Schooling and the Politics of Disaster Kenneth J. Saltman.2010-06-10 Schooling and the Politics of Disaster is the first volume to address how disaster is being used for a radical social and economic reengineering of education. From the natural disasters of the Asian tsunami and the hurricanes in the Gulf Coast, to the human-made disasters in Iraq, Afghanistan, Haiti, Sudan, Indonesia, the United States and around the globe, disaster is increasingly shaping policy and politics. This groundbreaking collection explores how education policy is being reshaped by disaster politics. Noted scholars in education and sociology tackle issues as far-ranging as No Child Left Behind, the War on Terror, Hurricane Katrina, the making of educational funding crises in the US, and the Iraq War to bring to light a disturbing new phenomenon in educational policy.

Incarcerating the Crisis Jordan T. Camp.2016-04-18 The United States currently has the largest prison population on the planet. Over the last four decades, structural unemployment, concentrated urban poverty, and mass homelessness have also become permanent features of the political economy. These developments are without historical precedent, but not without historical explanation. In this searing critique, Jordan T. Camp traces the rise of the neoliberal carceral state through a series of turning points in U.S. history including the Watts insurrection in 1965, the

Detroit rebellion in 1967, the Attica uprising in 1971, the Los Angeles revolt in 1992, and events in post-Katrina New Orleans in 2005. *Incarcerating the Crisis* argues that these dramatic events coincided with the emergence of neoliberal capitalism and the state's attempts to crush radical social movements. Through an examination of the poetic visions of social movements—including those by James Baldwin, Marvin Gaye, June Jordan, JosŽ Ram' rez, and Sunni Patterson—it also suggests that alternative outcomes have been and continue to be possible.É

Central American Biodiversity Falk Huettmann.2015-08-04 This book highlights key results and lessons learnt from two field sites, La Suerte in Costa Rica and Ometepe Nicaragua. It provides long term data on species abundance and distribution. Primates receive specific attention in this book, as they are flagship species and good indicators for the “health” of an ecosystem, but as well a money maker. Many primate species are sensitive to habitat alteration, and are often hunted out first. But they play an important role as seed dispersal agents for the regeneration of the forest. The book then compares results from the two field sites with regional trends, and explores potential solutions such as REDD+. This book strongly calls for new approaches in conservation, it makes the case for looking beyond the pure species biology and classic conservation angle and to take into account the economic and political realities.

Between Dreams and Ghosts Andrea Wright.2021-11-09 More than one million Indians travel annually to work in oil projects in the Gulf, one of the few international destinations where men

without formal education can find lucrative employment. Between *Dreams and Ghosts* follows their migration, taking readers to sites in India, the United Arab Emirates, and Kuwait, from villages to oilfields and back again. Engaging all parties involved—the migrants themselves, the recruiting agencies that place them, the government bureaucrats that regulate their emigration, and the corporations that hire them—Andrea Wright examines labor migration as a social process as it reshapes global capitalism. With this book, Wright demonstrates how migration is deeply informed both by workers' dreams for the future and the ghosts of history, including the enduring legacies of colonial capitalism. As workers navigate bureaucratic hurdles to migration and working conditions in the Gulf, they in turn influence and inform state policies and corporate practices. Placing migrants at the center of global capital rather than its periphery, Wright shows how migrants are not passive bodies at the mercy of abstract forces—and reveals through their experiences a new understanding of contemporary resource extraction, governance, and global labor.

Turn and Jump Howard Mansfield.2010-08-16 Before Thomas Edison, light and fire were thought to be one and the same. Turns out, they were separate things altogether. This book takes a similar relationship, that of time and place, and shows how they, too, were once inseparable. Time keeping was once a local affair, when small towns set their own pace according to the rising and setting of the sun. Then, in 1883, the expanding railroads necessitated the creation of Standard Time zones, and communities became linked by a universal time. Here Howard Mansfield explores how our sudden interconnectedness, both physically, as through the railroad, and through inventions like the telegraph, changed our concept of time and place forever.

Climate Travels Michael M. Gunter, Jr. 2023-03-28 Many accounts of climate change depict disasters striking faraway places: melting ice caps, fearsome hurricanes, all-consuming fires. How can seeing the consequences of human impacts up close help us grasp how global warming affects us and our neighbors? This book is a travelogue that spotlights what a changing climate looks like on the local level—for wherever local happens to be. Michael M. Gunter, Jr. takes readers around the United States to bear witness to the many faces of the climate crisis. He argues that conscientious travel

broadens understanding of climate change and makes its dangers concrete and immediate. Vivid vignettes explore the consequences for people and communities: sea level rise in Virginia, floods sweeping inland in Tennessee, Maine lobsters migrating away from American territorial waters, and imperiled ecosystems in national parks, from Alaskan permafrost to the Florida Keys. But Gunter finds inspiring initiatives to mitigate and adapt to these threats, including wind turbines in a tiny Texas town, green building construction in Kansas, and walkable urbanism in Portland, Oregon. These projects are already making a difference—and they underscore the importance of local action. Drawing on interviews with government officials, industry leaders, and alternative energy activists, *Climate Travels* emphasizes direct personal experience and the centrality of environmental justice. Showing how travel can help bring the reality of climate change home, it offers readers a hopeful message about how to take action on the local level themselves.

