Bureau of Reclamation water marketing activities and costs at the Central Valley Project : report to the Honorable John T. Doolittle, House of Representatives .

*Concrete Revolution* Christopher Sneddon.2015-09-25 Water may seem innocuous, but as a universal necessity, it inevitably intersects with politics when it comes to acquisition, control, and associated technologies. While we know a great deal about the socioecological costs and benefits of modern dams, we know far less about their political origins and ramifications. In *Concrete Revolution*, Christopher Sneddon offers a corrective: a compelling historical account of the US Bureau of Reclamation's contributions to dam technology, Cold War politics, and the social and environmental adversity perpetuated by the US government in its pursuit of economic growth and geopolitical power. Founded in 1902, the Bureau became enmeshed in the US State Department's push for geopolitical power following World War II, a response to the Soviet Union's increasing global sway. By offering technical and water resource management advice to the world's underdeveloped regions, the Bureau found that it could not only provide them with economic assistance and the United States with investment opportunities, but also forge alliances and shore up a country's global standing in the face of burgeoning communist influence. Drawing on a number of international case studies—from the Bureau's early forays into overseas development and the launch of its Foreign Activities Office in 1950 to the Blue Nile investigation in Ethiopia—*Concrete Revolution* offers insights into this historic damming boom, with vital implications for the present. If, Sneddon argues, we can understand dams as both technical and political objects rather than instruments of impartial science, we can better participate in current debates about large dams and river basin planning.

**Cadillac Desert** Marc Reisner.1993-06-01 "I've been thinking a lot about Cadillac Desert in the past few weeks, as the rain fell and fell and kept falling over California, much of which, despite the pouring heavens, seems likely to remain in the grip of a severe drought. Reisner anticipated this moment. He worried that the West's success with irrigation could be a mirage — that it took water

for granted and didn't appreciate the precariousness of our capacity to control it." - Farhad Manjoo, The New York Times, January 20, 2023 The definitive work on the West's water crisis. --Newsweek The story of the American West is the story of a relentless quest for a precious resource: water. It is a tale of rivers diverted and dammed, of political corruption and intrigue, of billion-dollar battles over water rights, of ecological and economic disaster. In his landmark book, Cadillac Desert, Marc Reisner writes of the earliest settlers, lured by the promise of paradise, and of the ruthless tactics employed by Los Angeles politicians and business interests to ensure the city's growth. He documents the bitter rivalry between two government giants, the Bureau of Reclamation and the U.S. Army Corps of Engineers, in the competition to transform the West. Based on more than a decade of research, Cadillac Desert is a stunning expose and a dramatic, intriguing history of the creation of an Eden--an Eden that may only be a mirage. This edition includes a new postscript by Lawrie Mott, a former staff scientist at the Natural Resources Defense Council, that updates Western water issues over the last two decades, including the long-term impact of climate change and how the region can prepare for the future.

*Managing Construction and Infrastructure in the 21st Century Bureau of Reclamation* National Research Council, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee on Organizing to Manage Construction and Infrastructure in the 21st Century Bureau of Reclamation.2006-02-19 In the more than 100 years since its formation, the U.S. Bureau of Reclamation of the Department of Interior (DOI), through its construction program, has brought water, electric power, and recreation facilities to millions of people in the Western United States. With major water and power systems in place, the Bureau's attention has now turned to operation, maintenance, repair, and modernization of those facilities in an environmentally and economically sound manner. To help with this effort, DOI asked the NRC to advise the Bureau on appropriate organizational, management, and resource configurations to meet its construction, maintenance, and infrastructure requirements for its missions of the 21st century. This report presents an assessment of the requirements facing the Bureau in the 21st century, an analysis of good practices and techniques for addressing those challenges, and a review of workforce and human resource needs. The report also provides alternative scenarios that describe possible future organizations for infrastructure management.

