Complete Works of Jules Verne (illustrated): A Journey To The Centre Of The Earth, From The Earth To The Moon, The Floating Island, The Children Of Capitan Grant, Twenty Thousand Leagues Under The Sea Jules Verne. 2021-02-01 Jules Verne, a 19th-century French author, is famed for such revolutionary science-fiction novels as “Around the World in Eighty Days” and “Twenty Thousand Leagues Under the Sea”. He has sometimes been called the Father of Science Fiction, a title that has also been given to H. G. Wells and Hugo Gernsback. In all, Verne authored more than 60 books (most notably the 54 novels comprising the “Voyages Extraordinaires”), as well as dozens of plays, short stories and librettos. He conjured hundreds of memorable characters and imagined countless innovations years before their time, including the submarine, space travel, terrestrial flight and deep-sea exploration. Verne is generally considered a major literary author in France and most of Europe, where he has had a wide influence on the literary avant-garde and on surrealism. Verne has been the second most-translated author in the world since 1979, ranking between Agatha Christie and William Shakespeare. Some of the works appear only in their original French texts, due to copyright restrictions. Table of Contents The Novels FIVE WEEKS IN A BALLOON PARIS IN THE

Planning the Greenspaces of Nineteenth-Century Paris Richard S. Hopkins.2015-05-11 In the second half of the nineteenth century, state and municipal governments oversaw the explosive growth of public parks, squares, and gardens throughout the city of Paris. In *Planning the Greenspaces of Nineteenth-Century Paris*, Richard S. Hopkins skillfully weaves together social and cultural history to argue that the expansion of these greenspaces served as more than simple urban embellishment. Rather, they provided an essential component of the Second Empire's efforts to transform and revitalize France's capital city, and their development continued well into the Third Republic. Hopkins brings a new dimension to the study of nineteenth-century Parisian urbanism by considering the parks and squares of Paris from multiple perspectives: the reformers who advocated for them, the planners who constructed them, the workers who maintained them, and the neighborhood residents who used them. As public areas over which private citizens felt a high degree of ownership, these spaces offered a unique opportunity for collaboration between city officials and residents. Hopkins examines the national and municipal goals for the greenspaces, their intended contributions to public health, and the roles of park service employees and neighborhood groups in their ongoing centrality to Parisian life. Hopkins's study moves deftly from the aspirations of the political authorities to the ways in which new public spaces contributed to community-building and neighborhood identity. Drawing on extensive archival research, he depicts a greenspace design and development process that illustrates the dynamic relationship between citizens and city.