Spaces and Fictions of the Weird and the Fantastic Julius Greve, Florian Zappe. 2019-11-18 This collection of essays discusses genre fiction and film within the discursive framework of the environmental humanities and analyses the convergent themes of spatiality, climate change, and related anxieties concerning the future of human affairs, as crucial for any understanding of current forms of “weird” and “fantastic” literature and culture. Given their focus on the culturally marginal, unknown, and “other,” these genres figure as diagnostic modes of storytelling, outlining the latent anxieties and social dynamics that define a culture’s “structure of feeling” at a given historical moment. The contributions in this volume map the long and continuous tradition of weird and fantastic fiction as a seismograph for eco-geographical turmoil from the nineteenth to the twenty-first century, offering innovative and insightful ecocritical readings of H. P. Lovecraft, Harriet Prescott Spofford, China Miéville, N. K. Jemisin, Thomas Ligotti, and Jeff VanderMeer, among

others.

Political Learning in Adulthood Roberta S. Sigel.1989 In the wake of World War II, the issues of political stability in general and the survival of stable democracies in particular captured the attention of American political scientists. An inevitable offshoot of this interest was the study of political behavior--how it is acquired and how and why it persists. In its early stages, work on political socialization focused exclusively on childhood and adolescence, as if the learning process ends when adulthood begins. Only recently has adult socialization emerged as a legitimate field of

study within political science. In *Political Learning in Adulthood*, social scientists for the first time examine the changes in political outlook and behavior that take place during the adult years, providing an invaluable overview of the problems, theories, and methodological approaches that characterize the field of political socialization. They consider which political values remain constant and which are subject to change, and they explore the ways in which both ordinary and extraordinary life events affect adults' political worldviews. Among specific topics considered are the effects of age and aging, the relation between participation in the work force and the development and expression of political views, continuity and change in the wake of revolutionary social and political movements, and the effects of such traumatic and life-threatening situations as war and terrorist activity.

In the Hurricane's Eye Nathaniel Philbrick. 2018-10-16 NEW YORK TIMES BESTSELLER
Nathaniel Philbrick is a masterly storyteller. Here he seeks to elevate the naval battles between the French and British to a central place in the history of the American Revolution. He succeeds, marvelously.--The New York Times Book Review The thrilling story of the year that won the Revolutionary War from the New York Times bestselling author of *In the Heart of the Sea* and *Mayflower*. In the concluding volume of his acclaimed American Revolution series, Nathaniel Philbrick tells the thrilling story of the year that won the Revolutionary War. In the fall of 1780, after five frustrating years of war, George Washington had come to realize that the only way to defeat the British Empire was with the help of the French navy. But coordinating his army's movements with those of a fleet of warships based thousands of miles away was next to impossible. And then, on September 5, 1781, the impossible happened. Recognized today as one of the most important naval engagements in the history of the world, the Battle of the Chesapeake—fought without a single

American ship—made the subsequent victory of the Americans at Yorktown a virtual inevitability. A riveting and wide-ranging story, full of dramatic, unexpected turns, *In the Hurricane's Eye* reveals that the fate of the American Revolution depended, in the end, on Washington and the sea.

The Signal and the Noise Nate Silver.2015-02-03 One of the more momentous books of the decade. —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He

explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

The Working Landscape Peter F. Cannavo.2007-06-22 In America today we see rampant development, unsustainable resource exploitation, and commodification ruin both natural and built landscapes, disconnecting us from our surroundings and threatening our fundamental sense of place. Meanwhile, preservationists often respond with a counterproductive stance that rejects virtually any change in the landscape. In *The Working Landscape*, Peter Cannavò identifies this zero-sum conflict between development and preservation as a major factor behind our contemporary crisis of place. Cannavò offers practical and theoretical alternatives to this deadlocked, polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values, creating a working landscape. Place, Cannavò argues, is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent, enduring landscape. This practice must balance development (which he calls founding) and preservation. Three case studies illustrate the polarizing development-preservation conflict: the debate over the logging of old-growth forests in the Pacific Northwest; the

problem of urban sprawl; and the redevelopment of the former site of the World Trade Center in New York City. Cannavò suggests that regional, democratic governance is the best framework for integrating development and preservation, and he presents specific policy recommendations that aim to create a working landscape in rural, suburban, and urban areas. A postscript on the mass exile, displacement, and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place.
