Criminality and Power in the Postcolonial City Maria Ridda.2022-11-21 This book investigates the literary imaginings of the postcolonial city through the lens of crime in texts set in Naples and Mumbai from the 1990s to the present. Employing the analogy of a 'black hole,' it posits the discourse on criminality as a way to investigate the contemporary spatial manifestations of coloniality and global capitalist urbanity. Despite their different histories, Mumbai and Naples have remarkable similarities. Both are port cities, 'gateways' to their countries and regional trade networks, and both are marked by extreme wealth and poverty. They are also the sites and symbolic battlegrounds for a wider struggle in which 'the North exploits the South, and the South fights back.' As one of the characters of the novel *The Neapolitan Book of the Dead* puts it, a narrativisation of the underworld allows for a 'discovery of a different city from its forgotten corners.' Crime provides a means to understand the relationship between space and society/culture in a number of cities across the Global South, by tracing a narrative of postcolonial urbanity that exposes the connections between exploitation and the ongoing 'coloniality of power.'

Information Communication Technology and Economic Development Tojo Joseph Thatchenkery,Roger Stough.2006-01-01 Information Communication Technology and Economic Development provides a quick and broad overview of the Indian ICT sector. With its exhaustive examination of the business management and industrial organisation of the ICT sector, it is a particularly useful tool for any researcher or policy analyst interested in a thorough analysis of the mechanics of the sector and the Indian context within which it operates. Syud Amer Ahmed, *Papers in Regional Science India* has become a highly visible participant in the information communication technology (ICT) industry. Since the 1990s, it has been one of the fastest growing economies in the world, emerging as the most watched test of global capitalism. The contributors to this volume examine how the ICT-driven development of India appears to have skipped the middle stages of the traditional economic development models and leapfrogged directly to the final stage whereby growth is mostly technologically driven. *Information Communication Technology and Economic Development* reveals new insights regarding the complex process of globalization. It shows how the generation and circulation of intellectual capital in the US and India in ICT have led to greater productivity in the US while facilitating the economic development of India. Most industrialized nations now see the vast intellectual capital-based services that India provides at extremely competitive rates as key to their own national competitiveness in the global arena. The contributors findings suggest that India s ICT-led growth will accelerate in the next ten years, launching India as a major global economic power next to the US and China. This provocative and timely volume will be a necessary read for students and scholars of international business, public policy, economic development, management and strategy as well as all those interested in the impact of globalization on national and regional economies.

Dongri to Dubai - Six Decades of the Mumbai Mafia Hussain Zaidi.2012-08-10 Dongri to Dubai is the first ever attempt to chronicle the history of the Mumbai mafia. It is the story of notorious gangsters like Haji Mastan, Karim Lala, Varadarajan Mudaliar, Chhota Rajan, Abu Salem, but above all, it is the story of a young man who went astray despite having a father in the police force. Dawood Ibrahim was initiated into crime as a pawn in the hands of the Mumbai police and went on to wipe out the competition and eventually became the Mumbai police's own nemesis.The narrative encompasses several milestones in the history of crime in India, from the rise of the Pathans, formation of the Dawood gang, the first ever supari, mafia's nefarious role in Bollywood, Dawood's move to Karachi, and Pakistan's subsequent alleged role in sheltering one of the most wanted persons in the world.This story is primarily about how a boy from Dongri became a don in Dubai, and captures his bravado, cunningness, focus, ambition, and lust for power in a gripping narrative. The meticulously researched book provides an in-depth and comprehensive account of the mafia's games of supremacy and internecine warfare.

Governing India's Metropolises Joël Ruet,Stéphanie Tawa Lama-Rewal.2012-04-27 This book is a comparative, sector-based study of the changing character of governance in Indian metropolises in the 2000s. Highlighting the horizontal and vertical ties of the participatory groups, both state and non-state, it looks at key civic issues.

Pipe Politics, Contested Waters Lisa Björkman.2015-09-14 Winner, 2014 Joseph W. Elder Prize in the Indian Social Sciences Despite Mumbai's position as India's financial, economic, and cultural capital, water is chronically unavailable for rich and poor alike. Mumbai's dry taps are puzzling, given that the city does not lack for either water or financial resources. In *Pipe Politics, Contested Waters*, Lisa Björkman shows how an elite dream to transform Mumbai into a world class business center has wreaked havoc on the city's water pipes. In rich ethnographic detail, *Pipe Politics* explores how the everyday work of getting water animates and inhabits a penumbra of infrastructural activity—of business, brokerage, secondary markets, and sociopolitical networks—whose workings are reconfiguring and rescaling political authority in the city. Mumbai's increasingly illegible and volatile hydrologies, Björkman argues, are lending infrastructures increasing political salience just as actual control over pipes and flows becomes contingent on dispersed and intimate assemblages of knowledge, power, and material authority. These new arenas of contestation reveal the illusory and precarious nature of the project to remake Mumbai in the image of Shanghai or Singapore and gesture instead toward the highly contested futures and democratic possibilities of the actually existing city.

