The Unreasoning Mask Philip José Farmer.2021-06-29 A novel of alien gods, monsters, and galactic destruction from the New York Times–bestselling author of the Riverworld series. Captain Ramstan commands the crew of one of the only alaraf-drive vessels capable of instantaneous travel between two points of space. While on an official scientific surveillance expedition, he revises their mission to join the search for a missing ship. But instead of the spacecraft, they discover a planet in its death throes, decimated by meteors that have been launched with extreme velocity from just outside of its atmosphere. The ultimate source of the destruction, however, is beyond anyone’s imagination . . . Ramstan may be the only man who can stop the world-destroying entity known as the “Chaos-Monster” before it follows in their footsteps to Earth. A stolen alien idol offers aid—though at a price. But there are those who hear his warnings as nothing but the rantings of a delusional madman, and Ramstan will have to put his career—and life—on the line to prove that, though he might not be the savior the universe wants, he’s exactly the one it needs. Praise for Philip José Farmer “An excellent science fiction writer.” —Isaac Asimov “[Farmer’s work is a] blend of intellectual daring and pulp fiction prose.” —The New York Times “Farmer offers his audience a wide-screen adventure that never fails to provoke, amuse, and educate. . . . His imagination is certainly of the first rank.” —Time on The World of Tiers “The greatest science fiction writer ever.” —Leslie A. Fiedler, author of *Love and Death in the American Novel*

returns to Tel Aviv from Mars, much has changed. Boris's ex-lover is raising a strangely familiar child who can tap into the datastream of a mind with the touch of a finger. His cousin is infatuated with a robotnik—a damaged cyborg soldier who might as well be begging for parts. His father is terminally-ill with a multigenerational mind-plague. And a hunted data-vampire has followed Boris to where she is forbidden to return. Rising above them is Central Station, the interplanetary hub between all things: the constantly shifting Tel Aviv; a powerful virtual arena, and the space colonies where humanity has gone to escape the ravages of poverty and war. Everything is connected by the Others, powerful alien entities who, through the Conversation—a shifting, flowing stream of consciousness—are just the beginning of irrevocable change. At Central Station, humans and machines continue to adapt, thrive...and even evolve.

When Gravity Fails George Alec Effinger.2014-04-01 In a futuristic Middle East, plug-ins can turn anyone into a killer in this “wry and black and savage” Nebula and Hugo award finalist (George R. R. Martin). Set in a high-tech near future featuring an ascendant Muslim world and divided Western superpowers, this cult classic takes us into a world with mind- or mood-altering drugs for any purpose, brains enhanced by electronic hardware with plug-in memory additions and modules offering the wearer new personalities, and bodies shaped to perfection by surgery. Marid Audran, an unmodified and fairly honest street hustler, lives in a decadent Arab ghetto, the Budayeen, and holds on tight to his cherished independence. Then, against his best instincts, he becomes involved in a series of inexplicable murders. Some seem like routine assassinations, carried out with an old-fashioned handgun by a man wearing a plug-in James Bond persona; others, involving whores, feature prolonged torture and horrible mutilations. Soon the problem comes to the attention of Budayeen godfather Friedlander Bey—who makes Audran an offer he can’t refuse. Nominated for the Nebula and Hugo

Fool's War Sarah Zettel.2013-05-21 A New York Times Notable Book from the author of Reclamation: A young woman must face off against an alien force within her starship’s computer. Katmer Al Shei has done well with the starship Pasadena, cutting corners where necessary to keep her crew paid and her journeys profitable. But there are two things she will never skip on: her crew and her fool. For a long space journey, a certified Fool’s Guild clown is essential to amuse, excite, and otherwise distract the crew from the drudgeries of interstellar flight. Her newest fool, Evelyn Dobbs, is a talented jester. But does she have enough wit to save mankind? In the computers of the Pasadena, something is emerging. The highly sophisticated software that makes interstellar travel practical is playing host to a new form of artificial intelligence, a living entity. And it will do whatever it takes to survive . . . Displaying “the influence of Asimov’s robot stories and C. J. Cherryh’s elaborate, sophisticated spaceship adventures,” this is a science fiction masterpiece that asks the thought-provoking question, “What if the next great life-form with which we must contend isn’t from the stars but from our hard drives?” (Publishers Weekly)

