Ecotourism David A. Fennell. 2020-04-19 The new fifth edition of *Ecotourism* focuses on an array of economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, and examines the sector in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance, and the ethical imperative of ecotourism as these apply to the world's greenest form of tourism. Building on the success of prior editions, the text has been revised throughout to incorporate recent research, including ecotourism taking place in under-represented world regions. It includes new case studies on important themes in research and practice as well as learning objectives in each chapter. David

Fennell provides an authoritative and comprehensive review of the most important issues, including climate change and UN Sustainable Development Goals. Ecotourism continues to be embraced as the antithesis of mass tourism because of its promise of achieving sustainability through conservation mindedness, community development, education and learning, and the promotion of nature-based activities that are sensitive to both ecological and social systems. The book debates to what extent this promise has been realised. An essential reference for those interested in ecotourism, the book is accessible to students, but retains the depth required for use by researchers and practitioners in the field. Managing Educational Tourism Brent W. Ritchie.2003-01-09 Increasingly tourists are seeking learning and educational holidays. This interest has led to the provision of tourism product with some form of learning or education as an integral component, including cultural heritage tourism and ecotourism. The growth of offshore education and lifelong learning has stimulated cross-border movement for language learning, school excursions and university student travel. Reflecting this growth in educational tourism types, the author outlines the main forms of educational tourism, their demand and supply characteristics, their impacts and the management issues associated with them, taking a holistic systems-based perspective. The book argues that without adequate research and appropriate management of educational forms of tourism, the potential regional development impacts and personal learning benefits will not be maximised. The book highlights the need for collaboration and networking between both the tourism and education industries to adequately manage the issues surrounding the growth in educational tourism.

An integrated and systematic review of a range of theoretical positions - that integrates economic and cultural - Tourism and Tourism Spaces will be a key resource for students of geography, sociology, management studies, hospitality studies, and leisure studies.

Routledge Handbook of Ecotourism David A. Fennell.2021-09-21 This handbook presents a timely, broad-ranging, and provocative overview of the essential nature of ecotourism. The chapters will

both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research, policy, and practice. The volume is arranged around four key themes: sustainability, ethics and identity, change, conflict, and consumption, and environment and learning, with a total of 28 chapters. The first section focuses on sustainability as a core ecotourism criterion, with a primary focus on some of the macro sustainability issues that have an impact on ecotourism. Foremost among these topics is the linkage to the UN's Sustainable Development Goals, which have relevance to ecotourism as one of the greenest or most responsible forms of tourism. The chapters in the second section provide a range of different topics that pull ecotourism research into new directions, including a chapter on enriching indigenous ecotourism through culturally sensitive universalism. The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism, to ecotourism as a form of luxury consumption. The final section emphasises the link between ecotourism and learning about the natural world, including a deeply theoretical chapter on rewilding Europe. With contributions from authors around the world, this handbook gives a global platform to local voices, in both developed and emerging country contexts. The multidisciplinary and international Routledge Handbook of Ecotourism will be of great interest to researchers, students, and practitioners working in tourism and sustainability.

Tourism and Protected Areas in Brazil André de Almeida Cunha, Teresa Cristina Magro-Lindenkamp, Stephen F. McCool. 2018 This book intends to support research and management practices in the real world and build a capacity to strengthen connections between Brazilian society and its natural heritage. The chapters highlight public policy, planning and management issues to link theory and practical application of implementing tourism in protected areas. The book focuses

