Foundations of Location Analysis H. A. Eiselt, Vladimir Marianov. 2011-01-13 Location analysis has matured from an area of theoretical inquiry that was designed to explain observed phenomena to a vibrant field which can be and has been used to locate items as diverse as landfills, fast food outlets, gas stations, as well as politicians and products in issue and feature spaces. Modern location science is dealt with by a diverse group of researchers and practitioners in geography, economics, operations research, industrial engineering, and computer science. Given the tremendous advances location science has seen from its humble beginnings, it is time to look back. The contributions in this volume were written by eminent experts in the field, each surveying the original contributions that created the field, and then providing an up-to-date review of the latest contributions. Specific areas that are covered in this volume include: • The three main fields of inquiry: minisum and minimax problems and covering models • Nonstandard location models, including those with competitive components, models that locate undesirable facilities, models with probabilistic features, and problems that allow interactions between facilities • Descriptions and detailed examinations of exact techniques including the famed Weiszfeld method, and heuristic methods ranging from Lagrangean techniques to Greedy algorithms • A look at the spheres of influence that the facilities generate and that attract customers to them, a topic crucial in planning retail facilities • The theory of central places, which, other than in mathematical games, where location science was born

Introduction aux sciences sociales Bernard Valade, Renaud Fillieule. 1996-01-01 T00:00:00+01:00 Les sciences sociales occupent, aujourd'hui, une position importante dans le secteur des sciences humaines. Elles la doivent à l'étendue des domaines qu'elles recouvrent, et à la diversité des questions dont elles traitent. Ce manuel vise, d'une part, à en retracer la genèse, en faisant une large place aux courants de pensée qui constituent leur fonds commun ; il suit, d'autre part, sans égard aux traditionnels clivages disciplinaires, le mouvement qui les a récemment conduites à privilégier les cadres d'analyse et modes d'explication, que sont le matérialisme dialectique, le structuralisme, et l'individualisme méthodologique. La présente introduction aux sciences sociales n'a donc d'autre ambition que de fournir, dans cette double optique historique et contemporaine, des données de base aux étudiants désireux de se familiariser avec les matières qui sont ici schématiquement présentées.

The Long Shadow of Informality Franziska Ohnsorge, Shu Yu. 2022-02-09 A large percentage of workers and firms operate in the informal economy, outside the line of sight of governments in emerging market and developing economies. This may hold back the recovery in these economies from the deep recessions caused by the COVID-19 pandemic--unless governments adopt a broad set of policies to address the challenges of widespread informality. This study is the first comprehensive analysis of the extent of informality and its implications for a durable economic recovery and for long-term development. It finds that pervasive informality is associated with significantly weaker economic outcomes--including

lower government resources to combat recessions, lower per capita incomes, greater poverty, less financial development, and weaker investment and productivity.

Actuarial Mathematics of Social Security Pensions Subramaniam Iyer.1999 Describes the application of actuarial principles and techniques to public social insurance pension schemes. Aims to establish a link between public social security and occupational pension scheme methods. Part one discusses actuarial theory. Part two deals with two techniques: the projection technique, and the present value technique. There is also a brief description of actuarial mathematics.

Methodological Approaches to Societies in Transformation Yasmine Berriane.2021 Carefully contextualizing the ethnography by taking scale and time seriously, the book shows why fieldwork is both necessary and insufficient if the aim is to make sense of the contemporary world. It is a significant contribution to the renewal of anthropological theory and methodology. Highly recommended! -Thomas Hylland Eriksen, University of Oslo, Norway With an eye for various scales, biographies of people and things, and processes as they take place, this book provides insights into how, to whom, and when things change, how it feels like - and also how some things stay the same. -Samuli Schielke, Leibniz-Zentrum Moderner Orient (Berlin) This important book, drawing on ethnographic research from across the globe, addresses both the 'why' and the 'how' of studying societal change, inviting the reader to reflect on the potential - and the limits - of qualitative methods. - Jonathan Rigg, University of Bristol, UK This open access book provides methodological devices and analytical frameworks for the study of societies in transformation. It explores a central paradox in the study of change: making sense of change requires long-term perspectives on societal transformations and on the different ways people experience social change, whereas the research carried out to study change is necessarily limited to a relatively short space of time. This volume offers a range of methodological responses to this challenge by paying attention to the complex entanglement of qualitative research and the metanarratives generally used to account for change. Each chapter is based on a concrete case study from different parts of the world and tackles a diversity of topics, analytical approaches, and data collection methods. The contributors' innovative solutions provide valuable tools and techniques for all those interested in the study of change. Yasmine Berriane is permanent researcher at the French National Center for Scientific Research (CNRS, Centre Maurice Halbwachs), France. Annuska Derks is Associate Professor in the Department of Social Anthropology and Cultural Studies at the University of Zurich, Switzerland. Aymon Kreil is Assistant Professor in the Department of Languages and Cultures at Ghent University, Belgium. Dorothea Lüddeckens is Professor in the Department of Religious Studies at the University of Zurich, Switzerland.

