**Now-time Image-space** Kia Lindroos.1998 Lindroos constructs an alternative interpretation on history, time, politics and art, approached through the moment of the Now (Jetztzeit). In the first section, she elaborates the critique of chronologic-linear way of understanding history. Through a close reading of Benjamin's Work of Art essay, the second section examines the problems of origins, authenticity and traditions of art through the ideas of artistic avant-garde and politicization of aesthetics. The end of the book discusses the concept of image and the new images as an Image-Space (Bildraum) of action.

**Musica Poetica: Musical-Rhetorical Figures in German Baroque Music** Dietrich Bartel.1997-07-01 Musica Poetica provides an unprecedented examination of the development of Baroque musical thought. The initial chapters, which serve as an introduction to the concept and teachings of musical-rhetorical figures, explore Martin Luther's theology of music, the development of the Baroque concept of musica poetica, the idea of the affections in German Baroque music, and that music's use of the principles and devices of rhetoric. Dietrich Bartel then turns to more detailed considerations of the musical-rhetorical figures that were developed in Baroque treatises and publications. After brief biographical sketches of the major theorists, Bartel examines those theorists' interpretation and classification of the figures. The book concludes with a detailed presentation of the musical-rhetorical figures, in which each theorist's definitions are presented in the original language and

in parallel English translations. Bartel's clear, detailed analysis of German Baroque musical-rhetorical figures, combined with his careful translations of interpretations of those figures from a wide range of sources, make this book an indispensable introduction and resource for all students of Baroque music.

*Santa Teresa* Dr. Martina Bengert,Iris Roebing-Grau.2019-07-15

Even prior to her widely observed 500th anniversary, Teresa of Ávila (1515-1582) was already considered one of the most important authors of occidental mysticism. This volume gathers together contributions from a multitude of disciplines to explore the writings and reception of the Spanish author and saint.

Previously disregarded lines of tradition are explored for a new understanding of her oeuvre, which is examined here with special regard to the potential to affect its readers. Teresa proves to not only be an accomplished, but also a very literary writer. Santa Teresa proves to be a figure of cultural memory, and the diffusion of her thinking is traced up to the present, whereby a recurrent focus is put on the phenomenon of ecstasy. Part of the widespread resonance of her work is the image of the iconic saint whose emergence as an international phenomenon is presented here for the first time. The volume is closed by an interview with Marina Abramovi answering four questions about Teresa.

Cosmography and the Idea of Hyperborea in Ancient Greece

Renaud Gagné.2021-04-22 Cosmography is defined here as the rhetoric of cosmology: the art of composing worlds. The mirage of Hyperborea, which played a substantial role in Greek religion and

culture throughout Antiquity, offers a remarkable window into the practice of composing and reading worlds. This book follows Hyperborea across genres and centuries, both as an exploration of the extraordinary record of Greek thought on that further North and as a case study of ancient cosmography and the anthropological philology that tracks ancient cosmography. Trajectories through the many forms of Greek thought on Hyperborea shed light on key aspects of the cosmography of cult and the cosmography of literature. The philology of worlds pursued in this book ranges from Archaic hymns to Hellenistic and Imperial reconfigurations of Hyperborea. A thousand years of cosmography is thus surveyed through the rewritings of one idea. This is a book on the art of reading worlds slowly.

### **Calvin's Theology of the Psalms (Texts and Studies in Reformation and Post-Reformation Thought)**

Herman J. Selderhuis.2007-04-01 In this intriguing book, Herman Selderhuis argues that John Calvin's biblical interpretation of the Psalms is fundamentally shaped by his doctrine of God. Selderhuis minimizes references to other Calvin studies and other works by Calvin, thus allowing Calvin's theology on the Psalms to speak for itself. The book is organized thematically according to divine attributes. Reformation and Calvin scholars as well as interested Reformed readers will value this resource.

and Pietist Studies Winner, 2005 Outstanding Publication, Communal Studies Association Co-published with the Pennsylvania German Society/Vandenhoeck & Ruprecht The Ephrata Cloister was a community of radical Pietists founded by Georg Conrad Beissel (1691&-1768), a charismatic mystic who had been a journeyman baker in Europe. In 1720 he and a few companions sought a new life in William Penn's land of religious freedom, eventually settling on the banks of the Cocalico Creek in what is now Lancaster County. They called their community &"Ephrata,&" after the Hebrew name for the area around Bethlehem. *Voices of the Turtledoves* is a fascinating look at the sacred world that flourished at Ephrata. In *Voices of the Turtledoves*, Jeff Bach is the first to draw extensively on Ephrata's manuscript resources and on recent archaeological investigations to present an overarching look at the community. He concludes that the key to understanding all the various aspects of life at Ephrata&—its architecture, manuscript art, and social organization&—is the religious thought of Beissel and his co-leaders.

**Aspects of the Performative in Medieval Culture** Manuele

Gragnolati,Almut Suerbaum.2010-04-29 The volume assesses

performative structures within a variety of medieval forms of

textuality, from vernacular literature to records of parliamentary

proceedings, from prayer books to musical composition. Three

issues are central to the volume: the role of ritual speech acts; the

way in which authorship can be seen as created within medieval

texts rather than as a given category; finally, phenomena of voice,

created and situated between citation and repetition, especially in

forms which appropriate and transform literary tradition. The

volume encompasses articles by historians and musicologists as

well as literary scholars. It spans European literature from the

West (French, German, Italian) to the East (Church Slavonic),

vernacular and Latin; it contrasts modes of liturgical meditation

in the Western and Eastern Church with secular plays and songs,

Writings on Physics and Philosophy Wolfgang Pauli.2013-04-17

Like Bohr, Einstein and Heisenberg, Wolfgang Pauli was not only a Nobel laureate and one of the creators of modern physics, but also an eminent philosopher of modern science. This is the first book in English to include all his famous articles on physics and epistemology. They were actually translated during Pauli's lifetime by R. Schlapp and are now edited and annotated by Pauli's former assistant Ch. Enz. Pauli writes about the philosophical significance of complementarity, about space,time and causality, symmetry and the exclusion principle, but also about the role of the unconscious in modern science. His famous article on Kepler is included as well as many historical essays on Bohr, Ehrenfest, and Einstein as well as on the influence of the unconscious on scientific theories. The book addresses not only physicists, philosophers and historians of science, but also the general public.
