Game, Set, Cash! Brad Hutchins.2014-05-28 Inside the secret world of tennis court-siding. Brad Hutchins has been living a young bloke's dream: getting paid to travel the world and watch sport. Sitting court-side on the pro tennis circuit, he uses his phone to transmit results to a gambling syndicate, taking advantage of the time delay in TV broadcasts to beat other online punters to the big pay-offs. His stories from life on the road capture the adventures and mishaps that come with following the world's best tennis players and partying in a new country every week. But like card counters in casinos, court-siders are despised by the tennis establishment. The more time Brad spends at tournaments, the harder it becomes for him to evade the security guards who are hell-bent on ejecting him from matches. The resulting cat-and-mouse chases will appeal to anyone who loves the roguish spirit of *The Wolf of Wall Street* or *Catch Me If You Can*. Brad Hutchins spent his youth playing sports and travelling the world, before finding his dream job as a tennis trader. Born and raised in Brisbane, he has lived and worked in the UK and Canada, and now teaches primary school students on the Gold Coast. *Game, Set, Cash!* is his first book.

The Smart Money Michael Konik.2006-11-14 A riveting inside look at the lucrative world of professional high-stakes sports betting by a journalist who lived a secret life as a key operative in the world's most successful sports gambling ring. When journalist Michael Konik landed an interview with Rick Big Daddy Matthews, the largest bet he'd placed on a sporting event was \$200. Konik, an expert blackjack and poker player, was no stranger to Vegas. But Matthews was in a different league: the man was rumored to be the world's smartest sports bettor, the

mastermind behind the Brain Trust, a shadowy group of gamblers known for their expertise in beating the Vegas line. Konik had heard the word on the street -- that Matthews was a snake, a conniver who would do anything to gain an edge. But he was also brilliant, cunning, and charming. And when he asked Konik if he'd like to make a little money during the football season, the writer found himself seduced . . . So began Michael Konik's wild ride as an operative of the elite Brain Trust. In *The Smart Money*, Konik takes readers behind the veil of secrecy shrouding the most successful sports betting operation in America, bypassing the myths and the rumors, going all the way to its innermost sanctum. He reveals how they -- and he -- got rich by beating the Vegas lines and, ultimately, the multimillion-dollar offshore betting circuit. He details the excesses and the betrayals, the horse-trading and the paranoia, that are the perks and perils of a lifestyle in which staking inordinate sums of money on the outcome of a single event -- sometimes as much as \$1 million on a football game -- is a normal part of doing business.

Fortune's Formula William Poundstone.2010-06-01 In 1956, two Bell Labs scientists discovered the scientific formula for getting rich. One was mathematician Claude Shannon, neurotic father of our digital age, whose genius is ranked with Einstein's. The other was John L. Kelly Jr., a Texas-born, gun-toting physicist. Together they applied the science of information theory—the basis of computers and the Internet—to the problem of making as much money as possible, as fast as possible. Shannon and MIT mathematician Edward O. Thorp took the Kelly formula to Las Vegas. It worked. They realized that there was even more money to be made in the stock market. Thorp used the Kelly system with his phenomenally successful hedge fund, Princeton-Newport Partners. Shannon became a successful investor, too, topping even Warren Buffett's rate of return. Fortune's Formula traces how the Kelly formula sparked controversy even as it made fortunes at racetracks, casinos, and trading desks. It reveals the dark side of this alluring scheme, which is founded on exploiting an insider's edge. Shannon believed it was possible for a smart investor to beat the market—and William Poundstone's Fortune's Formula will convince you that he was right.

The Amazing Sports Betting Secret Of A London Mystery Man Frank Owen.2021-02-09 Have you ever wondered why there is a lot of excitement about winning money in sports betting? Well, I'm going to tell you why. In fact, I am going to tell you some things about this amazing betting game that you've

probably never heard before. Things that could possibly win you a lot of money. And some things that might stop you from ever gambling again. So, please read these words carefully. Every word is true and it has taken me the better part of my life to discover what I am about to reveal to you. As you probably already know, sports betting is a game in which you are either a winner or a loser. There are no in-betweens, right? But did you know that 99% of people lose their money in the long run? And this of course does not mean that you will not win any money. You probably already have. What it means is that in the end, you are bound to lose all the money you've won plus much more of your own. You see, the 99% of people who lose their money do so because they bet on sports relying on two things alone. First, it's the knowledge they have of a particular sports game. And secondly, they hope to get lucky by relying on that knowledge. But...HOPE IS NOT A STRATEGY. In fact, there is nothing more difficult to acquire than the image that hope places in one's mind. The truth is, while you hope to get lucky (usually by betting on your favorite teams), the gambling industry on the other hand strategizes by using psychological techniques to fuel you to continue hoping and dreaming. And why is that? Actually, the answer is simple: As long as you maintain this attitude, they will always take your money. A good example is the use of a psychological technique known as priming, in which the betting companies only advertise the people who win. By constantly seeing this, most people will think that there are so many winners out there. And because of the natural self-centeredness, most seeing these ads will be deceived to think that they too stand a chance to win. While in truth, the odds of winning are really stacked against them. In fact, if we required that the television stations run a thirty-second interview with each loser every time, they interviewed a winner. The hundreds of millions of losers in a single game would require more than nine years of your undivided attention just to watch them say that they've lost. That's

