Wong's Nursing Care of Infants and Children - E-Book Marilyn J. Hockenberry.2022-12-23 Provide quality nursing care through each stage of child development! Wong's Nursing Care of Infants and Children, 12th Edition uses an easy-to-follow, family-centered approach to describe the care of children at each age and stage of development. The book begins with a discussion of the influences on and assessment of child health, then provides chapters on child health promotion and health problems — all organized by age groups and body systems. Up-to-date, evidence-based information helps you develop critical thinking skills along with the sensitivity needed to become a compassionate, caring pediatric nurse. Written by a team of experts led by Marilyn J. Hockenberry, Wong's continues to be the leading text in pediatric nursing. Focus on family-centered care emphasizes the role and influence of the family in child health and illness with a separate chapter and Family-Centered Care boxes. Full-color drawings and photographs reflect the latest in nursing care. Nursing Care Guidelines boxes offer clear, step-by-step instructions for interventions in a variety of situations and conditions, and Nursing Care Plan boxes included expected patient outcomes and rationales for nursing interventions. Nursing Tips include helpful hints and practical, clinical information. Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to improve the outcomes of nursing care. Atraumatic Care boxes contain techniques for care that manage pain, discomfort, or stress, along with approaches to promote self-esteem and prevent embarrassment. Emergency Treatment boxes serve as a quick reference for interventions in critical situations. Cultural Considerations and Cultural Competence content provides tips from clinical experts. Community and Home Health Considerations boxes address issues such as increasing immunization rates, decreasing smoking among teens, and preventing lead poisoning. Drug Alerts highlight important drug-related information for safe, appropriate care. Nursing Alerts call out critical considerations such as key assessment data, risk factors, and danger signs that must be considered in providing care. Research Focus boxes emphasize research with concise reviews of important evidence.

*Nursing Interventions for Infants, Children, and Families* Martha Craft-Rosenberg, Janice Denehy. 2000-09-12 The purpose of Nursing Interventions with Infants, Children, and Families is to systematically describe nursing interventions used by nurses who serve this population. The book covers interventions for infants and children as clients, as well as the family as a client. Topics include interventions on prevention as well as interventions for children and families experiencing health problems. Each chapter examines the theoretical and research literature support for the invention and links to appropriate nursing diagnoses and outcomes. However, the focus of the chapter is on specific activities nurses can select to implement the intervention. A case study is presented to illustrate how the intervention is used in nursing practice. Implications for further research are presented with the goal of advancing nursing science by stimulating further study of nursing interventions.