Bombay Brokers Lisa Björkman.2021-04-05 A political party worker who produces crowds for electoral rallies. A "prison specialist" who serves other people's prison sentences in exchange for a large fee. An engineer who is able to secure otherwise impossible building permits. These and other dealmakers—whose behind-the-scenes expertise and labor are often invisible—have an intrinsic role in the city's functioning and can be indispensable for navigating everyday life in Bombay, one of the world's most complex, dynamic, and populous cities. *Bombay Brokers* collects profiles of thirty-six such "brokers." Written by anthropologists, artists, city planners, and activists, these character sketches bring into relief the paradox that these brokers' knowledge and labor are simultaneously invisible yet essential for Bombay's functioning. Their centrality reveals the global-scale paradoxes and gaps that these brokers mediate and bridge. In this way, *Bombay Brokers* prompts a reconsideration of what counts as legitimate and valuable knowledge and labor while offering insight into changing structures of power in Bombay and around the globe. Metabolic Living Harris Solomon. 2016-05-06 The popular narrative of globesity posits that the adoption of Western diets is intensifying obesity and diabetes in the Global South and that disordered metabolisms are the embodied consequence of globalization and excess. In *Metabolic Living* Harris Solomon recasts these narratives by examining how people in Mumbai, India, experience the porosity between food, fat, the body, and the city. Solomon contends that obesity and diabetes pose a problem of absorption between body and environment. Drawing on ethnographic fieldwork carried out in Mumbai's home kitchens, metabolic disorder clinics, food companies, markets, and social services, he details the absorption of everything from snack foods and mangoes to insulin, stress, and pollutants. As these substances pass between the city and the body and blur the two domains, the onset and treatment of metabolic illness raise questions about who has the power to decide what goes into bodies and when food means life. Evoking metabolism as a condition of contemporary urban life and a vital political analytic, Solomon illuminates the lived predicaments of obesity and diabetes, and reorients our understanding of chronic illness in India and beyond.

Sustainable Cities in Asia Federico Caprotti, Li Yu. 2017-08-31 With Asia's cities undergoing unprecedented growth in the 21st century, lauded the 'urban century' by many, *Sustainable Cities in Asia* provides a timely examination of the challenges facing cities across the continent including some of the projects, approaches and solutions that are currently being tested. This book uses numerous case studies, analysing topical issues ranging from city cycling in India, to green spaces in China, to the use of community-led energy generation projects in post-Fukushima Japan. Containing contributions from an international team of scholars, it also takes a multi-disciplinary approach and draws on examples from a wide range of countries, including China, India, Japan, Korea, Taiwan, Singapore and the United Arab Emirates. Ultimately, by providing a comprehensive discussion of the broader debates around the shape of sustainable urbanism, it demonstrates that Asia is one of the most active regions in terms of the development of sustainable city strategies. Tackling the contemporary issues of key importance for sustainability, such as property markets, migration and transport, this book will appeal to students and scholars of Urban Geography, Sustainability, Environmental Studies and Asian studies.

Negotiating Resilience with Hard and Soft City Binti Singh, Tania Berger, Manoj Parmar. 2023-03-16 This book explores how cities are shaped by the lived experiences of inhabitants and examines the ways they develop strategies to cope with daily and unexpected challenges. It argues that migration, livelihood, and public health challenges result from inadequacies in the hard city—urban assets, such as land, infrastructure, and housing, and asserts that these challenges and escalating vulnerabilities are best negotiated using the soft city—social capital and community networks. In so doing, the authors criticise a singular knowledge system and argue for a granular, nuanced understanding of cities—of the interrelations between people in places, everyday urbanisms, social relationships, cultural practices, and histories. The volume presents perspectives from the Global South and the Global North and engages with city-specific cases from Africa, India, and Europe for a deeper understanding of resilience. Part of the Urban Futures series, it will be of great interest to students and researchers of urban studies, urban planning, urban management, architecture, urban sociology, urban design, ecology, conservation, and urban sustainability. It will also be useful for urbanists, architects, urban sociologists, city and

town planners, policy makers, and those interested in a deeper understanding of the contemporary and future city.

