**The Barcelona Complex** Simon Kuper.2022-08-16 With rare and unrivaled access, bestselling coauthor of *Soccernomics* and longtime Financial Times journalist Simon Kuper tells the story of how FC Barcelona became the most successful club in the world—and how that era is now ending FC Barcelona is not just the world's highest grossing sports club, it is simply one of the most influential organizations on the planet. At last count, it had approximately 214 million social media followers, more than any other sports club except Real Madrid CF—and by one earlier measure, more than all thirty-two NFL teams combined. It has more in common with multinational megacompanies like Netflix or small nation-states than it does with most soccer teams. No wonder its motto is “More than a club.” But it was not always so. In the past three decades, Barcelona went from a regional team to a global powerhouse, becoming a model of sustained excellence and beautiful soccer, and a consistent winner of championships. Simon Kuper unravels exactly how this transformation took place, paying special attention to the club's two biggest stars, Johan Cruyff and Lionel Messi, who is arguably the greatest soccer player of all time. Messi joined Barça at age thirteen and, more than anyone, has been the engine and standard-bearer of Barcelona's glory. But his era is coming to an end—and with it, a once-in-a-lifetime golden run. This book charts Barça's rise and fall. Like many world-beating organizations, FC Barcelona closely guards its secrets, granting few outsiders access to the Camp Nou, its legendary home stadium. But after decades of writing about the sport and the club, Kuper was given access to the inner sanctum and the people behind the scenes who strive daily to keep Barcelona at the top. Erudite, personal, and capturing all the latest upheavals, his portrait of this incredible institution goes beyond soccer to understand FC Barcelona as a unique social, cultural, and political phenomenon.

**A Moment of Equality for Latin America?** Barbara Fritz,Lena Lavinas.2016-03-09 Unlike other regions around the world, several Latin American countries have managed to reduce income inequality over the last decade. Higher growth rates and growing employment, but also innovative wage policies and social programs, have contributed to reducing poverty and narrow income disparities. Yet, despite this progress, nation-states in the region demonstrate little capacity to substantially change their patterns of deeply rooted inequalities. Focusing on the limits and challenges of redistributive policies in Latin America, this volume synthesizes and updates the discussion of inequality in the region, introducing the perspective of global and transnational interdependencies. The book explores the extent to which redistributive policies have been interlinked with the provision and quality of public goods as well as with structural changes of the productive sector. Inspired by structuralist and neostructuralist thinking of Latin American economists, such as Raúl Prebisch and Celso Furtado, authors question the redistributive impact of the interplay of recent macroeconomic, fiscal and social policies, particularly under left and center-left administrations committed to greater equality. Bringing together experts in social, fiscal and macroeconomic policies to investigate the interdependent and global character of inequalities, this book will appeal to scholars of sociology, economics, development and politics with interests in Latin America, inequality and public policy.

Alejandria-Gonzalez,Subharati Ghosh,Nicolas Sacco.2018-12-18 This book explores how the forces of development have shaped the experience of aging in countries in the global south. It points to the challenges and opportunities that lie in developing innovative, sustainable programs to support elderly care services.

[Growing Smarter](#) World Bank.2018-04-13 One-quarter of the world's school-age children live in East Asia and Pacific. During the past 50 years, some economies in the region have successfully transformed themselves by investing in the continuous upgrading of the knowledge, skills, and abilities of their workforce. Through policy foresight, they have produced graduates with new levels of knowledge and skills almost as fast as industries have increased their demand for skilled workers. Yet the success of these high-performing systems has not been replicated throughout the region. Tens of millions of students are in school but not learning, and as many as 60 percent of students remain in school systems that are struggling to escape from the global learning crisis or in systems where performance is likely poor. Many students in these systems fail to reach basic levels of proficiency in key subjects and are greatly disadvantaged because of it. *Growing Smarter: Learning and Equitable Development in East Asia and Pacific* focuses on the experiences of economies in the region that have been able to expand schooling and learning and showcases those that have managed to pursue successful education reforms at scale. By examining these experiences, the report provides both diagnoses and detailed recommendations for improvement not only for education systems within East Asia and Pacific but also for countries across the globe. In East Asia and Pacific, the impressive record of success in education in some low- and middle-income countries is proof of concept that schooling in resource-constrained contexts can lead to learning for all. This report identifies the policies and practices necessary to ensure that students learn and suggests how countries can improve learning outcomes.

