Multilingual Aspects of Fluency Disorders Peter Howell,John Van Borsel.2011-05-11 This book contains contributions by scholars working on diverse aspects of speech who bring their findings to bear on the practical issue of how to treat stuttering in different language groups and in multilingual speakers. The book considers classic issues in speech production research, as well as whether regions of the brain that are affected in people who stutter relate to areas used intensively in fluent bilingual speech. It then reviews how formal language properties and differential use of parts of language affect stuttering in English, and then compares these findings to work on stuttering in a variety of languages. Finally, the book addresses methodological issues to do with studies on bilingualism and stuttering; and discusses which approach is appropriate in the treatment of bilingual and multilingual people who stutter.

been developed to satisfy a need for training in this area. It is hoped that all persons involved in the design, construction, operation, and maintenance of highways will become familiar with the concepts contained in the program. The concepts and practices discussed come from those contained in the AASHTO publication, Highway Design and Operational Practices Related to Highway Safety. They are discussed in considerable depth in this program and should provide a good working knowledge of roadside safety design. Much of the program is oriented around freeways; however, the principles apply equally toward the lower order highway.

They are Trying to Break Your Heart David Savill.2016-12-06 For fans of William Boyd, a literary thriller that ranges across decades and continents, weaving together the 2004 tsunami with the civil war in Bosnia and the personal with the political. In 1994, Marko Novak's world is torn apart by the death of his best friend, Kemal, a young soldier in the darkest days of the Bosnian war. After the funeral, Marko flees to England, hoping to put his broken homeland, and the part he played in the loss of his friend, behind him. In 2004, human rights researcher Anya Teal is following a tenuous lead in the hunt for a Bosnian man with blood on his hands. She is also clinging to the fragile hope that she can rebuild a relationship with her first love, William Howell. When Anya invites Will to join her on a Christmas holiday in the Thai beach resort of Khao Lak, she hopes the holiday will offer them the chance to unpick the mistakes of their past. But Khao Lak may also be home to the man Anya is looking for-a man with a much darker history. What nobody knows is that a disaster as destructive as a war is approaching, detonated in the seabed of the Indian Ocean, one that will connect the fates of Marko, William, and Anya, across the years and continents. In its wake, everything Marko thought he knew will be overturned.

Affective Health and Masculinities in South Africa Hans Reihling. 2020-04-03. Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable

increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
