Religion and Human Security James K. Wellman Jr.,Clark B.

Lombardi.2012-08-02 Since the1950s the world has witnessed a period of extraordinary religious revival in which religious political parties and non-governmental organizations have gained power around the globe. At the same time, the international community has come to focus on the challenge of promoting global human security. This groundbreaking book explores how these trends are interacting. In theoretical essays and case studies from Turkey, Egypt, Pakistan, the Americas, Africa and Europe, the contributors address such crucial questions as: Under what circumstances do religiously motivated actors advance or harm human welfare? Do certain state policies tend to promote security-enhancing behavior among religious groups? The book concludes by providing important suggestions to policymakers about how to factor the influence of religion into their evaluation of a population's human security and into programs designed to improve human security around the globe.

The Oxford Handbook of China Innovation Xiaolan Fu,Bruce McKern,Jin Chen.2021 The Oxford Handbook of China Innovation provides a contemporary and authoritative view of the role of

innovation in China's extraordinary emergence. The Handbook consists of chapters written by over sixty experts from universities and research institutions worldwide, who describe and analyze this phenomenon with criticism, discussion of policy issues, and views about further development. It focuses on the microeconomic factors in China's growth, of which the critical force has been the steady drive for innovation. It identifies the many factors instrumental in the development of innovation and evaluates those that are specific to China's context, and those applicable to other nations. The scope of topics is comprehensive, covering China's development policies, the place of innovation in national priorities, the components of the national innovation system and the resources required for their effective deployment. These include the institutions and policies that provide incentives and support to technological development, including people, financial mechanisms, private ownership, rule of law and culture. The issue of foreign influence is also addressed, including the evolution of policy towards inward foreign direct investment and knowledge transfer and China's goals for outward foreign direct investment. The chapters include discussion of the capabilities and strategies of world-class Chinese innovators, together with emerging issues such as environmental remediation, green energy, digital innovation, open innovation, mass innovation and China's future science and technology policy. As China emerges as a contender for global leadership in many fields, the Handbook provides a foundation for informed conjecture regarding the challenges ahead--
