The Barbarian's Beverage Max Nelson.2005-02-25 There has been a very long and rich European beer-making tradition which developed independently of any traditions in the Middle East or Egypt. This text demonstrates the important technological as well as ideological contributions made by the Europeans to the history of beer.

Handbook of Consumer Psychology Curtis P. Haugtvedt,Paul M. Herr, Frank R. Kardes.2018-12-07 This Handbook contains a unique collection of chapters written by the world's leading researchers in the dynamic field of consumer psychology. Although these researchers are housed in different academic departments (ie. marketing, psychology, advertising, communications) all have the common goal of attaining a better scientific understanding of cognitive, affective, and behavioral responses to products and services, the marketing of these products and services, and societal and ethical concerns associated with marketing processes. Consumer psychology is a discipline at the interface of marketing, advertising and psychology. The research in this area focuses on fundamental psychological processes as well as on issues associated with the use of theoretical principles in applied contexts. The Handbook presents state-of-the-art research as well as providing a place for authors to put forward suggestions for future research and practice. The Handbook is most appropriate for graduate level courses in marketing, psychology, communications, consumer behavior and advertising.

The Afterlives of the Terror Ronen Steinberg.2019-09-15 The Afterlives of the Terror explores how those who experienced the mass violence of the French Revolution struggled to come to terms with it. Focusing on the Reign of Terror, Ronen Steinberg challenges the presumption that its aftermath was characterized by silence and enforced collective amnesia. Instead, he shows that there were painful, complex, and sometimes surprisingly honest debates about how to deal with its legacies. As The Afterlives of the Terror shows, revolutionary leaders, victims' families, and ordinary citizens argued about accountability, retribution, redress, and commemoration. Drawing on the concept of transitional justice and the scholarship on the major traumas of the twentieth century, Steinberg explores how the French tried, but ultimately failed, to leave this difficult past behind. He argues that it was the same democratizing, radicalizing dynamic that led to the violence of the Terror, which also gave rise to an unprecedented interrogation of how society is affected by events of enormous brutality. In this sense, the modern question of what to do with difficult pasts is one of the unanticipated consequences of the eighteenth century's age of democratic revolutions. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

Family-group Names of Recent Fishes Richard Van Der Laan,William N. Eschmeyer,Ronald Fricke.2014 The family-group names of animals (superfamily, family, subfamily, supertribe, tribe and subtribe) are regulated by the International Code of Zoological Nomenclature. Family names are particularly important because they are among the most widely used of all technical animal names. Apart from using the correct family-group name according to the Code, it is also important to use one unique universal name (with a fixed spelling) to avoid confusion. We have compiled a list of familygroup names for Recent fishes, applied the rules of the Code and, if possible, tried to conserve the names in prevailing recent practice. We list all of the family-group names found to date for Recent fishes (N=2625), together with their author(s) and year of publication. This list can be used in assigning the correct family-group name to a genus or a group of genera. With this publication we contribute to the usage of correct, universal family-group names in the classification of, and for

communication about, Recent fishes.

European Drawings 1 George R. Goldner, Lee Hendrix, Gloria Williams. 1988-04-01 Within a short time the Department of Drawings has acquired impressive holdings of European works on paper. This volume, the first in a series intended to keep scholars apprised of acquisitions, contains 149 entries on Italian, French, Flemish, Dutch, and other works ranging in date from the Renaissance through the nineteenth century. Artists represented include Rembrandt, Cezanne, Blake, Goya, Dürer, Savery, Rubens, Millet, Veronese, Caravaggio, Raphael, and numerous others. All drawings are illustrated at full-page size.

