Adventure on the Hoe Jennifer Gallagher.2012

The Future of Vocational Education and Training in a Changing World Matthias Pilz.2012-04-25 Across the globe, vocational education and training is characterised by a number of over-arching trends, including the increasing use of technology, the growing importance of information and communications systems, and changes to national demographics. At the interface between the education and training system and the world of work, VET faces the challenge of tackling these changes, of making a constructive contribution to solving the problems posed by the transition from education to employment, and of ensuring that the next generation has the skills it - and the economy - needs. This volume comprises thirty individual contributions that together add up to a comprehensive overview of the current situation in vocational education and training, its strengths and weaknesses, and its prospects. VET experts from Canada, the USA, India, China, Japan and Korea, as well as from a number of European countries, focus on their national context and how it fits in to the bigger picture. The contributions combine theoretical discussions from various strands of VET research with evidence from country case studies and examples from current practice.

Higher Education to 2030 .2008 Demographic changes increasingly shape social policies as most OECD populations are aging and include more migrants and minorities. Japan and Korea have already started to see their enrollments in tertiary education decline, but other countries like Turkey and Mexico can still expect a boom. Drawing on trend data and projections, volume 1 takes a look at these important questions from both a qualitative and quantitative standpoint. Issues covered include the impact of demographic changes on student enrollment, educational attainment, academic staff and policy choices. Particular attention is given to how access policies determine the demographics of tertiary education, notably by examining access to higher education for disabled and migrant students. The book covers most OECD countries, illustrating the analysis with specific examples from France, Japan, Korea and the United States. Volumes 2 and 3 examine the effects of technology and globalization, and volume 4 presents scenarios for the future of higher education systems.-- Publisher's description.

Seamless Learning in the Age of Mobile Connectivity Lung-Hsiang Wong,Marcelo Milrad,Marcus Specht.2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces. It is the first such work that is solely dedicated to research on and the practice of seamless learning, uniquely combining interpretations, visions, and past research on and practices in seamless learning from diversified perspectives. The book also strikes a good balance between theoretical and practical perspectiveness, going beyond a collection of reports on specific research projects. Instead of thick descriptions of research processes and findings, readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning.

Digital Education at School in Europe .2019 This Eurydice report sheds light on two different but complementary perspectives of digital education: the development of digital competences relevant to learners and teachers on the one hand, and the pedagogical use of technologies to support, improve and transform learning and teaching on the other. The report covers different areas of digital education starting by an overview of school curricula and learning outcomes related to digital competence. The development of teacher-specific competences during initial teacher education and throughout their career is addressed as well as the assessment of students' digital competences and the use of digital technologies for assessment. Finally, the report gives some insight into current national strategies and policies on digital education at school. The annexes add specific information by country, on school curricula, teacher competence frameworks, top-level strategies and agencies supporting digital education at school. The report covers digital education at primary and general secondary levels for the school year 2018/19 in all 28 EU Member States, as well as Albania, Bosnia and Herzegovina, Switzerland, Iceland, Liechtenstein, Montenegro, North Macedonia, Norway, Serbia and Turkey, 43 education systems in total.

Beyond the Blue Border Dorit Linke.2021-09-07 Hanna and Andreas will do anything to leave oppressive East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to

without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom.

ECERS-E with Planning Notes Kathy Sylva,Iram Siraj,Brenda Taggart.2010-11-22 ECERS-E is designed to be used with the Early Childhood Rating Scale-Revised (ECERS-R), an internationally recognized measure of quality in education and care written by Thelma Harms, Richard M. Clifford, and Debby Cryer. It not only complements the ECERS-R but extends the scales to provide additional insights into important aspects of literacy, mathematics, science and environment, as well as practices related to issues of diversity. Given the current focus on emerging literacy and numeracy skills, the ECERS-E provides unique guidance on the kinds of environments that enhance learning in preschool settings. The curriculum domains within the scales bear important relationships to children's (age 3-5) cognitive and social/behavioral developmental outcomes. Using the ECERS-E alongside the ECERS-R gives users a more complete picture of what a high-quality early childhood education program can look like. It can be used by program directors, teaching staff, agency staff, and in teacher training programs. Convenient organization: Literacy Items: Print in the environment Book and literacy areas Adults reading with children Sounds in words Emergent writing/mark making Talking and listening Mathematics Items: Counting and application of counting Reading and representing simple numbers Activities: Shape Activities: Sorting, matching and comparing Science and Environment Items: Natural materials Areas featuring science/science materials Activities: Non living Activities: Living processes Activities: Food preparation Diversity Items: Planning for individual learning needs Gender equality and awareness Race equality and awareness

