The New Spirit of Capitalism Luc Boltanski, Eve Chiapello. 2005 A century after the publication of Max Weber's *The Protestant Ethic and the Spirit of Capitalism*, a major new work examines network-based organization, employee autonomy and post-Fordist horizontal work structures.

Ludwig Boltzmann Carlo Cercignani. 2006-01-12 This book presents the life and personality, the scientific and philosophical work of Ludwig Boltzmann, one of the great scientists who marked the passage from 19th- to 20th-Century physics. His rich and tragic life, ending by suicide at the age of 62, is described in detail. A substantial part of the book is devoted to discussing his scientific and philosophical ideas and placing them in the context of the second half of the 19th century. The fact that Boltzmann was the man who did most to establish that there is a microscopic, atomic structure underlying macroscopic bodies is documented, as is Boltzmann's influence on modern physics, especially through the work of Planck on light quanta and of Einstein on Brownian motion. Boltzmann was the centre of a scientific upheaval, and he has been proved right on many crucial issues. He anticipated Kuhn's theory of scientific revolutions and proposed a theory of knowledge based on Darwin. His basic results, when properly understood, can also be stated as mathematical theorems. Some of these have been proved: others are still at the level of likely but unproven conjectures. The main text of this biography is written almost entirely without equations. Mathematical appendices deepen knowledge of some technical aspects of the subject.

Science and Empires P. Petitjean, Cathérine Jami, A.M. Moulin. 2012-12-06 *SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK* Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium Science and Empires - Historical Studies about Scientific Development and European Expansion is the product of an International Colloquium, Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries. Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed Sciences and Empires as one of the main research programmes for the project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title Sciences and Empires, is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Europe (in Theory) Roberto M. Dainotto. 2007-01-09 Europe (in Theory) is an innovative analysis of eighteenth- and nineteenth-century ideas about Europe that continue to inform thinking about culture, politics, and identity today. Drawing on insights from subaltern and postcolonial studies, Roberto M. Dainotto deconstructs imperialism not from the so-called periphery but from within Europe itself. He proposes a genealogy of Eurocentrism that accounts for the way modern theories of Europe have marginalized the continent's own southern region, portraying countries including Greece, Italy, Spain, and Portugal as irrational, corrupt, and clan-based in comparison to the rational, civic-minded nations of northern Europe. Dainotto argues that beginning with Montesquieu's *The Spirit of Laws* (1748), Europe not only defined itself against an "Oriental" other but also against elements within its own borders: its South. He locates the roots of Eurocentrism in this disavowal; internalizing the other made it possible to understand and explain Europe without reference to anything beyond its boundaries. Dainotto synthesizes a vast array of literary, philosophical, and historical works by authors from different parts of Europe. He scrutinizes theories that came to dominate thinking about the continent, including Montesquieu's invention of Europe's north-south divide, Hegel's "two Europes," and Madame de Staël's idea of opposing European literatures: a modern one from the North, and a pre-modern one from the South. At the same time, Dainotto brings to light counter-narratives written from Europe's margins, such as the Spanish Jesuit Juan Andrés's suggestion that the origins of modern European culture were eastern rather than northern and the Italian Orientalist Michele Amari's assertion that the South was the cradle of a social democracy brought to Europe via Islam.

Mavericks at Work William C. Taylor, Polly G. LaBarre. 2009-03-17 The first book to document this change, *Mavericks at Work* is business edutainment for a smart, ambitious readership, profiling some of the most exciting—and often eccentric—CEOs in the United States, while detailing their remarkable strategies for success. Who's going to write the next chapter in the saga of American business? Who's going to chronicle the best way to compete, the new way to win? That's the mission of *Mavericks at Work*, a book that profiles a network of rebels who are creating a new business model that makes use of fresh principles and captures what it means to be a state-of-the-art organization. Including such pioneering companies as ING Direct, Southwest Airlines, Pixar, HBO, Anthropologie, Craigslist, Netflix, and Commerce Bank, this book is nothing short of a lively new intellectual agenda for business.

Strategic Imaginations Anke Gilleir, Aude Defurne. 2020-12-15 *Imaginations of female rule and the imaginative strategies of women rulers* What is the gender of political power? What happens to the history of sovereignty when we reconsider it from a gender perspective? Political sovereignty has been a major theme in European thought from the very beginning of intellectual reflection on community. Philosophy and political theory, historiography, theology, and literature and the arts have, often in dialogue with one another, sought to represent or recalibrate notions of rule. Yet whatever covenant was imagined, sovereign rule has consistently been figured as a male prerogative. While in-depth studies of historical women rulers have proliferated in the past decades, these have not systematically explored how all women rulers throughout the entirety of European culture have had to operate in a context that could not think power as female – except in grotesque terms. *Strategic Imaginations* demonstrates that this constitutive tension can only be brought out by studying women's political rule in a comparative and *longue durée* manner. The book offers a collection of essays that brings together studies of female sovereignty from the Polish-Lithuanian to the British Commonwealth, and from the Middle

Ages to the genesis of modern democracy. It addresses historical figures and takes stock of the rich yet unsettling imagination of female rule in philosophy, literature and art history. For all the variety of geographical, social, and historical contexts it engages, the book reveals surprising resonances between the strategies women rulers used and the images and practices they adopted in the context of an all-pervasive skepticism toward female rule.