Extracellular ATP and adenosine as regulators of endothelial cell function Evgenia Gerasimovskaya, Elzbieta Kaczmarek. 2010-04-26 Extracellular purines and pyrimidines (ATP, ADP, UTP and adenosine) are released into the extracellular milieu in response to a variety of stress conditions and act as important regulators of vascular homeostasis. This new book is uniquely focused on the signaling actions of extracellular purines in endothelial cells and the crucial role of extracellular purines in regulation of angiogenesis, vascular tone, cell permeability, wound healing, inflammation and cell-to-cell communication. This book examines the responses of endothelial cells, originating from various tissues (such as cornea, pancreas and uterus), to extracellular nucleotides and adenosine under physiological and pathological conditions, i.e. pregnancy, hypoxia, hypertension, inflammation and diabetes. In the book's 12 chapters, the role of purinergic signaling in endothelium-dependent tissue perfusion, regulation of endothelial barrier function, and angiogenesis are discussed. The mechanisms of ATP release and its role in intercellular communication are also presented. In addition, the book provides the most up to date mechanisms of extracellular nucleotide metabolism by purine-converting ecto-enzymes and their contribution to purinergic signaling in endothelial cells originating from various vascular beds. This book is a valuable resource for biomedical research scientists, clinical scientists, graduate students and health science professionals interested in the mechanisms of extracellular purine function in endothelial cells under physiologic and pathologic conditions.

Modern Peoplehood John Lie. 2011-04 [A] most impressive achievement by an extraordinarily intelligent, courageous, and—that goes without saying—'well-read' mind. The scope of this work is enormous: it provides no less than a comprehensive, historically grounded theory of 'modern peoplehood,' which is Lie's felicitous umbrella term for everything that goes under the names 'race,' 'ethnicity,' and 'nationality.' Christian Joppke, *American Journal of Sociology* Lie's objective is to treat a series of large topics that he sees as related but that are usually treated separately: the social construction of identities, the origins and nature of modern nationalism, the explanation of genocide, and racism. These multiple themes are for him aspects of something he calls 'modern peoplehood.' His mode of demonstration is to review all the alternative explanations for each phenomenon, and to show why each successively is inadequate. His own theses are controversial but he makes a strong case for them. This book should renew debate. Fifty Years of Invasion Ecology David M. Richardson. 2011-01-18 Invasion ecology is the study of the causes and consequences of the introduction of organisms to areas outside their native range. Interest in this field has exploded in the past few decades. Explaining why and how organisms are moved around the world, how and why some become established and invade, and how best to manage invasive species in the face of global change are all crucial issues that interest biogeographers, ecologists and environmental managers in all parts of the world. This book brings together the insights of more than 50 authors to examine the origins, foundations, current dimensions and potential trajectories of invasion ecology. It revisits key tenets of the foundations of invasion ecology, including contributions of pioneering naturalists of the 19th century, including Charles Darwin and British ecologist Charles Elton, whose 1958 monograph on invasive species is

widely acknowledged as having focussed scientific attention on biological invasions.

Cephalopods of the World: Chambered nautilus and sepioids (Nautilidae, Sepiidae, Sepiolidae, Sepiadariidae, Idiosepiidae, and Spirulidae) P. Jereb, Clyde F. E. Roper. 2005 This is a multiauthored compilation that reviews six families: Nautilidae, Sepiidae, Sepiolidae, Sepiadariidae, Idiosepiidae and Spirulidae, with 23 genera and the 201 species known to the date of the completion of the volume. It provides accounts for all families and genera, as well as illustrated keys to all taxa. Information under each species account includes: valid modern systematic name and original citation of the species (or subspecies); main synonyms; English, French and Spanish FAO names for the species; illustrations of dorsal and ventral aspect of the whole animal (as necessary) and other distinguishing illustrations; field characteristics; diagnostic features; geographic and vertical distribution, including GIS map; size; habitat; biology; interest to fishery; local names when available; a remarks section (as necessary) and literature. The volume is fully indexed and also includes sections on terminology and measurements, an extensive glossary, an introduction with an updated review of the existing biological knowledge on cephalopods (including fisheries information and catch data for recent years) and a dedicated bibliography.

Lake Pavin Téléphore Sime-Ngando, Pierre Boivin, Emmanuel Chapron, Didier Jezequel, Michel Meybeck. 2018-07-07 This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.

Litteratura Coleopterologica (1758-1900) Yves Bousquet. 2016-12-02 Bibliographic references to works pertaining to the taxonomy of Coleoptera published between 1758 and 1900 in the non-periodical literature are listed. Each reference includes the full name of the author, the year or range of years of the publication, the title in full, the publisher and place of publication, the pagination with the number of plates, and the size of the work. This information is followed by the

date of publication found in the work itself, the dates found from external sources, and the libraries consulted for the work. Overall, more than 990 works published by 622 primary authors are listed. For each of these authors, a biographic notice (if information was available) is given along with the references consulted--[p. 1].

