Will Alsop Tom Porter.2010-10-04 Driven by his three tenets of architecture, Diversity, Individuality and Naughtiness. Will Alsop paints his way into architecture through a design process that acts as a conduit for the dreams and aspiration of others. Moving from public consultation to the privacy of his painting studio → it is here, born in the liquidity of paint, the flourish of line and the serendipity of collage, that Alsop disengages from cultural baggage, discards the tyranny of taste and opens up to a world of less predictable and more diverse solutions.

Rosie and the Nightmares Philip Waechter.2005-11-10 Rosie is haunted by monster nightmares. Waking up in a pool of sweat, she is bound and determined to confront her fears. Her solution is so deft and clever, mixing a deep knowledge of childhood, exuberant energy, and... a kiss, that it will leave young readers cheering and, more important, armed with some of the tools to tackle their own night monsters. Philip Waechter, the creator of the wonderfully all-too-human hero bear in Me!, now shows an equally keen and sensitive appreciation of the dilemmas of childhood. In Rosie he has created a feisty and courageous little heroine, who can stand proudly next to William Steig's Brave Irene and Kevin Henke's Lily.

Shanghai Nightscapes James Farrer,Andrew David Field.2015-08-03 The pulsing beat of its nightlife has long drawn travelers to the streets of Shanghai, where the night scene is a crucial component of the city's image as a global metropolis. In *Shanghai Nightscapes*, sociologist James Farrer and historian Andrew David Field examine the cosmopolitan nightlife culture that first arose in Shanghai in the 1920s and that has been experiencing a revival since the 1980s. Drawing on over twenty years of fieldwork and hundreds of interviews, the authors spotlight a largely hidden world of nighttime pleasures—the dancing, drinking, and socializing going on in dance clubs and bars that have flourished in Shanghai over the last century. The book begins by examining the history of the jazz-age dance scenes that arose in the ballrooms and nightclubs of Shanghai's foreign settlements. During its heyday in the 1930s, Shanghai was known worldwide for its jazz cabarets that fused Chinese and Western cultures. The 1990s have seen the proliferation of a drinking, music, and sexual culture collectively constructed to create new contact zones between the local and tourist populations. Today's Shanghai night scenes are simultaneously spaces of inequality and friction, where men and women from many different walks of life compete for status and attention, and

spaces of sociability, in which intercultural communities are formed. Shanghai Nightscapes highlights the continuities in the city's nightlife across a turbulent century, as well as the importance of the multicultural agents of nightlife in shaping cosmopolitan urban culture in China's greatest global city. Deep South Paul Theroux. 2015 The travel writer Paul Theroux turns his unflinching eye on an American South too often overlooked. He finds there a paradoxical place, full of incomparable music, unparalleled cuisine, and yet also some of the nation's worst schools, housing, and unemployment rates. On road trips spanning four seasons, wending along rural highways, Theroux visits gun shows and small-town churches, laborers in Arkansas, and parts of Mississippi where they still call the farm up the road 'the plantation.' He talks to mayors and social workers, writers and reverends, the working poor and farming families ... the unsung heroes of the south, the people who, despite it all, never left, and also those who returned home to rebuild a place they could never live without

Organic Computing – A Paradigm Shift for Complex Systems Christian Müller-Schloer, Hartmut Schmeck, Theo Ungerer. 2011-04-29 Organic Computing has emerged as a challenging vision for future information processing systems. Its basis is the insight that we will increasingly be surrounded by and depend on large collections of autonomous systems, which are equipped with sensors and actuators, aware of their environment, communicating freely, and organising themselves in order to perform actions and services required by the users. These networks of intelligent systems surrounding us open fascinating application areas and at the same time bear the problem of their controllability. Hence, we have to construct such systems as robust, safe, flexible, and trustworthy as possible. In particular, a strong orientation towards human needs as opposed to a pure implementation of the technically possible seems absolutely central. The technical systems, which can achieve these goals will have to exhibit life-like or organic properties. Organic Computing Systems adapt dynamically to their current environmental conditions. In order to cope with unexpected or undesired events they are self-organising, self-configuring, self-optimising, self-healing, self-protecting, self-explaining, and context-aware, while offering complementary interfaces for higher-level directives with respect to the desired behaviour. First steps towards adaptive and self-organising computer systems are being undertaken. Adaptivity, reconfigurability, emergence of new properties, and self-organisation are hot topics in a variety of research groups worldwide. This book summarises the results of a 6-year priority research program (SPP) of the German Research Foundation (DFG) addressing these fundamental challenges in the design of Organic Computing systems. It presents and discusses the theoretical foundations of

Organic Computing, basic methods and tools, learning techniques used in this context, architectural patterns and many applications. The final outlook shows that in the mean-time Organic Computing ideas have spawned a variety of promising new projects.

Tank Waste Retrieval, Processing, and On-site Disposal at Three Department of Energy Sites National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on the Management of Certain Radioactive Waste Streams Stored in Tanks at Three Department of Energy Sites.2006-09-12 DOE Tank Waste: How clean is clean enough? The U.S. Congress asked the National Academies to evaluate the Department of Energy's (DOE's) plans for cleaning up defense-related radioactive wastes stored in underground tanks at three sites: the Hanford Site in Washington State, the Savannah River Site in South Carolina, and the Idaho National Laboratory. DOE plans to remove the waste from the tanks, separate out high-level radioactive waste to be shipped to an off-site geological repository, and dispose of the remaining lower-activity waste onsite. The report concludes that DOE's overall plan is workable, but some important challenges must be overcome—including the removal of residual waste from some tanks, especially at Hanford and Savannah River. The report recommends that DOE pursue a more risk-informed, consistent, participatory, and transparent for making decisions about how much waste to retrieve from tanks and how much to dispose of onsite. The report offers several other detailed

recommendations to improve the technical soundness of DOE's tank cleanup plans.

Up Up Nele Dechmann, Fabian Jaggi, Katrin Murbach, Nicola Ruffo. 2016 Up Up presents a selection of buildings in the inner city of Johannesburg, focusing on the tall modernist towers that stood out at the time they were constructed. Witnesses to profound shifts in the political history of the metropolis, the buildings have gone through immense changes. They are documented in two distinct sections: the architecture is presented with facts, floor plans, archival discoveries and contemporary images of the interior and the exterior; additionally, each building is accompanied by a reportage or subjective essay on the inner workings of the building. Interviews with residents, research-based texts on contemporary issues and independent contributions from commissioned writers, artists and photographers allow brief insights into the old and new lives of these towers.

The Timbuktu School for Nomads Nicholas Jubber.2016-11-15 The Sahara: a dream-like, far away landscape of Lawrence of Arabia and Wilfred Thesiger, The English Patient and Star Wars, and home to nomadic communities whose ways of life stretch back millennia. Today it's a teeth-janglingly dangerous destination, where the threat of jihadists lurks just over the horizon. Following in the footsteps of 16th century traveller Leo Africanus, Nicholas Jubber went on a turbulent adventure to the forgotten places of North Africa and the legendary Timbuktu. Once the seat of African civilization and home to the richest man who ever lived, this mythic city is now scarred by terrorist occupation and is so remote its own inhabitants hail you with the greeting, 'Welcome to the middle of nowhere'. From the cattle markets of the Atlas, across the Western Sahara and up the Niger river, Nicholas joins the camps of the Tuareg, Fulani, Berbers, and other communities, to learn about their craft, their values and their place in the world. The Timbuktu School for Nomads is a unique look at a resilient city and how the nomads pit ancient ways of life against the challenges of the 21st century.
