**Alzheimer Disease** Gérard Emilien, Cécile Durlach, Kenneth L. Minaker, Bengt Winblad, Serge Gauthier, Jean-Marie Maloteaux. 2012-12-06 Alzheimer disease (AD) has become the most common form of dementia in industrialized countries and represents an increasing burden at the economic, social and medical level. In discussing both the biological aspects of AD as well as the cognitive functions involved, *Alzheimer Disease - Neuropsychology and Pharmacology* presents a comprehensive picture of the pathology and approaches to diagnosis and treatment. Basic research including animal models, molecular and genetic aspects is also taken into consideration. In part I, the biological correlates of AD are discussed. In part II the neuropsychological aspects such as cognitive impairment, loss of functional autonomy and emergence of neuropsychiatric disturbances of AD are outlined. In part III, strategies for effective treatment and prevention of AD are discussed. This book will be a useful source of information for clinicians as well as researchers in the area of neuropharmacology.

Turkey and the Holocaust Stanford J. Shaw. 2016-07-27 The neutrality maintained by Turkey during most of the Second World War enabled it to rescue thousands of Jews from the Holocaust in the Nazi-occupied or collaborating countries of Europe. This book shows how in France, the Turkish consuls in Paris and Marseilles intervened to protect Turkish Jews from application of anti-Jewish laws introduced both by the German occupying authorities and the Vichy government and rescued them from concentration camps, getting them off trains destined for the extermination chambers in the East, and arranging train caravans and other special transportation to take them through Nazi-occupied territory to safety in Turkey. 'an important and unique addition to the vast scholarship available on that tragic era' Rabbi Abraham Cooper

**Remediation** Jay David Bolter, Richard Grusin. 1999 A new framework for considering how all media constantly borrow from and refashion other media. Media critics remain captivated by the modernist myth of the new: they assume that digital technologies such as the World Wide Web, virtual reality, and computer graphics must divorce themselves from earlier media for a new set of aesthetic and cultural principles. In this richly illustrated study, Jay David Bolter and Richard Grusin offer a theory of mediation for our digital age that challenges this assumption. They argue that new visual media achieve their cultural significance precisely by paying homage to, rivaling, and refashioning such earlier media as perspective painting, photography, film, and television. They call this process of refashioning remediation, and they note that earlier media have also refashioned one another: photography remediated painting, film remediated stage production and photography, and television remediated film, vaudeville, and radio.

*The Tuning of the World* R. Murray Schafer. 1980

*Black Morocco* Chouki El Hamel. 2013 Chronicles the experiences, identity, agency and achievements of enslaved black people in Morocco from the sixteenth century to the beginning of the twentieth century.

Material Culture in Europe and China, 1400-1800 S.A.M. Adshead. 1997-09-12 This book reinterprets the rise of consumerism in terms of interaction between Europe and China 1400-1800. In particular, it examines the intellectual foundations of consumerism in food, dress, shelter, utilities, information and symbolism. It highlights consumerism as an expression of both rationality and freedom and indicates the constructive role it has played in the formation of the modern world. Particular use is made of comparisons between developments in Europe and China to differentiate both.

**ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives** Steyn,

Jacques, Johanson, Graeme. 2010-09-30 ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives focuses on Information and Communication Technologies for Development (ICT4D), which includes any technology used for communication and information. This publication researches the social side of computing, the users, and the design of systems that meet the needs of ordinary users.

**Domestic Devotions in the Early Modern World** Marco Faini, Alessia Meneghin. 2018 This volume sets out to explore the world of domestic devotions taking place in people's homes across space and time, and is premised on the assumption that the home was a central space of religious practice and experience throughout the early modern world.

**Armies and Ecosystems in Premodern Europe** Sander Govaerts. 2021-04-30 Using the ecosystem concept as his starting point, the author examines the complex relationship between premodern armed forces and their environment at three levels: landscapes, living beings, and diseases. The study focuses on Europe's Meuse Region, well-known among historians of war as a battleground between France and Germany. By analyzing soldiers' long-term interactions with nature, this book engages with current debates about the ecological impact of the military, and provides new impetus for contemporary armed forces to make greater effort to reduce their environmental footprint.

**Anaphora Resolution** Ruslan Mitkov. 2014-02-24 Teaching computers to solve language problems is one of the major challenges of natural language processing. There is a large amount of interesting research devoted to this field. This book fills an existing gap in the literature with an up-to-date survey of the field, including the author's own contributions. A number of different fields overlap in anaphora resolution - computational linguistics, natural language processing (NLP), grammar, semantics, pragmatics, discourse analysis and artificial intelligence. This book begins by introducing basic notions and terminology, moving onto early research methods and approaches, recent developments and applications, and future directions. It addresses various issues related to the practical implementation of anaphora systems, such as rules employed, algorithms implemented or evaluation techniques used. This is an ideal reference book for students and researchers in this particular area of computational linguistics. Since anaphora resolution is vital for the development of any practical NLP system, the book will be of interest to readers from both academia and industry.

