Budgeting for Sustainability Jerome B. McKinney.2017-10-12 This book provides critical insights about how U.S. policymaking is likely to be imperiling America's future, and how only the most efficient and productive organizations and governments will reap globalization's greatest rewards. Vital areas such as vocational training, manufacturing, infrastructure, sustainable debt creation and the STEM worker shortage crisis are extensively examined and innovative solutions are proposed. Twenty-seven common-good indicators are presented for assessing policymaking, aimed at providing maximum transparency and accountability.

Prospective Mathematics Teachers' Knowledge of Algebra Rongjin Huang.2014-03-20 Rongjin Huang examines teachers' knowledge of algebra for teaching, with a particular focus on teaching the concept of function and quadratic relations in China and the United States. 376 Chinese and 115 U.S.A. prospective middle and high school mathematics teachers participated in this survey. Based on an extensive quantitative and qualitative data analysis the author comes to the following conclusions: The Chinese participants demonstrate a stronger knowledge of algebra for teaching and the Chinese participants' structure of knowledge of algebra for teaching is much more interconnected. Chinese participants show flexibility in choosing appropriate perspectives of the function concept and in selecting multiple representations. Finally, the number of college mathematics and mathematics education courses taken impacts the teachers' knowledge of algebra for teaching.

Follow the Science to School: Evidence-based Practices for Elementary Education Barbara Davidson,Kathleen Carroll,Michael J. Petrilli.2022-03-21 "Follow the science." How often have you picked up an education book to read how, according to the authors, the system is broken, failing, and flailing—but their ideas for fixing it will bring about a miraculous transformation? That's not the approach of this volume. Sure, the editors believe that our system of education could achieve significantly better results. But they also recognize that schools have gotten better over time. One explanation is the progress schools have made in "following the science". Especially in early reading and math instruction, scholars know more now about what works than we did in the past, and more schools are putting that knowledge into practice. Now, in the wake of a horrific pandemic, even the best elementary schools are struggling to help their students get their momentum back again. In this book, the editors share high-quality syntheses of evidence and insights from leading educators, academics, and other experts. And they communicate those findings in user-friendly language, with an understanding of the real-world complexities of schools and classrooms.

Global Catholicism, Tolerance and the Open Society Arno Tausch,Stanislaw Obirek.2019-09-03 This book systematically assesses the political and social values of the more than 1.3 billion Catholics around the globe, by far the largest denomination of Western Christianity. Based on an extensive analysis of data from the World Values Survey and other global opinion surveys, the book sheds new light on the value systems and opinions of Roman Catholics. The authors highlight core problems and challenges the Church is currently facing in adapting to the modern world, including Catholic anti-Semitism, religious and sexual tolerance, and opinions towards democracy, while also offering an anthropological reflection on how well the Church is adapting or failing to adapt to the requirements of an open society.

Encyclopedia of Education Economics and Finance Dominic J. Brewer, Lawrence O. Picus. 2014-08-25 Economics can be a lens for understanding the behavior of schools, districts, states, and nations in meeting education needs of their populaces, as well as for understanding the individual decisions made by administrators, teachers, and students. Insights from economics help decision makers at the state level understand how to raise and distribute funds for public schools in an equitable manner for both schools and taxpayers. Economics also can assist researchers in analyzing effects of school spending and teacher compensation on student outcomes. And economics can provide important insights into public debates on issues such as whether to offer vouchers for subsidizing student attendance at private schools. This two-volume encyclopedia contains over 300 entries by experts in the field that cover these issues and more. Features: This work of 2 volumes (in both print and electronic formats) contains 300-350 signed entries by significant figures in the field. Entries conclude with cross-references and suggestions for further readings to guide students to in-depth resources. Although organized in A-to-Z fashion, a thematic "Reader's Guide" in the front matter groups related entries by topic. Also in the front matter, a chronology provides students with historical perspective on the development of education economics and finance as a field of study. The entire work concludes with a Resources appendix and a comprehensive Index. In the electronic version, the index, Reader's Guide, and cross references combine to provide effective search-and-browse capabilities.

