Assessment of Ecological Footprints Subramanian Senthilkannan Muthu.2021-03-11 This book highlights the concepts and assessment methods of Ecological Footprints. Ecological footprint is defined as, "a measure of how much area of biologically productive land and water an individual, population or activity requires to produce all the resources it consumes and to absorb the waste it generates, using prevailing technology and resource management practices". Developed in 1992 by William Rees, it was the first footprint developed followed by other footprints such as Carbon, Water and Energy. Assessment of Ecological footprints strive for comparing consumption footprint to biological capacity. This book presents five interesting chapters pertaining to the assessment of Ecological Footprints.

Paradise Valley C.J. Box.2017-07-25 She almost caught him once. Now, he's back. For three years, Investigator Cassie Dewell has been on a hunt for a serial killer known as the Lizard King whose hunting grounds are the highways and truck stops where runaways and prostitutes are most likely to vanish. Cassie almost caught him...once. Working for the Bakken County, North Dakota sheriff's department, Cassie has set what she believes is the perfect trap and she has lured him and his truck to a depot. But the plan goes horribly wrong, and the blame falls on Cassie. Disgraced, she loses her job and investigation into her role is put into motion. At the same time, Kyle Westergaard, a troubled kid whom Cassie has taken under her wing, has disappeared after telling people that he's going off on a long-planned adventure. Kyle's grandmother begs Cassie to find him and, with nothing else to do, Cassie agrees—all the while hunting the truck driver. Now Cassie is a lone wolf. And in the same way that two streams converge into a river, Kyle's disappearance may have a more sinister meaning than anyone realizes. With no allies, no support, and only her own wits to rely on, Cassie must take down a killer who is as ruthless as he is cunning. But can she do it alone, without losing her own humanity or her own life? *Paradise Valley* continues the Highway Quartet series from bestselling author C. J. Box.

Too Much and Not the Mood Durga Chew-Bose.2017-04-11 On April 11, 1931, Virginia Woolf ended her entry in *A Writer's Diary* with the words too much and not the mood. She was describing how tired she was of correcting her own writing, of the cramming in and the cutting out to please other readers, wondering if she had anything at all that was truly worth saying. The character of that sentiment, the attitude of it, inspired Durga Chew-Bose to write and collect her own work. The result is a lyrical and piercingly insightful collection of essays and her own brand of essay-meets-prose poetry about identity and culture. Inspired by Maggie Nelson's *Bluets*, Lydia Davis's short prose, and Vivian Gornick's exploration of interior life, Chew-Bose captures the inner restlessness that keeps her always on the brink of creative expression. *Too Much and Not the Mood* is a beautiful and surprising exploration of what it means to be a first-generation, creative young woman working today.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community.2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with

consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Right Amount of Panic Vera-Gray, Fiona.2018-07-18 Have you ever thought about how much energy goes into avoiding sexual violence? The work that goes into feeling safe goes largely unnoticed by the women doing it and by the wider world, and yet women and girls are the first to be blamed the inevitable times when it fails. We need to change the story on rape prevention and 'well-meaning' safety advice, because this makes it harder for women and girls to speak out, and hides the amount of work they are already doing trying to decipher 'the right amount of panic'. With real-life accounts of women's experiences, and based on the author's original research on the impact of sexual harassment in public, this book challenges victim-blaming and highlights the need to show women as capable, powerful and skilful in their everyday resistance to harassment and sexual violence.

Water Footprint Subramanian Senthilkannan Muthu.2021-01-12 This book highlights the concept of water footprint in different industrial sectors such as leather tanning, steel, agriculture, textile and wine. One of the very basic necessities of life which is soon going to be scarce is water, hence the environmental footprint assessments on any scale essentially includes water footprint which is being measured in various supply chains and across different product categories. According to ISO 14046, the water footprint assessment refers to the total freshwater volume consumed and polluted directly or indirectly across a product's end-to-end supply chain. This book presents, for industry purposes, the focus on identification and quantification of water trade, the scarcity, and pollution involved in the production of goods and services.

