Childhood in the Late Ottoman Empire and After .2015-10-27 This volume explores the variety of ways in which childhood was experienced, lived and remembered in the late Ottoman Empire and its successor states. The period of the late nineteenth and early twentieth centuries was a time of rapid change, and the history of childhood reflects the impact of new expectations, lived realities and national responsibilities on the youngest members of societies undergoing monumental change because of ideological, wartime and demographic shifts. Drawing on comparisons both within the Balkans, Turkey and the Arab lands and with Western Europe and beyond, the chapters investigate the many ways in which upheaval and change affected the youth. Particular attention is paid to changing conceptions of childhood, gender roles and newly dominant national imperatives. Contributors include: Elif Akşit, Laurence Brockliss, Nazan Çiçek, Alex Drace-Francis, Benjamin C. Fortna, Naoum Kaytchev, Duygu Köksal, Kathryn Libal, Nazan Maksudyan, Heidi Morrison, and Philipp Wirtz. This title, in its entirety, is available online in Open Access.

Beyond Order Jordan B. Peterson.2021-03-02 The inspirational sequel to 12 RULES FOR LIFE, which has sold over 5 million copies around the world - now in paperback In 12 Rules for Life, acclaimed public thinker and clinical psychologist Jordan B. Peterson offered an antidote to the chaos in our lives: eternal truths applied to modern anxieties. His insights have helped millions of readers and resonated powerfully around the world. Now in this

long-awaited sequel, Peterson goes further, showing that part of life's meaning comes from reaching out into the domain beyond what we know, and adapting to an ever-transforming world. While an excess of chaos threatens us with uncertainty, an excess of order leads to a lack of curiosity and creative vitality. Beyond Order therefore calls on us to balance the two fundamental principles of reality - order and chaos - and reveals the profound meaning that can be found on the path that divides them. In times of instability and suffering, Peterson reminds us that there are sources of strength on which we can all draw: insights borrowed from psychology, philosophy, and humanity's greatest myths and stories. Drawing on the hard-won truths of ancient wisdom, as well as deeply personal lessons from his own life and clinical practice, Peterson offers twelve new principles to guide readers towards a more courageous, truthful and meaningful life.

Cinema, Trance and Cybernetics Ute Holl.2017-03-15 We've all had the experience of watching a film and feeling like we've been in a trance. This book takes that experience seriously, explaining cinema as a cultural technique of trance, one that unconsciously transforms our perceptions. Ute Holl moves from anthropological and experimental cinema through nineteenth-century psychological laboratories, which she shows developed technique of testing, measuring, and classifying the mind that can be seen as a prehistory of cinema, one that allows us to see the links among cinema, anthropology, psychology, and cybernetics.

In His Milieu Amy Golahny, Mia M. Mochizuki, Lisa Vergara.2006 Gathered in honor of John Michael Montias (1928–2005), the foremost scholar on Johannes Vermeer and a pioneer in the study of the socioeconomic dimensions of art, the essays in *In His Milieu* are an essential contribution to the study of the social functions of making, collecting, displaying, and donating art. The nearly forty essays here by—all internationally recognized experts in the fields of art history and the economics of art—are especially revealing about the Renaissance and Baroque eras and present new material on such artists as Rembrandt, Van Eyck, Rubens, and da Vinci.

The Cold War Konrad H. Jarausch, Christian Ostermann, Andreas Etges.2017-02-06 The traces of the Cold War are still visible in many places all around the world. It is the topic of exhibits and new museums, of memorial days and historic sites, of documentaries and movies, of arts and culture. There are historical and political controversies, both nationally and internationally, about how the history of the Cold War should be told and taught, how it should be represented and remembered. While much has been written about the political history of the Cold War, the analysis of its memory and representation is just beginning. Bringing together a wide range of scholars, this volume describes and analyzes the cultural history and representation of the Cold War from an international perspective. That innovative approach focuses on master narratives of the Cold War, places of memory, public and private memorialization, popular culture, and schoolbooks. Due to its unique status as a center of Cold War confrontation and competition, Cold War memory in Berlin receives a special emphasis. With the friendly support of the Wilson Center.

Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year

after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Hypertext Semiotics in the Commercialized Internet Moritz Neumüller.2003-04 Doctoral Thesis / Dissertation from the year 2001 in the subject Computer Science - Internet, New Technologies, grade: 1,0, Vienna University of Economics and Business (Marketing, Informationsverarbeitung und Informationswirtschaft), language: English, abstract: Inhaltsangabe: Abstract: Building on approaches that have succeeded in applying semiotic principles and methodology to computer science, such as computer semiotics, computational semiotics, and semiotic interface engineering, this dissertation establishes a systematic account for those researchers who are ready to look at hypertext from a semiotic point of view. Rather than a new hypertext model, this work presents the prolegomena of a theory of hypertext semiotics, interlacing the existing models with the findings of semiotic research, on all levels of the textual, aural, visual, tactile and olfactory channels. A short history of hypertext, from its prehistory to today's state of the art systems and the current developments in the commercialized World Wide Web creates the context for this approach which should be seen as a fortification of the connection between the media semiotic approach and computer semiotics. While computer semioticians claim that the computer is a semiotic machine and Artificial Intelligence scientists underline the importance of semiotics for the construction of the next hypertext generation, this paper makes use of a much broader methodological basis. These findings are placed in the context of the commercialization of the Internet. Besides identifying the main challenges for eCommerce from the viewpoint of hypertext semiotics, the author concentrates on information goods and the current limitations for a new economy, such as restrictive intellectual property and copyright laws. A semiotic analysis of iMarketing techniques and the Toywar complete the dissertation. Zusammenfassung: Diese Dissertation legt einen systematischen Ansatz für all jene Forscher dar, die bereit sind, Hypertext

Society of the Query Reader Miriam Rasch, René König.2014-04-22 Looking up something online is one of the most common applications of the web. Whether with a laptop or smartphone, we search the web from wherever we are, at any given moment. 'Googling' has become so entwined in our daily routines that we rarely question it. However, search engines such as Google or Bing determine what part of the web we get to see, shaping our knowledge and perceptions of the world. But there is a world beyond Google - geographically, culturally, and technologically. The Society of the Query network was founded in 2009 to delve into the larger societal and cultural consequences that are triggered by search technology. In this Reader, which is published after two conferences held in Amsterdam in 2009 and 2013, twenty authors - new media scholars, historians, computer scientists, and artists - try to answer a number of pressing questions about online search.

Knowledge and Power George Gilder.2013-06-10 Ronald Reagan's most-quoted living author—George Gilder—is back with an all-new paradigm-shifting theory of capitalism that will upturn conventional wisdom, just when our economy desperately needs a new direction. America's struggling economy needs a better philosophy than the college student's lament: I can't be out of money, I still have checks in my checkbook! We've tried a government spending spree, and we've learned it doesn't work. Now is the time to rededicate our country to the pursuit of free market capitalism, before we're buried under a mound of debt and unfunded entitlements. But how do we navigate between government spending that's too big to sustain and financial institutions that are too big to fail? In *Knowledge and Power*, George Gilder proposes a bold new theory on how capitalism produces wealth and how our economy can regain its vitality and its growth. Gilder breaks away from the supply-side model of economics to present a new economic paradigm: the epic conflict between the knowledge of entrepreneurs on one side, and the blunt power of government on the other. The knowledge of entrepreneurs, and their freedom to share and use that knowledge, are the sparks that light up the economy and set its gears in

motion. The power of government to regulate, stifle, manipulate, subsidize or suppress knowledge and ideas is the inertia that slows those gears down, or keeps them from turning at all. One of the twentieth century's defining economic minds has returned with a new philosophy to carry us into the twenty-first. Knowledge and Power is a must-read for fiscal conservatives, business owners, CEOs, investors, and anyone interested in propelling America's economy to future success.

