Naples and Napoleon John A. Davis.2008-12-18 In *Naples and Napoleon* John Davis takes the southern Italian Kingdom of the Two Sicilies as the vantage point for a sweeping reconsideration of Italy's history in the age of Napoleon and the European revolutions. The book's central themes are posed by the period of French rule from 1806 to 1815, when southern Italy was the Mediterranean frontier of Napoleon's continental empire. The tensions between Naples and Paris made this an important chapter in the history of that empire and revealed the deeper contradictions on which it was founded. But the brief interlude of Napoleonic rule later came to be seen as the critical moment when a modernizing North finally parted company from a backward South. Although these arguments still shape the ways in which Italian history is written, in most parts of the North political and economic change before Unification was slow and gradual; whereas in the South it came sooner and in more disruptive forms. Davis develops a wide-ranging critical reassessment of the dynamics of political change in the century before Unification. His starting point is the crisis that overwhelmed the Italian states at the end of the 18th century, when Italian rulers saw the political and economic fabric of the Ancien Régime undermined throughout Europe. In the South the crisis was especially far reaching and this, Davis argues, was the reason why in the following decade the South became the theatre for one of the most ambitious reform projects in Napoleonic Europe. The transition was precarious and insecure, but also mobilized political projects and forms of collective action that had no counterparts elsewhere in Italy before 1848, illustrating the

similar nature of the political challenges facing all the pre-Unification states. Although Unification finally brought Italy's insecure dynastic principalities to an end, it offered no remedies to the insecurities that from much earlier had made the South especially vulnerable to the challenges of the new age: which was why the South would become a problem - Italy's 'Southern Problem'.

The Deeds of God Through the Franks Robert Levine.2004-06-01
Disturbed by such foul arrogance, the emperor instructed them to delay their crossing of the waters of the Arm no longer. Once they had made the crossing, they continued to behave as they had on the other side; those who had taken a vow to fight against the pagans fought against men of our own faith, destroying churches everywhere, and stealing the possessions of Christians. Since they were not subject to the severity of a king, who might correct their errors with judicial strength, nor did they reflect soberly upon divine law, which might have restrained the instability of their minds, they fell to sudden death.

Philosophical Issues in Psychiatry IV Kenneth S. Kendler,Josef Parnas.2017-04-06
The revisions of both DSM-IV and ICD-10 have again focused the interest of the field of psychiatry and clinical psychology on the issue of nosology. This interest has been further heightened by a series of controversies associated with the development of DSM-5 including the fate of proposed revisions of the personality disorders, bereavement, and the autism spectrum. Major debate arose within the DSM process about the criteria for changing criteria, leading to the creation of first the Scientific Review Committee and then a series of other oversight committees which weighed in on the final debates on the most controversial proposed additions to DSM-5, providing important influences on the final decisions. Contained within these debates were a range of conceptual and philosophical issues. Some of these - such as the definition of mental disorder or the problems of psychiatric - have been with the field for a long

time. Others - the concept of epistemic iteration as a framework for the introduction of nosologic change - are quite new. This book reviews issues within psychiatric nosology from clinical, historical and particularly philosophical perspectives. The book brings together a range of distinguished authors - including major psychiatric researchers, clinicians, historians and especially nosologists - including several leaders of the DSM-5 effort and the DSM Steering Committee. It also includes contributions from psychologists with a special interest in psychiatric nosology and philosophers with a wide range of orientations. The book is organized into four major sections: The first explores the nature of psychiatric illness and the way in which it is defined, including clinical and psychometric perspectives. The second section examines problems in the reification of psychiatric diagnostic criteria, the problem of psychiatric epidemics, and the nature and definition of individual symptoms. The third section explores the concept of epistemic iteration as a possible governing conceptual framework for the revision efforts for official psychiatric nosologies such as DSM and ICD and the problems of validation of psychiatric diagnoses. The book ends by exploring how we might move from the descriptive to the etiologic in psychiatric diagnoses, the nature of progress in psychiatric research, and the possible benefits of moving to a living document (or continuous improvement) model for psychiatric nosologic systems. The result is a book that captures the dynamic cross-disciplinary interactions that characterize the best work in the philosophy of psychiatry.

Psychosomatic Medicine Franz Alexander.1965-04-01 A pioneer in the field of psychoanalysis and psychosomatic medicine describes the fundamental concepts on which the psychosomatic approach is based and presents the results of study concerning the influence of emotions on bodily processes in health and disease. Dr. Alexander draws a clear picture of the psychological factors involved in a body process and shows that these factors must receive the same detailed scrutiny as the physiological processes.