on the analysis of social, environmental and managerial aspects that facilitate new approaches to tourism planning in protected areas. Upcoming challenges, such as public-private partnerships for tourism development, fewer resources from governments, and increasing visitor numbers are key topics in dealing with market demand to guarantee principles of sustainable tourism in Brazilian protected areas. Nature-based tourism remains a new area of knowledge in Brazil, with some papers published in regional and national journals. However, there is an increasing flux of tourists and a high demand to improve visitor experiences in these protected areas. Brazilian landscapes possess a myriad of nature-based tourism opportunities, indigenous cultures, and incredible biodiversity. Sustainability of these rely on research and support. This book is an insightful reference to how tourism challenges and opportunities are managed in Brazilian protected regions. The content and language are directed at undergraduate and graduate students, as well as tourism managers in these areas. Other beneficiaries of this publication include NGOs and students from tourism, environmental sciences, ecology, biology, sociology, economics, and interdisciplinary areas about protected areas within a developing country. This is a welcome reference for researchers worldwide, especially for studies on Brazilian nature-based tourism published in English are scarce. A number of new undergraduate, graduate and specialization courses focusing on nature tourism, ecotourism, sustainable development, and protected-area management have been created in the last decade in Brazil. Although international courses in developed countries focus on contributing to sustainable tourism and research in protected areas, there are few examples with a distinct focus on viable economic application and planning in Brazil. This book fills in a part of this gap. From the viewpoint of Brazilian researchers, it addresses the reality of the unique theoretical and practical issues facing these economies. It also discusses strategies in applications that focus on improving the benefits

from tourism in these protected areas.

Adventure Tourism Management Ralf Buckley.2011-01-03 The academic study of adventure tourism is rapidly increasing in popularity, with research beginning to focus on it heavily. This book is a cohesive and comprehensive look at this multi-million dollar industry sector from a variety of perspectives relevant to the teaching of tourism. Ideal for the undergraduate student taking adventure tourism as a single subject degree, or as part of their tourism management studies, this book documents, analyses and offers insight into the latest research in the area. Includes analysis of products, trends, climate change, risk management and environmental management and many others. The Subsectors section within the book offers an overview of the twenty or more definable sectors within the adventure tourism industry considering their origins and history, latest trends and demographic groups. The author then goes on to look in more detail at: Wildlife Tourism, Marine Tourism, Helitourism, and Boardsports. Each chapter will include seven pedagogical elements: * introduction - what the chapter does and doesn't cover * plain-language review of the chapter topic with minimal referencing - essentially like lecture notes * concluding paragraph to the review section explaining how it leads to the next chapter(s) * review of recent research, condensed into tables where possible * revision notes - a few pages of bullet points summarising the review and research * a sample set of assignment questions, three to six per chapter in some cases * readings on relevant topics, condensed from previous publications.

Reframing Sustainable Tourism Stephen F. McCool,Keith Bosak.2015-08-19 This book examines the need for a new way of describing sustainable tourism and also looks at the frameworks needed to rethink how to apply this to communities, private operators and protected area managers. It makes it clear that tourism is just one of many human activities that affects host communities. The work

includes informative and provocative case studies with realistic applications. References included in the book will help graduate students formulate new hypotheses and suggest literature for them. Tools and techniques useful to tourism practitioners suggest innovative approaches to marketing, management and community development.

Accessible Tourism Dimitrios Buhalis, Simon Darcy. 2011 Inclusion, disability, an ageing population and tourism are increasingly important areas of study due to their implications for both tourism demand and supply. This book therefore sets out to explore and document the current theoretical approaches, foundations and issues in the study of accessible tourism. In drawing together the contributions to this volume the editors have applied broader social constructionist approaches to understanding the accessible tourism phenomena. Accessible tourism, as with any area of academic study is an evolving field of academic research and industry practice. As with other areas of tourism, the field is multidisciplinary, and is influenced by various disciplines including geography, disability studies, economics, public policy, psychology and marketing. As one would expect from two scholars at the height of their academic abilities, Dimitrios Buhalis and Simon Darcy have delivered a timely and much needed contribution to the under-served area of accessible tourism. Harnessing the best conceptual developments on the topic, Accessible Tourism is a scholarly yet hugely readable collection and readily communicates the various contributors' passion for and command of their subject. This collection is a must have text for anyone engaged in the theory, practice and policy of accessible tourism and will be essential reading on undergraduate and postgraduate courses across a range of disciplines and fields. I cannot speak highly enough of this endeavour and I'm sure it will take accessible tourism and universal design debates into the mainstream of academic enquiry and industry practice.