**One-Armed Economist** Murray L. Weidenbaum.2005-09-01 Murray Weidenbaum has brought solid economic understanding and a talent for clear expression to analyses of a wide range of public and private policy problems. Written over the course of a remarkable and varied career as a scholar, official, and participant in varied businesses, this collection of concise essays is full of insights and lessons as fresh and relevant to issues of today as to the time they were written. --The Honorable Paul A. Volcker, former chairman of the Federal Reserve System 'One-Armed Economist' could easily

have been titled 'Intellectually Honest Economist,' or 'Clear-Eyed Economist,' or 'Literate Economist.' Murray Weidenbaum is all of those things, as these essays, spanning his career, as professor, corporate planner, and top White House official, elegantly make clear. In a non-dogmatic, non-doctrinaire, clear-headed and clearly written fashion, Weidenbaum ranges over the widest range of issues involving business, government and economics. He is that rare person who can write for an audience of experts and specialists while still being able to reach a larger audience. People in business, government and academia, as well as those in corner shops and on factory floors, can benefit from his insights and experiences.--Norman Ornstein, Resident Scholar, American Enterprise Institute Murray Weidenbaum is a triple threat: a wise, witty, and one-armed economist. This wonderful selection of his professional writing displays impressive public policymaking insights based on an extraordinarily rich set of experiences in the public and private sector; a refreshingly puckish and self-deprecating humor; and a most welcome willingness to say exactly what he thinks.--Thomas E. Mann, W. Averell Harriman Chair and Senior Fellow, The Brookings Institution Murray Weidenbaum's One Armed Economist: On the Intersection of Business and Government is must-reading for students and scholars of economic policy. A blend of theory, history and practice, this collection of essays provides important and enduring insights into subjects as diverse as government regulation of business, tax reform, the military and presidential advising from the invaluable perspective of an academic who has also been inside business and government. Highly recommended.--Michael J. Boskin, T.M. Friedman Professor of Economics, Hoover Institution Senior Fellow and Former Chairman, President's Council of Economic Advisors With this book we all have available to us the perceptivity and wisdom of a distinguished American economist. It is good that these pieces were brought together in one package. --Paul W. McCracken, Distinguished University Professor Emeritus of Business Administration, Economics, and Public Policy, University of Michigan Business Schools One-Armed Economist represents a personal, if eclectic, approach to public policy. Weidenbaum avoids doctrinaire positions, be they Keynesian or monetarist or supply side or libertarian. This distillation of Weidenbaum's wide range of writings on public policy issues over the last four decades draws on his practical experience in government and business as well as his academic research over that extended period. The volume covers six major clusters of policy issues: economic policy, government programs, business decision-making, government regulation, the defense sector, and the international economy. There are chapters on how to achieve a cleaner environment, how to fundamentally overhaul the tax and health care systems, and a defense of Reaganomics. The work examines how public sector activities impact the performance of the national economy. Its coverage includes the role of government as a buyer, a seller, a provider of credit, and a source of subsidy and support. Drawing heavily on his experience as economist for a major military contractor, Weidenbaum shows that the defense industry is the most heavily regulated sector of the Amer

**Assessment of the Bureau of Reclamation's Security Program** National Research Council,Division on Engineering and Physical Sciences,Board on Infrastructure and the Constructed Environment,Committee on the Assessment of the Bureau of Reclamation's Security Program.2008-11-13 The water impounded behind a dam can be used to generate power and to provide water for drinking, irrigation, commerce, industry, and recreation. However, if a dam fails, the water that would be unleashed has the energy and power to cause mass destruction downstream, killing and injuring people and destroying property, agriculture, industry, and local and regional economies. The U.S. Bureau of Reclamation (Reclamation) is responsible for managing and operating some of this nation's largest and most critical dams. The failure of one or more of these dams as the result of a malicious act would come with little warning and a limited time for evacuation. In the years since the 9/11 attacks, Reclamation has invested significant resources to establish and build a security program. Reclamation is now ready to evaluate the results of these

efforts and determine how best to move forward to develop a security program that is robust and sustainable. This book assesses Reclamation's security program and determines its level of preparedness to deter, respond to, and recover from malicious acts to its physical infrastructure and to the people who use and manage it.
