World Terraced Landscapes: History, Environment, Quality of Life Mauro Varotto, Luca Bonardi, Paolo Tarolli.2018-12-06 This volume collects the best scientific contribution presented in the 3rd World Conference on Terraced Landscapes held in Italy from 6th to 15th October 2016, offering a deep and multifaceted insight into the remarkable heritage of terraced landscapes in Italy, in Europe and in the World (America, Asia, Australia). It consists of 2 parts: a geographical overview on some of the most important terraced systems in the world (1st part), and a multidisciplinary approach that aims to promote a multifunctional vision of terraces, underlining how these landscapes meet different needs: cultural and historical values, environmental and hydrogeological functions, quality and variety of food, community empowerment and sustainable development (2nd part). The volume offers a great overview on strengths, weaknesses, functions and strategies for terraced landscapes all over the world, summarizing in a final manifest the guidelines to provide a future for these landscapes as natural and cultural heritage.

Bottlemania Elizabeth Royte.2011-01-15 Second only to soda, bottled water is on the verge of becoming the most popular beverage in the country. The brands have become so ubiquitous

that we're hardly conscious that Poland Spring and Evian were once real springs, bubbling in remote corners of Maine and France. Only now, with the water industry trading in the billions of dollars, have we begun to question what it is we're drinking. In this intelligent, accomplished work of narrative journalism, Elizabeth Royte does for water what Michael Pollan did for food: she finds the people, machines, economies, and cultural trends that bring it from distant aquifers to our supermarkets. Along the way, she investigates the questions we must inevitably answer. Who owns our water? How much should we drink? Should we have to pay for it? Is tap safe water safe to drink? And if so, how many chemicals are dumped in to make it potable? What happens to all those plastic bottles we carry around as predictably as cell phones? And of course, what's better: tap water or bottled?

ICSID Reports: Volume 1 Rosemary Rayfuse.1993 The World Bank Convention on the Settlement of Investment Dispute entered into force in 1965. An international dispute settlement system which is of great and growing importance, its reports have been published haphazardly in various periodicals, but are presented in these volumes in consolidated form for the first time, together with materials related to the ICSID cases from national courts around the world. All the decisions are presented in English with summaries, and are translated from other languages where necessary. This first volume contains materials relating to proceedings from 1975 to 1990, and is fully indexed.

While all ground water withdrawals should be managed in a sustainable and compatible manner, the study concluded that concerns about the bottled water industry's use of ground water are not science-based. Furthermore, effective management of ground water resources may be better accomplished by focusing on multi-jurisdictional ground water management policies that are based on sound science, consider all users, and treat all users equitably.

Nature's Crossroads George Vrtis,Chris Wells.2023-01-10
Minnesota's Twin Cities have long been powerful engines of change. From their origins in the early nineteenth century, the Twin Cities helped drive the dispossession of the region's Native American peoples, turned their riverfronts into bustling industrial and commercial centers, spread streets and homes outward to the horizon, and reached well beyond their urban confines, setting in motion the environmental transformation of distant hinterlands. As these processes unfolded, residents inscribed their culture into the landscape, complete with all its tensions, disagreements, contradictions, prejudices, and social inequalities. These stories lie at the heart of *Nature's Crossroads*. The book features an interdisciplinary team of distinguished scholars who aim to open new conversations about the environmental history of the Twin Cities and Greater Minnesota.

Youngstedt.2019-09-01 *Water, Life, and Profit* offers a holistic analysis of the people, economies, cultural symbolism, and

material culture involved in the management, production, distribution, and consumption of drinking water in the urban context of Niamey, Niger. Paying particular attention to two key groups of people who provide water to most of Niamey's residents - door-to-door water vendors, and those who sell water in one-half-liter plastic bags (sachets) on the street or in small shops - the authors offer new insights into how Niamey's water economies affect gender, ethnicity, class, and spatial structure today.