Dragon Operations Thomas P Odom, Frederick M. Franks, Combat Studies Institute. 2010-12-01 In August 1964, thousands of Simba rebels attacked and captured the city of Stanleyville in the newly independent Republic of the Congo and took more than 1,600 European and American residents as hostages, threatening to kill them if any attempt was made to recapture the city. In November of that year, after months of increasingly tense and complex discussions among the governments whose nationals were being held, an airborne assault by Belgian paracommandos dropped by American Air Force planes, combined with a CIA-piloted air strike against the Stanleyville airport, liberated most of the hostages, but only after a Simba-initiated massacre. *Dragon Operations: Hostage Rescues in the Congo, 1964-1965* provides both the political background to these events and a detailed account of the actual operations: *Dragon Rouge*, the operations in Stanleyville, and *Dragon Noir*, focused on the city of Paulis, several hundred miles away. The book highlights the difficulties in organizing an international rescue effort with insufficient joint planning and inadequate command and control among the Belgian and American forces, as well as their differing political ideas and goals. The ad hoc nature of the planning was exemplified by an initial American Special Forces plan to air drop its forces east of Stanleyville and float down the river to Stanleyville. This plan was aborted when it was pointed out that the existence of Stanley Falls between the drop zone and the city was an insuperable obstacle. The operation also suffered from the Belgian commander's colonial-era contempt for the numerical strength of the Simbas and American fears of what was in reality a non-existent Communist element in the rebel movement. *Dragon Operations* demonstrates that, despite the slapdash nature of their planning and communications aspects, as well as the distance involved, the austere support, the large number of hostages, and a lack of intelligence data, they were remarkably successful in rescuing most of the hostages. Although less than ideal, the operations worked better than expected, given the conditions under which they were conducted. This important study of an almost forgotten episode of the Cold War has much to offer to military strategists and tacticians, political scientists and students of contemporary history alike. The Cinema of Attractions Reloaded Wanda Strauven. 2006 Twenty years ago, noted film scholars Tom Gunning and André Gaudreault introduced the phrase “cinema of attractions” to describe the essential qualities of films made in the medium’s earliest days, those produced between 1895 and 1906. Now, *The Cinema of Attractions Reloaded* critically examines the term and its subsequent wide-ranging use in film studies. The collection opens with a history of the term, tracing the collaboration between Gaudreault and Gunning, the genesis of the term in their attempts to explain the spectacular effects of motion that lay at the heart of early cinema, and the pair’s debts to Sergei Eisenstein and others. This reconstruction is followed by a look at applications of the term to more recent film productions, from the works of the Wachowski brothers to virtual reality and video games. With essays by an impressive collection of international film scholars—and featuring contributions by Gunning and Gaudreault as well—*The Cinema of Attractions Reloaded* will be necessary reading for all scholars of early film and its continuing influence.

The Well of Loneliness Radclyffe Hall.2015-04-23 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

Dionysos in Classical Athens Cornelia Isler-Kerényi.2014-11-14 Dionysos, with his following of satyrs and women, was a major theme in a big part of the figure painted pottery in 500-300 B.C. Athens. As an original testimonial of their time, the imagery on these vases convey what this god meant to his worshippers. It becomes clear that he was not only appropriate for wine, wine indulgence, ecstasy and theatre. Rather, he was present on many, both happy and sad, occasions. The vase painters have emphasized different aspects of Dionysos for their customers inside and outside of Athens, depending on the political and cultural situation.

Painted Love Hollis Clayson.2003-10-30 In this engrossing book, Hollis Clayson provides the first description and analysis of French artistic interest in women prostitutes, examining how the subject was treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their contemporaries. Clayson not only illuminates the imagery of prostitution-with its contradictory connotations of disgust and fascination-but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the commercialization and the ambiguity of modern life.

Corruption and Anti-corruption Peter Larmour,Nick Wolanin.2013-03-01 Corruption and Anti-Corruption deals with the international dimensions of corruption, including campaigns to recover the assets of former dictators, and the links between corruption, transnational and economic crime. It deals with corruption as an issue in political theory, and shows how it can be addressed in campaigns for human rights. It also presents case studies of reform efforts in Philippines, India and Thailand. The book explains the doctrines of a well-established domestic anticorruption agency. It is based on research to develop a curriculum for a unique international training course on 'Corruption and Anti-Corruption', designed and taught by academics at The Australian National University, the Australian Institute of Criminology and public servants in the New South Wales Independent Commission Against Corruption.

