The Lived Experience of Chinese International Students in the U.S. Yalun Zhou, Michael Wei.2020-12-21 This book marks a departure from traditional assumptions concerning the deficiencies of Chinese international students in terms of learning and adapting. It employs phenomenological narrative inquiry and a small culture approach to investigate the evolved, fluid experience of pursuing a graduate degree in the U.S. at Blue Fountain University (a pseudonym for a mid-western university). Adopting an interdisciplinary perspective, this book addresses two fundamental questions: What study abroad is and what study abroad counts? The sociocultural dimensions that shape the cross-border degree seeking endeavors inform stakeholders what works for Chinese international students' successful pursuits as EFL learners and ESL users and what could be improved. This book shares thoughts on the implications and impact of educational contexts to stakeholders at normal and dynamic contexts interrupted by global pandemic outbreak. It contributes to the understanding of the internationalization of the host institute and the EFL education reform efforts (policy making, teacher education, and classroom practice) in China (and in Asia at large).

Critical Perspectives on International Education Yvonne Hébert, Ali A. Abdi.2013-02-11 In rapidly globalizing spaces of life, any research project on international education would necessarily have multi-directional emphases, with the quality of observations and analyses reflecting the expanding political, economic and cultural intersections which characterize this potentially promising century. To respond to these emerging learning and living contexts of our world, this book brings together some of the most active and established scholars in the field. As such, the book represents important epistemic interventions that analyze and critique the institutional, socio-economic, linguistic and pedagogical platforms of international education. As the locus of international education cannot be detached from the pragmatics of social development, the specific recommendations embedded in this book expand the debates and broaden the boundaries of learning projects that should enhance the lives of people, especially those who are continually marginalized by the regimes of globalization. Thus, the book actively advocates for possibilities of human well-beings via different formats of education in diverse locations of life. "Critical Perspectives on International Education offers a historically comprehensive, intellectually honest, and perspective-rich scholarly exploration of a new education-globalization dynamic. This book courageously offers up diverse voices, gathered into a robust and useful conversation regarding global education. This book adds greatly to understanding why educational marketplaces must be driven by principles and practices that empower diverse peoples, to secure sustainable knowledge benefits that contribute to personal, local, national and international well-being. This critical perspective reader will engage scholars, researchers and citizens." Jim Paul, University of Calgary "In the current intensifications of globalization and its resulting inequalities, it is crucial to better understand the role of knowledge creation and knowledge dissemination. Should knowledge be only a commodity to be sold in the market and a tool to increase economic capital, or should it be a shared sociocultural capital aimed at improving democracy and the common good? In Critical Perspectives on International Education, Yvonne Hébert and Ali A. Abdi assemble an impressive array of contributions from all over the world that address this question from a variety of critical perspectives and case studies. I recommend this book to everyone interested in the connections between education, citizenship development and human well-being." Daniel Schugurensky, Arizona State University
