**Sirius** Jay B. Holberg.2007-02-22 This book tells two stories. The first and most obvious is why the star known as Sirius has been regarded as an important fixture of the night sky by many civilizations and cultures since the beginnings of history. A second, but related, narrative is the prominent part that Sirius has played in how we came to achieve our current scientific understanding of the nature and fate of the stars. This is the first book to integrate the cultural history of Sirius with modern astrophysics in a way which provides a realistic view of how science progresses over time.

**Europe and the Black Sea Region** Dominik Gutmeyr.2019-05 When the scientific study of the Black Sea Region began in the late 18th and early 19th centuries, initially commissioned by adjacent powers such as the Habsburg and the Russian empires, this terra incognita was not yet considered part of Europe. The eighteen chapters of this volume show a broad range of thematic foci and theoretical approaches - the result of the enormous richness of the European macrocosm and the BSR. The microcosms of the many different case studies under scrutiny, however, demonstrate the historical dimension of exchange between the allegedly opposite poles of 'East' and 'West' and underscore the importance of mutual influences in the development of Europe and the BSR.

**Journey Through Saxony** Tina Herzig,Sylvia Gehlert,Horst Herzig.2004 Saxony shines with its magnificent cities and fantastic landscapes in this striking travel companion. The metropolis on the Elbe is portrayed as bursting with Saxon spirit and historic monuments of European note, among them the Zwinger, Taschenbergpalais, and the palaces of Moritzburg and Pillnitz—all of them testimonies to the riches once harvested in the region's silver mines. This handbook documents how Saxony continues to further its long history as a center of trade, with the Choir of St. Thomas and the Gewandhausorchester nurturing a valued musical tradition. Chemnitz and Zwickau are featured as the economic and cultural driving forces of West Saxony, and Meißen as the site where “white gold” is still produced at the famous Royal Saxon Porcelain Manufacturers. Capturing the region's

spectacular scenery, this guide travels from the mountains of the Erzgebirge to the castles dotted about the Saxon heathlands and from the Vogtland to Upper Lusatia. The area's natural beauty is celebrated, manifested also in the bizarre rock formations of the Elbsandsteingebirge, the idyllic river meadows of the Mulde, and the low mountains around Zittau. Additional features focus on famous Saxons from Johann Sebastian Bach to Karl May, the great powers of Augustus the Strong, the traditions of the Erzgebirge, the language of the Saxons, and local specialties such as "Stollen" and "Leipziger Allerlei."

**Cosmogony** Lucy Ives.2021-03-09 An energetic, witty collection of stories where the supernatural meets the anomalies of everyday life--deception, infidelity, lost cats, cute memes, amateur pornography, and more. There are analogies between being female and being left-handed, I think, or being an animal. A woman answers a Craigslist ad (to write erotic diaries for money). A woman walks onto a tennis court (from her home at the bottom of the ocean). A woman goes to the supermarket and meets a friend's husband (who happens to be an immortal demon). A woman goes for a run (and accidentally time travels). Cosmogony takes accounts of so-called normal life and mines them for inconsistencies, deceptions, and delights. Incorporating a virtuosic range of styles and genres (Wikipedia entry, phone call, physics equation, encounters with the supernatural), these stories reveal how the narratives we tell ourselves and believe are inevitably constructed, offering a glimpse of the structures that underlie and apparently determine human existence.

[Introduction to Air Transport Economics](#) Bijan Vasigh, Ken Fleming. 2016-05-06 Introduction to Air Transport Economics: From Theory to Applications uniquely merges the institutional and technical

aspects of the aviation industry with their theoretical economic underpinnings. In one comprehensive textbook it applies economic theory to all aspects of the aviation industry, bringing together the numerous and informative articles and institutional developments that have characterized the field of airline economics in the last two decades as well as adding a number of areas original to an aviation text. Its integrative approach offers a fresh point of view that will find favor with many students of aviation. The book offers a self-contained theory and applications-oriented text for any individual intent on entering the aviation industry as a practicing professional in the management area. It will be of greatest relevance to undergraduate and graduate students interested in obtaining a more complete understanding of the economics of the aviation industry. It will also appeal to many professionals who seek an accessible and practical explanation of the underlying economic forces that shape the industry. The second edition has been extensively updated throughout. It features new coverage of macroeconomics for managers, expanded analysis of modern revenue management and pricing decisions, and also reflects the many significant developments that have occurred since the original's publication. Instructors will find this modernized edition easier to use in class, and suitable to a wider variety of undergraduate or graduate course structures, while industry practitioners and all readers will find it more intuitively organized and more user friendly.