Architecture and Modern Literature David Anton Spurr.2017-05-09 Architecture and Modern Literature explores the representation and interpretation of architectural space in modern literature from the early nineteenth century to the present, with the aim of showing how literary production and architectural construction are related as cultural forms in the historical context of modernity. In addressing this subject, it also examines the larger questions of the relation between literature and architecture and the extent to which these two arts define one another in the social and philosophical contexts of modernity. Architecture and Modern Literature will serve as a foundational introduction to the emerging interdisciplinary study of architecture and literature. David Spurr addresses a broad range of material, including literary, critical, and philosophical works in English, French, and German, and proposes a new historical and theoretical overview of this area, in which modern forms of meaning in architecture and literature are related to the discourses of being, dwelling, and homelessness.

The Atheist's Bible: Diderot's 'Éléments de physiologie' Caroline Warman.2020-11-16 'Love is harder to explain than hunger, for a piece of fruit does not feel the desire to be eaten': Denis Diderot's *Éléments de physiologie* presents a world in flux, turning on the relationship between man, matter and mind. In this late work, Diderot delves playfully into the relationship between bodily sensation, emotion and perception, and asks his readers what it means to be human in the absence of a soul. The Atheist's Bible challenges prevailing scholarly views on Diderot's *Éléments*, asserting its contemporary philosophical importance, and prompting its readers to inspect more closely this little-known and little-studied work. In this timely volume, Warman establishes the place of Diderot's *Éléments* in the trajectory of materialist theories of nature and the mind stretching back to Epicurus and Lucretius, and explores the fascinating reasons behind scholarly neglect of this seminal work. In turn, Warman outlines the

hitherto unacknowledged dissemination and reception of Diderot's *Éléments*, demonstrating how Diderot's *Éléments* was circulated in manuscript-form as early as the 1790s, thus showing how the text came to influence the next generations of materialist thinkers. This book is accompanied by a digital edition of Jacques-André Naigeon's *Mémoires historiques et philosophiques sur la vie et les ouvrages de Denis Diderot* (1823), a work which, Warman argues, represents the first publication of Diderot's *Éléments*, long before its official publication date of 1875. The *Atheist's Bible* constitutes a major contribution to the field of Diderot studies, and will be of further interest to scholars and students of materialist natural philosophy in the Age of Enlightenment and beyond.

Signature Pieces Peggy Kamuf.2018-03-15 Some contemporary approaches to literature still accept the separation of historical, biographical, external concerns from formal, internal ones. On the borderline that lends this division between inside and outside its apparent coherence is signature. In Peggy Kamuf's view, studying signature will help us to rediscover some of the stakes of literary writing beyond the historicist/formalist opposition. Drawing on Derrida's extensive work on signatures and proper names, Kamuf investigates authorial signature in key writers from Rousseau to Woolf, as well as the implications of signature for the institutions of authorship and criticism.

Conscripts and Deserters Alan I. Forrest.1989 Between the outbreak of war with Austria in 1792 and Napoleon's final debacle in 1814, France remained almost continuously at war, recruiting in the process some two to three million frenchmen--a level of recruitment unknown to previous generations and widely resented as an attack on the liberties of rural communities. Forrest challenges the notion of a nation heroically rushing to arms by examining the massive rates of desertion and avoidance of service as well as their consequences on French society--on military campaigns and the morale of armies, on political opinion at home, on the social fabric of local villages, and on the Napoleonic dream of bringing about a coherent and centralized state.

Marketing Identities Through Language E. Martin.2005-11-30 Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.

Vogue on Yves Saint Laurent Natasha Fraser-Cavassoni.2015-10-06 Originally born in Algeria, Yves Saint Laurent moved to Paris when he was 18, and only three years later he was handpicked by Christian Dior to take the reins as designer of his fashion house. Over time, Saint Laurent resurrected haute couture from the casual mores that predominated in the 1960s, but also offered chic cachet to ready-to-wear clothing. He was among the earliest of designers to incorporate non-European references into his work, and in 1983 he became the first living designer to be feted with a solo exhibition at The Metropolitan Museum of Art in New York. *Vogue on Yves Saint Laurent* is a stellar volume in the series from the editors of *British Vogue*, featuring 20,000 words of original biography and history and studded with more than 80 images from their unique archive of

Creating the Empress Vera Proskurina. 2018-05-30 In *Creating the Empress*, Vera Proskurina examines the interaction between power and poetry in creating the imperial image of Catherine the Great, providing a detailed analysis of a wide range of Russian literary works from this period, particularly the main Classical myths associated with Catherine (Amazon, Astraea, Pallas Athena, Felicitas, Fortune, etc.), as well as how these Classical subjects affirmed imperial ideology and the monarch's power. Each chapter of the book revolves around the major events of Catherine's reign (and some major literary works) that give a broad framework to discuss the evolution of important recurring motifs and images.

