Taking Forward the Primary Curriculum: Preparing for the 2014 National Curriculum

Roy Blatchford.2013-10-11 This book has a simple intent. In September 2014, primary schools in England will be expected to adopt a new national curriculum. There is good time to prepare. At this point of curriculum change and development in England's schools, the contributors offer their considered reflections on how primary schools across the country might take forward and shape their own curriculum framework for pupils. The spirit of the book is, based on considerable leadership experience in schools, letting-a-thousand-flowers-bloom rather than recommending a one-size-fits-all approach. This book does not set out to analyse the content of the 2014 Primary Curriculum, nor to present ways in which individual schools should plan their schemes of work and weekly or monthly planning. That is rightly the province of each school, learning from and sharing best practice with others. Rather, the contributors to this book present underpinning values, ideas and approaches to successful curriculum planning, rooted in many years of leading and working in schools. Their reflections come from varying perspectives: teachers, headteachers, directors of foundations and leading thinkers on education, each of whom is involved in the work of the National Education Trust (www.nationaleducationtrust.net), an independent charitable foundation which champions best practice.

English Teaching in the Secondary School 2/e

Mike Fleming, David Stevens.2014-06-03 Presenting an informed view of current educational policy, this text encourages students of secondary English to take a creative and independent

interpretation of government initiatives in order to achieve effective teaching practice. It provides a good balance of theoretical material with practical ideas for application in the classroom and strongly encourages reflection and critical thought. This new edition includes: coverage of the National Curriculum 2000, the National Literacy Strategy and the new Key Stage 3 Strategy a new chapter on how to teach ICT a new chapter on Inclusion - including differentiation, cultural diversity, EAL and teaching across the ability range new material on how to teach Shakespeare an introduction to cross-curricular themes - such as citizenship, and social, moral and spiritual values. Written in an accessible and conversational style, this text poses an excellent degree of challenge for all students on initial teacher training courses.

Teaching Climate Change and Sustainability in the Primary Curriculum Karin Doull,Susan Ogier.2023-11-18 The first aim of the DfE's 2022 Strategy for Sustainability and Climate Change is to prepare all young people for a world impacted by climate change through learning and practical experience. This practical text for new teachers empowers them to develop their knowledge and understanding of climate change and sustainability. It supports them to develop confidence in discussing difficult themes and to create safe learning spaces that allow children to articulate concerns. The book provides a structure for learning and teaching about climate change and sustainability across the primary curriculum. All chapters are linked to relevant and authentic research and include suggestions for practical activities.

Teaching Primary Humanities Russell Grigg.2014-05-22 As primary subjects are increasingly being taught on an interdisciplinary level, Russell Grigg and Sioned Hughes have

created an innovative new text, *Teaching Primary Humanities*. This new text explores current debate, encourages reflection and provides clear guidance on planning, teaching and assessing the humanities from the Early Years to Key Stage 2. Through a blend of theory and real-life examples, Grigg and Hughes demonstrate the contribution that history, geography and religious education can make to enhancing children's thinking, literacy, numeracy and ICT skills. Whether you are a trainee or a practitioner, this book will develop your knowledge of how young children's understanding of place, time and community can be fostered through a play-based curriculum. It will also benefit teachers of older children looking to encourage more independent learning in their schools. About the authors: Dr Russell Grigg is Head of the South West Wales Centre of Teacher Education. He is a trained primary inspector for England and Wales. He has written widely in the field of history and primary education including *Wales in the Victorian Age* and *Becoming an Outstanding Primary Teacher*. Dr Sioned Hughes is Senior Lecturer in Initial Teacher Training at the South West Wales Centre of Teacher Education. She has published many educational materials, especially in primary geography. Her work on Patagonia was recognised by the Welsh Books Council as the 'Bestselling Children's Book' in 2011.

Learning to Teach Gill Nicholls. 2014-05-12 Written in accordance with the Teacher Training Association and DfEE guidelines, this text is intended to become a course reference. The author examines all modules which need to be studied in teacher training programmes and takes account of the Labour government's plans for teacher education.