The Routledge Companion to Planning in the Global South Gautam Bhan, Smita Srinivas, Vanessa Watson. 2017-09-11 The Routledge Companion to Planning in the Global South offers an edited collection on planning in parts of the world which, more often than not, are unrecognised or unmarked in mainstream planning texts. In doing so, its intention is not to fill a 'gap' that leaves this 'mainstream' unquestioned but to re-theorise planning from a deep understanding of 'place' as well as a commitment to recognise the diverse modes of practice that come within it. The chapters thus take the form not of generalised, 'universal' analyses and prescriptions, but instead are critical and located reflections in thinking about how to plan, act and intervene in highly complex city, regional and national contexts. Chapter authors in this Companion are not all planners, or are planners of very different kinds, and this diversity ensures a rich variety of insights, primarily based on cases, to emphasise the complexity of the world in which planning is expected to happen. The book is divided into a framing Introduction followed by five sections: planning and the state; economy and economic actors; new drivers of urban change; landscapes of citizenship; and planning pedagogy. This volume will be of interest to all those wanting to explore the complexities of planning practice and the need for new theories of knowledge from which to draw insight to face the challenges of the 21st century.

Faces of Inequality Pradeep Baisakh. 2022-01-06 Amid the talks of a five trillion dollar Indian economy, there is still an India where people struggle to arrange two square meals a day. Many strive hard for basic needs of food, health and education. Often unheard and ignored, these voiceless people mostly don't matter to the mainstream media. This book, through various ground reports over a decade and a half, captures the stories of the most marginalised people of society. All the reports should serve as a warning bell till the time another man dies of starvation, an HIV positive woman is thrown out of her house, a girl is raped in brick kilns of Andhra Pradesh or a poor child is forced to work in the cotton fields of Gujarat. These are not mere real-life stories but a chronicle of policy and governance failures. The reports analyse the systemic causes of such failures. But all is not lost. Still, there are rays of hope amid the bleak picture. Many positive stories show us how, with the right policy interventions and community effort, the lives and livelihoods of the marginalised can flourish. Note: This book is a republication of author's selected articles published earlier in different newspapers, portals and journals. Author's announcement: 25% of the earnings incurred to the author from the sale of this book will be donated for social causes.

Trafficking and Prostitution Reconsidered Kamala Kempadoo. 2017-07-05 Trafficking and prostitution are widely believed to be synonymous, and to be leading international crimes. This collection argues against such sensationalism and advances carefully considered and grounded alternatives for understanding transnational migrations, forced labor, sex work, and livelihood strategies under new forms of globalization. From their long-term engagements as anti-trafficking advocates, the authors unpack the contemporary international debate on trafficking. They maintain that rather than a new 'white slave trade,' we are witnessing today, more broadly, an increase in the violation of the rights of freedom of movement, decent employment, and social and economic security. Critical examinations of state anti-trafficking interventions, including the U.S.-led War on Trafficking, also reveal links to a broader attack on undocumented migrants; tribal and aboriginal peoples; poor women, men, and children; and sex workers. The book sheds new light on everyday circumstances, popular discourses, and strategies for survival under twenty-first century economic and political conditions, with a focus on Asia, but with lessons globally. Contributors: Natasha Ahmad, Vachararutai Boontinand, Lin Chew, Melissa Ditmore, John Frederick, Matthew S. Friedman, Josephine Ho, Jagori, Ratna Kapur, Phil Marshall, Jyoti Sanghera, Susu Thatun.

Urban Poverty, Local Governance and Everyday Politics in Mumbai Joop de Wit.2016-10-04 This book explores the informal (political) patronage relations between the urban poor and service delivery organisations in Mumbai, India. It examines the conditions of people in the slums and traces the extent to which they are subject to social and political exclusion. Delving into the roles of the slum-based mediators and municipal councillors, it brings out the problems in the functioning of democracy at the ground level, as election candidates target vote banks with freebies and private-sector funding to manage their campaigns. Starting from social justice concerns, this book combines theory and insights from disciplines as diverse as political science, anthropology and policy studies. It provides a comprehensive, multi-level overview of the various actors within local municipal governance and democracy as also consequences for citizenship, urban poverty, gender relations, public services, and neoliberal politics. Lucid and rich in ethnographic data, this book will be useful to scholars, researchers and students of social anthropology, urban studies, urban sociology, political science, public policy and governance, as well as practitioners and policymakers.

