**Drawn after Nature** Jan Koning, Gerda va Uffelen, Alicja Zemanek, Bogdan Zemanek. 2017-03-27 Drawn after nature presents a vivid and complete picture of a unique historical collection of botanical watercolours. Botanists, art lovers, historians as well as the general public will enjoy this publication of the watercolours, their annotations and their history, but above all their supreme beauty and display of craftsmanship. For over 300 years, the Preußische Staatsbibliothek in Berlin held a most remarkable collection of botanical watercolours. They were catalogued as part of the library's illustrated manuscripts, or Libri Picturati. These magnificent works of art, rich in colour and detail, were made in the second half of the 16th century in the southern part of the Low Countries. In the 1970s the complete set of watercolours had been rediscovered and sparked the interest of historians, art historians and botanists alike. Together they set out to unravel the many secrets still held by the Libri Picturati's watercolours: who had collected them, and why? A team of pre-eminent European scientists worked together on these and other intriguing questions surrounding the collection. They unveiled the important role played by the famous Dutch botanist Carolus Clusius, who later founded the University of Leiden's Botanical Gardens. Drawn after nature contains accessible and informative chapters on the collection's history, but most importantly: it brings together all of the original 1429 watercolours and sketches, for the first time in one volume, accompanied by their original annotations.

**Mental Neuroimplants** Hans J Markowitsch,Margit M

Schreier.2020-02-27 Mental Neuroimplants provides a new take

on personality development through brain research - a book for the general reader and practitioner alike. It shows how mental health is influenced by basic neuroscientific rules, and how these can be stabilised and strengthened using a new approach: Mental Neuroimplants. Individual positive emotional worlds can directly impact the brain and - in turn - the psychological health of the person in question. This study shows how this can directly improve quality of life. The authors emphasise that the individual's lifestyle can lead to long-term physical and environmentally induced changes - which can even be effective across generations. The central message of this book is to raise awareness; how using psychological neuroimplants can have a positive impact on numerous areas of life including emotion, health and material prosperity. Hans J. Markowitsch was Professor of Physiological Psychology at the University of Bielefeld, Germany. He studied psychology and biology at the University of Konstanz, had professorships for biopsychology and physiological psychology at the Universities of Konstanz, Bochum, and Bielefeld. He was offered chairs of psychology and neuroscience at both Australian and Canadian Universities. His research centres on the neural and mental bases of memory disorders and on interactions between memory, emotion and consciousness. He is author, co-author or editor of about 30 books and has written around 700 scientific articles. Margit M. Schreier has been working since 1999 as an Independent Management Consultant. She founded the brand NIKU in Germany and the USA. She studied Rightsizing and Upgrading Management at the Georg Simon Ohm Management Institute of the Nuremberg University for Applied Sciences. After many years of personal interest and research in neurosciences, she decided to combine her insights in NIKU. NIKU is a support system for mental autonomy and psychological strength, independent of personal background and opportunities. [www.niku-neuro.com](http://www.niku-neuro.com)

Moral Vision David McNaughton.1991-01-08 This book introduces

the reader to ethics by examining a current and important debate. During the last fifty years the orthodox position in ethics has been a broadly non-cognitivist one: since there are no moral facts, moral remarks are best understood, not as attempting to describe the world, but as having some other function - such as expressing the attitudes or preferences of the speaker. In recent years this position has been increasingly challenged by moral realists who maintain that there are moral facts; there is a truth of the matter in ethics, which is independent of our views, and which we seek to discover. Unfortunately much of this interesting debate found in the work of McDowell, Wiggins, Putnam, Blackburn and others is not easily accessible to undergraduates. McNaughton presents many of the major issues in ethics by way of a clear exposition of both sides of this argument and assumes no prior knowledge of philosophy. Topics discussed include: moral observation, moral motivation, amoralism and wickedness, moral weakness, cultural relativism and utilitarianism. The book concludes that a convincing case can be made out for a radical form of moral realism in which moral virtue is found, not in the following of correct moral principles, but rather in the development of moral sensitivity. *Moral Vision* is a clear and engaged introduction to an important, and often troubling, debate.

