Sleep Disorders and Sleep Deprivation Institute of Medicine, Board on Health Sciences Policy, Committee on Sleep Medicine and Research. 2006-10-13 Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. *Sleep Disorders and Sleep Deprivation* presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

Governing Africa's Forests in a Globalized World Laura A. German, Alain Karsenty, Anne-Marie Tiani. 2009-12 Many countries around the world are engaged in decentralization processes, and most African countries face serious problems with forest governance, from benefits sharing to illegality and sustainable forest management. This book summarizes experiences to date on the extent and nature of decentralization and its outcomes, most of which suggest an underperformance of governance reforms, and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests. Findings are grouped into two thematic areas: decentralization, livelihoods and sustainable forest management; and international trade, finance and forest sector governance reforms. The authors examine diverse forces shaping the forest sector, including the theory and practice of decentralization, usurpation of authority, corruption and illegality, inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits, and discuss related outcomes on livelihoods, forest condition and equity. The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions, and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns. Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice.

Man, Play, and Games Roger Caillois. 2001 According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

Organizational Culture and Leadership Edgar H. Schein. 2010-07-16 Regarded as one of the most influential management books of all time, this fourth edition of *Leadership and Organizational Culture* transforms the abstract concept of culture into a tool that can be used to better shape the

dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

Une société internationale en mutation Laurence Boisson de Chazournes, Rostane Mehdi.2005 Nombreux sont les acteurs sur la scène internationale. Aux côtés des Etats, des organisations internationales, le secteur privé et le monde associatif, notamment composé de quelques milliers d'ONG, occupent une place toujours plus importante dans les processus d'élaboration normative, de régulation ou encore de contrôle du respect des normes et standards. Un nouveau mode de gouvernance internationale, aux contours certes encore incertains, prend forme. Cet ouvrage collectif - auquel ont participé des juristes et des politologues - analyse les facettes diverses et variées de nouvelles formes d'actions collectives et de partenariats qui émergent dans l'ordre, international contemporain dans les domaines des droits de l'homme, de la protection de l'environnement, du dialogue social ou encore de la promotion de nouvelles technologies de l'information. L'analyse d'initiatives et d'actions menées au sein de l'Organisation des Nations Unies (ONU), de l'Organisation internationale du Travail (OIT), de l'Organisation mondiale du commerce (OMC) de l'Union européenne (UE) et bien d'autres institutions encore, souligne les adaptations normatives et institutionnelles induites par la présence de très nombreux acteurs sur la scène internationale. A l'ère de la mondialisation, les organisations internationales deviennent de véritables enceintes de socialisation au sein desquelles le secteur privé et les ONG sont toujours plus désireux de prendre part au processus de décision, d'application et de contrôle de respect du droit. La viabilité de ces nouveaux processus est néanmoins liée à leur légitimité. Les principes de transparence, de responsabilité et de démocratie participative, apportent leur contribution pour satisfaire à cette exigence Cette dernière appelle néanmoins à d'autres réponses. C'est là l'un des défis importants pour les juristes et politologues face aux mutations de la société internationale.

Conflict in the African Great Lakes Region Ladislav Bizimana.1999 Any analysis aimed at coming up with strategies to positively transform a conflict has first to identify all the actors involved and interests pursued, either individually or collectively. This rule applies best to protracted conflicts like the one under scrutiny. In this research study, Ladislav Bizimana tries to answer the most fundamental question: Who has been doing what, why, how in the bloody conflict that continues to plunge the peoples of the African Great Lakes region into mourning? In doing so, Ladislav draws upon both his personal experience and professional background. As a Rwandan who lived through and survived the 1994 Rwandan horror, Ladislav speaks from within. This matchless, insightful and compelling testimony is enriched by his being a former TV and Radio reporter working for humanitarian agencies in the African Great Lakes region (1994-1995).

There is No Such Thing as a Social Science Dr Phil Hutchinson, Dr Rupert Read, Professor Wes Sharrock. 2012-12-28 The death of Peter Winch in 1997 sparked a revived interest in his work with this book arguing his work suffered misrepresentation in both recent literature and in contemporary critiques of his writing. Debates in philosophy and sociology about foundational questions of social ontology and methodology often claim to have adequately incorporated and moved beyond Winch's concerns. Re-establishing a Winchian voice, the authors examine how such contentions involve a failure to understand central themes in Winch's writings and that the issues which occupied him in his *Idea of a Social Science and its Relation to Philosophy* and later papers remain central to social studies. The volume offers a careful reading of the text in alliance with Wittgensteinian insights and alongside a focus on the nature and results of social thought and inquiry. It draws parallels with other movements in the social studies, notably ethnomethodology, to demonstrate how Winch's central claim is both more significant and more difficult to transcend than sociologists and philosophers have hitherto imagined.