Improved Career Decision Making in a Changing World Judith M. Ettinger.1991 This participant's resource guide and trainer's guide are designed to train career development facilitators to help their clients use labor market information. The participant's resource guide contains 10 modules. Each module consists of these components: National Career Development Guidelines (NCDG) Counselor Competencies, abbreviated version of the trainer's lecturette with copies of transparencies embedded within the text, and references. Module subjects are as follows: introduction; definitions of terms and concepts related to career development and labor market information; demographic trends that have an impact on career decision making; theories of career development; information and how to assess and use it; developing an awareness of multicultural issues; and specific needs of adults, women and teen parents, persons with disabilities, and children at risk. An Action Plan follows Module 1. Thirty-five activities are provided. Appendixes include the following: career counseling competencies; State/National Occupational Information Coordinating Committee contacts; directory of state career information delivery systems; the NCDG; state guidance supervisors; guidelines for use of computer-based career information and guidance systems, career software review, and preparation and evaluation of career and occupational information literature; government printing offices; sources of state/local job outlook; annotated list of 14 print references; overview of equal opportunity legislation; labor market information directors; state data center organizations; and acronyms. The trainer's guide provides the information, research, theories, and implementation activities necessary for conducting the inservice program. Modules include a listing of content with related activities, lecturette, transparency masters, and references. The final section contains applications of the concepts presented in the modules--activities, case studies, small group exercises, and problem-solving scenarios. (YLB)

Atlantic Simon Winchester.2010-11-02 Variably genial, cautionary, lyrical, admonitory, terrifying, horrifying and inspiring...A lifetime of thought, travel, reading, imagination and memory inform this affecting account. —Kirkus Reviews (starred review) Blending history and anecdote, geography and reminiscence, science and exposition, New York Times bestselling author Simon Winchester tells the breathtaking saga of the Atlantic Ocean. A gifted storyteller and consummate historian, Winchester sets the great blue sea's epic narrative against the backdrop of mankind's intellectual evolution, telling not only the story of an ocean, but the story of civilization. Fans of Winchester's *Krakatoa*, *The Man Who Loved China*, and *The Professor and the Madman* will love this masterful, penetrating, and resonant tale of humanity finding its way across the ocean of history.

The Battle against Anarchist Terrorism Richard Bach Jensen.2013-12-05 This is the first global history of the secret diplomatic and police campaign that was waged against anarchist terrorism from 1878 to the 1920s. Anarchist terrorism was at that time the dominant form of terrorism and for many continued to be synonymous with terrorism as late as the 1930s. Ranging from Europe and the Americas to the Middle East and Asia, Richard Bach Jensen explores how anarchist terrorism emerged as a global phenomenon during the first great era of economic and social globalization at the end of the nineteenth and beginning of the twentieth centuries and reveals why some nations were so much more successful in combating this new threat than others. He shows how the challenge of dealing with this new form of terrorism led to the fundamental modernization of policing in many countries and also discusses its impact on criminology and international law.

[Daniel Goleman Omnibus](#) Daniel Goleman.2004 Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional

intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

European Drawings 2 George R. Goldner, Lee Hendrix, Kelly Pask.1992-10-08 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

Geology and Resource Potential of the Congo Basin Maarten J. de Wit, François

Guillocheau, Michiel C. J. de Wit.2015-01-02 This book summarizes the geomorphology, geology, geochronology, geophysics and mineral resources of the Congo Basin, one of the world's most enigmatic and poorly understood major intra-continental sedimentary basins, and its flanking areas of Central Africa. It provides an up to date analysis of the large region's origin and evolution. The book's nineteen chapters take the reader through the entire basement history, as well as the Basin's ca. 700 million years of cover sequences. Starting from its Archean cratons and Proterozoic mobile belts, and proceeding through the Phanerozoic sequences, including the most recent Cenozoic successions, the book also explores the present drainage systems and the subtle but complex topography of the Congo Basin. It also presents and evaluates new basin models and related dynamic processes, as well as revised correlation schemes with its Gondwana counterparts in South America, all of which provide key insights into its rich diamond deposits and other mineral wealth, which are documented in the final chapters. A specific feature of this book is its synthesis, performed by teams of active experts, of a vast amount of geoscientific data previously only recorded in research reports, company reports, survey bulletins, and scattered journal articles and books. The sheer size of the Congo Basin (ca.1.8 million km², or just under half the area of the EU) and Central Africa (some 7 million km², or more than 70% of the area of the USA) will make this a sought-after source of information and inspiration on this unique region.