*I Don't Want to be Inside Me Anymore* Birger Sellin.1996-03-01

Sellin writes with a rough poetic beauty born of great pain and continual struggle, reaching out from his island of sorrow to embrace the people of the overworld. *I Don't Want to Be Inside Me Anymore* is a firsthand account of rare eloquence and immediacy, a remarkable story of raw human courage and - ultimately - indomitable hope.

### **Inhibitions, Symptoms and Anxiety** Sigmund

Freud.2014-04-10 This text comprises one instance of Freud's re-evaluation of some of the fundamental issues of psychoanalysis. An astoundingly comprehensive text, *Inhibitions, Symptoms and Anxiety* is a prime example of Freud's constant evaluation of psychoanalytical theory which rightly earned him his title of the father of psychoanalysis. In an attempt to augment his earlier postulations on anxiety, this text sets fourth an amended commentary that theorises the existence of several types of anxiety, as well as arguing that repression does not cause anxiety but rather vice versa. Hailed as the founding father of psychoanalysis, Sigmund Freud was an Austrian neurologist whose work is fundamental to modern psychoanalytical theory. This text was originally published in 1926 and is now republished with a biography of the author.

### **On Vision and Colors; Color Sphere** Arthur

Schopenhauer, Philipp Otto Runge.2012-03-20 During the first two decades of the nineteenth century, two of the most significant theoretical works on color since Leonardo da Vinci's *Trattato della Pittura* were written and published in Germany: Arthur Schopenhauer's *On Vision and Colors* and Philipp Otto Runge's *Color Sphere*. For Schopenhauer, vision is wholly subjective in nature and characterized by processes that cross over into the territory of philosophy. Runge's *Color Sphere* and essay *The Duality of Color* contained one of the first attempts to depict a comprehensive and harmonious color system in three dimensions. Runge intended his color sphere to be understood not as a product of art, but rather as a mathematical figure of various

philosophical reflections. By bringing these two visionary color theories together within a broad theoretical context—philosophy, art, architecture, and design—this volume uncovers their enduring influence on our own perception of color and the visual world around us.

Heilpädagogische Konzepte und Methoden Heinrich

Greving, Sabine Schäper. 2020-06-24 Von den vielen Konzepten und Methoden heilpädagogischer Tätigkeit fußen nur wenige auf einem heilpädagogischen Bildungsverständnis. Angesichts dieses pluralen Methodenspektrums ist eine zentrale Herausforderung der Disziplin, die Einheit von Praxis, Profession und Wissenschaft immer wieder neu auszuweisen. Der erste Teil des Buches liefert eine theoretische und ethische Grundlegung heilpädagogischer Praxiskonzepte. Diese werden im zweiten Teil konkretisiert: Die Spannweite reicht dabei von den klassischen Handlungskonzepten wie der Heilpädagogischen Übungsbehandlung bis zu aktuellen personenzentrierten und beziehungsorientierten Ansätzen, der Kunsttherapie, der Biographiearbeit und der Syndromanalyse im Kontext heilpädagogischer Diagnostik.

**Wissenschaft fürs Fernsehen** Olaf Jacobs, Theresa

Lorenz. 2013-10-01 Der Band ist eine Einführung in die Praxis, Wissenschafts- und Wissensthemen im Fernsehen zu präsentieren. Dinge neu zu erfahren, Einblicke in ungekannte Zusammenhänge zu erhalten oder an Orte zu gelangen, an denen noch nie zuvor jemand war, reiz Menschen seit Urzeiten. Das Fernsehen mit seiner besonderen Chance, Zuschauern eine Teilhabe mit eigenen Sinnen zu ermöglichen, ist prädestiniert, genau solche Themen zu erzählen und doch führt Wissenschaft häufig auch an die Grenzen des im Fernsehen Darstellbaren. Dieses Buch zeigt die besonderen Erzählweisen des Wissenschaftsfernsehens und Strategien, mit den Grenzen der Darstellbarkeit umzugehen. Durch Beispiele aus der Praxis und eine Systematisierung der geeigneten Darstellungsformen bietet