Mastering Primary History Karin Doull, Christopher Russell, Alison Hales. 2019-02-21 *Mastering Primary History* introduces the primary history curriculum and helps trainees and teachers learn how to plan and teach inspiring lessons that make learning history irresistible. Topics covered include: · Current developments in history · History as an irresistible activity ·

History as a practical activity · Skills to develop in history · Promoting curiosity · Assessing children in history · Practical issues This guide includes examples of children's work, case studies, readings to reflect upon and reflective questions that all help to show students and teachers what is considered to be best and most innovative practice, and how they can use that knowledge in their own teaching to the greatest effect. The book draws on the experience of three leading professionals in primary history, Karin Doull, Christopher Russell and Alison Hales, to provide the essential guide to teaching history for all trainee primary teachers.

Cross-Curricular Teaching in the Primary School Trevor Kerry.2015-02-11 How can teaching across the curriculum improve children's learning? How can you plan meaningful, imaginative topic work? Cross-Curricular Teaching in the Primary School helps teachers plan a more imaginative, integrated curriculum by presenting in accessible language a rationale and framework for teaching across the subjects. This second edition has been fully updated in light of the new curriculum, and shows how cross-curricular work can contribute to deeper subject knowledge. Illustrated throughout with examples of effective topic work in successful schools, this book provides guidance on the underpinning theory and strategies to facilitate cross-curricular work with young children. With a new structure to emphasise the importance of careful planning and preparation, issues covered include: How children learn The theory and rationale behind the cross-curricular approach Developing the curriculum and lesson planning Teaching and learning in an integrated way at KS1 and KS2 Cross-curricular approaches for maths Whole school approaches and team teaching for cross-curricular teaching The role of support staff in cross-curricular teaching Improving children's thinking skills Supporting children with special needs Using new media and drama to facilitate cross-curricular learning Assessing cross-curricular learning. Cross-

Curricular Teaching in the Primary School provides much needed support for busy student and practising teachers. Packed with practical ideas, it offers an accessible guide to all aspects of introducing an integrated curriculum.

National Curriculum In The Early Years Dr Theo Cox, Theo Cox.2014-05-01 The child-centred principles of early years education - which emphasize play and holistic learning - are being challenged by the implementation of a subject-based National Curriculum. The contributors to this book explore this challenge and offer some ways of meeting it practically and productively. Issues covered include: pedagogical issues, such as the cross-curricular, topic-based teaching; teacher's attitudes to subject knowledge; assessment issues, including baseline assessment at the age of five; and parental attitudes to the National Curriculum and its content at Key Stage 1.

Learning to Teach in the Primary School Teresa Cremin, James Arthur.2014-02-24 Flexible, effective and creative primary school teachers require subject knowledge, an understanding of their pupils and how they learn, a range of strategies for managing behaviour and organising environments for learning, and the ability to respond to dynamic classroom situations. This third edition of Learning to Teach in the Primary School is fully updated with reference to the new National Curriculum, and has been revised to provide even more practical advice and guidance to trainee primary teachers. Twenty-two new authors have been involved and connections are now made to Northern Irish, Welsh and Scottish policies. In addition, five new units have been included on: making the most of your placement play and exploration in learning behaviour management special educational needs phonics. With Masters-level reflective tasks and suggestions for research-based further reading, the book provides valuable support to trainee teachers engaged in learning through school-based experience and through reading, discussion and reflections as part of a teacher education course. Primary Computing and ICT: Knowledge, Understanding

and Practice Keith Turvey, John Potter, Jonathan Allen, Jane Sharp. 2014-06-17 This popular text for primary trainees in teaching primary ICT has been updated in line with the new computing curriculum. What do you need to know to teach ICT and computing in primary schools? How do you teach it? This book provides practical guidance on how to teach ICT and the computing curriculum in primary schools alongside the necessary subject knowledge. It explores teaching and learning with applications and technologies, addressing the role of the professional teacher with regards to important issues such as e-safety. This Sixth Edition is updated in line with the new curriculum for computing. It includes new material on how to integrate programming and computational thinking and explores how to harness new tools such as blogging and social media to enrich learning and teaching. Written in an accessible way, it will help trainees to develop confidence in their own approach to teaching. ICT and computing is both a subject and a powerful teaching and learning tool throughout the school curriculum and beyond, into many areas of children's learning lives. This text highlights the importance of supporting children to become discerning and creative users of technology as opposed to passive

consumers.