Infrastructural Lives Stephen Graham,Colin McFarlane.2014-10-10 *Infrastructural Lives* is the first book to describe the everyday experience and politics of urban infrastructures. It focuses on a range of infrastructures in both the global South and North. The book examines how day-to-day experience and perception of infrastructure provides a new and powerful lens to view urban sustainability, politics, economics, cultures and ecologies. An interdisciplinary group of leading and emerging urban researchers examine critical questions about urban infrastructure in different global contexts. The chapters address water, sanitation, and waste politics in Mumbai, Kampala and Tyneside, analyse the use of infrastructure in the dispossession of Palestinian communities, explore the pacification of Rio's favelas in the run-up to the 2014 World Cup, describe how people's bodies and lives effectively operate as 'infrastructure' in many major cities, and also explores tentative experiments with low-carbon infrastructures. These diverse cases and perspectives are connected by a shared sense of infrastructure not just as a 'thing', a 'system', or an 'output,' but as a complex social and technological process that enables - or disables - particular kinds of action in the city. *Infrastructural Lives* is crucial reading for academics, researchers, students and practitioners in urban studies globally.

Any Way You Slice It Stan Cox.2013-05-07 Rationing: it's a word—and idea—that people often loathe and fear. Health care expert Henry Aaron has compared mentioning the possibility of rationing to “shouting an obscenity in church.” Yet societies in fact ration food, water, medical care, and fuel all the time, with those who can pay the most getting the most. As Nobel Prize-winning economist Amartya Sen has said, the results can be “thoroughly unequal and nasty.” In *Any Way You Slice It*, Stan Cox shows that rationing is not just a quaint practice restricted to World War II memoirs and 1970s gas station lines. Instead, he persuasively argues that rationing is a vital concept for our fragile present, an era of dwindling resources and environmental crises. *Any Way You Slice It* takes us on a fascinating search for alternative ways of apportioning life's necessities, from the goal of “fair shares for all” during wartime in the 1940s to present-day water rationing in a Mumbai slum, from the bread shops of Cairo to the struggle for fairness in American medicine and carbon rationing on Norfolk Island in the Pacific. Cox's question: can we limit consumption while assuring everyone a fair share? The author of *Losing Our Cool*, the much debated and widely acclaimed examination of air-conditioning's many impacts, here turns his attention to the politically explosive topic of how we share our planet's resources.

Beyond the Networked City Olivier Coutard,Jonathan Rutherford.2015-12-14 Cities around the world are undergoing profound changes. In this global era, we live in a world of rising knowledge economies, digital technologies, and awareness of environmental issues. The so-called modern infrastructural ideal of spatially and socially ubiquitous centrally-governed infrastructures providing exclusive, homogeneous services over extensive

areas, has been the standard of reference for the provision of basic essential services, such as water and energy supply. This book argues that, after decades of undisputed domination, this ideal is being increasingly questioned and that the network ideology that supports it may be waning. In order to begin exploring the highly diverse, fluid and unstable landscapes emerging beyond the networked city, this book identifies dynamics through which a 'break' with previous configurations has been operated, and new brittle zones of socio-technical controversy through which urban infrastructure (and its wider meaning) are being negotiated and fought over. It uncovers, across a diverse set of urban contexts, new ways in which processes of urbanization and infrastructure production are being combined with crucial sociopolitical implications: through shifting political economies of infrastructure which rework resource distribution and value creation; through new infrastructural spaces and territorialities which rebundle socio-technical systems for particular interests and claims; and through changing offsets between individual and collective appropriation, experience and mobilization of infrastructure. With contributions from leading authorities in the field and drawing on theoretical advances and original empirical material, this book is a major contribution to an ongoing infrastructural turn in urban studies, and will be of interest to all those concerned by the diverse forms and contested outcomes of contemporary urban change across North and South.

Possibility of Politics in India Akshat Jain.2024-01-15 This book is an attempt to find new ways of inter-disciplinary theorisation about this moment when both the unitary idea of the Indian nation and the bureaucratic dream of a centralised Indian state are falling apart. At this juncture, the Indian state has two choices. Either it can recognise the political nature of the struggles confronting it and radically re-imagine itself or it can wage a losing war against the democratic aspirations of people. It is essential that political movements in the subcontinent let go of their differences and organise together to agitate for modernisation. By bringing these disparate struggles together, this book explores the possibility of an alliance between them such that they are able to inform each other against a colonial state. Taken together, this book is thus an experiment in politics, rather than being about specific events. The chapters in this book were originally published in various Taylor & Francis journals.