es Anregungen für Journalisten und Autoren von Wissenschaftsprogrammen und sensibilisiert Wissenschaftler für die besonderen Herausforderungen, denen Fernsehmacher gegenüber stehen, wenn sie sich auf das Feld ihrer Forschungen begeben.

**The Cerebral Code** William H. Calvin.1998-03-02 The Cerebral Code is a new understanding of how Darwinian processes could operate in the brain to shape mental images in only seconds, starting with shuffled memories no better than the jumble of our nighttime dreams, but evolving into something of quality, such as a sentence to speak aloud. Jung said that dreaming goes on continuously but you can't see it when you are awake, just as you can't see the stars in the daylight because it is too bright. Calvin's is a theory for what goes on, hidden from view by the glare of waking mental operations, that produces our peculiarly human type of consciousness with its versatile intelligence. As Piaget emphasized in 1929, intelligence is what we use when we don't know what to do, when we have to grope rather than using a standard response. Calvin tackles a mechanism for doing this exploration and improvement offline, as we think before we act or practice the art of good guessing. Surprisingly, the subtitle's mosaics of the mind is not a literary metaphor. For the first time, it is a description of a mechanism of what appears to be an appropriate level of explanation for many mental phenomena, that of hexagonal mosaics of electrical activity that compete for territory in the association cortex of the brain. This two-dimensional mosaic is predicted to grow and dissolve much as the sugar crystals do in the bottom of a supersaturated glass of iced tea. A Bradford Book

*Unstrange Minds* Roy Richard Grinker.2008-07-31 When anthropologist Richard Grinker's daughter was diagnosed with autism in 1994, it occurred in only about 1 in every 10,000

children. Within ten years, rates had skyrocketed, and the media was declaring autism an epidemic. *Unstrange Minds* documents Grinker's quest across the globe to discover the surprising truth about why autism is so much more common today. Grinker shows that the identification and treatment of autism depends on culture just as much as on science. Filled with moving stories and informed by the latest science, *Unstrange Minds* is a powerful testament to a father's quest for the truth.

pathologisieren, werden ihre Stärken erschlossen und gewürdigt. Das führt zu einer starken, außergewöhnlichen Kunst mit persönlichen, beeindruckenden Geschichten. Neben der Präsentation einer faszinierenden Bildwelt geht es aber auch um die Frage der Entdeckung eines kreativen Potenzials sowie der Förderung und Unterstützung bildnerischer Ausdrucksformen von autistischen Kindern, Jugendlichen und Erwachsenen. This is Daniel Woodrell's third book set in the Ozarks and, like the other two, *Give Us a Kiss* and

**Neurodiversität und Autismus** Christian Lindmeier, Marek

Grummt, Mechthild Richter. 2023-02-22 Der Auftakt-Band der Reihe Pädagogik im Autismus-Spektrum befasst sich zunächst mit sozial- und erziehungswissenschaftlichen Perspektiven auf das Konzept Neurodiversität. Darauf aufbauend wendet es sich dann pädagogischen und didaktischen Anschlüssen zu und bezieht sich anschließend auf partizipative (Autismus-)Forschung als eine Hauptforderung der Neurodiversitätsbewegung. Ferner wird ein Einblick in erste interdisziplinäre Neurodiversitätsforschungen gegeben. Da der deutschsprachige wissenschaftliche Diskurs erst am Anfang steht und bislang fast ausschließlich die Neuro-Minderheit autistischer Personen umfasst, sind 'Betroffene' in diesem Band besonders zahlreich vertreten.

