Urban Health Steven Whitman, Ami Shah, Maureen Benjamins. 2011 The 1980s opened a discussion of the varying nature of health in different segments of the United States. Falling under the rubric of health disparities, a great deal of research has been published demonstrating the substantial differences in health status within a population. The causes of health disparities are varied and not always clear but most researchers agree that disparities are a reflection of social and economic inequities and political injustice. One of the obstacles to addressing disparities is the lack of meaningful health data especially for vulnerable populations, which is often nonexistent despite being a critical factor for informing health programs and policies at the local level. This book provides a model for combating health disparities by describing how the authors gathered local health information, engaged the community at every step of the process, and created movement toward evidence-based sustainable change. This book describes how a landmark health survey in Chicago generated dramatic data that are allowing investigators throughout the city to move from data to action and from observation to intervention. In providing a detailed description of how the community-focused collection and analysis of health data can serve as an impetus for improved well-being, *Urban Health* is an invaluable resource for researchers, community groups, students and professionals.

Health and Wellness Guide for the Volunteer Fire Service .2004 From Book's Introduction: Firefighting continues to be one of the nation's most dangerous and hazardous jobs with heart attacks, high physical stress levels, and sprains and strains all too common. In the past five years, the fire service has focused its attention on overcoming these issues by working to change the service's culture. The National Fire Protection Association (NFPA) has spent much time redeveloping and revamping their health and wellness standards, while career departments have been working with the International Association of Firefighters (IAFF) and International Association of Fire Chiefs (IAFC) on a wellness initiative that began in 1997. Volunteer personnel also face similar risks when it comes to health and wellness. The nature of member time constraints and tight departmental

budgets in the volunteer service often inhibits the creation of comprehensive health and wellness programs. Implementing a comprehensive health and wellness program could overwhelm the resources of many volunteer departments. Time, lack of program leadership, and insufficient funding pose serious challenges to most departments, which often struggle to deliver basic fire suppression capabilities. This guide provides the rationale and suggestions for successfully implementing a health and wellness program volunteer service. It also addresses many common roadblocks.
