La vie privée à l'ère du numérique REY Bénédicte.2012-09-05 La démocratisation de l'informatique, puis des usages de l'internet, de la téléphonie mobile, ou plus récemment d'autres objets communicants génèrent une profusion de traces numériques gardant en mémoire les actions des usagers. Approuvé par certains qui y voient l'opportunité d'améliorer la sécurité publique, la relation marchande ou encore leur propre confort quotidien, ce constat fait craindre à d'autres l'avènement d'une société de la surveillance érodant le respect de la vie privée. Cet ouvrage étudie la notion d'espace privé à l'ère du numérique. Il montre comment les changements technologiques, de services et d'usages redéfinissent l'acceptation traditionnelle de la vie privée fondée sur des normes, et comment, en complément du dispositif normatif existant, des modalités de régulation appropriables par les individus sont envisagées.

**COMMENT DIEU VOIT LE MONDE** Bertin Nana.2007-08-08 Comment Dieu Voit le Monde est un message de paix sur la terre, une invitation aux chrétiens et au monde à devenir pacifi que et doux comme les anges, une invitation à l'humanité à devenir compatissante et solidaire pour combattre la pollution et le réchauffement de la terre. Comment Dieu Voit le Monde, c'est la Bible, la philosophie occidentale, les mathématiques, la littérature, la science, la vie. Le livre est unique et révolutionnaire dans l'histoire de l'humanité parce que l'auteur utilise le raisonnement mathématique pour prouver les vérités en religion, en philosophie, et sur la vie. L'auteur est un défenseur de la civilisation de la renaissance et de la croissance zéro comme le recommandait le Club de Rome dans le livre intitulé Halte à la croissance. L'auteur explique les mystères de Satan et du péché original en utilisant le personnalisme, la phénoménologie, l'existentialisme, et les mathématiques. Les mathématiques sont la logique et l'art de raisonner. L'auteur démontre mathématiquement et bibliquement qu'un chrétien est un saint, un philosophe, et un communiste. C'est-à-dire que l'humanité doit devenir communiste pour espérer résoudre les problèmes de la pollution, du chômage, de la violence, de la pauvreté, de la santé, des guerres etc. C'est-à-dire que l'humanité doit devenir communiste si elle veut survivre.

*Life Phenomenology of Life as the Starting Point of Philosophy* Anna-Teresa Tymieniecka.2012-12-06 This collection presents perspectives into the pristine field of phenomenology/philosophy of life conceived by Tymieniecka, initiated in the *Analecta Husserliana* and unfolding with each volume. This new and original philosophy reaches to the `inner workings of Nature' as well as to the innermost recesses of the Human Creative Condition, opening a basic starting point for all philosophy. Life, `the theme of our times', finds at last a profound philosophical treatment.

*Phenomenology of Space and Time* Anna-Teresa Tymieniecka.2014-04-26 This book celebrates the investigative power of phenomenology to explore the phenomenological sense of space and time in conjunction with the phenomenology of intentionality, the invisible, the sacred, and the mystical. It examines the course of life through its ontopoietic genesis, opening the cosmic sphere to logos. The work also explores, on the one hand, the intellectual drive to locate our cosmic position in the universe and, on the other, the pull toward the infinite. It intertwines science and its grounding principles with imagination in order to make sense of the infinite. This work is the first of a two-part work that contains papers presented at the 62nd International Congress of Phenomenology, The Forces of the Cosmos and the Ontopoietic Genesis of Life, held in Paris, France, August 2012. It features the work of scholars in such diverse disciplines as biology, anthropology, pedagogy, and psychology who philosophically investigate the

cosmic origins of beingness. Coverage in this first part includes: Toward a New Enlightenment: Metaphysics as Philosophy of Life, Transformation in Phenomenology: Husserl and Tymieniecka, Biologically Organized Quantum Vacuum and the Cosmic Origin of Cellular Life, Plotinus Enneads and Self-Creation, The Creative Potential of Humor, Transcendental Morphology - A Phenomenological Interpretation of Human and Non-Human Cosmos, and Cognition and Emotion: From Dichotomy to Ambiguity.