The Clinical Management of Nicotine Dependence James A. Coccores.2012-12-06 The 1980s have seen a remarkable degree of public and professional acceptance of cigarette smoking as the most widespread and devastating form of drug dependence. More medical schools now give required

courses about drug dependence. Prestigious journals publish reports of investigations on the subject of nicotine dependence, and more conferences and workshops are held each year on various aspects of nicotine dependence. All this is in sharp contrast to the earlier prevailing atmosphere of disinterest, ignorance, or professional disdain. These changes created an obvious place for a textbook oriented primarily toward the needs of clinicians working with patients who have nicotine dependence. Thus, in preparation of this book, most aspects of the management of nicotine dependence are incorporated, in order to address concerns of physicians in training and other health care professionals across the world. The final product, which I believe to be comprehensive and clinically relevant throughout, is a text that I hope will be of equal use to psychologists, social workers, nurses, counselors, and physicians in all specialties. An encyclopedic treatise was deliberately avoided because that approach can be cumbersome in size, readability, and cost, and for that reason, readers will find little mention of data involving animal research, nicotine-related politics, nicotine product advertising, medical consequences of smoking, psychotherapeutic techniques, and the extent of the problem.

Uncommon Causes of Stroke Julien Bogousslavsky, Louis R. Caplan. 2001-05-24 An essential resource for diagnosis and treatment of stroke patients outside the usual clinical categories.

Posttraumatic Stress Disorder Gerald Rosen. 2004-11-19 Is Posttraumatic Stress Disorder (PTSD) an illness that arises after horrific and life-threatening events? Or is it a label that medicalizes human suffering, and brings with it more problems than it solves? Still a relatively new diagnosis, PTSD has changed our vocabulary and shaped our views on human coping and resilience. Yet almost every assumption upon which the diagnosis rests has come under question. In this volume, Gerald Rosen brings together leading international scholars in posttraumatic studies to consider the most contentious debates. Each chapter offers an analysis of the issues, reviews current research, and clarifies implications for the practicing clinician. *Posttraumatic Stress Disorder: Issues and Controversies* is essential reading for all practitioners, researchers, and students who work in the field of trauma. Professionals in related health fields and the law will also find this book useful.

Pandemic Disease in the Medieval World Monica Helen Green. 2015 The plague organism (*Yersinia pestis*) killed an estimated 40% to 60% of all people when it spread rapidly through the Middle East, North Africa, and Europe in the fourteenth century: an event known as the Black Death. Previous research has shown, especially for Western Europe, how population losses then led to structural economic, political, and social changes. But why and how did the pandemic happen in the first place? When and where did it begin? How was it sustained? What was its full geographic extent? And when did it really end?

Tropical Agroforestry Alain Atangana, Damase Khasa, Scott Chang, Ann Degrande. 2013-10-29 Agroforestry is recognized as a sustainable land-use management in the tropics, as it provides environmental-friendly ecosystems; it also provides people with their every day need for food and cash. Since the recognition of agroforestry as a science, curricula have been developed for agroforestry programs for undergraduate and graduate trainings in Universities. Therefore, there is an urgent need to develop and make available educational material. This textbook strives to provide up-to-date information on tropical agroforestry to serve as educational material in the tropical context. The authoritative textbook of Nair (1993) on agroforestry was published 18 years ago, and before the advent of tree domestication, an important agroforestry practice today. In addition, many other research activities, such as carbon sequestration and integrated pest management, have been included in the agroforestry agenda. This textbook is intended for agroforestry students, teachers, and practitioners.

The Translation Studies Reader Lawrence Venuti. 2012 A definitive survey of the most important developments in translation theory and research, with an emphasis on the twentieth century. This new edition includes pre-twentieth century readings and readings from other fields.