Social Movements, 1768 - 2012 Charles Tilly, Lesley J. Wood. 2015-12-22 The updated and expanded third edition of Tilly's widely acclaimed book brings this analytical history of social movements fully up to date. Tilly and Wood cover such recent topics as the economic crisis and related protest actions around the globe while maintaining their attention to perennially important issues such as immigrants' rights, new media technologies, and the role of bloggers and Facebook in social movement activities. With new coverage of colonialism and its impact on movement formation as well as coverage and analysis of the 2011 Arab Spring, this new edition of *Social Movements* adds more historical depth while capturing a new cycle of contention today. New to the Third Edition Expanded discussion of the Facebook revolution and the significance of new technologies for social movements Analysis of current struggles including the Arab Spring and pro-democracy movements in Egypt and Tunisia, Arizona's pro- and anti-immigration movements, the Tea Party, and the movement inspired by Occupy Wall Street Expanded discussion of the way the emergence of capitalism affected the emergence of the social movement.

Algerian Sketches Pierre Bourdieu.2013-11-04 In the late 1950s, like tens of thousands of young men of his generation, Pierre Bourdieu, having recently passed the agrégation in philosophy, found himself immersed in the Algerian war. Motivated by an impulse that, as he himself says, 'was civic rather than political', nothing seemed more important to him than to understand the Algerian situation and provide the elements that would enable others to come to an informed judgement about it. In extremely tough conditions and along with a small group of students, Bourdieu undertook a series of studies across an Algeria that was tightly patrolled by the army, leading him to discover the shocking reality of the resettlement camps and to analyse the mechanisms of destruction of Algerian society of which they were emblematic. To achieve the objectives he had set himself, Bourdieu had to carry out a genuine intellectual conversion, acquiring an ethnographic understanding of Algerian society, learning sociological analysis at a breakneck pace and inventing new instruments - both theoretical and empirical - that would enable him to understand the relations of domination specific to colonialism. These new tools also enabled him to analyse the nature of the crisis that the war had both produced and manifested. This unique volume brings together the first texts written by Bourdieu in the midst of the Algerian conflict, as well as later writings and interviews in which he returns to the topic of Algeria and the decisive role it played in the development of his work.

Ageing in Society John Bond, Sheila M Peace, Freya Dittmann-Kohli, Gerben Westerhof.2007-02-22 `Ageing in Society brings forth exciting new questions, fresh perspectives, and a necessary critical approach to key issues - this is indeed an authoritative introduction. The authors not only have made significant contributions to gerontology, but offer the reader considerations for what could be, not just what is, the design of old age in society. The book will inform students in ways that so many texts in the area, satisfied with comfortable bromides, do not' - Jaber Gubrium, Editor of Journal of Aging Studies, University of Missouri-Columbia `This completely revised Third Edition of Ageing in Society presents one of the most comprehensive pictures of ageing today. Emphasising the dual processes of ageing societies and the experience of ageing, the book offers the reader - student or researcher alike - cogent discussions of the most up to date perspectives and evidence available. The contributors are all leading experts in their fields - comprising a range of important disciplines as they apply to ageing. Ageing in Society is a cutting edge text on one of the most important subjects facing the modern world - a must for all students of ageing' - Mike Bury, Emeritus Professor of Sociology, University of London

'The Third Edition of the comprehensive textbook Ageing in Society extends its scope to include continental Europe, allowing broader as well as deeper insights into recent trends in gerontology. Gerontologists and practitioners are urged not to stop reading before they have reached the insightful last chapter Ageing into the future!' - Professor Dorly Deeg, Editor-in-Chief European Journal of Ageing The Third Edition of this popular and widely-used text provides a comprehensive introduction to the study of ageing, exploring the key theories, concepts and methods which the behavioural and social sciences contribute to the subject. Thoroughly revised and updated, Ageing in Society reflects new trends in gerontology, incorporating recent developments in theory and research as well as major international and interdisciplinary perspectives. A new chapter on cognitive ageing has been added and key themes, such as social protection, retirement, health and illness, and cultural images of old age are also critically examined. Ageing in Society was developed by the British Society of Gerontology to fulfil the need for an authoritative introduction to social gerontology. As such, it is an ideal resource for students and lecturers in the social and behavioural sciences, as well as for students and practitioners in health and social care.