The Primary Curriculum Patricia Driscoll, Andrew

Simpson.2021-07-19 Based on a critical Marxist ethnography, conducted at a state primary school in a former coalmining community in the north of England, this book provides insight into teachers' perceptions of the effects of deindustrialisation on education for the working class. The book draws on the notion of social haunting to help understand the complex ways in which historical relations and performances, reflective of the community's industrial past, continue to shape experiences and processes of schooling. The arguments presented enable us to engage with the 'goodness' of the past as well as the pain and suffering associated with deindustrialisation. This, it is argued, enables teachers and pupils to engage with rhythms, relations, and performances that recognise the heritage and complexities of working-class culture. Reckoning and harnessing with the fullness of ghosts is essential if schooling is to be refashioned in more encouraging and relational ways, with and for the working class. This text will benefit researchers, academics, and educators with an interest in the sociology of education, and social class and education in particular. Those interested in schooling, ethnography, and qualitative social research will also benefit from the book

Strong Foundations in Early Mathematics Lorna Earle, Sam Parkes.2023-01-11 Developing the building blocks for mathematics. This book supports early years teachers and practitioners to enable children to build Strong Foundations in Mathematics. It focuses on children's learning and development in mathematics in the critical reception year. It supports trainee teachers and early years students to reflect on their own mathematics learning and how this influences their teaching and subject confidence. It acknowledges the uniqueness of the early years and explores the mathematical pedagogies of the EYFS. Importantly, the book challenges the assumption that early years mathematics is 'not proper maths'.

Primary Professional Studies Alice Hansen.2015-08-14 Primary

teacher training is challenging. Trainees must be prepared to consider teaching in innovative ways, while remaining focussed on the unchanging requirements of children's learning. The third edition of this popular core book supports trainee teachers working towards primary QTS taking account of the diverse aspects of primary professional studies. Mapped to the Teachers' Standards and the new National Curriculum, this text designed specifically for the primary professional studies module. It begins with an exploration of the curriculum reviewing recent changes together with the new National Curriculum as well as taking a wider view of curriculum design and delivery. The text moves on to look at 'The Developing Child' encouraging students to home in on child-centred teaching and learning and explores the needs and learning journeys of all children. 'The Developing Teacher' section outlines and highlights the professional role of the teacher and helps trainees to consider the kind of teachers they want to be. Finally, the text covers essential 'Teaching Skills', offering trainees friendly and accessible advice on planning, assessments and behaviour management. Exploring key issues in current teaching and learning such as inclusion, safeguarding and the wider school community explore, this third edition also includes new chapters on children's learning in the early years and children's voice enhancing the text's child-centred focus. Also included is a completely new chapter on managing your teaching environment to help trainees consider the small things about everyday teaching that can really make a difference in the classroom. A comprehensive guide offering in-depth coverage of all aspects of teaching and learning, together with practical teaching suggestions.

[Hyper-Socialised: How Teachers Enact the Geography Curriculum in Late Capitalism](#) David Mitchell. 2019-11-01 Hyper-socialised explores the challenges of late capitalist times for education systems, schools and teachers. It looks at how trends of accountability, 'teaching to the test', using pupil voice and reliance on network technologies are all connected to powerful social and economic forces, shaping the curriculum as it is taught in classrooms. Such forces threaten to overwhelm teachers but, in the right hands, they can also be harnessed to create, influence and teach a truly powerful curriculum for their students.