Introduction aux sciences sociales Jean-Luc Chabot.2007-01-01 L'objectif de cette introduction est triple : amener le lecteur à s'interroger sur le concept de science molle, par rapport à celui de science dure ; tracer à grands traits une généalogie historique de l'évolution des sciences sociales au cours des derniers siècles ; enfin, réaliser un tableau analytique des principales sciences sociales contemporaines, accompagné des références bibliographiques les plus récentes.

Strategic Management in Public Services Organizations Ewan Ferlie, Edoardo Ongaro.2015-02-20 Strategic Management in Public Services Organizations sets out to connect the two traditionally disparate academic literatures of public management and strategic management. The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations, especially when considering successive New Public Management reforms. This observation has important consequences for the requisite work practices, skills and knowledge bases of current public managers, as they are increasingly being asked to act as strategic as well as operational managers. Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions. The impact of strategic management on the performance of public agencies is examined and it is argued that the appropriate use of strategic management models depends on the politico-administrative and cultural contexts of the public services organization in question, concluding that there is no single best way to strategically lead public organisations. This is an advanced textbook aimed at the postgraduate level, particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management.

A History of Mathematics Luke Hodgkin.2013-02-21 A History of Mathematics: From Mesopotamia to Modernity covers the evolution of mathematics through time and across the major Eastern and Western civilizations. It begins in Babylon, then describes the trials and tribulations of the Greek mathematicians. The important, and often neglected, influence of both Chinese and Islamic mathematics is covered in detail, placing the description of early Western mathematics in a global context. The book concludes with modern mathematics, covering recent developments such as the advent of the computer, chaos theory, topology, mathematical physics, and the solution of Fermat's Last Theorem. Containing more than 100 illustrations and figures, this text, aimed at advanced undergraduates and postgraduates, addresses the methods and challenges associated with studying the history of mathematics. The reader is introduced to the leading figures in the history of mathematics (including Archimedes, Ptolemy, Qin Jiushao, al-Kashi, al-Khwarizmi, Galileo, Newton, Leibniz, Helmholtz, Hilbert, Alan Turing, and Andrew Wiles) and their fields. An extensive bibliography with cross-references to key texts will provide invaluable resource to students and exercises (with solutions) will stretch the more advanced reader.

Introduction to Social Work in Canada Nicole Ives, Myriam Denov, Tamara Sussman.2020-03-02 This comprehensive introduction to social work integrates perspectives from English, French, and Indigenous peoples in Canada to provide an inclusive treatment of the history, foundational skills, and specific fields of social work practice and research. Part I begins with an exploration of the origins and foundational concepts of social work in

Canada, including how Indigenous, French, and English traditions have shaped and informed social work practice in Canada. The text then discusses theoretical approaches, and the values and ethics at the core of professional practice. Part II examines foundational skills for social workers through a focus on working with individuals and families, and groups and communities. Part III explores specific fields of social work practice and research, with chapters focused on the health field and on working with children, Indigenous peoples, persons with disabilities, immigrants and refugees, the LGBTQ community, aging populations, and international social work. With an emphasis on diversity and drawing extensively on Canadian statistics and scholarship, this is an ideal text for introduction to social work courses. This updated, new edition features a substantially revised and expanded chapter on Indigenous Peoples and Social Work.

Méthodologie des sciences sociales et approche qualitative des organisations Omar Aktouf.1987 Ce livre se veut une introduction à la méthodologie, une critique et une réflexion sur la conduite de la recherche dans les domaines de l'humain et du social. L'auteur y tente une synthèse des traditions européennes et américaines, ainsi qu'un dépassement de la mathématisation de la réflexion au profit d'un modèle plus humaniste dont il esquisse les contours phénoménologiques et anthropologiques.

Reimagining our futures together International Commission on the Futures of Education.2021-11-06 The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures.

Violence at Work Duncan Chappell,Vittorio Di Martino,International Labour Office.2006 Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

Célébrons Nos Réussites Féministes Karen Blackford,Marie-Luce Garceau,Sandra Kirby.1999 Abuses by international corporations, withdrawal of social services and implementation of regressive legislation continue to impoverish women and reduce the quality of their everyday lives: women have reason to be demoralized. Recognizing this challenging and difficult situation, this volume reviews women's successes at feminizing Canadian institutions. It is intended to hearten the women's movement and show the potential for feminist change and suggest ways to realize this potential. Bilingual edition.

Brazil in the 1990s Renato Baumann Neves.2002-03-20 The 1990s represented for several Latin American countries, Brazil in particular, a remarkable period. New international scenario and changes in the traditional way of economic policymaking have led to an unprecedented economic environment, with low inflation rates, broader access to imported goods and reduced interference from the State, among other characteristics.By the end of such a unique period the Economic Commission for Latin America and the Caribbean (ECLAC), a United Nations agency, sponsored a regionwide project of growth and equity in Latin America in the 1990s, as an effort to improve the knowledge of the economic reforms undertaken in Latin America during that decade. This book presents the main results of the project for the Brazilian economy, with systematic information and analysis of several aspects of those unprecedented changes. The works published here were made by well-known Brazilian experts, several of them with previous high-ranking experience in the public sector.