Women's Under-Representation in the Engineering and Computing Professions: Fresh Perspectives on a Complex Problem Kathleen Buse, Catherine Hill, Romila Singh. 2018-06-21 Understanding the many complexities that define gender inequality has been described by researchers as a grand challenge. Novel insights, innovation, a broader community to conduct research and to ascertain effective interventions are essential in the challenge to create organizations that are gender equal. As such, this Research Topic in *Frontiers in Psychology* addresses the under-representation of women in engineering and computing as a complex, but solvable problem. This Research Topic seeks to inform the global community about advances in understanding the under-representation of women in engineering and computing with a focus on what enables change. Further, this Topic will promote fresh perspectives, innovative methodologies, and mixed method approaches important to accelerating the pace of change.

Pain Woman Takes Your Keys, and Other Essays from a Nervous System Sonya Huber. 2017-03-01 Rate your pain on a scale of one to ten. What about on a scale of spicy to citrus? Is it more like a lava lamp or a mosaic? Pain, though a universal element of human experience, is dimly understood and sometimes barely managed. *Pain Woman Takes Your Keys, and Other Essays from a Nervous System* is a collection of literary and experimental essays about living with chronic pain. Sonya Huber moves away from a linear narrative to step through the doorway into pain itself, into that strange, unbounded reality. Although the essays are personal in nature, this collection is not a record of the author's specific condition but an exploration that transcends pain's airless and constraining world and focuses on its edges from wild and widely ranging angles. Huber addresses the nature and experience of invisible disability, including the challenges of gender bias in our health care system, the search for effective treatment options, and the difficulty of articulating chronic pain. She makes pain a lens of inquiry and lyricism, finds its humor and complexity, describes its irascible character, and explores its temperature, taste, and even its beauty.

The Future of the Gulf Region Arno Tausch.2021-08-09 This book studies values and attitudes in the Gulf region. In light of global power shifts, the threatening collapse of internal security in the West, and uncertainty about the current leadership vacuum in world society, this book explores a future leading role of the Gulf countries in such institutions as the G-20 and the OECD. Based on rigorous analysis of macro-level data and opinion surveys with relevance for the Gulf region, it analyzes the global macro-factors shaping the Gulf's future at a time of the global COVID-19 crisis and depression and rising global tensions. Starting with an empirical time series analysis of the long cycles of global politics and economics, it highlights the implications for the Gulf region. Offering a multivariate analysis of civil society values in the Gulf, the author analyzes value changes and attitudes on antisemitism, political Islam, internal security, democracy, and other issues of Arab politics. The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf's civil society and strongly suggest that the Gulf's future is rather with the free societies of the West and not with a Neo-Ottoman Empire in whatever form. Exceptional in scope and right up-to-the-minute in coverage Brian M Pollins, Associate, Professor Emeritus, The Ohio State University. An outstanding and topical book by an astute scholar of the MENA region Professor Hussein Solomon, Academic Head of Department, Political Studies and Governance, University of the Free State, South Africa. The most comprehensive and insightful study on the subject to date Manfred B. Steger, Professor of Sociology, University of Hawai'i at Manoa and Global Professorial Fellow, Western Sydney University.

The ID CaseBook Peggy A. Ertmer,James A. Quinn,Krista D. Glazewski.2019-03-26 The fifth edition of The ID CaseBook provides instructional design students with 26 realistic, open-ended case studies that encourage adept problem-solving across a variety of client types and through all stages of the process. After an introduction to the technique of case-based reasoning, the book offers three sections dedicated to K-12, post-secondary, and corporate clients, respectively, each composed of varied, detailed cases created by instructional design experts. The cases and their accompanying discussion questions encourage students to analyze the available information, develop action plans, and consider alternative possibilities in resolving problems. The esteemed editor team of Peggy A. Ertmer, James A. Quinn, and Krista D. Glazewski continue their considerable contribution to the teaching of instructional design with this thoroughly revised and updated volume.