Presenting a historical view of curriculum change, the book examines how society, curriculum and teachers are linked. Using geography as an illustrative subject, the chapters investigate what influences teachers, to what extent they are in control of the curriculum, and what else is shaping it. Divided into two parts, it offers an in-depth exploration of the relationship between society, teachers and the curriculum, including that what and how to teach remain wide open to debate. Evidence-based research into the significance and implications of 'hyper-socialised' curriculum enactment for teachers and teacher education. Four case study 'portraits' of geography departments and personal curriculum stories of each Head of Department. Insights into the nature of teaching as a profession and how a crisis of teacher recruitment and retention may be addressed. Written in clear and accessible terms, this book is an essential resource for teacher educators, subject teachers, headteachers and educational researchers who want to understand how and why schools and teaching are changing - and what this means for them.

The Really Useful Book of Science Experiments Tracy-ann Aston. 2015-09-16. The Really Useful Book of Science Experiments contains 100 simple-to-do science experiments that can be confidently carried out by any teacher in a primary school classroom with minimal (or no!) specialist equipment needed. The experiments in this book are broken down into easily manageable sections including: It's alive: experiments that explore our living world, including the human body, plants, ecology and disease. A material world: experiments that explore the materials that make

up our world and their properties, including metals, acids and alkalis, water and elements Let's get physical: experiments that explore physics concepts and their applications in our world, including electricity, space, engineering and construction Something a bit different: experiments that explore interesting and unusual science areas, including forensic science, marine biology and volcanology. Each experiment is accompanied by a 'subject knowledge guide', filling you in on the key science concepts behind the experiment. There are also suggestions for how to adapt each experiment to increase or decrease the challenge. The text does not assume a scientific background, making it incredibly accessible, and links to the new National Curriculum programme of study allow easy connections to be made to relevant learning goals. This book is an essential text for any primary school teacher, training teacher or classroom assistant looking to bring the exciting world of science alive in the classroom.

Make Key Stage 3 Matter in English Liz Hillier. 2017-04-27 The KS3 curriculum plays a critical part in giving students the best possible start to their secondary education and preventing the need for intervention later on. This timely book provides detailed guidance on how to develop a robust, multifaceted, inclusive and challenging KS3 curriculum in English that provides a secure and progressive link between KS2 and KS4. Featuring examples of curriculum models and audits of current practice, chapters cover

key topics such as: developing the planning cycle; transitioning between primary and secondary English; assessment in KS3 English; creating a model that supports and challenges students of all levels; LAC and SPAG: divisive or cohesive abbreviations; speaking and listening in the KS3 English curriculum; using multimodal texts; examples of how meaningful homework can successfully embed itself in a KS3 English curriculum model. Make Key Stage 3 Matter in English will be an invaluable resource for KS3 English coordinators, teachers and all those involved in the planning and delivery of the KS3 English curriculum.

Research on Mathematics Textbooks and Teachers'

Resources Lianghuo Fan, Luc Trouche, Chunxia Qi, Sebastian Rezat, Jana Visnovska. 2018-02-13 This book focuses on issues related to mathematics teaching and learning resources, including mathematics textbooks, teacher guides, student learning and assessment materials, and online resources. The book highlights various theoretical and methodological approaches used to study teaching and learning resources, and addresses the areas of resources, teachers, and students at an international level. As for the resources, the book examines the role textbooks and other curricular or learning resources play in mathematics teaching, learning, and assessment. It asks questions such as: Could we consider different types of textbooks and roles they play in teaching and learning? How does the digitalization of information and communication affect these roles? What are defining features of e-textbooks, and how could we characterize the differences between the traditional textbooks and e-textbooks? As for the teachers, the book discusses the relationships between teachers' individual and collective resources, and the way in which we could model such relationships. Specific questions addressed are: What is the role of teachers in developing textbooks and other teaching and learning materials? What are the relationships between resource

designers and users? What are the consequences of these changing roles and relationships for the teaching of mathematics, and for teacher knowledge and professional development? As for the students, the book explores how students, as well as their teachers, interact through resources. It raises and addresses questions such as: What are the effects of modern ICT (particularly internet) on students' use and the design of resources? How do changing patterns of use and design affect student behaviour, learning, and relationships to the subject of mathematics?

