Healthy Beginnings Jane Paul, International Labour Office. 2004 Improving maternal health and reducing child mortality are among the eight UN Millennium Development Goals. This publication contains guidance on maternity protection in the workplace, focusing on measures that can be taken to establish a decent workplace and to identify workplace risks. The starting point is the Maternity Protection Convention (No. 183), adopted by the International Labour Conference in 2000 and its accompanying Recommendation (No. 191). The guide is intended for general use as a reference tool for employers, workers, trade union leaders, occupation health and safety advisors, labour inspectors and others involved in workplace health and maternity protection.

Constructive Ergonomics Pierre Falzon. 2014-09-26 The goal for ergonomics has always been to adapt work, work environments, and machines to humans. But is this goal still sufficient? Does it satisfy the needs of the individual or of societies and organizations as they operate now? Constructive Ergonomics provides an answer to these questions. Rooted both in the academic world and in the world of p

A Research Agenda For DSM V David J. Kupfer, Michael B. First, Darrel A. Regier. 2008-08-13 In the ongoing quest to improve our psychiatric diagnostic system, we are now searching for new approaches to understanding the etiological and pathophysiological mechanisms that can improve the validity of our diagnoses and the consequent power of our preventive and treatment interventions -- venturing beyond the current DSM paradigm and DSM-IV framework. This thought-provoking volume -- produced as a partnership between the American Psychiatric Association, the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse -- represents a far-reaching attempt to stimulate research and discussion in the field in preparation for the eventual start of the DSM-V process, still several years hence. The book explores a variety of basic nomenclature issues, including the desirability of rating the quality and quantity of information available to support the different disorders in the DSM in order to indicate the disparity of empirical support across the diagnostic system. Offers a neuroscience research agenda to guide development of a pathophysiologically based classification for DSM-V, which reviews genetic, brain imaging, postmortem, and animal model research and includes strategic insights for a new research agenda. Presents highlights of recent progress in developmental neuroscience, genetics, psychology, psychopathology, and epidemiology, using a bioecological perspective to focus on the first two decades of life, when rapid changes in behavior, emotion and cognition occur. Discusses how to address two important gaps in the current DSM-IV: (1) the categorical method of diagnosing personality disorders and their relationship with Axis I disorders, and (2) the limited provision for the diagnosis of relational disorders -- suggesting a research agenda for personality disorders that considers replacing the current categorical approach with a dimensional classification of personality. Reevaluates the relationship between mental disorders and disability, asserting that research into disability and impairment would benefit from the diagnosis of mental disorders be uncoupled from a requirement for impairment or disability to foster a more vigorous research agenda on the etiologies, courses, and treatment of mental disorders as well as disabilities and to avert unintended consequences of delayed diagnosis and treatment. Examines the importance of culture in psychopathology and the main cultural variables at play in the diagnostic process, stating that training present and future professionals in the need to include cultural factors in the diagnostic process is a logical step in any attempt to develop comprehensive research programs in psychology, psychiatry, and related disciplines. This fascinating work, with contributions from an international group of research investigators, reaches into the core of psychiatry, providing invaluable background and insights for all psychology and psychiatry professionals -- food for thought and further research that will be relevant for years to come.

Ethics and Law for the Health Professions Ian Kerridge, Michael Lowe, Cameron Stewart. 2013 Ethics and Law for the Health Professions is a cross-disciplinary medico-legal book, the first edition of which was widely used in the medical world. We believe it is also of immense use to the legal world when grappling with medico-legal issues. Its special features are its focus on a clinically-relevant approach and its recognition that health care professionals are often confronted with legal and ethical issues simultaneously. Health professionals have to satisfy both, and their legal advisers need to be aware of the dilemmas this can present. This book is careful to distinguish between ethics and law. Its chapters take account of all the health professions and their differing responsibilities, and the book covers a very wide range of the issues they face.