Courbet and the Modern Landscape .2006 With its fittingly dramatic design, *Courbet and the Modern Landscape* accompanies the first major museum exhibition specifically to address Gustave Courbet's extraordinary achievement in landscape painting. Many of these carefully selected works produced from 1855 to 1876--gathered from Asia, Europe, and North America--will be new to readers. The catalogue--which accompanies an exhibition at the Getty Museum to be held from February 21 to May 14, 2006--highlights the artist's expressive responses to the natural environment. Essays by the curators examine Courbet's distinctly modern practice of landscape painting. Mary Morton's essay situates his landscapes in relation to his work in other genres, his critical reputation, and his role in establishing a new pictorial language for landscape painting. Charlotte Eyerman's essay investigates how later generations of nineteenth- and twentieth-century artists responded to Courbet's example. The catalogue also includes an essay by Dominique de Font-Reaulx, curator of photographs at the Musee d'Orsay, on the relationship between Courbet's work and landscape photography of the 1850s and 1860s. American Holocaust David E. Stannard. 1993-11-18 For four hundred years--from the first Spanish assaults against the Arawak people of Hispaniola in the 1490s to the U.S. Army's massacre of Sioux Indians at Wounded Knee in the 1890s--the indigenous inhabitants of North and South America endured an unending firestorm of violence. During that time the native population of the Western Hemisphere declined by as many as 100 million people. Indeed, as historian David E. Stannard argues in this stunning new book, the European and white American destruction of the native peoples of the Americas was the most massive act of genocide in the history of the world. Stannard begins with a portrait of the enormous richness and

diversity of life in the Americas prior to Columbus's fateful voyage in 1492. He then follows the path of genocide from the Indies to Mexico and Central and South America, then north to Florida, Virginia, and New England, and finally out across the Great Plains and Southwest to California and the North Pacific Coast. Stannard reveals that wherever Europeans or white Americans went, the native people were caught between imported plagues and barbarous atrocities, typically resulting in the annihilation of 95 percent of their populations. What kind of people, he asks, do such horrendous things to others? His highly provocative answer: Christians. Digging deeply into ancient European and Christian attitudes toward sex, race, and war, he finds the cultural ground well prepared by the end of the Middle Ages for the centuries-long genocide campaign that Europeans and their descendants launched--and in places continue to wage--against the New World's original inhabitants. Advancing a thesis that is sure to create much controversy, Stannard contends that the perpetrators of the American Holocaust drew on the same ideological wellspring as did the later architects of the Nazi Holocaust. It is an ideology that remains dangerously alive today, he adds, and one that in recent years has surfaced in American justifications for large-scale military intervention in Southeast Asia and the Middle East. At once sweeping in scope and meticulously detailed, *American Holocaust* is a work of impassioned scholarship that is certain to ignite intense historical and moral debate.

The End and the Beginning Hermynia Zur Mühlen.2010 First published in Germany in 1929, *The End and the Beginning* is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Mühlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Mühlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

Upheaval Jared Diamond.2019-05-07 A riveting and illuminating Bill Gates Summer Reading pick about how and why some nations recover from trauma and others don't (Yuval Noah Harari), by the Pulitzer Prize-winning author of the landmark bestseller *Guns, Germs, and Steel*. In his international bestsellers *Guns, Germs and Steel* and *Collapse*, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now, in his third book in this monumental trilogy, he reveals how successful nations recover from crises while adopting selective changes -- a coping mechanism more commonly associated with individuals recovering from personal crises. Diamond compares how six countries have survived recent upheavals -- ranging from the forced opening of Japan by U.S. Commodore Perry's fleet, to the Soviet Union's attack on Finland, to a murderous coup or countercoup in Chile and Indonesia, to the transformations of Germany and Austria after World War Two. Because Diamond has lived and spoken the language in five of these six countries, he can present gut-wrenching histories experienced firsthand. These nations coped, to varying degrees, through mechanisms such as acknowledgment of responsibility, painfully honest self-appraisal, and learning from models of other nations. Looking to the future, Diamond examines whether the United States, Japan, and the whole world are successfully coping with the grave crises they currently face. Can we learn from lessons of the past? Adding a psychological dimension to the in-depth history, geography, biology, and anthropology that mark all of Diamond's books, *Upheaval* reveals factors influencing how both whole nations and individual people can respond to big challenges. The

result is a book epic in scope, but also his most personal yet.