**Affective Health and Masculinities in South Africa** Hans Reihling. 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an

analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

FireSigns Steven Skaggs.2017-02-24 Semiotics concepts from a design perspective, offering the foundation for a coherent theory of graphic design as well as conceptual tools for practicing designers. Graphic design has been an academic discipline since the post-World War II era, but it has yet to develop a coherent theoretical foundation. Instead, it proceeds through styles, genres, and imitation, drawing on sources that range from the Bauhaus to deconstructionism. In FireSigns, Steven Skaggs offers the foundation for a semiotic theory of graphic design, exploring semiotic concepts from design and studio art perspectives and offering useful conceptual tools for practicing designers. Semiotics is the study of signs and significations; graphic design creates visual signs meant to create a certain effect in the mind (a “FireSign”). Skaggs provides a network of explicit concepts and terminology for a practice that has made implicit use of semiotics without knowing it. He offers an overview of the metaphysics of visual perception and the notion of visual entities, and, drawing on the pragmatic semiotics of the philosopher Charles Sanders Peirce, looks at visual experience as a product of the action of signs. He introduces three conceptual tools for analyzing works of graphic design—semantic profiles, the functional matrix, and the visual gamut—that allow

visual “personality types” to emerge and enable a greater understanding of the range of possibilities for visual elements. Finally, he applies these tools to specific analyses of typography.

*Wide Awake Hand Surgery* Donald Lalonde.2016-01-27 Wide awake hand surgery (WALANT) represents a breakthrough in surgery of the hand and upper extremity. It can be performed with no preoperative testing, no intravenous insertion, and no monitoring. Like a dental procedure, the patient simply gets up and goes home after the procedure. Presented in an easy-to-read, bullet-point format, *Wide Awake Hand Surgery* guides surgeons through all aspects of WALANT. The book covers a wide variety of topics including minimal pain injection of local anesthesia, nerve and tendon decompression, wrist surgery, repair of lacerated tendons, tendon transfers, finger fractures, lacerated nerves, metacarpal fractures, arthritis surgery and complex reconstructions in hand surgery. The book includes more than 150 step-by-step surgical and instructional videos as well as numerous color clinical photographs. Color drawings clearly guide the surgeon to the correct anatomic locations for anesthetic injections, and the book includes an atlas of tumescent local anesthesia distribution anatomy. Featuring a complimentary eBook, this valuable resource offers chapters written by worldwide experts, making it the definitive guide to wide awake hand surgery.

**Luna Cognita** Robert A. Garfinkle.2020-03-13 All three volumes sold as a combined set for a one-time purchase! This comprehensive three-volume set takes you on an incomparable journey of our closest celestial neighbor. Not since the golden age of 19th-century lunar guidebooks has one author managed to cover the Moon in such detail as this all-in-one handbook. Volume 1 begins with a

section on the Moon's place in human history, mythology and lore, before gravitating closer to the Moon itself through scientific sections on the Earth-Moon system, lunar motions and cycles. Following these are technical chapters on how to purchase, use and care for lunar observing and photography equipment. Techniques for observing the Moon (both with the naked eye and optical instruments) are detailed as the reader approaches the Moon's surface on this visual tour-de-force. A close-up exploration of the Moon is the result. The "crater-hop" chapters in Volumes 1 and 2 discuss the physical aspects of the Moon's features, offering brief biographical information on the person for whom the feature is named, as well as how each individual was involved in the development of science and selenography from ancient to modern times. Volume 3 contains a plethora of useful appendices that cover a range of topics, from catalogues of lunar features such as nearside lunar domes to a comprehensive list of publishers and observing organizations. Luna Cognita goes far beyond any recent work in both breadth and depth of coverage on the Moon. Written in an accessible, engaging manner for readers of all backgrounds and levels of expertise, this handbook is thus an invaluable resource for anybody who looks up at the glowing sphere in the night sky and wants to learn more about the "Known Moon."

