Dietary assessment Food and Agriculture Organization of the United Nations.2018-06-11 FAO provides countries with technical support to conduct nutrition assessments, in particular to build the evidence base required for countries to achieve commitments made at the Second International Conference on Nutrition (ICN2) and under the 2016-2025 UN Decade of Action on Nutrition. Such concrete evidence can only derive from precise and valid measures of what people eat and drink. There is a wide range of dietary assessment methods available to measure food and nutrient intakes (expressed as energy insufficiency, diet quality and food patterns etc.) in diet and nutrition surveys, in impact surveys, and in monitoring and evaluation. Different indicators can be selected according to a study's objectives, sample population, costs and required precision. In low capacity settings, a number of other issues should be considered (e.g. availability of food composition tables, cultural and community specific issues, such as intra-household distribution of foods and eating from shared plates, etc.). This manual aims to signpost for the users the best way to measure food and nutrient intakes and to enhance their understanding of the key features, strengths and limitations of various methods. It also highlights a number of common methodological considerations involved in the selection process. Target audience comprises of individuals (policy-makers, programme managers, educators, health professionals including dietitians and nutritionists, field workers and researchers) involved in national surveys, programme planning and monitoring and evaluation in low capacity settings, as well as those in charge of knowledge brokering for policy-making.

Cuba Since the Revolution of 1959 Samuel Farber.2011-12-13 "Frequent insights, stimulating historical comparisons, and command of the data relating to Cuba's economic and social performance." —Foreign Affairs Uncritically lauded by the left and impulsively denounced by the right, the Cuban Revolution is almost universally viewed one dimensionally. In this book, Samuel Farber, one of its most informed left-wing critics, provides a

much-needed critical assessment of the Revolution's impact and legacy. "The Cuban story twists and turns as we speak, so thank goodness for scholars such as Samuel Farber, an unapologetic Marxist whose knowledge of Cuban affairs is unrivalled . . . In this excellent, necessary book, Farber takes stock of fifty years of revolutionary control by recognizing achievements but lambasting authoritarianism." —Latin American Review of Books "A courageous and formidable balance-sheet of the Cuban Revolution, including a sobering analysis of a draconian 'reform' program that will only deepen the gulf between revolutionary slogans and the actual life of the people." —Mike Davis, author of Planet of Slums

Sourcing Practices in the Apparel Industry Marlon Lezama,Brian Webber,Charles Dagher.2004 Sourcing practices in the global apparel industry are changing because of the removal of quotas, new trade agreements, and a drive by apparel importers to lower costs. This study addresses the implications of these changes for garment manufacturers in Commonwealth developing countries. The principal research activities behind the book consisted of face-to-face interviews in North America with top sourcing executives of apparel importing companies and senior executives of apparel manufacturing companies and other stakeholders in six Commonwealth developing countries. The findings indicate that almost without exception apparel manufacturers are struggling to lower costs and to increase productivity so as to remain competitive. Government and industry are thus faced with critical decisions on how best to support the apparel industry in their respective countries. The principal outputs of the study are enterprise level guidelines to remain competitive in the face of evolving sourcing policies, technology, and practices, complemented by related frameworks at government and institutional levels.