Science Fiction in India .2022-05-30 Nominated, 2023 Teaching Literature Book Award Indian Science Fiction has evolved over the years and can be seen making a mark for itself on the global scene. Dalit speculative fiction writer and editor Mimi Mondal is the first SF writer from India to have been nominated for the prestigious Hugo award. In fact, Indian SF addresses themes such as global climate change. Debates around G.C.C are not just limited to science fiction but also permeate in

critical discussions on SF. This volume seeks to examine the different ways by which Indian SF narratives construct possible national futures. For this looking forward necessarily germinates from the current positional concerns of the nation. While some work has been done on Indian SF, there is still a perceptible lack of an academic rigor invested into the genre; primarily, perhaps, because of not only its relative unpopularity in India, but also its employment of futuristic sights. Towards the same, among other things, it proposes to study the growth and evolution of science fiction in India as a literary genre which accommodates the duality of the national consciousness as it simultaneously gazes ahead towards the future and glances back at the past. In other words, the book will explore how the tensions generated by the seemingly conflicting forces of tradition and modernity within the Indian historical landscape are realized through characteristic tropes of SF storytelling. It also intends to look at the interplay between the spatio-temporal coordinates of the nation and the SF narratives produced within to see, firstly, how one bears upon the other and, secondly, how processes of governance find relational structures with such narratives. Through these, the volume wishes to interrogate how postcolonial futures promise to articulate a more representative and nuanced picture of a contemporary reality that is rooted in a distinct cultural and colonial past.

The Jagged Orbit John Brunner.2014-04-01 Nebula Award Finalist:Mankind has been reduced to slavery by technology and surveillance, in this near-future novel from the author of Stand on Zanzibar. In The Jagged Orbit, Brunner, writing at the peak of form that allowed him to create Stand on Zanzibar, takes a long, hard, disturbing, and hilarious look at the near and not-so-distant future. Catastrophic changes due to rampant drug abuse, uncontrolled violence, high-level government corruption, inhumane treatment of the too-readily defined “insane,” and the accompanying collapse of the social order are wreaking havoc on

the world we recognize and turning it into a reality we must fear and hope to avoid. Brunner tells a spine-chilling tale of where the world could possibly go that is all too believable and real for our comfort. "For each generation, there is a writer meant to bend the rules of what we know. Hugo Award winner (Best Novel, *Stand on Zanzibar*) and British science fiction master John Brunner remains one of the most influential and respected authors of all time, and now many of his classic works are being reintroduced. For readers familiar with his vision, it is a chance to reexamine his thoughtful worlds and words. For new readers, Brunner's work proves itself the very definition of timeless.

Islam, Science Fiction and Extraterrestrial Life Jörg Matthias

Determann.2020-09-17 The Muslim world is not commonly associated with science fiction. Religion and repression have often been blamed for a perceived lack of creativity, imagination and future-oriented thought. However, even the most authoritarian Muslim-majority countries have produced highly imaginative accounts on one of the frontiers of knowledge: astrobiology, or the study of life in the universe. This book argues that the Islamic tradition has been generally supportive of conceptions of extra-terrestrial life, and in this engaging account, Jörg Matthias Determann provides a survey of Arabic, Bengali, Malay, Persian, Turkish, and Urdu texts and films, to show how scientists and artists in and from Muslim-majority countries have been at the forefront of the exciting search. Determann takes us to little-known dimensions of Muslim culture and religion, such as wildly popular adaptations of *Star Wars* and mysterious movements centred on UFOs. Repression is shown to have helped science fiction more than hurt it, with censorship encouraging authors to disguise criticism of contemporary politics by setting plots in future times and on distant planets. The book will be insightful for anyone looking to explore the science, culture and politics of the Muslim world and asks what the discovery of extra-terrestrial life would mean for one of the greatest faiths.