*Art and the Artist in Society* Jane Elizabeth Alberdeston, Elsa Luciano Feal, José Jiménez-Justiniano. 2013-07-16 *Art and Artist in Society* is a compilation of essays that examine the nexus between artists, the art they create and society. These essays consider how art has changed its form and role both to accommodate newer trends and to fully participate in society. Divided into six thematic sections, the book examines the works of a diverse group of artists working in a range of art forms, such as writers Milan Kundera and Judith Ortiz Cofer, filmmakers Humberto Solás and

Walter Salles, performers/photographer Daniel Joseph Martínez and feminist-activists Suzanne Lacy and Leslie Labowitz. The analyses of the work of these artists and other artists offer readers an opportunity to explore a number of important issues in art today, such as the representation of the Other, the exploration of alternative sources of knowledge and the construction of the self. For the array of works it analyzes, this book offers fascinating insights into the art and the artists of the 20th and 21st centuries.

**Achtung-Panzer!** Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Language Ideologies and Media Discourse* Sally Johnson,Tommaso M. Milani.2009-12-24 The study of language ideologies has become a key theme in sociolinguistics over the past decade. It is the study of the relationship between representations of language, on the one hand, and broader aesthetic, economic, moral and political concerns, on the other. Research into the particular role

played by media discourse in the construction, reproduction and contestation of such ideologies has been widely scattered - this book brings together this emerging field. It considers how, in an era of global communication technologies, the media - by which we understand the press, radio, television, cinema, the internet and multimodal gaming - help to disseminate preferred uses of, and ideas about, language. The book is tightly focussed on the relationship between language ideologies and media discourse, together with the methods and techniques required for the analysis of that relationship. It also places emphasis on television and new-media texts, incorporating and expanding upon recent theoretical insights into visual communication and multimodal discourse analysis. International in scope, this book will also be of interest to students from a wide range of fields including linguistics (particularly sociolinguistics and linguistic anthropology), modern languages, education, media studies, communication studies and cultural theory.

The Black Sea Encyclopedia Sergei R. Grinevetsky, Igor S. Zonn, Sergei S. Zhiltsov, Aleksey N. Kosarev, Andrey G. Kostianoy. 2014-09-30 This publication is devoted to the natural feature - the Black Sea and its littoral states. At the same time the Azov Sea is also considered here. This region is the focus of many geopolitical, economic, social and environmental issues that involve not only the countries coming out to the Black and Azov Seas, but other world countries, too. This publication contains over 1500 articles and terms providing descriptions of geographical and oceanographic features, cities, ports, transport routes, marine biological resources, international treaties, national and international programs, research institutions, historical and archaeological monuments, activities of prominent scientists, researchers, travelers, military commanders, etc. who had relation to the Black Sea. It includes a multi-century chronology of the events that became the outstanding milestones in the history of development of the Black Sea - Azov Sea region.

**Europe's Atlantic Coast** .2015 One motif, two photographers, two styles: Michael Pasdzior and Peter Haefcke traveled Europe's Atlantic coast in the past eight years. The result is a photographic art book that lives from its contrasts. While Haefcke takes his pictures in black and white, Pasdzior photographs in color. The Atlantic coast presents itself just as contradictory: Sometimes original, wild and rough, sometimes altered by human hands and embossed. The moody photographs and the elaborate design as a turning book make Europe's Atlantic Coast equally attractive for photography fans and coast-lovers.

The Islamic State in Khorasan Antonio Giustozzi.2018-08-01 So-called Islamic State began to appear in what it calls Khorasan (Afghanistan, Pakistan, Central Asia, Iran and India) in 2014. Reports of its presence were at first dismissed as propaganda, but during 2015 it became clear that IS had a serious presence in Afghanistan and Pakistan at least. This book, by one of the leading experts on Islamist insurgency in the region, explores the nature of IS in Khorasan, its aim and strategies, and its evolution in an environment already populated by many jihadist organisations. Based on first-hand research and numerous interviews with members of IS in Khorasan, as well as with other participants and observers, the book addresses highly contentious issues such as funding, IS's relationship with the region's authorities, and its interactions with other insurgent groups. Giustozzi argues that the central leadership of IS invested significant financial resources in establishing its own branch in Khorasan, and as such it is more than a local movement which adopted the IS brand for its own aims. Though the central leadership has been struggling in implementing its project, it is now turning towards a more realistic approach. This is the first book on a new frontier in Islamic State's international jihad.

