Brenda Gayle Plummer traces the connections between African Americans' involvement in international affairs and their influence on American foreign policy, integrating African American history, the history of the African diaspora and the history of United States foreign relations--Provided by publisher.

Treaties in Force United States. Department of State. Office of the Legal Adviser.2014

Treaties in Force United States Department of State - Office of the Legal Adviser.2014-04-08 Treaties in Force is prepared by the Department of State for the purpose of providing information on treaties and other international agreements to which the United States has become a party and which are carried on the records of the Department of State as being in force as of its stated publication date, January 1, 2013. With respect to treaties and agreements in force as of January 1, 2013, information regarding status is up to date as of the date indicated as authoritative. The term "treaty" as a matter of U.S. constitutional law denotes international agreements made by the President with the advice and consent of the Senate in accordance with Article II, section 2 of the Constitution of the United States. In addition to such "treaties", this publication covers international agreements in force that have been concluded by the Executive (a) pursuant to or in accordance with existing legislation or a prior treaty; (b) subject to congressional approval or implementation, and/or (c) under and in accordance with the President's constitutional powers. Treaties in Force is arranged in two sections. Section 1 includes bilateral treaties and other international agreements listed by country or other international entity with subject headings under each entry. Arrangements with territorial possessions of a country appear at the end of the entry for that country. In some cases, treaties and international agreements applicable to a territory prior to its independence are included in the entry for that country on the basis of its assumption of treaty obligations upon becoming independent, as noted at the beginning of the entry for that country. For convenience, some treaties and agreements concluded with countries whose name or statehood status has changed continue to be listed under the name in use at the time the agreement was concluded, if the title of the treaty or agreement has not been formally amended. Section 2 lists multilateral treaties and other international agreements to which the United States is a party, arranged by subject. The depositary is the authoritative source for a current list of parties and information on other matters concerning the status of the agreement, and status information often changes. Information is provided on the depositary for the agreement in question, and contact information, including an Internet site is provided for the depositary where available.

Critically Examining the Case Against the 1998 Human Rights Act Frederick Cowell.2017-09-13 Since its inception in 1998 the Human Rights Act (HRA) has come in for a wide variety of criticism on legal, constitutional, political and cultural grounds. More recently, this criticism escalated significantly as politicians have seriously considered proposals for its abolition. This book examines the main arguments against the HRA and the issues which have led to public hostility against the protection of human rights. The first part of the book looks at the legal structures and constitutional aspects of the case against the HRA, including the criticism that the HRA is undemocratic and is used by judges to subvert the will of parliament. The second part of the book looks at specific issues, such as immigration and terrorism, where cases involving the HRA have triggered broader public concerns about the protection of human rights. The final section of this book looks at some of the structural issues that have generated hostility to the HRA, such as media coverage and the perception of the legal profession. This book aims to unpick the complex climate of hostility that the HRA has faced and examine the social, political and legal forces that continue to inform the case against the HRA.

Joint Public Procurement and Innovation Gabriella Margherita Racca, Christopher Yukins.2020-02-12 Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy. To achieve that potential, both the promises and the perils of innovation must be investigated, including the risks and opportunities of joint procurement across borders in the European Union and the United States. This in-depth research investigates innovation in public procurement from three different perspectives. First, leading academics and practitioners assess the purchase of innovation, with a particular focus on urban public contracting in smart cities involving meta-infrastructures, public-private partnership arrangements and smart contracts. A second line of inquiry looks for ways to encourage innovative suppliers. Here, the collected authors draw on emerging lessons from the US and Europe, to explore both the costs and the benefits of spurring innovation through procurement. A third perspective looks to various innovations in the procurement process itself, with a focus on the effects of joint and cross-border procurement in the EU and US landscapes. The chapters review new technologies and platforms, the increasingly automated means of selecting suppliers, and the related efficiencies that "big data" can bring to public procurement. Expanding on research in the editors' prior volume, Integrity and Efficiency in Sustainable Public Contracts: Balancing Corruption Concerns in Public Procurement Internationally (Bruylant 2014), this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic, institutional and practical perspectives, and to point the way to future research on the contractual models that are emerging from new procurement technologies.

Keeping the Vow Donald Paul Sullins. 2016 Although many Catholics, and certainly most non-Catholics, are unaware of it, the rule of celibacy for Catholic priests is not absolute. The ordination of a married man is exceptionally rare, but it does occur. In most cases it happens as an accommodation for a married priest of another Christian church, almost always Anglican (Episcopalian), who has converted to the Catholic faith and wishes to serve in the Catholic priesthood. The Anglican Pastoral Provision, a set of streamlined canonical policies established by Pope John Paul II in 1980, encouraged the reception of these priest. Since then over a hundred men-most married, most Episcopalian-have been ordained; today there are seventy-five married former Episcopalian priests serving in the U.S. Catholic Church. Based on one hundred fifteen interviews augmented by biographical, survey and historical research, Keeping the Vow tells the story of these married priests and their wives, their unusual and difficult journey from Anglicanism and their life in the Catholic Church. Sullins explores the perspectives of this small group of men and their wives and how they juxtapose a unique set of identities and perspectives. A full-sample national survey provides the views of U.S. bishops on the practice of married priest ordination. The book's extensive use of quotes and personal narrative helps bring these stories to life, while sociological analysis provides a clear view of their collective features and discusses implications for related social and religious issues such as conversion, priesthood, worship, marital roles and celibacy. An engaging study on Catholicism, Anglicanism, American religion, and marriage, Keeping the Vow expands the discussion on the future prospects and effects married priests in the Catholic Church.