The contributors focus on documentary research of both quantitative and qualitative data on Thai social change as a consequence of globalization and digital technology. They first provide a general overview of social media and communication in the country. Next, the authors go on to explore the specifics of digital communication. This includes a look at its impact on the various ways of Thai communication given politico-economic and religious influences.

**BUDGETING FOR A THAI AUTONOMOUS UNIVERSITY** WASAN KANCHANAMUKDA.2014-12-31 This unique book analyses the bold attempts of the Thai Government to encourage State universities to move to autonomous governance and management. Systems used for universities that are similar to government departments are often inadequate for the increased responsibility of autonomy. In this book, Dr Wasan details the process of transition, including some pitfalls, over a five-year period as Thaksin University evolved to become 'autonomous'. Including history, accounting and foreign inputs, the book provides a narrative of the policy and procedural changes needed to make autonomy work. Complemented by surveys of two other universities and users of the new procedures, the book concludes that the continuous improvement resulting from proper budgeting offers a benchmark for government universities seeking to improve their efficiency and effectiveness. It is a wise book insofar as it does not claim that there is one path to follow. Those concerned with university management, particularly in Thailand and the region, will find this is a book they keep at hand for many years.

*Cross-Cultural Performance Management* Mahmoud Moussa, Thomas Doumani, Adela McMurray, Nuttawuth Muenjohn, Ling Deng. 2022-02-10 The book's foundations informing its content are anchored to evidence-based primary data, which was collected in the Thailand context utilising interview and case study techniques. The data has been internationally scrutinized by our peers to validate its truthfulness and integrity. In this way, our book sheds reliable and valid new understandings on the complex relationship between performance management and the effects of culture. The book transcends beyond conceptual discussions as it is anchored to evidence-based data to inform the direct or obvious cultural value differences exploring the very concept of efficacy and how culture impacts on the way in which we perceive what constitutes the pursuit of efficacious outcomes in managing employees. Therefore, this novel research design offers integrated insights from practitioners, and academics, in the field of management within organisations from various Thai industry contexts.

**Asia Pacific Graduate Education** Deane E. Neubauer, Prompilai Buasuwan. 2016-05-11 This volume examines the changes taking place within graduate education in the Asia Pacific Region. A collection of essays by distinguished scholars from eight Asia Pacific nations links profound changes occurring in the economies and societies of the region to the many changes taking place within higher education. Focusing on how the dynamics of a changing global economy are affecting the ways higher education institutions are responding, particular changes are seen to be taking place in graduate education as many societies experience the need to produce graduates of high quality with elevated qualifications. Such changes are not without challenge or difficulty as issues of finance. Questions of appropriate directions of innovation and overall higher education capacity continue to frame the broader issue of the changing nature of graduate education.

**Cash in East Asia** Frank Rövekamp, Moritz Bälz, Hanns Günther Hilpert. 2017-08-25 This book presents contributions by leading academics and practitioners from central banks to shed light on the function and impact of cash in Asian countries. It explores the impact of cash on society, the role of cash in monetary policy, and the future of cash in various monetary systems, contrasting case studies from China, Japan, Korea, and Singapore with experiences from Europe. Recently the role of cash in the economy has become a much-discussed topic in Europe, but the issue is also of considerable relevance in Asia. Singapore and South Korea, for example, are relatively advanced in the use of cashless payments for daily exchanges, while countries like Japan still largely rely on cash for a wide range of transactions. Some economists argue for the abolition of cash so as to facilitate transactions, reduce the monetary scope of criminal transactions, and expand the available options for monetary policy through negative interest rates. Opposing voices claim that such a step would reduce the freedom of individuals and lead to a greater potential for monetary repression. The abolition of cash could also significantly impact the public's monetary psychology, thereby influencing their inflation expectations, portfolio structure, saving behavior, and other important monetary parameters.

*OECD Economic Surveys: Thailand 2020 Economic Assessment* OECD. 2020-10-05 Thailand has made impressive economic and social progress over several decades. However, the COVID-19 crisis has interrupted this progress. Thanks to its sound macroeconomic policy framework, Thailand was well placed to respond rapidly to the sharp economic downturn. Nevertheless, achieving high-income country status will require, in addition to a strong recovery programme, a set of policy reforms focused on productivity growth and human capital accumulation. Thailand has made remarkable progress in expanding access to education, and the share of highly educated workers has increased significantly. Nevertheless, because of skills mismatches, substantial labour shortages have prevailed in a range of occupations and industries, which makes it important to improve vocational education and adult training programmes. As the demand for services has become important globally, Thailand has an opportunity to boost its exports of services, diversify its economic activity, and therefore become more resilient in the face of unexpected shocks. This would involve a focus on digital services and business-to-business services, which represent a large share of the value of manufacturing products. Focus on human capital, skills, digital technology, and high-value services would help Thailand resume strong economic growth and social progress after the COVID-19 crisis. SPECIAL FEATURES: HUMAN CAPITAL; TRADE IN SERVICES