**Evolution of Awareness** Kia Marlene. 2022-03-08 Evolution of Awareness, the debut poetry collection from Kia Marlene, is a book about a spiritual journey towards enlightenment. The collection consists of 6 chapters, titled The Egg, The Caterpillar, Intermission (heartbreak&love), The Cocoon, The Butterfly, and a chapter titled Knock Knock. Through numerous poems this book outlines various thoughts, questions and eventual answers concerning our collective greater purpose in life, self love, consciousness, and personhood. The author intends for this book to help broaden the reader's general perception, view of their environment, awareness, and sense of self.

**Parallel Text Processing** Jean Véronis. 2013-03-14 | This book evolved from the ARCADE evaluation exercise that started in 1995. The project's goal is to evaluate alignment systems for parallel texts, i. e. , texts accompanied by their translation. Thirteen teams from various places around the world have participated so far and for the first time, some ten to fifteen years after the first alignment techniques were designed, the community has been able to get a clear picture of the behaviour of alignment systems. Several chapters in this book describe the details of competing systems, and the last chapter is devoted to the description of the evaluation protocol and results. The remaining chapters were especially commissioned from researchers who have been major figures in the field in recent years, in an attempt to address a wide range of topics that describe the state of the art in parallel text processing and use. As I recalled in the introduction, the Rosetta stone won eternal fame as the prototype of parallel texts, but such texts are probably almost as old as the invention of writing. Nowadays, parallel texts are electronic, and they are becoming an increasingly important resource for building the natural language processing tools needed in the multilingual information society that is currently emerging at an incredible speed. Applications are numerous, and they are expanding every day: multilingual lexicography and terminology, machine and human translation, cross-language information retrieval, language learning, etc.

**Ever Faithful** David Sartorius.2014-01-10 Known for much of the nineteenth century as the ever-faithful isle, Cuba did not earn its independence from Spain until 1898, long after most American colonies had achieved emancipation from European rule. In this groundbreaking history, David Sartorius explores the relationship between political allegiance and race in nineteenth-century Cuba. Challenging assumptions that loyalty to the Spanish empire was the exclusive province of the white Cuban elite, he examines the free and enslaved people of African descent who actively supported colonialism. By claiming loyalty, many black and mulatto Cubans attained some degree of social mobility, legal freedom, and political inclusion in a world where hierarchy and inequality were the fundamental lineaments of colonial subjectivity. Sartorius explores Cuba's battlefields, plantations, and meeting halls to consider the goals and limits of loyalty. In the process, he makes a bold call for fresh perspectives on imperial ideologies of race and on the rich political history of the African diaspora.

**Why We Play** Roberte Hamayon.2016 Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called Games, echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. Playing is no 'doing' in the ordinary sense once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise ?

**Reducing Inequalities** Rémi Genevey,R. K. Pachauri,Laurence Tubiana.2013-01-01 The reduction of inequalities within and between countries stands as a policy goal, and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio+20 Summit in 2012.The 2013 edition of A Planet for Life represents a unique international initiative grounded on conceptual and strategic thinking, and “ most importantly ” empirical experiments, conducted on five continents and touching on multiple realities. This unprecedented collection of works proposes a solid empirical approach, rather than an ideological one, to inform future debate.The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic, political and cultural realities. These systems combine technical, financial, legal, fiscal and organizational elements with a great deal of applied expertise, and are articulated within a clear, well-understood, growth- and job-generating development strategy.Inequality reduction does not occur by decree; neither does it automatically arise through economic growth, nor through policies that equalize incomes downward via ill conceived fiscal policies. Inequality reduction involves a collaborative effort that must motivate all concerned parties, one that constitutes a genuine political and social innovation, and one that often runs counter to prevailing political and economic forces.

**In Defiance of Painting** Christine Poggi.1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of

exchange.

**The Christianization of Ancient Russia** Unesco.1992

**Paris-Amsterdam Underground** Christoph Lindner,Andrew Hussey.2013-01-01 The postwar histories of Paris and Amsterdam have been significantly defined by the notion of the “underground” as both a material and metaphorical space. Examining the underground traffic between the two cities, this book interrogates the countercultural histories of Paris and Amsterdam in the mid to late-twentieth century. Shuttling between Paris and Amsterdam, as well as between postwar avant-gardism and twenty-first century global urbanism, this interdisciplinary book seeks to create a mirroring effect over the notion of the underground as a driving force in the making of the contemporary European city.