Napoleon's Integration of Europe Stuart Woolf.2002-11-01 Histories of the Napoleonic period are almost exclusively biographies of the man, or political-military accounts of his wars. But such wars were only the first stage in a far more ambitious programme; the establishment of a rational state which would force the pace of modernising society. Through an examination of the experiences of French domination, Napoleon's Integration of Europe explores the implications of such a project for France and its relationship with the rest of Europe. It examines the problems of ruling a progressively expanding empire, as seen through the eyes of a trained corps of bureaucrats who were convinced that their scientific methods would enable them to understand and govern the mechanisms of society. However it also looks at the populations subjected to French rule, at the nature of their resistance and adaptation to the principles of the Napoleonic project. This book is the first overall comparative study of Europe in the Napoleonic years. It is a study not only of an early exercise in imperialism, but of the conflict that is aroused between the rationalising tendencies of the modern state and the spatial and cultural heterogeneity of individual societies. As well as a history of France, it is also a history of Italy, Germany, Belgium, Holland, Switzerland, Poland and Spain at a crucial moment in the history of each nation state.

Practical Aspects of Rape Investigation Robert R. Hazelwood, Ann Wolbert Burgess.2021-03-31 This latest edition addresses rape

and sexual assaults from all clinical, pathological, medical, and legal aspects. The book focuses on the victim and covers contemporary issues in sexual violence, investigative aspects of rape and sexual assault, offender fantasy, the personality of the offender, collection of evidence, medical examinations, and treatment, as well as trial preparation issues. Special topics include pedophiles, female and juvenile offenders, drug-facilitated rape, sexual sadism, elder abuse, and sexual assault within the military.

Mass Communication and Public Health Charles K.

Atkin, Lawrence Wallack. 1990-08 This book evolved from a recent national conference that was convened to explore how the mass media could become a more potent weapon to improve public health. The conference sought to achieve several goals: increasing understanding of mass communication influences on health issues and problems, exploring shared responsibilities among media and public health professionals, designing strategies for influencing policymakers and gatekeepers in each field, and setting priorities for future initiatives and research.

The Following Story Cees Nooteboom. 2014-01-02 WITH AN INTRODUCTION BY DAVID MITCHELL One morning Herman Mussert wakes up in a hotel room in Lisbon, where twenty years previously he slept with another man's wife. Yet he is quite certain that the night before he went to sleep as normal in his house in Amsterdam. And so Herman begins a physical journey and a metaphysical adventure, which will re-route him via past loves, through the pangs and pleasures of memory, and to the very heart of that crucial question: 'who am I?'

Sociology of Crime Joseph Slabey Roucek. 2011-10-01

Race, Ethnicity and Education David Gillborn. 2003-09-02 This book is a major new investigation into the issues of 'race',

ethnicity and education, following the educational reforms during the late 1980s. It provides an up-to-date and critical introduction to current issues and major research findings in the field, exploring the teacher-pupil relationship through a detailed account of life in an inner-city comprehensive. It reveals the influence of different racist stereotypes and highlights the especially disadvantaged position of Afro- Caribbean pupils within a school. Features: * Draws on a wide variety of research projects in ethnic schools to examine: achievement; curriculum content; language use; assessment and testing under the National Curriculum * Uses material collected during two years of research to consider young people's school experiences and issues relating to classroom discipline.

Neuropsychotherapy Klaus Grawe.2017-09-25

Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly

connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories.

Action Against Child Labour Nelien Haspels,Michele Jankanish.2000 Comprehensive and timely, this essential book provides a wealth of practical information on planning and carrying out action against child labor. Offering an array of effective strategies, instruments, methodologies, and information, it stresses a multi-pronged approach to combating child labor on several fronts: economic, educational, social, and cultural. It provides striking examples of effective legislation, policies, programs, and projects, and offers step-by-step guidelines for their precise implementation. Action Against Child Labor examines in depth the vital functions of national policies and programs against child labor, while providing valuable insight on developing and improving existing policy, setting priorities for action, capacity building, and creating social alliances. In addition, it spotlights ways to improve the knowledge base on child labor, provides technical and practical guidelines for designing and conducting surveys, and offers insights on obtaining information on children. Compiled by an array of child labor experts, this invaluable resource will help governments, employers' and workers' organizations, and NGOs contribute to eliminating child labor.