WHO Evaluation Practice Handbook World Health Organization. 2014-09-15 The Evaluation Practice Handbook offers comprehensive information and practical guidance on how to prepare for and conduct evaluations in WHO, and gives guidance on the utilization and follow-up of evaluation results and recommendations. Most importantly, it shows how an evaluation culture can be mainstreamed throughout WHO, outlining stakeholders responsibilities and supporting our staff to commission or carry out high-quality evaluations in accordance with WHO's policy, that conform to current best practices and the norms and standards of the United Nations Evaluation Group. This handbook clarifies roles and responsibilities in evaluation and documents processes, methods and associated tools. It describes the main phases of an evaluation--i.e. planning, conducting the evaluation, reporting, and managing and communicating outcomes--and provides operational guidance and templates to assist those responsible for evaluations to comply with the Organization's evaluation policy. The handbook is divided into two parts: * Part One (chapters 1 and 2) covers the definition, objectives, principles and management of evaluation in WHO. * Part Two (chapters 3-6) provides practical guidance on preparing for and conducting an evaluation, detailing the main steps to carrying out a quality evaluation in compliance with WHO's evaluation policy (Fig. 1). Annexes provide templates, standard documents and a glossary that can be used for the different phases of the evaluation process.

Global Education Monitoring Report 2020 UNESCO. 2020-07-07 This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

Out of the Shadows Patricia Fernández-Kelly, Jon Shefner. 2010-11 Since the beginning of scholarly writing about the informal economy in the mid-1970s, the debate has evolved from addressing survival strategies of the poor to considering the implications for national development and the global economy. Simultaneously, research on informal politics has ranged from neighborhood clientelism to contentious social movements basing their claims on a variety of social identities in their quest for social justice. Despite related empirical and theoretical concerns, these research traditions have seldom engaged in dialogue with one another. Out of the

Shadows brings leading scholars of the informal economy and informal politics together to address how globalization has influenced local efforts to resolve political and economic needs—and how these seemingly separate issues are indeed deeply related. In addition to the editors, contributors are Javier Auyero, Miguel Angel Centeno, Sylvia Chant, Robert Gay, Mercedes González de la Rocha, José Itzigsohn, Alejandro Portes, and Juan Manuel Ramírez Sáiz.

Preventing Disease Richard B. Goldbloom, Robert S. Lawrence. 2012-12-06 Preventing Disease, the offspring of an extraordinary collaboration between the U.S. and Canadian Preventive Services Task Forces, presents a meticulous and objective review of the published evidence on preventive measures. Examining such diverse and relevant topics as screening for endometrial cancer, exercise counselling for healthy adults, and the evidence for a causal relation between dietary lipids and coronary heart disease, this volume reflects the editors' shared conviction that recommendations for preventive action should rarely exceed what is well justified by the evidence. In the current period, characterized as the Second Public Health Revolution, the authors' hard-nosed approach leads them to ask the tough questions. Are preventive measures cost-saving? Does preventive screening actually lead to treatment in clinical practice? Does the treatment do more good than harm? To what extent does our desire to eliminate causes of serious disability, ill health and premature death cloud our objectivity? All concerned about preventive medicine, community health, and primary care will find valuable stimulation for thought and action in this book: the contributions have gone beyond the rhetoric.

Precarious Work Arne L. Kalleberg, Steven P. Vallas. 2017-12-08 This volume presents original theory and research on precarious work in various parts of the world, identifying its social, political and economic origins, its manifestations in the USA, Europe, Asia, and the Global South, and its consequences for personal and family life.