**The Anatomy of Fascism** Robert O. Paxton.2007-12-18 What is fascism? By focusing on the concrete: what the fascists did, rather than what they said, the esteemed historian Robert O. Paxton answers this question. From the first violent uniformed bands beating up “enemies of the state,” through Mussolini’s rise to power, to Germany’s fascist radicalization in World War II, Paxton shows clearly why fascists came to power in some countries and not others, and explores whether fascism could exist outside the early-twentieth-century European setting in which it emerged. A deeply intelligent and very readable book. . . . Historical analysis at its best. -The Economist The Anatomy of Fascism will have a lasting impact on our understanding of modern European history, just as Paxton’s classic Vichy France redefined our vision of World War II. Based on a lifetime of research, this compelling and important book transforms our knowledge of fascism-“the major political innovation of the twentieth century, and the source of much of its pain.”

*Integrated approaches to health* Simon R. Rüegg,Barbara Häslér,Jakob Zinsstag.2023-09-14 One Health addresses health challenges arising from the intertwined spheres of humans, animals and ecosystems. This handbook is the product of an interdisciplinary effort to provide science-based guidance for the evaluation of One Health and other integrated approaches to health. It guides the reader through a systems approach and framework to evaluate such approaches in a standardised way. It provides an overview of concepts and metrics from health and life sciences, social sciences, economics, and ecology that are relevant for the evaluation of the processes involved, as well as the characterisation of expected and unexpected outcomes of One Health initiatives. Finally, the handbook provides guidance and practical protocols to help plan and implement evaluations in order to generate new insights and provide meaningful information about the value of One Health. The handbook is intended for practitioners, researchers, evaluators as well as funders of integrated approaches to health and beyond.

**Fruits of Oceania** Annie Walter,Chanel Sam,Marie-Claire Bataille-Benguigui.2002 This book covers the woody species, which cultivated or wild, produce the great majority of fleshy and non-fleshy fruits of the Pacific Four regions served as the study area: Vanuatu, Papua New Guinea, Samoa and Tonga.

**Adult Literacy Perspectives** Maurice Charles Taylor,James A. Draper.1994

**Paris in the Dark** Eric Smoodin.2020-03-27 In Paris in the Dark Eric Smoodin takes readers on a journey through the streets, cinemas, and theaters of Paris to sketch a comprehensive picture of French film culture during the 1930s and 1940s. Drawing on a wealth of journalistic sources, Smoodin recounts the ways films moved through the city, the favored stars, and what it was like to go to the movies in a city with hundreds of cinemas. In a single week in the early 1930s, moviegoers might see Hollywood features like King Kong and Frankenstein, the new Marlene Dietrich and Maurice Chevalier movies, and any number of films from Italy, Germany, and Russia. Or they could frequent the city's ciné-clubs, which were hosts to the cinéophile subcultures of Paris. At other times, a night at the movies might result in an evening of fascist violence, even before the German Occupation of Paris, while after the war the city's cinemas formed the space for reconsolidating French film culture. In mapping the cinematic geography of Paris, Smoodin expands understandings of local film exhibition and the relationships of movies to urban space.

**Khrushchev Lied** Grover Furr.2013

Anarchism and Syndicalism in the Colonial and Postcolonial World, 1870-1940 .2010-11-11 Before communism, anarchism and syndicalism were central to labour and the Left in the colonial and postcolonial world. Using studies from Africa, Asia, Eastern Europe, and Latin America, this groundbreaking volume examines the revolutionary libertarian Left's class politics and anti-colonialism in the first globalization and imperialism (1870/1930).

**Greenhouse Gas Emissions - Fluxes and Processes** A. Tremblay, Louis Varfalvy, Charlotte Roehm, Michelle Garneau.2011-04-30 In a time when an unquestionable link between anthropogenic emissions of greenhouse gases and climatic changes has finally been acknowledged and \* widely documented through IPCC reports, the need for precise estimates of greenhouse gas (GHG) production rates and emissions from natural as well as managed ecosystems has risen to a critical level. Future agreements between nations concerning the reduction of their GHG emissions will - pend upon precise estimates of the present level of these emissions in both natural and managed terrestrial and aquatic environments. From this viewpoint, the present volume should prove to a benchmark contribution because it provides very carefully assessed values for GHG emissions or exchanges between critical climatic zones in aquatic environments and the atmosphere. It also provides unique information on the biases of different measurement methods that may account for some of the contradictory results that have been published recently in the literature on this subject. Not only has a large array of current measurement methods been tested concurrently here, but a few new approaches have also been developed, notably laser measurements of atmospheric CO<sub>2</sub> concentration gradients. Another highly useful feature of this book is the addition of monitoring and process studies as well as modeling.

