Hard Lessons: the Iraq Reconstruction Experience Stuart W. Bowen.2009-05 A combination of poor planning, weak oversight and greed cheated U.S. taxpayers and undermined American forces in Iraq and Afghanistan. U.S. taxpayers have paid nearly \$51 billion for projects in Iraq, including training the Iraqi army and police and rebuilding Iraq's oil, electric, justice, health and transportation sectors. Many of the projects did not succeed, partly because of violence in Iraq and friction between U.S. officials in Washington and Iraqi officials in Baghdad. The U.S. gov't. was neither prepared for nor able to respond quickly to the ever-changing demands of stabilizing Iraq and then rebuilding it. This report reviews the problems in the war effort, which the Bush admin. claimed would cost \$2.4 billion. Charts and tables.

Performance Budgeting for State and Local Government Janet M. Kelly,William C. Rivenbark.2003 This text describes performance budgeting as the integration of the components of performance management - planning, performance measurement, benchmarking, and evaluation - into the framework of state and local government budgeting. The authors present performance budgeting not as a stand-alone budgeting technique, but as an extension of the traditional budget process that reconciles financial and operational accountability. The authors make frequent references to their original research and personal experiences with performance measurement, citizen satisfaction surveys, and financial management practices. They introduce findings from a nationwide survey of public managers throughout the text to illustrate how managers actually use performance data for decision-making. The book also includes several case studies in performance budgeting as well as interviews with managers and practitioners.

Designed for use in undergraduate and graduate level courses in public budgeting/financial management, this practical text will be equally useful for any student or practitioner involved in performance-based management.

Hard Lessons United States. Office of the Special Inspector General for Iraq Reconstruction. 2009 Product Description: The billions of dollars expended in Iraq constitute the largest relief and reconstruction exercise in American history. SIGIR's lessons learned capping report characterizes this effort in four phases (pre-war to ORHA, CPA, post-CPA/Negroponte era, and Khalilzad, Crocker, and the Surge). From this history, SIGIR forwards a series of conclusions and recommendations for Congress to consider when organizing for the next post-conflict reconstruction situation. Over the past five years, the United States has provided nearly fifty billion dollars for the relief and reconstruction of Iraq. This unprecedented rebuilding program, implemented after the March 2003 invasion, was developed to restore Iraq's essential services, build Iraq's security forces, create a market-based economy, and establish a democratic government--all in pursuit of U.S. interests in a stable and free Iraq. Did the U.S. rebuilding program achieve its objectives? Was the money provided well-spent or wasted? What lessons have we learned from the experience? **Hard Lessons: The Iraq Reconstruction Experience**, a report from the Special Inspector General for Iraq Reconstruction (SIGIR), answers these and other important questions by presenting a comprehensive history of the U.S. program, chiefly derived from SIGIR's body of extensive oversight work in Iraq, hundreds of interviews with key figures involved with the reconstruction program, and thousands of documents evidencing the reconstruction work that was - or was not - done. The report examines the limited pre-war planning for reconstruction, the shift from a large infrastructure program to a more community-based one, and the success of the Surge in 2007 and beyond. **Hard Lessons** concludes that the U.S. government did not have the structure or resources in place to execute the mammoth relief and reconstruction plan it took on in 2003. The lessons learned from this experience create a basis for reviewing and reforming the U.S. approach to contingency relief and reconstruction operations.

Ace the Interview, Land a Librarian Job Robin O'Hanlon. 2016-01-11 One of the most critical elements of achieving a successful career, interviewing with poise and tenacity, is a skill to be learned—and this practical guide leads readers through that process, step by step. In a competitive job market, all candidates need to prepare to succeed. This certainly applies to job seekers looking for professional librarian positions in public, academic, and/or special libraries—especially recent MLIS graduates and mid-career job-changers. Designed for today's competitive job market, this practical guidebook provides job applicants with practical tips and effective strategies for successful interview preparation and execution specific to seeking librarian positions. Unlike generic how to interview guides, this book recognizes that there is no one-size-fits-all interviewing method and teaches the techniques for excelling at the unique aspects of interviews for specific librarian positions such as reference librarian, electronic resources librarian, outreach librarian, youth services librarian, and adult programming librarian. The book opens with an overview of what is expected during today's librarian interview followed by descriptions by four experienced library directors of what makes an interview truly great. This guidebook includes 100 actual library interview questions to help readers best prepare for the specific position they seek and also contains a chapter that identifies mistakes all rookie librarians should avoid making.