Slums Eugenie L. Birch,Shahana Chattaraj,Susan M. Wachter.2016-03-08 Large numbers of people in urbanizing regions in the developing world live and work in unplanned settlements that grow through incremental processes of squatting and self-building. *Slums: How Informal Real Estate Markets Work* shows that unauthorized settlements in rapidly growing cities are not divorced from market forces; rather, they must be understood as

complex environments where state policies and market actors still do play a role. In this volume, contributors examine how the form and function of informal real estate markets are shaped by legal systems governing property rights, by national and local policy, and by historical and geographic particularities of specific neighborhoods. Their essays provide detailed portraits of individuals and community organizations, revealing in granular detail the working of informal real estate markets, and they review programs that have been implemented in unconventional settlements to provide lessons about the effectiveness and implementation challenges of different approaches. Chapters explore the relationships between informality, state policies, and market forces from a range of disciplinary perspectives and on different scales, from an analysis of the relationship between regulations and housing in 600 developing world cities to an ethnographic account of the buying and selling of houses in Rio de Janeiro's favelas. While many of the book's contributors focus on the emerging economies of India and Brazil, the conclusions drawn illustrate dynamics relevant to developing countries throughout the Global South. The diversity of perspectives combines to create a rich understanding of an important, complex, and understudied topic. Contributors: Arthur Acolin, Sai Balakrishnan, Eugenie L. Passages of Play in Urban India Prasad Khanolkar. 2022-08-12 In this book, Prasad Khanolkar offers a new way of thinking about 'slums' and southern cities based on a grounded engagement with the relationship between media, objects, spaces, and people in the everyday life of slum localities in Mumbai, India. Over the past few decades, Mumbai, like many cities in the global South, has experienced a series of overarching governmental missions to program it into an interoperable and profitable city. Its 'slums', which house a majority of its population don't fit within the dominant registers and continue to be deemed as excess. Urban residents inhabiting Mumbai's slum localities thus find themselves in the middle of missions, policies, and programs that are not of their making, just as often that they find themselves localized by lack of resources, caste system, communal conflicts, and territorial jurisdictions. Drawing on extensive fieldwork in slum localities of Mumbai, this book explores how its residents engage in different forms of play in order to extend and expand their field of possibilities, despite the limitations and fixities. The book attends to some of these playacts: imparting stories with different thicknesses, rehearsing roles on and offscreen, engaging in deceptive performances, experimenting with repetitive everyday rhythms, and recycling matter and forms. Through these playacts, urban residents explore the virtual abilities of different mediums to put bodies, objects, and spaces into new forms of relationships and create passages to depart from programmed urban futures. By attending to these proliferating urban passages of different residents in slum localities, the book makes a case for rethinking southern cities as mediums for urban lives to converge and depart without an overarching framework. The book makes a significant contribution in the field of urban studies, urban anthropology, urban geography, and urban sociology. It will be of interest to scholars and students working on postcolonial cities, Southern urbanisms, infrastructure studies, and urban planning in the global South.

Global Civil Society Yearbook 2009 Ashwani Kumar, Jan Aart Scholte, Mary Kaldor, Marlies Glasius, Hakan Seckinelgin, Helmut K Anheier. 2009-05-13 The annual Global Civil Society Yearbooks provide an indispensable guide to global civil society or civic participation and action around the world. The 2009 Yearbook explores the framings, strategies and impacts of a range of actors on poverty and its alleviation. The overarching question is to whether such actors, in pressing for poverty alleviation actually achieve anything/empower the poor, or simply aid wealthy states in maintaining the status quo. The contributors are diverse, including scholars and practitioners from India, America, the UK, Australia, Thailand, and Mali. The Global Civil Society Yearbook remains the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike. It is essential reading for anyone seeking a deeper understanding of the key actors, forms and manifestations of global civil society around the world today.

Reverse Subsidies in Global Monopsony Capitalism Dev Nathan, Shikha Silliman Bhattacharjee, S. Rahul, Purushottam Kumar, Immanuel Dahagani, Sukhpal Singh, Padmini Swaminathan. 2022-03-31 This book provides a firm analytical base to discussions about injustice and the unequal distribution of gains from global production in the form of global monopsony capitalism. It utilizes the concept of reverse subsidies as the purchase of

gendered labour and environmental services below their costs of production in garment value chains in India and other garment producing countries, such as Bangladesh and Cambodia. Environmental services, such as freshwater for garment manufacture and land for cotton production, are degraded by overuse and untreated waste disposal. The resulting higher profits from the low prices of garments are captured by global brands, using their monopsony position, with few buyers and myriad sellers, in the market. This book links the concept of reverse subsidies with those of injustice, inequality and sustainability in global production.