*Sacred Men* Keith L. Camacho.2019-11-22 Between 1944 and 1949 the United States Navy held a war crimes tribunal that tried Japanese nationals and members of Guam's indigenous Chamorro population who had worked for Japan's military government. In *Sacred Men* Keith L. Camacho traces the tribunal's legacy and its role in shaping contemporary domestic and international laws regarding combatants, jurisdiction, and property. Drawing on Giorgio Agamben's notions of bare life and Chamorro concepts of retribution, Camacho demonstrates how the U.S. tribunal used and justified the imprisonment, torture, murder, and exiling of accused Japanese and Chamorro war criminals in order to institute a new American political order. This U.S. disciplinary logic in Guam, Camacho argues, continues to directly inform the ideology used to justify the Guantánamo Bay detention center, the torture and enhanced interrogation of enemy combatants, and the American carceral state.

**The Practice of Everyday Life** Michel de Certeau.2011-11 Michel de Certeau considers the uses to which social representation and modes of social behavior are put by individuals and groups, describing the tactics available to the common man for reclaiming his own autonomy from the all-pervasive forces of commerce, politics, and culture. In exploring the public meaning of ingeniously defended private meanings, de Certeau draws on an immense theoretical literature in analytic philosophy, linguistics, sociology, semiology, and anthropology--to speak of an apposite use of imaginative literature.

Expanding the Lexicon Sabine Arndt-Lappe, Angelika Braun, Claudine Moulin, Esme Winter-

Froemel.2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

The Sounds of Early Cinema Richard Abel, Rick R. Altman.2001-10-03 The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. Silent cinema may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910). Contributors include Richard Abel, Rick Altman, Edouard Arnoldy, Mats Björkin, Stephen Bottomore, Marta Braun, Jean Châteauevert, Ian Christie, Richard Crangle, Helen Day-Mayer, John Fullerton, Jane Gaines, André Gaudreault, Tom Gunning, François Jost, Charlie Keil, Jeff Klenotic, Germain Lacasse, Neil Lerner, Patrick Loughney, David Mayer, Dominique Nasta, Bernard Perron, Jacques Polet, Lauren Rabinovitz, Isabelle Raynauld, Herbert Reynolds, Gregory A. Waller, and Rashit M. Yangirov.

Advanced Information Systems Engineering Anne Persson, Janis Stirna.2004-08-18 th CAiSE 2004 was the 16 in the series of International Conferences on Advanced Information Systems Engineering. In the year 2004 the conference was hosted by the Faculty of Computer Science and Information Technology, Riga Technical University, Latvia. Since the late 1980s, the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering. The conference theme of CAiSE 2004 was Knowledge and Model Driven Information Systems Engineering for Networked Organizations. Modern businesses and IT systems are facing an ever more complex environment characterized by openness, variety, and change. Organizations are becoming less self-sufficient and increasingly dependent on business partners and other actors. These trends call for openness of business as well as IT systems, i.e. the ability to connect and interoperate with other systems. Furthermore, organizations are experiencing ever more variety in their business, in all conceivable dimensions. The different competencies required by the workforce are multiplying. In the same way, the variety in technology is overwhelming with a multitude of languages, platforms, devices, standards, and products. Moreover, organizations need to manage an environment that is constantly changing and where lead times, product life cycles, and partner relationships are shortening. The demand of having to constantly adapt IT to changing technologies and business practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years, such as autonomic computing, component and services marketplaces and dynamically generated software.

**Socialism of Fools** Michele Battini.2016-04-05 In Socialism of Fools, Michele Battini focuses on the critical moment during the Enlightenment in which anti-Jewish stereotypes morphed into a sophisticated, modern social anti-Semitism. He recovers the potent anti-Jewish, anticapitalist propaganda that cemented the idea of a Jewish conspiracy in the European mind and connects it to the atrocities that characterized the Jewish experience in the nineteenth and twentieth centuries.

Beginning in the eighteenth century, counter-Enlightenment intellectuals and intransigent Catholic writers singled out Jews for conspiring to exploit self-sustaining markets and the liberal state. These ideas spread among socialist and labor movements in the nineteenth century and intensified during the Long Depression of the 1870s. Anti-Jewish anticapitalism then migrated to the Habsburg Empire with the Christian Social Party; to Germany with the Anti-Semitic Leagues; to France with the nationalist movements; and to Italy, where Revolutionary Syndicalists made anti-Jewish anticapitalism the basis of an alliance with the nationalists. Exemplified best in the Protocols of the Elders of Zion, the infamous document that leaked Jewish plans to conquer the world, the Jewish-conspiracy myth inverts reality and creates a perverse relationship to historical and judicial truth. Isolating the intellectual roots of this phenomenon and its contemporary resonances, Battini shows us why, so many decades after the Holocaust, Jewish people continue to be a powerful political target.