Knowing What Students Know National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Board on Testing and Assessment,Committee on the Foundations of Assessment.2001-10-27 Education is a hot topic. From the stage of presidential debates to tonight's dinner table, it is an issue that most Americans are deeply concerned about. While there are many strategies for improving the educational process, we need a way to find out what works and what doesn't work as well. Educational assessment seeks to determine just how well students are learning and is an integral part of our quest for improved education. The nation is pinning greater expectations on educational assessment than ever before. We look to these assessment tools when documenting whether students and institutions are truly meeting education goals. But we must stop and ask a crucial question: What kind of assessment is most effective? At a time when traditional testing is subject to increasing criticism, research suggests that new, exciting approaches to assessment may be on the horizon. Advances in the sciences of how people learn and how to measure such learning offer the hope of developing new kinds of assessments--assessments that help students succeed in school by making as clear as possible the nature of their accomplishments and the progress of their learning. Knowing What Students Know essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment. These advances suggest ways that the targets of assessment--what students know and how well they know it--as well as the methods used to make inferences about student learning can be made more valid and instructionally useful. Principles for designing and using these new kinds of assessments are presented, and examples are used to illustrate the principles. Implications for policy, practice, and research are also explored. With the promise of a productive research-based approach to assessment of student learning, Knowing What Students Know will be important to education administrators, assessment designers, teachers and teacher educators, and education advocates.

Employability and Mobility of Bachelor Graduates in Europe Harald Schomburg,Ulrich Teichler.2011-10-23 A decade after the Bologna Declaration has called for the establishment of a cycle system of study programmes and degrees all over Europe the changes actually having occurred in this reform process can be measured and assessed. To what extent did the bachelor students gained international experiences during or after their study program? What is the proportion of bachelor degree holders who are employed about one year after graduation? What are the labor market experiences of those bachelor graduates who started to work? Was it difficult to gain relevant employment? What are the employment conditions for bachelor graduates in terms of income, position, working time, unlimited term contracts compared to traditional graduates? To what extent are bachelor graduates working in areas with close relation to their field of study (horizontal match)? Is their level of education needed for their work tasks (vertical match)? These are the key questions which will be answered in this volume based on surveys of graduates from institutions of higher education recently undertaken in ten European countries (Austria, Czech Republic, France, Germany, Hungary, Italy, Norway, Netherlands, Poland, and United Kingdom). The bachelor-master-structure actually implemented varies substantially between the countries and also the consequences of these reforms differ strikingly. In some countries, more students spend a period of study abroad than the goal set for the year 2020 in the Bologna Process; in other countries, not yet a quarter of the expected rate is achieved. Also the frequency of bachelor graduates differs by country who opt for further study, transfer to employment or are both employed and students. The comparative study also provides a wealth of information about the employment and work situation of bachelor graduates as compared to other graduates from institutions of higher education. The book provides relevant information for students and teaching staff at institutions of higher education, employers and politicians and administrative staff dealing with higher education issues.

Nuclear Energy Today OECD Nuclear Energy Agency.2003 As energy demand increases in line with the expansion of the world's leading economies and the growth of developing economies, a key challenge remains of how to provide the energy levels required while protecting our environment and conserving natural resources. Nuclear energy is a complex and controversial technology but also has the potential to provide considerable benefits. This publication explores a range of issues involved in the use of nuclear energy, including safety aspects, whether its use is economically competitive, its role in meeting greenhouse gas reduction targets, how to manage the radioactive waste it generates, whether its use increase the risk of proliferation of nuclear weapons, security of resources, and its potential role in the future.