Sustainable Shipping Harilaos N. Psaraftis.2019-02-11 International shipping is currently at a

crossroads. The decision of the International Maritime Organization (IMO) in April 2018 to adopt an Initial Strategy so as to achieve by 2050 a reduction of at least 50% in maritime greenhouse gas (GHG) emissions vis-à-vis 2008 levels epitomizes the last among a series of recent developments as regards sustainable shipping. It also sets the scene on what may happen in the future. Even though many experts and industry circles believe that the IMO decision is in line with the COP21 climate change agreement in Paris in 2015, others disagree, either on the ground that the target is not ambitious enough, or on the ground that no clear pathway to reach the target is currently visible. This book takes a cross-disciplinary view of the various dimensions of the maritime transportation sustainability problem. “Cross-disciplinary” means that a variety of angles are used to examine the book topics, and these mainly include the technological angle, the economics angle, the logistics angle, and the environmental angle. The book reviews models that can be used to evaluate decisions, policy alternatives and trade-offs. For sustainable shipping, a spectrum of technical, logistics-based and market based measures are being contemplated. All may have important side-effects as regards the economics and logistics of the maritime supply chain, including ports and hinterland connections. The objective to attain an acceptable environmental performance, while at the same time respecting traditional economic performance criteria so that shipping remains viable, is and is likely to be a central goal for both industry and policy-makers in the years ahead. At the same time, policy fragmentation is likely to create distortions of competition and sub-optimal solutions. This book attempts to address these issues and identify better solutions. /divSustainable Shipping: A Cross-Disciplinary View includes chapters that cover many relevant topics. These include a general view of maritime transport sustainability, green ship technologies, information and communication technologies (ICTs) for sustainable shipping, green tramp ship routing and scheduling, green liner

network design and speed optimization. Market based measures, oil pollution, ship recycling, sulphur emissions, ballast water management, alternative fuels and green ports are also covered. The book concludes by discussing prospects for the future, with a focus on the IMO Initial Strategy. This book contains a unique wealth of information on sustainable shipping. The knowledge it provides is rigorous, complete, and well supported by statistics, technical reports, and scientific references. The treatment of the various topics is not only informative but also analytical and critical. —Gilbert Laporte, Maritime Economics & Logistics (12 May, 2020)

*Impossible Views of the World* Lucy Ives.2017-08-01 A witty, urbane, and sometimes shocking debut novel, set in a hallowed New York museum, in which a co-worker's disappearance and a mysterious map change a life forever Stella Krakus, a curator at Manhattan's renowned Central Museum of Art, is having the roughest week in approximately ever. Her soon-to-be ex-husband (the perfectly awful Whit Ghiscolmbe) is stalking her, a workplace romance with a fascinating, hyper-rational narcissist is in freefall, and a beloved colleague, Paul, has gone missing. Strange things are afoot: CeMArt's current exhibit is sponsored by a Belgian multinational that wants to take over the world's water supply, she unwittingly stars in a viral video that's making the rounds, and her mother--the imperious, impossibly glamorous Caro--wants to have lunch. It's almost more than she can overanalyze. But the appearance of a mysterious map, depicting a 19th-century utopian settlement, sends Stella--a dogged expert in American graphics and fluidomanie (don't ask)--on an all-consuming research mission. As she teases out the links between a haunting poem, several unusual novels, a counterfeiting scheme, and one of the museum's colorful early benefactors, she discovers the

unbearable secret that Paul's been keeping, and charts a course out of the chaos of her own life. Pulsing with neurotic humor and dagger-sharp prose, Impossible Views of the World is a dazzling debut novel about how to make it through your early thirties with your brain and heart intact.

**Loudermilk** Lucy Ives. 2019-05-07 This New York Times Book Review Editors' Choice, is hilarious . . . a riotous success. Equal parts campus novel, buddy comedy and meditation on art-making under late capitalism, the novel is a hugely funny portrait of an egomaniac and his nebbish best friend (The Washington Post). It's the end of summer 2003. George W. Bush has recently declared the mission in Iraq accomplished, the unemployment rate is at its highest in years, and Martha Stewart has just been indicted for insider trading. Meanwhile, somewhere in the Midwest, Troy Augustus Loudermilk (fair-haired, statuesque, charismatic) and his companion Harry Rego (definitely none of those things) step out of a silver Land Cruiser and onto the campus of The Seminars, America's most prestigious creative writing program, to which Loudermilk has recently been accepted for his excellence in poetry. Loudermilk, however, has never written a poem in his life. Wickedly entertaining, beguiling, layered, and sly, Loudermilk is a social novel for our time: a comedy of errors that deftly examines class, gender, and inheritance, and subverts our pieties about literature, authorship, art making, and the institutions that sustain them.