**Sources of the Boece** Tim William Machan,Alastair J. Minnis.2005 Boethius's *De Consolatione Philosophiae* was among the most persistent and extensive influences on Chaucer's writing. Its ideas appear in various works, including the *Knight's Tale* and *Troilus and Criseyde*, while the so-called Boethian balades offer poetic renditions of small sections of the *Consolation*. Around 1380 Chaucer translated the whole of the *Consolation* into English, drawing not only on the Latin Vulgate *Consolatio* but also on Jean de Meun's French translation (*Li Livres de confort de philosophie*) and on Nicholas Trevet's Latin commentary on the *Consolatio*. Sources of the Boece will be particularly valuable for Chaucer studies, for it makes available for the first time copies of all Chaucer's sources for his translation: newly edited, complete, facing-page texts of the Vulgate *Consolatio* and Meun's translation, along with relevant extracts from the commentaries of Nicholas Trevet and Remigius of Auxerre and collations from the larger Latin and French traditions. The edition thus enables detailed, comparative studies of Chaucer's use of his sources and provides additional material for assessing his understanding of Boethius's ideas and how they figure in his other compositions. More generally, the very format of the edition will facilitate the study of translation in the Middle Ages, when writers worked not from standardized editions like the ones modern scholars consult but from variable and sometimes conflicting traditions. Chaucer's procedures provide insights into medieval notions of textuality and vernacular authorship, issues that are perennial scholarly concerns.

Michel Henry et l'affect de l'art Adnen Jdey,Rolf Kühn.2011-11-25 The studies in this book set out to examine the labile resonances of phenomenology and art in Michel Henry, by examining the different figures of movement given to the concept of the aesthetic by the philosopher. They are preceded by one of Michel Henry's own texts. Les études qui composent ce livre proposent d'interroger les résonances labiles de la phénoménologie et de l'art chez Michel Henry, en examinant les différentes figures du déplacement imprimé par le philosophe au concept d'esthétique. Le tout est précédé d'un texte de Michel Henry.

Life of the World to Come Abraham Abulafia.2018-02-26 Abraham Abulafia 1240-1291, Hayyei ha-Olam ha-Ba Life of the World to ComeThe Spanish kabbalist Abraham Abulafia (1240- after 1291) advocated a concept of Kabbalah that had little or nothing to do with the well-known schools of thought. He considered Kabbalah neither as a form of gnosis nor as a kind of theosophical theory that concentrates on the Sefirot, the emanation of the Divine Being. Instead he attempted to attain a state of prophetic-mystical ecstasy, based on his conviction that the experience of the prophets was an ecstatic experience and that all true mystics were prophets. This work of his was especially popular and circulated under the titles Hayyei ha-Olam ha-Ba (Life of the World to Come), Sefer ha-Shem (Book of the Divine Name) or Sefer ha-Iggulim (Book of Circles); in this manuscript, however, it is called Sefer ha-Shem ha-Meforash (Book of the Ineffable name). The manuscript presents ten inscriptions in concentric circles in red and black ink, as well as 128 only in black ink. They contain detailed instructions for mystical meditation. While contemplating these circles, one should recite the 72-lettered name of God, which is arrived at by combining the numerical values of the letters in the names of the twelve tribes of Israel, of the Patriarchs, and the nine letters of the words shivtei yisra'el) (the tribes of Israel). The reader should enter each of the triple black and red circles at the point where an entrance is designated by means of a small pen stroke (red).

**Life** M. Kronegger,Anna-Teresa Tymieniecka.2012-12-06 In her Introduction, Tymieniecka states the core theme of the present book sharply: Is culture an excess of nature's prodigious expansiveness - an excess which might turn out to be dangerous for nature itself if it goes too far - or is culture a 'natural', congenial prolongation of nature-life? If the latter, then culture is assimilated into nature and thus would lose its claim to autonomy: its criteria would be superseded by those of nature alone. Of course, nature and culture may both still be seen as being absorbed by the inner powers of specifically human inwardness, on which view, human being, caught in its own transcendence, becomes separated radically in kind from the rest of existence and may not touch even the shadow of reality except through its own prism. Excess, therefore, or prolongation? And on what terms? The relationship between culture and nature in its technical phase demands a new elucidation. Here this is pursued by excavating the root significance of the 'multiple rationalities' of life. In contrast to Husserl, who differentiated living types according to their degree of participation in the world, the phenomenology of life disentangles living types from within the ontopoietic web of life itself. The human creative act reveals itself as the Great Divide of the Logos of Life - a divide that does not separate but harmonizes, thus dispelling both naturalistic and spiritualistic reductionism.
