Secret Origins of the Bible Tim Callahan.2002 Callahan strictly interprets the Bible through the lens of comparative mythology, where the mythic content of Biblical stories is illustrated as a way to understand the purpose the stories served for the people who wrote them. Biblical history is merely a mythic representation of human psychology and meaning-making in human conscience. Callahan contends that most of the histories and stories were written and manipulated centuries after the events described. He cautions against literal interpretation of the Bible, but seeks to understand why society validates the myth.

Poverty and Famines Amartya Sen. 1983-01-20 The main focus of this book is on the causation of starvation in general and of famines in particular. The author develops the alternative method of analysis—the 'entitlement approach'—concentrating on ownership and exchange, not on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of conceptualizing poverty with that of analyzing starvation.