the bad news. The good news is that there are ways to win. And the most famous one being the use of sports betting systems and strategies. They are everywhere and have been sold for as little as £ 10 to as much as £ 5,000. I know it because I have purchased them all. Many of these systems are extremely complex. They have been developed by scientists, mathematicians, and college professors with high tech computer-like minds. In practice and research, I have found that to successfully use these systems you need to have a sophisticated analytical framework to perform the constant calculations required. And for the average person, many of these systems are not even worth the hype they have been given. That's why I developed my own simple sports betting system. Actually, it took me several years and a lot of money to make it into a sure-fire winner, but it was worth it. I took all the expensive and complex systems available on today's market and created a simple, easy-to-follow system that quite honestly wins like crazy! There are no weird hair-brained formulas to use and no mathematical theories to apply. It is simple and straight-forward. It tells you how to play, how to bet, and how to win. Would you like to try out this amazing money-making sports betting secret? Would you like to see for yourself if it is as easy and as profitable as I say it is? Sure, you would. Your decision to purchase this manual will probably turn out to be the smartest move you've ever made.

sports, and reveal the hidden forces that shape how basketball, baseball, football, and hockey games are played, won and lost. Drawing from Moskowitz's original research, as well as studies from fellow economists such as bestselling author Richard Thaler, the authors look at: the influence home-field advantage has on the outcomes of games in all sports and why it exists; the surprising truth about the universally accepted axiom that defense wins championships; the subtle biases that umpires exhibit in calling balls and strikes in key situations; the unintended consequences of referees' tendencies in every sport to swallow the whistle, and more. Among the insights that Scorecasting reveals: • Why Tiger Woods is prone to the same mistake in high-pressure putting situations that you and I are • Why professional teams routinely overvalue draft picks • The myth of momentum or the hot hand in sports, and why so many fans, coaches, and broadcasters fervently subscribe to it • Why NFL coaches rarely go for a first down on fourth-down situations--even when their reluctance to do so reduces their chances of winning. In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small parochial high school in Arkansas, Scorecasting will forever change how you view the game, whatever your favorite sport might be.

The Ultimate Sports Betting Secrets A. B. Lawal.2019-08-30

About the Book Imagine if you had an Almanac with tomorrows sports results and events. Imagine what you could do if you knew the outcome before it actually happened. Impossible? This book teaches you how sports investing works and how you can win consistently from sports betting. Sports has been my life since childhood. I was trying to crunch the code to predict tomorrow's games. In fact, this may sound a little bit like a back to the future fairytale, but I've come as close as I can to the results of Tomorrow's Almanac. During the last 13 years, I've been gathering sports data for Major League sports like Major League Baseball, Nhl Hockey, the NFL football and NBA basketball. I'm

crunching the numbers and I'm comparing the stats. I'm analyzing and back testing everything for years and years to crack the sports code and to find those repeating patterns and trends. This makes me understand what makes teams win and what makes teams lose. And you know what I found? I found that history always repeats itself. This is true, especially in sports where the rules are strictly defined. The outcomes in these situations are very predictable. Of course there are lucky strikes and conditions that are impossible to put into perspective. However, those are very small percentages. If you know the past outcome of an event, you can predict the results for the game in similar circumstances with a high degree of probability. As I said before, the past is never a full indication of what will happen in the future and there is always room for surprises, but again, this is what makes sports fun to watch. Am I right? However, what is the chance that a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances? What's that percentage? 86.5% that's right. An 86.5% of the cases there will be no surprises and the prediction will come absolutely. The Zcode investing software is the best system in the market because it keeps making investors consistent gains each and every month. Truth is we love sports, but we hate to gamble and that's why we call this sports investing, which is similar to any other trading like stocks, stock options, and forex trades. This is just way more predictable than today's flawed economic models with crisis's and bankruptcy events. Every day the software is gathering thousands and thousands of sports data and results: every single event, every single detail, every single player and every single team. I start the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tell you who is going to win, but also and most importantly, where the value is, which means more money can be made guessing. The Ten Equations That Rule the World David

Sumpter.2021-08-24 Is there a secret formula for getting rich?

For going viral? For deciding how long to stick with your current job, Netflix series, or even relationship? This book is all about the equations that make our world go round. Ten of them, in fact.

They are integral to everything from investment banking to betting companies and social media giants. And they can help you to increase your chance of success, guard against financial loss, live more healthfully, and see through scaremongering. They are known by only the privileged few - until now. With wit and clarity, mathematician David Sumpter shows that it isn't the technical details that make these formulas so successful. It is the way they allow mathematicians to view problems from a different angle - a way of seeing the world that anyone can learn. Empowering and illuminating, The Ten Equations shows how math really can change your life.

Bettors learn how to read the betting lines, how the lines are formed, the odds in each sport, and how the over/under, teasers,

What people are saying about The Logic Of Sports Betting Matt and Ed are two of the smartest minds in sports betting. - Rufus Peabody, professional sports bettor As a sportsbook employee for 30-plus years, I find it difficult to read or watch anything about sports betting.
