*Stars Over Hawaii* Edwin Horace Bryan.2015-07-22 The stars in the night sky over the Hawaiian Islands overwhelm us with feelings of wonder and amazement. They evoke images of Hawai'i's first people, sailing from faraway lands, finding their way by use of the stars in the heavens. Their knowledge of the skies, from Hōkūpa'a (North Star) to Hānaiakamalama (Southern Cross) helped them navigate the vast Pacific in voyaging canoes and discover new homes. Today, astronomers have explored the heavens with the use of advanced telescopes, satellites and space vehicles traveling to our sun, moon, planets and beyond. Two voyages of discovery separated by centuries, have both found a home in Hawai'i. *Stars Over Hawai'i* presents an introduction to the study of Astronomy and an overview of current knowledge about the night sky above us and the vast universe beyond. Descriptions of the constellations and some of the stories behind the Greek and Roman mythology that is associated with their names is included. Twelve monthly star charts, plus two that label star names in Hawaiian, will help guide you through the year in your own explorations of Hawai'i's brilliant starlit sky. Readers can learn about Lahaina Noon, when the sun casts no shadow, a phenomenon exclusive to latitudes near the equator. Hawaiian Astronomy is explored through legend, surviving oral history, and the ongoing observation of the skies and our planet. The Hawaiian Moon Calendar is discussed and the Night of the Moon are depicted and labeled in Hawaiian and other Pacific languages. Polynesian voyaging and wayfinding is celebrated with the

inclusion of the Polynesian Voyaging Society's Star Compasses. Man's knowledge of our solar system and the universe has increased dramatically in the 60 years since *Stars Over Hawai'i* was first published. This latest edition builds upon a solid foundation to bring star gazers up to date with current statistics and theories about our universe. *Stars Over Hawai'i* marries the knowledge of the masterful navigators and astronomers of ancient Hawai'i with today's astronomy experts to bring you an integrated view of Hawai'i's skies, past and present.

*How Musical is Man?* John Blacking.1973 This important study in ethnomusicology is an attempt by the author -- a musician who has become a social anthropologist -- to compare his experiences of music-making in different cultures. He is here presenting new information resulting from his research into African music, especially among the Venda. Venda music, he discovered is in its way no less complex in structure than European music. Literacy and the invention of nation may generate extended musical structures, but they express differences of degree, and not the difference in kind that is implied by the distinction between 'art' and 'folk' music. Many, if not all, of music's essential processes may be found in the constitution of the human body and in patterns of interaction of human bodies in society. Thus all music is structurally, as well as functionally, 'folk' music in the sense that music cannot be transmitted or have meaning without associations between people. If John Blacking's guess about the biological and social origins of music is correct, or even only partly correct, it would generate new ideas about the nature of musicality, the role of music in education and its general role in societies which (like the Venda in the context of their traditional economy) will have more leisure time as automation increases.

*38 and Pregnant* Heradiani & Adhitya Pattisahusiwa.2018-07-16 With all the warnings against women being pregnant after 35, I started to observe people who are pregnant during the [late age]. I cursed myself for not having this urge when I was 30, not a couple of years away from 40. Well, Nicole Kidman was having her first baby at 41, but obviously I'm not a Hollywood starlet with an army of top-notch doctors and babysitters. Or should I opt for adoption instead?

**Learning First, Technology Second** Liz Kolb.2017-03-31 Learning First, Technology Second offers teachers a classroom-tested, easy-to-use framework to help them move from arbitrary uses of technology to thoughtful ways of adding value to student learning. Learning with technology doesn't happen because a specific tool "revolutionizes" education. It happens when proven teaching strategies intersect with technology tools, and yet it's not uncommon for teachers to use a tool because it's "fun" or because the developer promises it will help students learn. This book includes:

- An introduction to the Triple E Framework that helps teachers engage students in time-on-task learning, enhance learning experiences beyond traditional means and extend learning opportunities to bridge classroom learning with students' everyday lives.
- Effective strategies for using technology to create authentic learning experiences for their students.
- Case studies to guide appropriate tech integration.
- A lesson planning template to show teachers how to effectively frame technology choices and apply them in instruction.

The companion jump start guide based on this

book is Engage, Enhance, Extend: Start Creating Authentic Lessons With the Triple E Framework. **Sitti Nurbaya** Marah Rusli.2009 First published in 1922, the novel Sitti Nurbaya: A Love

Unrealized, by Marah Rusli, retains the poignancy that made it a modern Indonesian classic. In terms of its social impact in what was then the Dutch East Indies, Sitti Nurbaya may be compared to Uncle Tom's Cabin in the ante-bellum United States. Even to this day, the issues of injustice and indignities suffered by women that this novel raised continue to be debated throughout the country. Rich in description, dense with ironic foreboding and the inexorable workings of fate, Sitti Nurbaya is Samsu and Sitti Nurbaya's ill-fated love story. But in their wishes, the reader might also discern young people's tantalizing dream of what the East Indies society might become, or could become, if only local genius, embodied in a modernizing youth emancipated from stifling traditions, could fuse with European genius in mutual respect and admiration. This too was, of course, a dream never to be realized, and one perhaps which never could have been realized.