The British Are Coming Rick Atkinson.2019-05-14 Winner of the George Washington Prize Winner of the Barbara and David Zalaznick Book Prize in American History Winner of the Excellence in American History Book Award Winner of the Fraunces Tavern Museum Book Award From the bestselling author of the Liberation Trilogy comes the extraordinary first volume of his new trilogy about the American Revolution Rick Atkinson, author of the Pulitzer Prize-winning *An Army at Dawn* and two other superb books about World War II, has long been admired for his deeply researched, stunningly vivid narrative histories. Now he turns his attention to a new war, and in the initial volume of the Revolution Trilogy he recounts the first twenty-one months of America's violent war for independence. From the battles at Lexington and Concord in spring 1775 to those at Trenton and Princeton in winter 1777, American militiamen and then the ragged Continental Army take on the world's most formidable fighting force. It is a gripping saga alive with astonishing characters: Henry Knox, the former bookseller with an uncanny understanding of artillery; Nathanael Greene, the blue-eyed bumpkin who becomes a brilliant battle captain; Benjamin Franklin, the self-made man who proves to be the wiliest of diplomats; George Washington, the commander in chief who learns the difficult art of leadership when the war seems all but lost. The story is also told from the British perspective, making the mortal conflict between the redcoats and the rebels all the more compelling. Full of riveting details and untold stories, *The British Are Coming* is a tale of heroes and knaves, of sacrifice and blunder, of redemption and profound suffering. Rick Atkinson has given stirring new life to the first act of our country's creation drama.

Beginning Algebra Charles P. McKeague.2014-05-10 *Beginning Algebra: A Text/Workbook, Second Edition* focuses on the principles, operations, and approaches involved in algebra. The publication first elaborates on the basics, linear equations and inequalities, and graphing and linear

systems. Discussions focus on solving linear systems by graphing, elimination method, graphing ordered pairs and straight lines, linear and compound inequalities, addition and subtraction of real numbers, and properties of real numbers. The text then examines exponents and polynomials, factoring, and rational expressions. Topics include multiplication and division of rational expressions, equations involving rational expressions, dividing a polynomial by a polynomial, factoring trinomials, greatest common factor, operations with monomials, addition and subtraction of polynomials, and binomial squares and other special products. The book takes a look at more quadratic equations and roots and radicals, including multiplication and division of radicals, equations involving radicals, quadratic formula, complex solutions to quadratic equations, and graphing parabolas. The publication is a dependable reference for students and researchers interested in algebra.

Doing the Scholarship of Teaching and Learning in Mathematics Jacqueline M. Dewar, Curtis D. Bennett. 2014-11-03 The Scholarship of Teaching and Learning (SoTL) movement encourages faculty to view teaching “problems” as invitations to conduct scholarly investigations. In this growing field of inquiry faculty bring their disciplinary knowledge and teaching experience to bear on questions of teaching and learning. They systematically gather evidence to develop and support their conclusions. The results are to be peer reviewed and made public for others to build on. This Notes volume is written expressly for collegiate mathematics faculty who want to know more about conducting scholarly investigations into their teaching and their students’ learning. Envisioned and edited by two mathematics faculty, the volume serves as a how-to guide for doing SoTL in mathematics.

Advanced Statistical Methods in Data Science Ding-Geng Chen, Jiahua Chen, Xuewen Lu, Grace Y. Yi, Hao Yu. 2016-11-30 This book gathers invited presentations from the 2nd Symposium of the ICSA- CANADA Chapter held at the University of Calgary from August 4-6, 2015. The aim of this Symposium was to promote advanced statistical methods in big-data sciences and to allow researchers to exchange ideas on statistics and data science and to embrace the challenges and opportunities of statistics and data science in the modern world. It addresses diverse themes in advanced statistical analysis in big-data sciences, including methods for administrative data analysis, survival data analysis, missing data analysis, high-dimensional and genetic data analysis, longitudinal and functional data analysis, the design and analysis of studies with response-dependent and multi-phase designs, time series and robust statistics, statistical inference based on likelihood, empirical likelihood and estimating functions. The editorial group selected 14 high-quality presentations from this successful symposium and invited the presenters to prepare a full chapter for this book in order to disseminate the findings and promote further research collaborations in this area. This timely book offers new methods that impact advanced statistical model development in big-data sciences.

Mathematical Methods in Engineering Nuno Miguel Fonseca Ferreira, José António Tenreiro Machado. 2014-08-18 This book presents a careful selection of the contributions presented at the Mathematical Methods in Engineering (MME10) International Symposium, held at the Polytechnic Institute of Coimbra- Engineering Institute of Coimbra (IPC/ISEC), Portugal, October 21-24, 2010. The volume discusses recent developments about theoretical and applied mathematics toward the solution of engineering problems, thus covering a wide range of topics, such as: Automatic Control, Autonomous Systems, Computer Science, Dynamical Systems and Control, Electronics, Finance and Economics, Fluid Mechanics and Heat Transfer, Fractional Mathematics, Fractional Transforms and Their Applications, Fuzzy Sets and Systems, Image and Signal Analysis, Image Processing, Mechanics, Mechatronics, Motor Control and Human Movement Analysis, Nonlinear Dynamics, Partial Differential Equations, Robotics, Acoustics, Vibration and Control, and Wavelets.