**Health Labor Market Analyses in Low- and Middle-Income Countries** Richard M. Scheffler, Christopher H. Herbst, Christophe Lemiere, Jim Campbell. 2016-10-19 This book, produced jointly by the World Bank, the University of California, Berkeley, and the WHO, aims to provide decision-makers at sub-national, national, regional and global levels with additional insights into how to address their workforce challenges rather than describe them. In order to optimize and align HRH investments and develop targeted policy responses, a thorough understanding of unique, country-specific labor market dynamics and determinants of these dynamics is critical. Policies need to take into account the fact that workers are economic actors, responsive to different levels of compensation and opportunities to generate revenue found in different sub-labor markets. Policies need to take into account the behavioral characteristics of the individuals who provide health care, but also the individuals who consume health care services and the institutions that employ health personnel. In other words, it is necessary to understand the determinants of both the supply (numbers of health workers willing to work in the health sector) and the demand for health workers (resources available to hire health workers), how these interact, and how this interaction varies in different contexts. This interaction will determine the availability of health personnel, their distribution as

well as their performance levels, thus ensuring stronger health systems capable to deliver universal health coverage. The book is structured to be of use to researchers, planners, and economists who are tasked with analyzing key areas of health labor markets, including overall labor market assessments as well as and more narrow and targeted analyses of demand and supply (including production and migration), performance, and remuneration of health workers. The chapters, written by a number of internationally renowned experts on Human Resources for Health, discuss data sources and empirical tools that can be used to assess health labor markets across high-, middle- or low-income countries, but draws primarily from examples and case-studies in LMICs.

**Education in Thailand** Gerald W. Fry.2018-11-01 This interdisciplinary book offers a critical analysis of Thai education and its evolution, providing diverse perspectives and theoretical frameworks. In the past five decades Thailand has seen impressive economic success and it is now a middle-income country that provides development assistance to poorer countries. However, educational and social development have lagged considerably behind its globally recognized economic success. This comprehensive book covers each level of education, such as higher and vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education, multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary chapter suggests strategies to enable Thailand to escape "the middle income trap" and enhance the quality of its education to ensure its long-term developmental success.

**Lao PDR** Asian Development Bank.2017-11-01 The Lao People's Democratic Republic (Lao PDR) has shown remarkable progress by consistently building itself into a market-oriented economy, with economic growth in 1986-2016 averaging around 6.5% per annum. The rapid and sustained growth brought about changes in the structure of output, but did not alter job composition: resource-based products still dominate in industry, low value-added jobs in services, and 65% of the labor force in agriculture. This country diagnostic study provides comprehensive analysis and identifies promising new drivers of growth which the Lao PDR can develop to diversify its production structure and speed up structural transformation.

**The Report: Thailand 2016** Oxford Business Group.2016-04-15 According to the UN Conference on Trade and Development, Thailand has been among eight priority destinations for foreign investment since 2012. Factors weighing on growth in 2016 will include an ongoing economic slowdown, weakening global demand for Thai exports and growing levels of consumer debt. The government's investment promotion agenda, while perhaps more complicated than in previous years, also addresses the dual challenge of labour shortages and the middle-income trap through promotion of both labour-intensive and high-tech industries, while potential membership in two major trade blocs could see regional and international exports soar in the coming years. Although the near-term forecast is dampened by global volatility, weakening demand and the impact of China's slowdown, trade in Thailand will remain on an upwards trajectory in 2016, and investment, though unlikely to meet government targets, is nonetheless expected to bounce back from a challenging 2015.

**Thailand's Buddhist Kingship in the 20th and 21st Centuries** Marie-Sybille de Vienne.2022-03-31 Based on two decades of fieldwork, including over a hundred interviews with various political and economic actors at different social levels, as well as documentary and media analysis, this volume presents an account of the Buddhist monarchy in Thailand, offering a sociology of elites, an analysis of the economic influence of the Crown and an examination of the magic and ritual dimension of kingship. An exploration of the role and status of the Palace over the last century, whether as a guarantor of democracy, a symbol of stability, a source of power or an object of popular discontent, Thailand's Buddhist Kingship in the 20th and 21st Centuries will appeal to scholars of sociology and anthropology with interests in material religion, politics and Southeast Asian studies.

