The Mid-Century Modern Garden Ethne Clarke.2017 A lavishly illustrated exploration of the prevalent architecture and landscaping style of the mid-century period (c.1940-1970) and its links with modern-day living, this sumptuous garden design book features examples of contemporary interpretations of the style as well as expert advice and tips on how you can achieve the style for yourself. In the second half of the twentieth century, outdoor living was born. Even modest homes were open plan with large picture windows that brought the outside in - and a deck or platform was the perfect answer to extending living outdoors. These lived-in spaces were easy to maintain with their limited plant palette and focus on structure and hard landscaping. They offered a space in which to relax and enjoy valuable leisure time, a pursuit that is as relevant now as it was then. Contrast was the design dynamic - a response to the energy that was fuelled by people's hope for a bright future after the Second World War. Outdoors this translated into a lively interplay of textures and colours between hardscaping materials, pieces of outdoor art and striking specimen plants. The first part of this seminal book charts the evolution of the MCM aesthetic starting with Frank Lloyd Wright's 'Usonian' houses and finishing with Cliff May's ranch houses looking at spaces outside and within and design influences from Europe. The second part focuses on classic and contemporary interpretations of the style in exceptional gardens from all over the world. It offers a unique insight into this period of seismic shift in garden design and will be a rich source of inspiration for garden makers today.

Becoming a Gardener Catie Marron.2022-05-03 A beautifully designed, full-color personal account of what it means to become a gardener, filled with specially commissioned color photography, watercolors, and fine art. To make her new house in Connecticut truly feel like home, Catie Marron decided to create a garden. But while she was familiar with landscape design, she had never grown anything. A dedicated reader with a lifelong passion for literature, Marron turned to the library of gardening books she'd collected to glean advice from a variety of writers on gardening and

horticultural topics both grand and small. Marron's quest to become a gardener, however, was about more than learning the basics about mulch or which plants work best in the shade. She sought something far more elusive: to identify the core qualities and characteristics that make a person a gardener and an understanding of what a garden could mean to her as it had to multitudes of other gardeners over the centuries. In *Becoming a Gardener*, Catie Marron chronicles her transformation into a gardener over the course of eighteen months, seeding the details of her experience with rich advice from writers as diverse as Eleanor Perényi and Karel Capek, Penelope Lively, and Jamaica Kincaid. As she digs deeper into her readings and works in the garden itself, Marron not only discovers the essence of gardening but in the words of Michael Pollan, "the endlessly engrossing ways that cultivating a garden attaches a body to the earth." A delightful blend of informed opinion, personal reflection, and practical advice, *Becoming a Gardener* explores topics as varied as the composition of dirt, the agricultural wisdom of avid kitchen gardeners George Washington and Thomas Jefferson, the healing power of digging in the soil, and the beauty of finding solitude in nature. Throughout, Marron carefully plants special illustrated features, such as musings on the merits (and detriments) of the rose, essential tools, moonlight gardening, children's books which feature gardens, and her favorite gardens around the world. Also included is an annotated list of recommended writers, books, and films related to gardens and gardening, and a monthly to-do calendar. Featuring specially commissioned illustrations by the Danish team All the Way to Paris, and stunning photographs by acclaimed photographer William Abranowicz that capture the pastoral beauty of Marron's Connecticut garden, *Becoming a Gardener* is a very special and moving portrait of life and the enduring power of literature and nature that is sure to become an instant classic.

The View from Federal Twist James Golden.2022-03 *Federal Twist* is set on a ridge above the Delaware River in western New Jersey. It is a naturalistic garden that has loose boundaries and integrates closely with the natural world that surrounds it. It has no utilitarian or leisure uses (no play areas, swimming pools, or outdoor dining) and the site is not an obvious choice for a garden (heavy clay soil, poorly drained: quick death for any plants not ecologically suited to it). The physical garden, its plants and its features, is of course an appealing and pleasant place to be but *Federal Twist*'s real charm and significance lie in its intangible aspects: its changing qualities and views, the moods and emotions it evokes, and its distinctive character and sense of place. This book charts the author's journey in making such a garden. How he made a conscious decision not to improve the land, planted large, competitive plants into rough grass, experimented with seeding to develop sustainable plant communities. And how he worked with light to provoke certain moods and allowed the energy of the place, chance, and randomness to have its say. Part experimental horticulturist and part philosopher, James Golden has written an important book for naturalistic and ecological gardeners and anyone interested in exploring the relationship between gardens, nature, and ourselves.

The Cambridge Illustrated Glossary of Botanical Terms Michael Hickey,Clive King.2000-11-16 This beautifully illustrated glossary comprises over 2400 terms commonly used to describe vascular plants. The majority are structural terms referring to parts of plants visible with the naked eye or with a x10 hand lens, but some elementary microscopical and physiological terms are also included, as appropriate. Each term is defined accurately and concisely, and whenever possible, cross referenced to clearly labelled line drawings made mainly from living material. The illustrations are presented together in a section comprising 127 large format pages, within which they are grouped according to specific features, such as leaf shape or flower structure, so allowing comparison of different forms at a glance. The illustrations therefore provide a unique compilation of information that can be referred to independently of the definitions.
