Get Your House Right Marianne Cusato, Ben Pentreath, Richard Franklin Sammons, Léon Krier. 2007 Even as oversized McMansions continue to elbow their way into tiny lots nationwide, a much different trend has taken shape. This return to traditional architectural principles venerates qualities that once were taken for granted in home design: structural common sense, aesthetics of form, appropriateness to a neighborhood, and even sustainability. Marianne Cusato, creator of the award-

winning Katrina Cottages, has authored and illustrated this definitive guide to what makes houses look and feel right--to the eye and to the soul. She teaches us the language and grammar of classical architecture, revealing how balance, harmony, and detail all contribute to creating a home that will be loved rather than tolerated. And she takes us through the do's and don'ts of every element of home design, from dormers to doorways to columns. Integral to the book are its hundreds of elegant line drawings--clearly rendering the varieties of lintels and cornices, arches and eaves, and displaying avoid" and use" versions of the same elements side by side.

Light Pollution Bob Mizon. 2012-12-06 Light-pollution is the modern scourge of optical astronomy. An increasing number of observing sites are in danger of being rendered useless due to the glare of city lighting blotting out the night sky. Professional astronomical observatories are located far from cities, but amateur astronomers often do not have this luxury. This book considers the two available strategies open to Astronomers. The first involves campaigning against light pollution by lobbying Authorities and Standards Organisations, and the second involves using the correct instrumentation. The book contains an extensive detailed catalogue of deep-sky and other objects that - despite what one might believe - can be seen from variously light-polluted sites, for practical observers.