**Between the Two Oceans of Indo-Pacific** Chirathivat, Suthipand,Tingsabhat, Charit,De, Prabir.2022-09-15 The idea of connectivity is an integral part of regionalism in international trade and integration. The focus in this book is particularly on the so-called southern East - West Economic Corridor which consists of the connections between the southern part of Myanmar and the western part of the central region of Thailand. Between the Two Oceans of Indo-Pacific covers a diverse range of topics in the fields of geography, history, archaeology, international trade, tourism, migration and infrastructure for transport. This book is an effort to understand these for a better future for ASEAN as well as India. The findings of this book may help strengthen the ASEAN integration process on its way towards 2025.

**Sufficiency Thinking** Gayle C. Avery.2020-07-17 Our world is under pressure, with growing inequalities in wealth and access to food and clean water. We depend too heavily on polluting fuels and diminishing natural resources. Traditional cultural practices are being swamped by global popular culture. The Thai model of sufficiency thinking aims to transform the mindset of a whole population to achieve the seemingly impossible: enriching everyone's lives in a truly sustainable way. Innovative management practices developed by King Bhumibol Adulyadej of Thailand have been applied across Thailand in agriculture, education, business, government and community organisations for over two decades. In this book, chapters written by eminent Thai scholars explain sufficiency thinking and review its implementation in different sectors including community development, business, agriculture, health care, schools, and even in prisons. Is Thailand unique in having discovered the holy grail of a more responsible form of capitalism? No, it is not, but it is the first country whose government has adopted this kind of thinking as national policy. '...we obviously need to revise dramatically our thinking about the outlines of a just economy and a decent society in which everyone can lead dignified lives. Sufficiency Thinking provides creative approaches to this quandary and this important volume is a brilliant addition to the growing literature critical of mainstream business-as-usual ideology.' - John Komlos, Professor Emeritus, University of Munich

**Innovative ICT Industrial Architecture in East Asia** Hitoshi Hirakawa,Nobuhiro Takahashi,Ferdinand C. Maquito,Norio Tokumaru.2016-11-21 This book aims to shed light on the potentially innovative ICT (information and communication technology) architectures from an East Asian regional perspective. The business environment brought about by the development of ICT intensified global competition and caused dramatic changes in the industrial architecture. Firms that are involved in manufacturing and maintenance of ICT hardware and that offer services for software development are continuously being created, giving rise to the provision of new and diverse services to an increasingly growing East Asian regional market. Such industrial activities are advancing the shift from an old to a new industrial architecture. Some parts of emerging economies have grasped this edge on economic globalization and informatization and have adopted business models that enable them to enter the world economy. Entering this century, China, the Philippines, and Vietnam in East Asia have been rapidly expanding their ICT-BPO (Business Process Outsourcing) businesses as destinations of offshoring of service activities by firms in the advanced economies, following India's example. Policy makers and firms in those countries are also meeting the challenge of catching up with advanced economies through the development of such industries. It has enabled those economies to exploit new possibilities of further development, which may mean a new stage of manufacturing cum services in an ICT- and

knowledge-based economy.

**Routledge Handbook of Contemporary Thailand** Pavin Chachavalpongpun.2019-10-17 The Routledge Handbook of Contemporary Thailand is a timely survey and assessment of the state of contemporary Thailand. It underlines emerging issues at this critical juncture in the kingdom and focuses on the history, politics, economy, society, culture, religion and international relations of the country. A multidisciplinary approach, with chapters written by experts on Thailand, this handbook is divided into the following sections. Migrating to Opportunity Mauro Testaverde,Harry Moroz,Claire H. Hollweg,Achim Schmillen.2017-10-02 The movement of people in Southeast Asia is an issue of increasing importance. Countries of the Association of Southeast Asian Nations (ASEAN) are now the origin of 8 percent of the world's migrants. These countries host only 4 percent of the world's migrants but intra-regional migration has turned Malaysia, Singapore, and Thailand into regional migration hubs that are home to 6.5 million ASEAN migrants. However, significant international and domestic labor mobility costs limit the ability of workers to change firms, sectors, and geographies in ASEAN. This report takes an innovative approach to estimate the costs for workers to migrate internationally. Singapore and Malaysia have the lowest international labor mobility costs in ASEAN while workers migrating to Myanmar and Vietnam have the highest costs. Singapore and Malaysia's more developed migration systems are a key reason for their lower labor mobility costs. How easily workers can move to take advantage of new opportunities is important in determining how they fare under the increased economic integration planned for ASEAN. To study this question, the report simulates how worker welfare is affected by enhanced trade integration under different scenarios of labor mobility costs. Region-wide, worker welfare would be 14 percent higher if barriers to mobility were reduced for skilled workers, and an additional 29 percent if barriers to mobility were lowered for all workers. Weaknesses in migration systems increase international labor mobility costs, but policy reforms can help. Destination countries should work toward systems that are responsive to economic needs and consistent with domestic policies. Sending countries should balance protections for migrant workers with the needs of economic development.