Introduction to Teaching Gene E. Hall,Linda F. Quinn,Donna M. Gollnick.2018-11-29 An ideal introductory text for aspiring teachers, Introduction to Teaching: Making a Difference in Student Learning is grounded in the realities and complexities found in today's schools. Acclaimed authors Gene E. Hall, Linda F. Quinn, and Donna M. Gollnick thoroughly prepare readers to make a difference as teachers, presenting firsthand stories and evidence-based practices while offering a student-centered approach to learning. The authors focus on how to address one of the biggest challenges facing many of today's schools—ensuring that all students are learning—and help teachers prioritize student learning as their primary focus. From true-to-life challenges that future teachers will face, such as high-stakes testing, reduced funding, low retention, and Common Core State Standards, to the inspiration and joy they will experience throughout their teaching careers, the Third Edition paints an importantly authentic picture of the real life of a teacher.

Algebra William G. McCallum,Eric Connally,Deborah Hughes-Hallett.2014-11-25 Algebra: Form and Function was designed based on the fundamental goal for a student to foster understanding of algebraic structure- that is, an understanding of how the arrangements of symbols allows

us to predict, for example, the behavior of a function or the number of solutions to an equation. Mastering algebraic structure enables students to read algebraic expressions and equations in real-life contexts, not just manipulate them, and to choose which form or which operation will best suit the context. It facilitates being able to translate back and forth between symbolic, graphical, numerical, and verbal representations. By balancing practice in manipulation and opportunities to see the big picture, Algebra: Form and Function offers a way for teachers to help students achieve real mastery of algebra.

Practical Guide to LTE-A, VoLTE and IoT Ayman Elnashar, Mohamed A. El-saidny. 2018-06-19 Essential reference providing best practice of LTE-A, VoLTE, and IoT Design/deployment/Performance and evolution towards 5G This book is a practical guide to the design, deployment, and performance of LTE-A, VoLTE/IMS and IoT. A comprehensive practical performance analysis for VoLTE is conducted based on field measurement results from live LTE networks. Also, it provides a comprehensive introduction to IoT and 5G evolutions. Practical aspects and best practice of LTE-A/IMS/VoLTE/IoT are presented. Practical aspects of LTE-Advanced features are presented. In addition, LTE/LTE-A network capacity dimensioning and analysis are demonstrated based on live LTE/LTE-A networks KPIs. A comprehensive foundation for 5G technologies is provided including massive MIMO, eMBB, URLLC, mMTC, NGCN and network slicing, cloudification, virtualization and SDN. Practical Guide to LTE-A, VoLTE and IoT: Paving the Way Towards 5G can be used as a practical comprehensive guide for best practices in LTE/LTE-A/VoLTE/IoT design, deployment, performance analysis and network architecture and dimensioning. It offers tutorial introduction on LTE-A/IoT/5G networks, enabling the reader to use this advanced book without the need to refer to more introductory texts. Offers a complete overview of LTE and LTE-A, IMS, VoLTE and IoT and 5G Introduces readers to IP Multimedia Subsystems (IMS) Performs a comprehensive evaluation of VoLTE/CSFB Provides LTE/LTE-A network capacity and dimensioning Examines IoT and 5G evolutions towards a super connected world Introduce 3GPP NB-IoT evolution for low power wide area (LPWA) network Provide a comprehensive introduction for 5G evolution including eMBB, URLLC, mMTC, network slicing, cloudification, virtualization, SDN and orchestration Practical Guide to LTE-A, VoLTE and IoT will appeal to all deployment and service engineers, network designers, and planning and optimization engineers working in mobile communications. Also, it is a practical guide for R&D and standardization experts to evolve the LTE/LTE-A, VoLTE and IoT towards 5G evolution.

The Education Invasion Joy Pullmann. 2017-03-14 Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of “informational text” instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping “reform” of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the

Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an absolute game-changer in public education,” yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation’s schools? Who benefits? And how can citizens regain local self-governance in education, so their children’s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.