The SAGE Handbook of Early Childhood Policy Linda Miller,Claire Cameron,Carmen Dalli,Nancy Barbour.2017-07-30 Recent authoritative evidence suggests that an estimated 200 million children under five fail to achieve their developmental potential due to factors including poor health and nutrition and the lack of stable high quality care. A significant number of the world's children today lack the basic rights to health,

development and protection. In light of such statistics, early childhood services for young children have expanded around the world. The SAGE Handbook of Early Childhood Policy draws critical attention to policy in Early Childhood Education and Care (ECEC) its relationship to service provision and its impact on the lives of children and families. The perspectives of leading academics and researchers from Europe, North America, South America, Africa, Australasia and Asia have been arranged around five key themes: Part 1: The Relationship Between Research, Policy And Practice: Country Case Studies Part 2: Equitable Early Childhood Services: Intervention to Improve Children's Life Chances Part 3: Extending Practice: The Role of Early Childhood Services In Family Support Part 4: Participation, Rights and Diversity Part 5: Future Directions for Early Childhood Policy This handbook is essential reading for practitioners, stakeholders and others committed to working within early years services to achieve an awareness of policy and its implications for services and practice.

Europeanizing Education Martin Lawn, Sotiria Grek. 2012-05-14 The study of common and diverse effects in the field of education across Europe is a growing field of inquiry and research. It is the result of many actions, networks and programmes over the last few decades and the development of common European education policies. Europeanizing Education describes the origins of European education policy, as it metamorphosed from cultural policy to networking support and into a space of comparison and data. The authors look at the early development and growth of research networks and agencies, and international and national collaborations. The gradual increase in the velocity and scope of education policy, practice and instruments across Europe is at the heart of the book. The European space of education, a new policy space, has been slowly coaxed into existence; governed softly and by persuasion; developed by experts and agents; and de-politicized by the use of standards and data. It has increasing momentum. It is becoming a single, commensurable space on a rising tide of indicators and benchmarks. The construction of policy spaces by the European Union makes Europe governable: policy spaces have to be mobilized by networks of actors and constructed by comparative data. They are the result of transnational flows of people, ideas and practices across European borders; the direct effects of European Union policy; and, finally, the Europeanizing effect of international institutions and globalization. The European space of education and research has become a new place of work through interconnected institutions, networks and companies, and it is being constructed through the flow of policy ideas, knowledge and practices from place to place, sector to sector, organization to organization, and across borders. This book will be useful to any scholar of the new arena of study, the European Space of Education.

Cross-national Attraction in Education Hubert Ertl. 2006-05-15 The comparison and borrowing of national policies is a widespread phenomenon in all major policy areas. In education, the PISA study has resulted in a renewed interest in cross-national comparison and reception of policies. In particular, the unexpectedly low results of Germany in the PISA study have sparked increased interest in educational policies and practice elsewhere. The chapters cover a wide variety of educational sectors: vocational education and training, preparation for career choice, citizenship education, secondary and higher education, teacher training and language learning policy. These chapters are framed by more general accounts of the influence of foreign educational reform on national reform agendas and the German reaction to the results of the PISA study. This book provides insights into educational policy formation and implementation of policies into educational practice in England and Germany from a comparative perspective, and is aimed at academics, students, policy makers and the wider public with an interest in the latest developments in the long-standing mutual interest in educational matters in the two countries.

The Absolutely True Diary of a Part-Time Indian Sherman Alexie. 2016-09-15 An all-new edition of the tragicomic smash hit which stormed the New York Times bestseller charts, now featuring an introduction from Markus Zusak. In his first book for young adults, Sherman Alexie tells the story of Junior, a budding cartoonist who leaves his school on the Spokane Indian Reservation to attend an all-white high school. This heartbreaking, funny, and beautifully written tale, featuring poignant drawings that reflect the character's art, is based on the author's own experiences. It chronicles contemporary adolescence as seen through the eyes of one Native American boy. 'Excellent in every way' Neil Gaiman Illustrated in a contemporary cartoon style by Ellen Forney.

Rapping for Shelly Paul Davenport. 2009 Sal ist ein junger Rapper. Er rappt - wenn er darf - in der Schule, er rappt in Clubs in Downtown San Francisco. Aber er ist nicht der einzige Rapper an seiner Schule. Sein Rivale heißt Alonzo: der robuste, aggressive, eifersüchtige Freund von Shelly. Und als Shelly anfängt, Interesse an Sals Raptalent zu zeigen, sind die Probleme vorprogrammiert. Vor einem Hintergrund von spannenden rap battles, in denen harte (und nicht so harte) Musik-Texte den Zuschauern präsentiert werden, kämpfen Sal und Alonzo um ihren musikalischen Ruf - und um die Aufmerksamkeit der schönen Shelly.
