**The Experimental Darkroom** Christina Z Anderson.2022-10-03 The Experimental Darkroom is a book focused on traditional black & white photographic materials—darkroom chemistry and silver gelatin paper—now used in many non-traditional ways. The book starts with a comprehensive digital negatives chapter. Topics are divided into five sections: cameraless experimentation, camera experimentation, printing experimentation, finished print experimentation, and a section highlighting contemporary photographers who use these approaches today. Each process under discussion is accompanied by photographic examples and a step-by-step method written in a “Just the facts, ma’am” style. Topics included are: Photograms and clichés verre Lumen prints Chemigrams Pinhole and zoneplate Holgas Chromo Liquid emulsion and modern tintype Lith printing Sabattier Mordancage Bleaching and bleachout Toning, traditional to experimental Applied color and abrasion tone Encaustic, photomontage, and collage Bromoil The Experimental Darkroom encourages taking risks and having fun. Over 400 images and 71 artists are included in its 276 pages. The outcome will be an expansion of creative options for the silver gelatin print. The options are engaging and now more accessible with digital negatives. Images are no longer solely captured in camera or on analog film. The darkroom is no longer always dark. The print is no longer a pristine and accurate rendition of what the camera sees.

Photographers are pushing the boundaries of black & white photographic practice. It is an exciting time to get into the darkroom and play!

**Darkroom Photography** James Carren.2015-11-10 Learn How to Become A More Complete Photographer With These Darkroom Techniques Today! Have you ever wondered how to make a darkroom print? My goal with this book is to walk you through the entirety of the process from selecting your film to pressing and toning a print. Here Is A Preview Of What You'll Learn Inside... First, I give a quick rundown on shooting film. In this chapter, you get tips on how to select your brand and ISO of film, and how that choice affects the final product. I also discuss how to take a properly exposed photo. Opening your film can be a little tricky. I break this down, with different technique suggestions, and also tell you how to load your film reel and tank. The next chapter is all about processing film for 35mm and 120mm. I talk about how to set up chemicals, use them, and dispose of them properly. I also discuss how to make contact sheets and how to use them to your benefit for making prints. I walk you through basic printmaking, from filter selection to test strips to the final print Dodging and burning is a more advanced technique to further enhance the overall look of your image Final print prep is also a very important step in the entire printmaking process. If you don't properly drain, dry, and press your photos, they won't be of great quality for display or selling. Toning is another advanced technique which will give your prints beautiful color and a unique pop others won't have. It's always important to digitize your prints and negatives so that you have them for further reference and for your website later as well. I go through all these things and more!