Good Jobs, Bad Jobs Arne L. Kalleberg. 2011-06-01 The economic boom of the 1990s veiled a grim reality: in addition to the growing gap between rich and poor, the gap between good and bad quality jobs was also expanding. The postwar prosperity of the mid-twentieth century had enabled millions of American workers to join the middle class, but as author Arne L. Kalleberg shows, by the 1970s this upward movement had slowed, in part due to the steady disappearance of secure, well-paying industrial jobs. Ever since, precarious employment has been on the rise—paying low wages, offering few benefits, and with virtually no long-term security. Today, the polarization between workers with higher skill levels and those with low skills and low wages is more entrenched than ever. Good Jobs, Bad Jobs traces this trend to large-scale transformations in the American labor market and the changing demographics of low-wage workers. Kalleberg draws on nearly four decades of survey data, as well as his own research, to evaluate trends in U.S. job quality and suggest ways to improve American labor market practices and social policies. Good Jobs, Bad Jobs provides an insightful analysis of how and why precarious employment is gaining ground in the labor market and the role these developments have played in the decline of the middle class. Kalleberg shows that by the 1970s, government deregulation, global competition, and the rise of the service sector gained traction, while institutional protections for workers—such as unions and minimum-wage legislation—were weakened. Together, these forces marked the end of postwar security for American workers. The composition of the labor force also changed significantly; the number of dual-earner families increased, as did the share of the workforce comprised of women, non-white, and immigrant workers. Of these groups, blacks, Latinos, and immigrants remain concentrated in the most precarious and low-quality jobs, with educational attainment being the leading indicator of who will earn the highest wages and experience the most job security and highest levels of autonomy and control over their jobs and schedules. Kalleberg demonstrates, however, that building a better safety net—increasing government responsibility for worker health care and retirement, as well as strengthening unions—can go a long way toward redressing the effects of today's volatile labor market. There is every reason to expect that the growth of precarious jobs—which already make up a significant share of the American job market—will continue. Good Jobs, Bad Jobs deftly shows that the decline in U.S. job quality is not the result of fluctuations in the business cycle, but rather the result of economic restructuring and the disappearance of institutional protections for workers. Only government, employers and labor working together on long-term strategies—including an expanded safety net, strengthened legal protections, and better training opportunities—can help reverse this trend. A Volume in the American Sociological Association's Rose Series in Sociology.

AIDS Scorecards Joint United Nations Programme on HIV/AIDS., UNAIDS. 2011 This report provides a quick snapshot of the state of the AIDS response, key findings and action points. For the first time UNAIDS is presenting AIDS scorecards that provide a quick overview of the progress made by United Nations Member States in the global AIDS response. The report also includes highlights of the global epidemiological trends. Together, they provide a synopsis of achievements, failures and obstacles in achieving universal access to HIV prevention, treatment, care and support.

Caring Democracy Joan C. Tronto. 2013-04-12 Americans now face a caring deficit: there are simply too many demands on people's time for us to care adequately for our children, elderly people, and ourselves. At the same time, political involvement in the United States is at an all-time low, and although political life should help us to care better, people see caring as unsupported by public life and deem the concerns of politics as remote from their lives. Caring Democracy argues that we need to rethink American democracy, as well as our fundamental values and commitments, from a caring perspective. The idea that production and economic life are the most important political and human concerns ignores the reality that caring, for ourselves and others, should be the highest value that shapes how we view the economy, politics, and institutions such as schools and the family. Care is at the center of our human lives, but Tronto argues it is currently too far removed from the concerns of politics. Caring Democracy traces the reasons for this disconnection and argues for the need to make care, not economics, the central concern of democratic political life. Joan C. Tronto is a Professor in the Political Science Department at the University of Minnesota. She is the author of *Moral Boundaries: A Political Argument for an Ethic of Care* (Routledge).

Mapping Precariousness, Labour Insecurity and Uncertain Livelihoods Emiliana Armano, Arianna Bove, Annalisa Murgia. 2017-04-07 The condition of precariousness not only provides insights into a segment of the world of work or of a particular subject group, but is also a standpoint for an overview of the condition of the social on a global scale. Because precariousness is multidimensional and polysemantic, it traverses contemporary society and multiple contexts, from industrial to class, gender, family relations as well as political participation, citizenship and migration. This book maps the differences and similarities in the ways precariousness and insecurity in employment and beyond unfold and are subjectively experienced in regions and sectors that are confronted with different labour histories, legislations and economic priorities. Establishing a constructive dialogue amongst different global regions and across disciplines, the chapters explore the shift from precariousness to precariat and collective subjects as it is being articulated in the current global crisis. This edited collection aims to continue a process of mapping experiences by means of ethnographies, fieldwork, interviews, content analysis, where the precarious define their condition and explain how they try to withdraw from, cope with or embrace it. This is valuable reading for students and academics interested in geography, sociology, economics and labour studies.

