted issues of climate change in the Pacific.

A History of Education in Kentucky William Ellis. 2011-06-01 Kentucky is nationally renowned for horses, bourbon, rich natural resources, and unfortunately, hindered by a deficient educational system. Though its reputation is not always justified, in national rankings for grades K-12 and higher education, Kentucky consistently ranks among the lowest states in education funding, literacy, and student achievement. In *A History of Education in Kentucky*, William E. Ellis illuminates the successes and failures of public and private education in the commonwealth since its settlement. Ellis demonstrates how political leaders in the nineteenth century created a culture that devalued public education and refused to adequately fund it. He also analyzes efforts by teachers and policy makers to enact vital reforms and establish adequate, equal education, and discusses ongoing battles related to religious instruction, integration, and the Kentucky Education Reform Act (KERA). *A History of Education in Kentucky* is the only up-to-date, single-volume history of education in the commonwealth. Offering more than mere policy analysis, this comprehensive work tells the story of passionate students, teachers, and leaders who have worked for progress from the 1770s to the present day. Despite the prevailing pessimism about education in Kentucky, Ellis acknowledges signs of a vibrant educational atmosphere in the state. By advocating a better understanding of the past, Ellis looks to the future and challenges Kentuckians to avoid historic failures and build on their successes.

**Leading Change from the Middle** Jackson Nickerson. 2014-05-09 Bookshelves abound with theoretical analyses, how-to guides, and personal success stories by famous corporate leaders, public officials, even athletic coaches, expounding on how to lead from the top. But what about those in

the middle who are increasingly tasked with trying to reshape, reorient, or recreate the capabilities of an organization? Leading Change from the Middle takes you on the journeys traveled by Kurt Mayer, an information technology executive in the Department of Defense trying to build a new IT system in record time with limited resources, and Stephen Wang, a mid-level leader in city government trying to build a capability for supporting commercial agriculture. Kurt and Stephen have to navigate complex organizational and stakeholder landscapes in which they often have few decision rights and few resources—a common scenario for mid-level leaders. One succeeds; one does not. While following Kurt and Stephen, the book introduces a new approach for increasing the likelihood of successfully leading change. This new approach breaks down into three core strategies: First, identify all relevant stakeholders and partition them into four categories: superordinates, subordinates, customers, and complementors/blockers (those who control needed resources but over whom the leaders have no authority). Second, for each stakeholder category, identify Communications, Strategies, and Tactics (referred to as CoSTS). Third, don't stimulate negative emotions that make people DEAF—Disrespect, Envy, Anger, and Fear—to efforts to produce change. As the book follows the journeys of Kurt and Stephen, it walks through the details of each strategy. In presenting this material in a concise, accessible, and applicable format that translates theory to practice, Nickerson provides an important service for leaders trying to build extraordinary capabilities for their organizations—from the middle.