Generating Social Capital M. Hooghe, D. Stolle. 2003-05-15 Social capital - networks of civic engagements, norms of reciprocity, and attitudes of trust - is widely seen as playing a key role for the health of democracy. While many authors have examined the consequences of social capital, there is a pressing need to explore its sources. This collection brings together leading American and European scholars in the first comparative analysis of how social trust and other civic attitudes are generated. The contributors to this volume examine the generation of social capital from two directions: society-based approaches that emphasize voluntary associations, and institutional approaches that emphasize policy.

The Violence of Modernity Debarati Sanyal. 2020-03-03 The Violence of Modernity turns to Charles Baudelaire, one of the most canonical figures of literary modernism, in order to reclaim an aesthetic legacy for ethical inquiry and historical critique. Works of modern literature are commonly theorized as symptomatic responses to the trauma of history. In a climate that tends to privilege crisis over critique, Debarati Sanyal argues that it is urgent to rethink literary experience in terms that recall its contestatory potential. Examining Baudelaire's poems afresh, she shifts the focus of critical attention toward an account of modernism as an active engagement with violence, specifically the violence of history in nineteenth-century France. Sanyal analyzes a literary current that uses the traditional hallmarks of modernism—irony, intertextuality, self-reflexivity, and formalism—to challenge the historical violence of modernity. Baudelaire and the committed ironists writing in his wake teach us how to read and resist the violence of history, and thereby to challenge the melancholy tenor of our contemporary wound culture. In a series of provocative readings, Sanyal presents Baudelaire's poetry as an aesthetic form that contests historical violence through rhetorical strategies of complicity, counterviolence, and critique.

The book develops a new account of Baudelaire's significance as a modernist by dislodging him both from his traditional status as a practitioner of art for art's sake and from his more recent incarnation as the poet of trauma. Following her extended analysis of Baudelaire's poetry, Sanyal in later chapters considers a number of authors influenced by his strategies—including Rachilde, Virginie Despentes, Albert Camus, and Jean-Paul Sartre—to examine the relevance of their interventions for our current climate of trauma and terror. The result is a study that underscores how Baudelaire's legacy continues to energize literary engagements with the violence of modernity.

Social Movements, 1768 - 2018 Charles Tilly, Ernesto Castañeda, Lesley J. Wood. 2019-07-24 *Social Movements 1768-2018* provides the most comprehensive historical account of the birth and spread of social movements. Renowned social scientist Charles Tilly applies his synthetic theoretical skills to explain the evolution of social movements across time and space in an accessible manner full of historical vignettes and examples. Tilly explains why social movements are but a type of contentious politics to decrease categorical inequalities. Questions addressed include what are the implications of globalization and new technologies for social movements, and what are the prospects for social movements? The overall argument includes data from mobilizations in England, Switzerland, Czechoslovakia, Russia, China, India, Argentina, Chile, Cuba, Mexico, Egypt, Tunisia, Iran, Iraq, and Kazakhstan. This new edition has been fully updated and revised with young researchers and students in mind. New case studies focus on social movements in Mexico, Spain, and the United States including Black Lives Matter, immigrants' rights struggles, The Indignados, the Catalan movement for independence, #YoSoy132, Ayotzinapa43, mass incarceration and prisoner rights, and more. Timelines are included to familiarise the reader with the events discussed and discussion questions are framed to increase understanding of the implications, limits, and importance of historical and ongoing social movements.

Bathing in art Burkhard Leismann, Martina Padberg. 2010 Across time and in every culture, bathing represents a primal urge. This book provides a broad historical and thematic overview of the bath, examining its traditions in the Orient and Japan, looking at modern spas and illuminating the bath as a scene often depicted in movies as the setting in which mayhem is committed. Throughout the world, a ritual bath is linked to traditions, and social, cultural and religious practices. Art often connects bathing with biblical and mythological stories, such as Susanna and the Old, of Bathsheba or Diana and Aktaion. Bathing in art reflects different perceptions of the body, highlighting beauty and vulnerability ? and linking them to perceptions of intimacy. Water has metamorphic powers:: rejuvenating and transformative, capable of returning original innocence. Featuring 140 works of art dating from the 15th century to the modern, the book casts a spell of suspense and intimacy through paintings, drawings, prints, photography, sculpture and video.

Aux origines des messianismes Juifs David Hamidović. 2013-08-05 Les premières expressions du messianisme juif s'expliquent à partir des modèles rhétoriques en circulation dans le Proche-Orient ancien et des évolutions des idéologies royales en Israël. Loin de fusionner en une seule figure messianique au tournant de notre ère comme on l'a longtemps pensé, les attentes messianiques se multiplient dans le judaïsme. -----
----- The first expressions of Jewish messianism are explained by rhetorical models in Ancient Near East and by changes of royal ideologies in Israel. Rather than merging in one messianic figure around CE as presented in modern scholarship, the messianic expectations were growing in Ancient Judaism.