Losing My Mind Thomas DeBaggio.2002-04-05 When Tom DeBaggio turned fifty-seven in 1999, he thought he was about to embark on the relaxing golden years of retirement -- time to spend with his family, his friends, the herb garden he had spent decades cultivating and from which he made a living. Then, one winter day, he mentioned to his doctor during a routine exam that he had been stumbling into forgetfulness, making his work difficult. After that fateful visit, and a subsequent battery of tests over several months, DeBaggio joined the legion of twelve million others afflicted with Alzheimer's disease. But under such a curse, DeBaggio was also given one of the greatest gifts: the ability to chart the ups and downs of his own failing mind. *Losing My Mind* is an extraordinary first-person account of early onset Alzheimer's -- the form of the disease that ravages younger, more alert minds. DeBaggio started writing on the first day of his diagnosis and has continued despite his slipping grasp on one of life's greatest treasures, memory. In an inspiring and detailed account, DeBaggio paints a vivid picture of the splendor of memory and the pain that comes from its loss. Whether describing the happy days of a youth spent in a much more innocent time or evaluating how his disease has affected those around him, DeBaggio poignantly depicts one of the most important parts of our lives -- remembrance -- and how we often take it for granted. But to DeBaggio, memory is more than just an account of a time long past, it is one's ability to function, to think, and ultimately, to survive. As his life becomes reduced to moments of clarity, the true power of thought and his ability to connect to the world shine through, and in DeBaggio's case, it is as much in the lack of functioning as it is in the ability to function that one finds love, hope and the relaxing golden years of peace. At once an autobiography, a medical history and a testament to the beauty of memory, *Losing My Mind* is more than just a story of Alzheimer's, it is the captivating tale of one man's battle to stay connected with the world and his own life.

Invisible in Austin Javier Auyero.2015-09-01 Austin, Texas, is renowned as a high-tech, fast-growing city for the young and creative, a cool place to live, and the scene of internationally famous events such as SXSW and Formula 1. But as in many American cities, poverty and penury are booming along with wealth and material abundance in contemporary Austin. Rich and poor residents lead increasingly separate lives as growing socioeconomic inequality underscores residential, class, racial, and ethnic segregation. In *Invisible in Austin*, the award-winning sociologist Javier Auyero and a team of graduate students explore the lives of those working at the bottom of the social order: house cleaners, office-machine repairers, cab drivers, restaurant cooks and dishwashers, exotic dancers, musicians, and roofers, among others. Recounting their subjects' life stories with empathy and sociological insight, the authors show us how these lives are driven by a complex mix of individual and social forces. These poignant stories compel us to see how poor people who provide indispensable services for all city residents struggle daily with substandard housing, inadequate public services and schools, and environmental risks. Timely and essential reading, *Invisible in Austin* makes visible the growing gap between rich and poor that is reconfiguring the cityscape of one of America's most dynamic places, as low-wage workers are forced to the social and symbolic margins.

Medical Traditions Alain Touwaide.2021-12-31 Medical traditions encapsulate the knowledge of life, health, nutrition, diseases and their treatment patiently assembled by populations over a long period of time in the past, carefully handed down through generations, and subsequently recorded in writing and preserved in books now scattered in libraries across the world. Rarely the object of a specific study, they are approached here as a field in its own right. The present essay explores such key topics as the impact of tradition approach on medical historiography, the relation between written documents and practice, and the transmission of knowledge across time and cultures with its possible modifications and their processes and causes. Though based on a decade-long close scrutiny of the Greek medical tradition, it establishes parallels with other traditions, and invites not only to do comparative study, but also to apply to other traditions the approach proposed here. By laying down the foundations for a fresh analysis of ancient medical knowledge as a discipline, *Medical Traditions - Exploring the Field* will be a reference for any scholar interested in the medical record of the past, be it for the sake of history or for renewed applications in present day.

Adult Literacy Programs in Uganda Anthony Okech, Roy A. Carr-Hill. 2001-01-01 The policy of the World Bank has been to focus on universal primary education, rather than supporting adult literacy programmes. But slow progress in Sub-Saharan Africa has convinced the Bank that adult literacy, especially amongst women, is a key factor in promoting economic and social development. This study of programmes in Uganda shows that adult literacy programmes can be more effective than was previously thought; that government run programmes can be as effective as those run by non-governmental organisations and that there is a large, unsatisfied demand among Ugandan adults for more education.

Vulnerable Colleen M. Flood, Vanessa MacDonnell, Jane Philpott, Sophie Thériault, Sridhar Venkatapuram. 2020-07-14 The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions, government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will force us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French.