Systematics, Evolution, and Biogeography of Compositae Vicki Ann Funk. 2009 This spectacular book does full justice to the Compositae (Asteraceae), the largest and most successful flowering plant family with some 1700 genera and 24,000 species. It is an indispensable reference,

providing the most up-to-date hypotheses of phylogenetic relationships in the family based on molecular and morphological characters, along with the corresponding subfamilial and tribal classification. The 2009 work not only integrates the extensive molecular phylogenetic analyses conducted in the last 25 years, but also uses these to produce a metatree for about 900 taxa of Compositae. The book contains 44 chapters, contributed by 80 authors, covering the history, economic importance, character variation, and systematic and phylogenetic diversity of the family. The emphasis of this work is phylogenetic; its chapters provide a detailed, current, and thoroughly documented presentation of the major (and not so major) clades in the family, citing some 2632 references. Like the Compositae, the book is massive, diverse, and fascinating. It is beautifully illustrated, with 170 figures, and an additional 108 cladograms (all consistently color-coded, based on the geographic range of the included taxa); within these figures are displayed 443 color photographs, clearly demonstrating the amazing array of floral and vegetative form expressed by members of the clade. --NHBS Environment Bookstore.

Renaissance Scepticisms Gianni Paganini, José R. M. Neto. 2008-11-14 Even if specific pieces of research (on the sources or on individual authors, such as Pico, Agrippa, Erasmus, Montaigne, Sanches etc.) have given and are still producing significant results on Renaissance scepticism, an overall synthesis comprising the entire period has not been achieved yet. No predetermined idea of that complex historical subject that is Renaissance scepticism underlies this book, and we want to sacrifice the complexity of movements, personalities, tendencies and interpretations to any sort of a priori unity of theme even less. We acknowledge unhesitatingly that we had always thought of "scepticisms" in the plural, and believe that the different contexts (philosophical, religious, cultural) in which these forms grew up must also be taken into account. Furthermore, given the transversal nature and provocative character of the sceptical challenge, this book contains essays also on philosophers who, without being sceptics and sometimes engaged in fighting scepticism, nevertheless took up its challenge. The main authors considered in this book are: Vives, Castelleo, Agrippa, Pedro de Valencia, Pico, Sanchez, Montaigne, Charron, Bruno, Bacon, and Campanella. The various essays in the book show the relevance of the philosophical thought of authors little known by the general public and put in new perspective important aspects of the thought of some of the great thinkers of the Renaissance.

Invasion Ecology Julie L. Lockwood, Martha F. Hoopes, Michael P. Marchetti. 2013-04-05 This new edition of *Invasion Ecology* provides a comprehensive and updated introduction to all aspects of biological invasion by non-native species. Highlighting important research findings associated with each stage of invasion, the book provides an overview of the invasion process from transportation patterns and causes of establishment success to ecological impacts, invader management, and post-invasion evolution. The authors have produced new chapters on predicting and preventing invasion, managing and eradicating invasive species, and invasion dynamics in a changing climate. Modern global trade and travel have led to unprecedented movement of non-native species by humans with unforeseen, interesting, and occasionally devastating consequences. Increasing recognition of the problems associated with invasion has led to a rapid growth in research into the dynamics of non-native species and their adverse effects on native biota and human economies. This book provides a synthesis of this fast growing field of research and is an essential text for undergraduate and graduate students in ecology and conservation management. Once you've found a book you're interested in, click Read Online and the book will open within your web browser. You also have the option to Launch Reading Mode if you're not fond of the website interface. Reading Mode looks like an open book, however, all the free books on the Read Print site are divided by chapter so you'll have to go back and open it every time you start a new chapter. DigiLibraries.com gathers up free Kindle books from independent authors and publishers. You can download these free Kindle books directly from their website. Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs. It's disappointing that there's no convenient menu that lets you just browse freebies. Instead, you have to search for your preferred genre, plus the word 'free' (free science fiction, or free history, for example). It works well enough once you know about it, but it's not immediately obvious. The split between "free public domain ebooks" and "free original ebooks" is surprisingly even. A big chunk of the public domain titles are short stories and a lot of the original titles are fanfiction. Still, if you do a bit of digging around, you'll find some interesting stories.