*Explorations and Entanglements* Hartmut Berghoff, Frank Biess, Ulrike Strasser. 2018-11-16 Traditionally, Germany has been considered a minor player in Pacific history: its presence there was more limited than that of other European nations, and whereas its European rivals established themselves as imperial forces beginning in the early modern era, Germany did not seriously pursue colonialism until the nineteenth century. Yet thanks to recent advances in the field emphasizing transoceanic networks and cultural encounters, it is now possible to develop a more nuanced understanding of the history of Germans in the Pacific. The studies gathered here offer fascinating research into German missionary, commercial, scientific, and imperial activity against the backdrop of the Pacific's overlapping cultural circuits and complex oceanic transits.

The Wisdom of the Overself Paul Brunton. 2015-05-26 Inspired by Paul Brunton's years spent with sages in Asia, *The Wisdom of the Overself* and its companion volume *The Hidden Teaching Beyond Yoga* were written at the request of these remarkable teachers, who recognized that Brunton had a significant role to play in the transmission of traditional wisdom to the West. Here is a profound re-creation of these teachings, brought to life and made accessible by Brunton's insights. In print since the 1940s,

Brunton's works are considered to be among the most comprehensive, clear, and practical guides on the path to enlightenment. Brunton unfolds the grand vision for human development by investigating consciousness as the source of all experience; how to move from ego-centered life to the transcendent reality; the interplay of karma, free will, and grace; the nature of evil and suffering; how to awaken intuition and penetrative insight; the passage through death to rebirth; and psychic experiences and mystic visions. He also provides seven ultramystic exercises to open the door to higher consciousness, including a healing meditation on the sun; practices for transforming the future, dream, and sleep; and a meditation on the timeless self. These techniques lead to the deepest spiritual realizations—to the true Wisdom of the Overself. This new edition has been updated to incorporate Brunton's final revisions. It includes a new foreword plus supplementary reading material selected from the author's archives by the Paul Brunton Philosophic Foundation. F Daniel Kehlmann.2015-08-04 From the internationally acclaimed author of *Measuring the World*, here is a dazzling tragicomedy about the three sons of a lost father. Arthur Friedland is a wannabe writer who one day takes his sons to a performance by the Great Lindemann, Master of Hypnosis. Arthur declares himself immune to hypnosis and a disbeliever in magic.

But the Great Lindemann knows better, and after he extracts Arthur's deepest secrets and tells him to make them real, Arthur empties the family bank account and vanishes. He goes on to become a world-famous author, a master of the mystical. (F is for fake.) But what of his abandoned boys? The painfully shy Martin grows up to be a priest without a vocation. (F is for faith, and lack of it.) Eric becomes a financier on the brink of ruin (F is for fraud), while Ivan, hoping for glory as a painter, instead becomes a forger. (F is for forgery, too.) During the summer before the global financial crisis, they are thrown together again with cataclysmic results. Wildly funny and heartbreaking, Daniel Kehlmann's novel about truth, family, and the terrible power of fortune is a fictional triumph.

**I am Not a Brain** Markus Gabriel.2017-09-18 Many consider the nature of human consciousness to be one of the last great unsolved mysteries. Why should the light turn on, so to speak, in human beings at all? And how is the electrical storm of neurons under our skull connected with our consciousness? Is the self only our brain's user interface, a kind of stage on which a show is performed that we cannot freely direct? In this book, philosopher Markus Gabriel challenges an increasing trend in the sciences towards neurocentrism, a notion which rests on the assumption that the self is identical to the brain. Gabriel raises serious doubts as to whether we can know ourselves in this way. In a sharp critique of this approach, he presents a new defense of the free will and provides a timely introduction to philosophical thought about the self - all with verve, humor, and surprising insights. Gabriel criticizes the scientific image of the world and takes us on an eclectic journey of self-reflection by way of such concepts as self, consciousness, and freedom, with the aid of Kant, Schopenhauer, and Nagel but also Dr. Who, The Walking Dead, and Fargo.