Forgotten Connections Klaus Mollenhauer.2013-10-30 Klaus Mollenhauer's *Forgotten Connections: On Culture and Upbringing* is internationally regarded as one of the most important German contributions to educational and curriculum theory in the 20th century. Appearing here in English for the first time, the book draws on Mollenhauer's concern for social justice and his profound awareness of the pedagogical tension between the inheritance of the past and the promise of the future. The book focuses on the idea of *Bildung*, in which philosophy and education come together to see upbringing and maturation as being much more about holistic experience than skill development. This translation includes a detailed introduction from Norm Friesen, the book's translator and editor. This introduction contextualizes the original publication and discusses its application to education today. Although Mollenhauer's work focused on content and culture, particularly from a German perspective, this book draws on philosophy and sociology to offer internationally relevant responses to the challenge of communicating cultural values and understandings to new generations. *Forgotten Connections* will be of value to students, researchers and practitioners working in the fields of education and culture, curriculum studies, and in educational and social foundations.

Spectra of Transformation Benjamin Jörissen, Lisa Unterberg, Leopold Klepacki, Juliane Engel, Victoria Flasche, Tanja Klepacki.2018 Like every pedagogical field, the fields of aesthetics, arts and cultural education have been confronted with various transformational dynamics in recent decades.

Transformation processes such as globalization, digitization or transculturalization not only characterize a change in social and cultural framework conditions, but also lead to changes in self-understanding, working methods, contents, and objectives in the research of these educational fields. The anthology Spectra of Transformation gathers a variety of perspectives on the question of the research on aesthetics, artistic and cultural education, which were discussed by international participants and speakers at the Winter School 2017 in Nuremberg.

Health Food Junkies Steven Bratman, M.D., David Knight.2004-07-27 The first book to identify the eating disorder orthorexia nervosa-an obsession with eating healthfully-and offer expert advice on how to treat it. As Americans become better informed about health, more and more people have turned to diet as a way to lose weight and keep themselves in peak condition. Anorexia nervosa and bulimia nervosa-disorders in which the sufferer focuses on the quantity of food eaten-have been highly documented over the past decade. But as Dr. Steven Bratman asserts in this breakthrough book, for many people, eating "correctly" has become an equally harmful obsession, one that causes them to adopt progressively more rigid diets that not only eliminate crucial nutrients and food groups, but ultimately cost

them their overall health, personal relationships, and emotional well-being. *Health Food Junkies* is the first book to identify this new eating disorder, orthorexia nervosa, and to offer detailed, practical advice on how to cope with and overcome it. Orthorexia nervosa occurs when the victim becomes obsessed, not with the quantity of food eaten, but the quality of the food. What starts as a devotion to healthy eating can evolve into a pattern of incredibly strict diets; victims become so focused on eating a “pure” diet (usually raw vegetables and grains) that the planning and preparation of food come to play the dominant role in their lives. *Health Food Junkies* provides an expert analysis of some of today’s most popular diets—from The Zone to macrobiotics, raw-foodism to food allergy elimination—and shows not only how they can lead to orthorexia, but how they are often built on faulty logic rather than sound medical advice. Offering expert insight gleaned from his work with orthorexia patients, Dr. Bratman outlines the symptoms of orthorexia, describes its progression, and shows readers how to diagnose the condition. Finally, Dr. Bratman offers practical suggestions for intervention and treatment, giving readers the tools they need to conquer this painful disorder, rediscover the joys of eating, and reclaim their lives.

Vulnerability and Resilience in Human Development Ved P.

Varma, Barbara Tizard. 2000 This volume explores the human capacity for resilience despite the experience of adversity in early life. Toddler Day Care Robin Lynn Leavitt, Brenda Krause Eheart. 1985 Between the ages of one and three, children go through a distinct

stage that every parent knows well--toddlerhood. Primarily concerned with themselves and their immediate worlds, toddlers present special needs to their caregivers. This book outlines a responsive, nondirective approach to help professionals with this unique developmental stage. The authors' approach is child-centered, focusing on the need to let children be themselves in as natural and individual a way as possible, rather than stressing preschool academic achievement. Responsive caregiving--adjusting to the specific needs of the children--requires as much knowledge of psychology, sociology, education, and medicine as directive caregiving. But in addition, the responsive caregiver needs a rarer, higher skill: an ability to follow the toddler's lead.-- Back cover.

Recent Research in Developmental Psychopathology James Eric Stevenson.1985 This book contains a selection of papers presented at the 10th International Congress of the International Association for Child and Adolescent Psychiatry and Allied Professions, held in Dublin in 1982. Developments currently taking place in child psychiatry and clinical child psychology are represented, and in particular, the two themes of processes within families and evaluation of intervention reflect important aspects of research activities that have emerged recently.

