This quick-reference tool has exactly what you need to select the appropriate diagnoses to plan your patients' care effectively. The 16th Edition features all the latest nursing diagnoses and updated interventions from NANDA-I 2021-2023. One of the best nursing school tools that I can use beyond graduation! "I only wish I found this book at the beginning of my nursing school experience and not towards the end. Finally a useful book that tells us what to do, what we can do, and prioritizes everything. I think it wouldn't have taken me 6 hours to complete a Care Plan/Map had I found this gem sooner. I'm even going to recommend it to my school to suggest students purchase it."—Angela D., Online Reviewer Love this Book! "I'm a nursing student, and for all y'all nursing professions, you need to have some form of this book. In semesters past, a friend of mine had a later edition, and the information was incredible. This book is really a must-have when making care plans or wanting to learn more about what interventions you can do for your patient. Reasonable for price."—Felicia M., Online Reviewer New & Updated! **Psychiatric-Mental Health Nursing, Second Edition** Jeffrey S. Jones, DNP, RN, PMHCNS-BC, CST, LNC, Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Vickie L. Rogers, DNP, RN. 2016-03-22 The editors and contributors are to be congratulated for their clear effort to bring some degree of correction to the singular emphasis on pharmacotherapy. While it is clear that pharmacotherapy has a role to play in treatment, it is equally clear that the use of relationships as therapy has an equal if not more important role to play. There are several other features of this text that commend it to the student and the nurse seeking a review or a refresher course. First, the authors have done an excellent job in noting historical context. Second, [they] have made extensive use of the current research literature. - Grayce M. Sills, PhD, RN, FAAN Thoroughly updated to correlate with DSM 5 diagnostic descriptions and QSEN guidelines, the second edition of this highly acclaimed undergraduate psychiatric nursing text features concrete strategies for establishing interpersonal relationships as the basis not only for working with the psychiatric patient population, but as a timeless foundation for all nursing practice. The text guides students through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice. Modules designed to foster growth in therapeutic use of self, including the importance of boundary management, are integrated with psychodynamic and current neurobiological theories to provide sturdy theoretical underpinnings for practice. A wealth of descriptive psychiatric diagnoses, QSEN criteria, and NANDA-based care plans, case scenarios, evidence-based practice, patient and family education tips, drug summary lists, and complementary and alternative therapy approaches populate the text. The main body of the book focuses on common mental illnesses and weaves both the psychodynamic and neurobiological concepts into evidence-based strategies for nursing interventions. Additional features such as examples of therapeutic dialogue and a Consumer's Perspective featuring an actual consumer's voice relating personal experience about living with a specific illness, provide further guidance in understanding and adopting a relationship-based approach to nursing. Web links facilitate quick access to additional information and NCLEX-style review questions prepare students for passing the NCLEX exam. New to the Second Edition: Revisions correlate to DSM 5 descriptions, QSEN criteria and NANDA nursing diagnoses Provides new information on psychopharmacology, compassion fatigue and a recovery model, use of informed consent, and cognitive behavioral therapy Presents updates on complementary and alternative interventions Includes expanded content on cultural and lifespan considerations related to mental health care worldwide Key Features: Focuses on interpersonal relationships and boundary navigation as the foundation for practice Promotes psychodynamic and neurobiological perspectives within ISPN curricular guidelines Written by national and international experts in nursing education and psychiatric/mental health practice Includes digital student companion with key chapter concepts and critical thinking questions for practice situations Provides digital faculty resources including power point slides, expanded test bank, case studies, and critical thinking exercises

**Psychiatric Nursing Care Plans - E-Book** Katherine M. Fortinash,Patricia A. Holoday Worret.2006-05-16 The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information,

consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.