Planning the Primary National Curriculum Keira

Learning to Teach Geography in the Secondary School Mary Biddulph, David Lambert, David Balderstone.2015-05-20 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to

teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School... 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review

Holocaust Education 25 Years On Andy Pearce, Arthur Chapman. 2018-08-07 The year 2016 marked the twenty-fifth anniversary of statutory teaching and learning about the Holocaust in English state-maintained schools, which was introduced with the first English National Curriculum in 1991. The year 2016 also saw the publication of the largest empirical research study on Holocaust education outcomes - the UCL Centre for Holocaust Education's What Do Students Know and Understand About the Holocaust? This book presents a systematic reflection on the outcomes of this quarter-century of Holocaust education in England and the Centre's wider work to reflect on the forms and the limitations of children's knowledge about the Holocaust and of English Holocaust education resources. These papers are then contextualised in two ways: through papers that situate English Holocaust education historiographically and in England's wider Holocaust culture; and

through papers from America, Switzerland, and Germany that place the UCL Centre for Holocaust Education's findings in a wider and comparative perspective. Overall, the book presents unique empirical insights into teaching and learning processes and outcomes in Holocaust education and enables these to be theorised and explored systematically. The chapters in this book were originally published as a special issue of *Holocaust Studies: A Journal of Culture and History*.

Primary English for Trainee Teachers David Waugh, Wendy Jolliffe, Kate Allott. 2023-03-15 What do I need know about English to teach it effectively in primary school?; How do children learn English?; How do I teach it? What does a good primary English lesson look like? This is the ultimate guide for primary trainee teachers grappling with these questions. A comprehensive text supporting you to teach the National Curriculum for primary English, it covers both subject knowledge and teaching theory and practice. Learning to Teach Science in the Secondary School Rob Toplis. 2015-02-11 Learning to Teach Science in the Secondary School is an indispensable guide with a fresh approach to the process, practice and reality of teaching and learning science in a busy secondary school. This fourth edition has been fully updated in the light of changes to professional knowledge and practice and revisions to the national curriculum. Written by experienced practitioners, this popular textbook comprehensively covers the opportunities and challenges of teaching science in the secondary school. It provides guidance on: • the knowledge and skills you need, and understanding the science department at your school • development of the science curriculum • the nature of science and how science works, biology, chemistry, physics and astronomy, earth science • planning for progression, using schemes of work to support planning , and evaluating lessons •

language in science, practical work, using ICT , science for citizenship, Sex and Health Education and learning outside the classroom • assessment for learning and external assessment and examinations Every unit includes a clear chapter introduction, learning objectives, further reading, lists of useful resources and specially designed tasks - including those to support Masters Level work - as well as cross-referencing to essential advice in the core text Learning to Teach in the Secondary School, sixth edition. Learning to Teach Science in the Secondary School is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.

Essential Subject Knowledge for Primary Teaching Nasreen

Majid.2023-03-25 As a trainee teacher you have a huge amount to grapple with when it comes to developing expertise in the suite of subjects within the primary national curriculum. Subject knowledge cannot be developed in isolation, it must relate to the curriculum knowledge and pedagogical knowledge, enabling ways to teach the subject with confidence. This book takes you through a journey of the national curriculum, supporting you to think about each subjects' positioning within the national curriculum, the subject knowledge you need to know and how to teach each subject in a creative way. Highlighting the importance of diversity, equity and inclusion across all chapters, this book enables new teachers to bring new voices and perspectives to the classroom. It includes: • Key subject knowledge. • Examples of sequenced lessons. • Classroom ideas. • Links to further learning and subject associations. • A chapter exploring the subject knowledge needed to teach sustainability and climate change.