Iraq + 100 Hassan Blasim.2017-09-12 One of NPR's Best Books of 2017! A groundbreaking anthology of science fiction from Iraq that will challenge your perception of what it means to be "The Other" "History is a hostage, but it will bite through the gag you tie around its mouth, bite through and still be heard."—Operation Daniel In a calm and serene world, one has the luxury of imagining what the future might look like. Now try to imagine that future when your way of life has been devastated by forces beyond your control. Iraq + 100 poses a question to Iraqi writers (those who still live in that nation, and those who have joined the worldwide diaspora): What might your home country look like in the year 2103, a century after a disastrous foreign invasion? Using science fiction, allegory, and magical realism to challenge the perception of what it means to be "The Other", this groundbreaking anthology edited by Hassan Blasim contains stories that are heartbreakingly surreal, and yet utterly recognizable to the human experience. Though born out of exhaustion, fear, and despair, these stories are also fueled by themes of love, family, and endurance, and woven through with a delicate thread of hope for the future. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

River of Gods Ian McDonald.2018-03-05 A superpower of two billion people, a dozen new nations from Kerela to the Himalayas, artificial intelligences, climate-change induced drought, water wars, strange new genders, genetically improved children that age at half the rate of baseline humanity, and a population where males outnumber females four to one. hundred years after its birth. In the new nation of Bharat, in the face of the failure of the monsoon, nine lives are swept together — a gangster, a cop, his wife, a politician, a stand-up comic, a set designer, a journalist, a scientist, and a dropout — to decide the future of Mother India. River of Gods teems with the life of a country choked with peoples and cultures — one and a half billion people, twelve semi-independent nations, nine million gods. A war is fought, a love is betrayed, a mystery from a different world decoded, as the great river Ganges flows on. Praise for River of Gods: “[A] bold, brave look at India on the eve of its centennial, 41 years from now...McDonald takes his readers from India's darkest depths to its most opulent heights, from rioting mobs and the devastated poor to high-level politicians and lavish parties. He handles his complex plot with flair and confidence and deftly shows how technological advances and social changes have subtly changed lives. RIVER OF GODS is a major achievement from a writer who is becoming one of the best sf novelists of our time.” —Washington Post “[P]erhaps his most accomplished novel to date... reminiscent of William Gibson in full-throttle cultural-immersion mode, packed with technical jargon, religious and sociological observation and allusions to art both high and low... RIVER OF GODS amply rewards careful consideration and more than delivers its share of straight-ahead entertainment. Already a multiple-award nominee following its British publication, McDonald's latest ranks as one of the best science fiction novels published in the United States this year.” —San Francisco Chronicle “A staggering achievement, brilliantly imagined and endlessly surprising ... A brave, brilliant and wonderful novel.” —Christopher Priest, The Guardian

work that stretches his talents to their fullest . . . welcome back, champ!”—The Detroit News In the twenty-third century pioneers have escaped the crowded earth for life in self-sustaining orbital colonies. One of the colonies, Rotor, has broken away from the solar system to create its own renegade utopia around an unknown red star two light-years from Earth: a star named Nemesis. Now a fifteen-year-old Rotorian girl has learned of the dire threat that nemesis poses to Earth’s people—but she is prevented from warning them. Soon she will realize that Nemesis endangers Rotor as well. And so it will be up to her alone to save both Earth and Rotor as—drawn inexorably by Nemesis, the death star—they hurtle toward certain disaster.

The Rebel Gerald Brandt.2018-11-27 The third and final installment in the San Angeles trilogy, a thrilling near-future cyberpunk sci-fi series Kris Merrill has lost everything. Her family when she was thirteen, her identity when she joined the anti-corporate movement, and now the man she loved. Living in a small room the resistance gave her, she feels alone. Abandoned. A year ago, Kris's life was torn apart when a delivery went wrong. The last year spent training with the anti-corporate movement had been the closest she'd ever gotten to normal. Now, war has broken out between the corporations, and the lower levels of San Angeles are paying the price. Water and food are rationed. People are being ripped from their families in massive sweeps, drafted to fight. Those remaining live in a wasteland. The insurgents are trying to help, but Kris is being left out, given menial tasks instead of doing what she was trained for. She is torn between working with the insurgents as they become more like the corporations they are fighting, and helping the people of the lower levels. Caught in one of SoCal's draft sweeps and being hunted by an enemy who will stop at nothing to have revenge are just the tip of the iceberg. Kris is pregnant, and she might have to choose between bringing down the corporations that destroyed her family or saving the life of her unborn son.