Care of the Dying Cicely Saunders. 1976

Nazi Empire-Building and the Holocaust in Ukraine Wendy

Lower. 2006-05-18 On 16 July 1941, Adolf Hitler convened top Nazi leaders at his headquarters in East Prussia to dictate how they would rule the newly occupied eastern territories. Ukraine, the jewel in the Nazi empire, would become a German colony administered by Heinrich Himmler's SS and police, Hermann Goring's economic plunderers, and a host of other satraps. Focusing on the Zhytomyr region and weaving together official German wartime records, diaries, memoirs, and personal interviews, Wendy Lower provides the most complete assessment available of German colonization and the Holocaust in Ukraine. Midlevel managers, Lower demonstrates, played major roles in mass murder, and locals willingly participated in violence and theft. Lower puts names and faces to local perpetrators, bystanders, beneficiaries, as well as resisters. She argues that Nazi actions in the region evolved from imperial arrogance and

ambition; hatred of Jews, Slavs, and Communists; careerism and pragmatism; greed and fear. In her analysis of the murderous implementation of Nazi race and population policy in Zhytomyr, Lower shifts scholarly attention from Germany itself to the eastern outposts of the Reich, where the regime truly revealed its core beliefs, aims, and practices.

Developmental Tasks in Adolescence Klaus Hurrelmann, Gudrun Quenzel. 2018-11-08 The topic of adolescent development in Europe is one which has received little academic attention in recent years. *Developmental Tasks in Adolescence* makes an exciting contribution to the field by applying socialisation theory to four major developmental tasks of life: Qualifying, Bonding, Consumption and Participation, arguing that if the tasks in these areas are mastered, then personal individuation and social integration can take place, a prerequisite for the formation of self-identity. In highly developed societies, adolescence encompasses a period of about 15 years on average. Puberty, or the transition from childhood, starts earlier and earlier, and the transition to adulthood is increasingly postponed. *Developmental Tasks in Adolescence* proposes that the way in which adolescents master the tasks of everyday life has become a pattern of orientation for the life stages which follow because of the new lifestyle requirements that are typical for modern democratic societies. Today, a life full of uncertainties and ambiguities is no longer limited to adolescence, but rather continues into adulthood. Hurrelmann and Quenzel's sociological approach is valuable reading for students and academics in psychology, sociology, education, social work and youth studies, and for those on professional training courses in these fields.

Europe Under Napoleon Michael Broers. 2014-11-18 Napoleon Bonaparte dominated the public life of Europe like no other individual before him. Not surprisingly, the story of the man himself has usually swamped the stories of his subjects. This book looks at the history of the Napoleonic Empire from an entirely

new perspective - that of the ruled rather than the ruler. Michael Broers concentrates on the experience of the people of Europe - particularly the vast majority of Napoleon's subjects who were neither French nor willing participants in the great events of the period - during the dynamic but short-lived career of Napoleon, when half of the European content fell under his rule.

Children and War Grazia Prontera, John Buckley, Wolfgang Aschauer, Helga Embacher, Albert Lichtblau, Johannes-Dieter Steinert. 2016 The amount of international research on 'Children and War' carried out by academics, governments and non-governmental organizations has continually increased in recent years. At the same time there has been growing public interest in how children experience military conflicts and how their lives have been affected by war and its aftermath. In light of the many brutal post-colonialist civil wars or 'new wars', especially in Africa and Asia, child soldiers have in particular gained increased attention. Simultaneously, since the 1990s, the history of the Holocaust and World War II has also increasingly been written from the perspective of children; those who speak out now and publish their memoirs experienced the Holocaust as children. A similar generational change has also taken place in the societies of the perpetrators: Germans and Austrians who experienced the war as children took over the role of war witnesses from the soldiers of the German Wehrmacht. Moreover, intensified focus on children's experiences and their strategies for dealing with what they went through is evident in Eastern Europe as well. In *Children and War: Past and Present Volume II* scholars from different academic disciplines, practitioners in the field, and representatives of government and non-governmental institutions present a further selection of studies in this sensitive subject from different angles and in various methodological ways. A number of studies investigate the difficult areas of recovery and reintegration both of child soldiers specifically, and children affected by armed conflict. Further sections examine Victims and

Witnesses, Public Discourse and Education and World War II and the Second Generation.

In My Brother's Shadow Uwe Timm.2005 This moving memoir explores a brother's death fighting for the SS, and one ordinary family's relationship with Nazi Rule.

Freedom and Indoctrination in Education Ben Spiecker,Roger Straughan.1991

Conscripts and Deserters Alan I. Forrest.1989 Between the outbreak of war with Austria in 1792 and Napoleon's final debacle in 1814, France remained almost continuously at war, recruiting in the process some two to three million frenchmen--a level of recruitment unknown to previous generations and widely resented as an attack on the liberties of rural communities. Forrest challenges the notion of a nation heroically rushing to arms by examining the massive rates of desertion and avoidance of service as well as their consequences on French society--on military campaigns and the morale of armies, on political opinion at home, on the social fabric of local villages, and on the Napoleonic dream of bringing about a coherent and centralized state.