How do we get the attention of a nonscientist? And if we can get it, how do we keep it - not only for the duration of the course or the chapter in a textbook but beyond? How do we convey in our courses and our textbooks not just what we know but also how science is done? These are the challenges we hope to address with our new series of textbooks specifically for the nonscientist. With this series, W. H. Freeman and Scientific American join forces not just to engage nonscientists but to equip them critical life tools.

Larding the Lean Earth Steven Stoll.2003-07-03 A major history of early Americans' ideas about conservation Fifty years after the American Revolution, the yeoman farmers who made up a large part of the new country's voters faced a crisis. The very soil of American farms seemed to be failing, and agricultural prosperity, upon which the Republic was founded, was threatened. Steven Stoll's passionate and brilliantly argued book explores the tempestuous debates that erupted between improvers, who believed in practices that sustained and bettered the soil of existing farms, and emigrants, who thought it was wiser and more American to move westward as the soil gave out. Stoll examines the dozens of journals, from New York to Virginia, that gave voice to the improvers'

cause. He also focuses especially on two groups of farmers, in Pennsylvania and South Carolina. He analyzes the similarities and differences in their farming habits in order to illustrate larger regional concerns about the new husbandry in free and slave states. Farming has always been the human activity that most disrupts nature, for good or ill. The decisions these early Americans made about how to farm not only expressed their political and social faith, but also influenced American attitudes about the environment for decades to come. *Larding the Lean Earth* is a signal work of environmental history and an original contribution to the study of antebellum America.

Speculative Everything Anthony Dunne, Fiona Raby. 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

Start-up Nation Dan Senor, Saul Singer. 2011-09-07 What the world can learn from Israel's meteoric economic success. *Start-Up Nation* addresses the trillion dollar question: How is it that Israel -- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to recreate the Israel effect, there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

The 57 Bus Dashka Slater. 2017-10-17 The riveting New York Times bestseller and Stonewall Book Award winner that will make you rethink all you know about race, class, gender, crime, and punishment. Artfully, compassionately, and expertly told, Dashka Slater's *The 57 Bus* is a must-read nonfiction book for teens that chronicles the true story of an agender teen who was set on fire by another teen while riding a bus in Oakland, California. Two ends of the same line. Two sides of the same crime. If it weren't for the 57 bus, Sasha and Richard never would have met. Both were high school students from Oakland, California, one of the most diverse cities in the country, but they inhabited different worlds. Sasha, a white teen, lived in the middle-class foothills and attended a small private school. Richard, a Black teen, lived in the economically challenged flatlands and attended a large public one. Each day, their paths overlapped for a mere eight minutes. But one afternoon on the bus ride home from school, a single reckless act left Sasha severely burned, and Richard charged with two hate crimes and facing life imprisonment. The case garnered international attention, thrusting both teenagers into the spotlight. But in *The 57 Bus*, award-winning journalist Dashka Slater shows that what might at first seem like a simple matter of right and wrong, justice and injustice, victim and criminal, is something more complicated—and far more heartbreaking.

Awards and Accolades for *The 57 Bus*: A New York Times Bestseller Stonewall Book Award Winner YALSA Award for Excellence in Nonfiction for Young Adults Finalist A Boston Globe-Horn Book Nonfiction Honor Book Winner A TIME Magazine Best YA Book of All Time A Los Angeles Times Book Prize Finalist Don't miss Dashka Slater's newest propulsive and thought-provoking nonfiction book, *Accountable: The True Story of a Racist Social Media Account and the Teenagers Whose Lives It Changed*, which National Book Award winner Ibram X. Procreation and Population in Historical Social Science Daniela Danna.2021-08-03 The book sees procreation, the forgotten basis of population dynamics, and its macrohistorical results through the lenses of world-system analysis in a nondogmatic way. This interdisciplinary book sheds light on the historical paths leading to the current unprecedented numbers of humans on the globe, fuelled by the capitalist demand for labor and mediated by the role of women in society. *Procreation and Population* is a critical text, opposing the current disciplinary fences that demonstrably hinder our comprehension of social phenomena. Attentive to gender relations, the book boldly tracks "the big picture" of population dynamics and its most reliable theories in times of postmodernist taboos on generalizations and on the search for the historical laws of human society.