**Advances in Human Factors and Ergonomics in Healthcare and Medical Devices** Nancy J. Lightner.2018-06-22 This book shows how human factors and ergonomic principles have been transforming healthcare. It reports on the design of systems and devices to improve quality, safety, efficiency, and effectiveness in patient care, and discusses findings related to improving organizational outcomes in a healthcare setting, as well as approaches for analyzing and modeling those work aspects that are unique to healthcare. Based on the AHFE 2018 International Conference on Human Factors and Ergonomics in Healthcare and Medical Devices, held on July 21–25, 2018, in Orlando, Florida, USA, the book highlights the physical, cognitive and organizational aspects of human factors and ergonomic applications, presenting various perspectives, including those of clinicians, patients, health organizations, and insurance providers. *A Critical Study of Thailand's Higher Education Reforms* Rattana Lao.2015-05-15 This book offers a critical examination of contemporary higher education reforms in Thailand situated in the broader historical, socio-economic and political changes. Through a qualitative case study with three methods of inquiry, this book explores why different 'global education policies' such quasi-privatisation, internationalization, as quality assessment (QA) have resonated in Thailand higher education sector. Grounded in policy borrowing and lending, this book uses the politics, economics and culture of borrowing to analyse major reforms in Thailand for the past one hundred years. It is argued that historical legacy, policy contexts and belief systems of policy elites play pivotal roles in facilitating policy changes or the lack thereof. While historical analysis elucidates that the Thai state has always been an active borrower of western ideas, the perseverance of the 'Thai-ness' discourse has often been used to suggest its so-called independence and idiosyncrasy. This in-depth analysis of the Thai case aims to contribute to the critical studies in Asian education, comparative higher education, policy borrowing and lending and Thai studies. The Culture of Borrowing intensively studies the policy appropriation in the Thai education system by analysing: • Selective Borrowing and the Historical Development of Thai Higher Education • The Asian Economic Crisis as Window of Opportunity: Autonomous University • Internationalization of Teaching: Quantitative and Qualitative Challenges • The Emergence of Quality Policies and their Rationales • The Intended and Unintended Consequences of Quality Policies This book will appeal to researchers in Education, particularly to scholars studying educational policies within the context of tertiary education. It will also interest scholars specialising in Asian and South-east Asian Studies.

**Austin to ATX** Joe Nick Patoski.2019-01-23 In this gonzo history of the “City of the Violet Crown,” author and journalist Joe Nick Patoski chronicles the modern evolution of the quirky, bustling, funky, self-contradictory place known as Austin, Texas. Patoski describes the series of cosmic accidents that tossed together a mashup of outsiders, free spirits, thinkers, educators, writers, musicians, entrepreneurs, artists, and politicians who would foster the atmosphere, the vibe, the slightly off-kilter zeitgeist that allowed Austin to become the home of both Armadillo World Headquarters and Dell Technologies. Patoski’s raucous, rollicking romp through Austin’s recent past and hipster present connects the dots that lead from places like Scholz Garten—Texas’ oldest continuously operating business—to places like the Armadillo, where Willie Nelson and Darrell Royal brought hippies and rednecks together around music. He shows how misfits like William Sydney Porter—the embezzler who became famous under his pen name, O. Henry—served as precursors for iconoclasts like J. Frank Dobie, Bud Shrake, and Molly Ivins. He describes the journey, beginning with the search for an old girlfriend, that eventually brought Louis Black, Nick Barbaro, and Roland Swenson to the founding of the South by Southwest music, film, and technology festival. As one Austinite, who in typical fashion is simultaneously pursuing degrees in medicine and cinematography, says, “Austin is very different from the rest of Texas.” Many readers of Austin to ATX will have already realized that. Now they will know why.