Fragmentation and the European Patent System Karen Walsh. 2022-08-11 This book provides an in-depth study on current perceptions of, and responses to, fragmentation in the European patent system (EPS). For decades, attempts have been made to address this fragmentation by introducing a unitary patent system. The most recent attempt, the EU unitary patent system, will be the first of its kind. It is expected to significantly change the EPS. However, rather than reducing existing fragmentation, it will likely add to it. Based on an analysis of the current and forthcoming system, the book argues that the inherent nature of fragmentation within the EPS needs to be recognised and suggests that a multifaceted approach is required to respond to it. Uniquely, it draws on work regarding fragmentation outside of the patent and intellectual property regimes, gaining insights from both European law-making and the international legal system. These insights are used to investigate current responses to fragmentation in the EPS. Interpretations of substantive patent law are examined, including claim construction (Actavis v Eli Lilly), exceptions to patentability related to uses of human embryos for industrial or commercial purposes (WARF, Brüstle, ISCC), and products resulting from essentially biological processes (Broccoli and Tomatoes II, G3/19). Attempts towards convergence in these areas have had mixed results and in some instances fragmentation may be necessary. However, similar techniques to those applied in the international legal system to respond to fragmentation are being used in the EPS, and, where this is seen, it has been to good effect. It is argued that these methods should be recognised, structured, and promoted to make our response to fragmentation more effective. Fragmentation and the European Patent System will be of interest to academics, students and practitioners looking for a new perspective on the EPS.

Law, Ecology, and the Management of Complex Systems Tiina Paloniitty.2022-08-19 This book addresses the role of law in the adaptive management of socio-ecological systems. Recent years have witnessed a rise in discussion over the relation between adaptivity and law, as if after decades of insouciance, legal scholars have finally started to understand the impacts of the scientific paradigm called 'adaptive management' on the legal sphere. Even though the complicated relations between law and the adaptive management of socio-ecological systems have become more debated, a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented. Using the illustrative example of European Union water governance and its path toward embracing adaptive management, this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced. Though always pivotal, rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the 'normative' is created gradually before law begins to examine the 'facts' of the matter. After examining the roots of adaptive management, this book argues that the legal needs to understand itself as an integral part of the process of the socio-ecological management of complex systems and not merely an external umpire resolving disputes. As a whole, the book offers new insights into the EU regulator's approaches to scientific realities, making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges, and to scientists interested in the science and law aspects of their work.

Child Abduction within the European Union Katarina Trimmings.2013-03-20 The first part of the book critically evaluates the evolution of the separate intra-EU child abduction regime and examines the extent to which the European Union complied with its standards of good legislative drafting during the negotiations on the Brussels II bis Regulation. It seeks to demonstrate that there was no real legal need for the involvement of the European Union in the area of child abduction and for the tightening of the 1980 Hague Abduction Convention return mechanism. The second part of the book presents findings of a statistical survey into the operation of child abduction provisions of the Brussels II bis Regulation in the first year of the functioning of the instrument and reveals how effectively the intra-EU return mechanism operated in that year. Based on the findings of the statistical survey, the book identifies and discusses a number of points of concern in respect of the functioning of the new child abduction scheme. Finally, the book investigates whether the Brussels II bis Regulation has added any value in the area of child abduction.

The U.S. Army/Marine Corps Counterinsurgency Field Manual John A. United States Army,United States Marine Corps.2008-09-15 When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. Transforming Insitutions Gabriela C. Weaver,Wilella D. Burgess,Amy L. Childress,Linda Slakey.2015-10-15 Higher education is coming under increasing scrutiny, both publically and within academia, with respect to its ability to appropriately prepare students for the careers that will make them competitive in the 21st-century workplace. At the same time, there is a growing awareness that many global issues will require creative and critical thinking deeply rooted in the technical STEM (science, technology, engineering, and mathematics) disciplines. However, the existing and ingrained structures of higher education, particularly in the STEM fields, are not set up to provide students with extensive skill development in communication, teamwork, and divergent thinking, which is needed for success in the knowledge economy. In 2011 and again in 2014, an international conference was convened to bring together university leaders, educational policymakers and researchers, and funding agency representatives to discuss the issue of institutional transformation in higher education, particularly in the STEM disciplines. Central to the issue of

institutional transformation is the ability to provide new forms of instruction so that students can gain the variety of skills and depth of knowledge they will need. However, radically altering approaches to instruction sets in motion a domino effect that touches on learning space design, instructional technology, faculty training and reward structures, course scheduling, and funding models. In order for one piece to move, there must be coordinated movement in the others, all of which are part of an entrenched and interconnected system. Transforming Institutions brings together chapters from the scholars and leaders who were part of the 2011 and 2014 conferences. It provides an overview of the context and challenges in STEM higher education, contributed chapters describing programs and research in this area, and a reflection and summary of the lessons from the many authors' viewpoints, leading to suggested next steps in the path toward transformation.

Knowing Knowledge George Siemens.2006 Why does so much of our society look as it did in the past? Our schools,our government, our religious organizations, our media - while more complex, have maintained their general structure and shape. Classroomstructure today, with the exception of a computer or an LCD projector, looks remarkably unchanged: teacher at the front, students i n rows. Our business processes are still built on theories and viewpoints that existed over a century ago (with periodic amendments from thinkers like Drucker 2). In essence, we have transferred (not transformed) our physical identity to online spaces and structures.