Organizing for Digital Innovation Alessandra Lazazzara, Raoul C.D. Nacamulli, Cecilia Rossignoli, Stefano Za. 2018-06-29 This book presents a collection of research papers exploring the human side of digital innovation management, with a specific focus on what people say and share on social media, how they respond to the introduction of specific IT tools, and how digital innovations are impacting sustainability and inclusion. Given the plurality of views that it offers, the book is particularly relevant for digital technology users, companies, scientists and governments. The overall spread of digital and technological advances is enhanced or hampered by people's skills, behaviors and attitudes. The challenge of balancing the digital dimension with humans situated in specific contexts, relations and networks has sparked a growing interest in how people use and respond to digital innovations. The content of the book is based on a selection of the best papers – original double-blind peer-reviewed contributions – presented at the annual conference of the Italian chapter of the AIS, which was held in Milan, Italy, in October 2017.

Maps of Meaning Jordan B. Peterson. 2002-09-11 Why have people from different cultures and eras formulated myths and stories with similar structures? What does this similarity tell us about the mind, morality, and structure of the world itself? From the author of *12 Rules for Life: An Antidote to Chaos* comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals, myths, and religious stories have long narrated. A cutting-edge work that brings together neuropsychology, cognitive science, and Freudian and Jungian approaches to mythology and narrative, *Maps of Meaning* presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind.

How the Essay Film Thinks Laura Rascaroli. 2017-05-05 This book offers a novel understanding of the epistemological strategies that are mobilized by the essay film, and of where and how such strategies operate. Against the backdrop of Adorno's discussion of the essay form's anachronistic, anti-systematic and disjunctive mode of resistance, and capitalizing on the centrality of the interstice in Deleuze's understanding of the cinema as image of thought, the book discusses the essay film as future philosophy-as a contrarian, political cinema whose argumentation engages with us in a space beyond the verbal. A diverse range of case studies discloses how the essay film can be a medium of thought on the basis of its dialectic use of audiovisual interstitiality. The book shows how the essay film's disjunctive method comes to be realized at the level of medium, montage, genre, temporality, sound, narration, and framing—all of these emerging as interstitial spaces of intelligence that illustrate how essayistic meaning can be sustained, often in contexts of political, historical or cultural extremity. The essayistic urge is not to be identified with a fixed generic form, but is rather situated within processes of filmic thinking that thrive in gaps.

The Cold War in the Classroom Barbara Christophe, Peter Gautschi, Robert Thorp. 2019-10-23 This book is open access under a CC BY 4.0 license. This book explores how the socially disputed period of the Cold War is remembered in today's history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the

impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is 'just history'. The contributions to this book unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past with a reflexive and disciplined approach.

When Corporatism Leads to Corporate Governance Failure Isabelle Schluep.2018 Corporatism is often seen as the way Swiss stakeholders in business and politics are handling industrial challenges in a reasonable and flexible way. The following paper argues, however, that the emergence of corporatist structures in the Swiss watch industry has often encouraged rent-seeking and collusion at the expense of innovation and competition. This legacy makes it currently difficult for the industry to effectively respond to new technological challenges and changing societal preferences in the global watch business. The book draws on archival sources, accessible since 2015, that have also been extensively discussed in the Swiss print media in early 2016. They provide increasing evidence of corporate governance failure in the 1983 merger of SSIH (Société suisse pour l'industrie horlogère) and ASUAG (Allgemeine Schweizerische Uhrenindustrie AG) that led to today's Swatch Group. The merger, induced by the Swiss banks, was portrayed as a necessary step to save the two allegedly bankrupt watch companies. Yet, the archival sources show that ASUAG had already been successfully restructured and ready to conquer global markets with its new product, the Swatch.

Data and Goliath: The Hidden Battles to Collect Your Data and Control Your World Bruce Schneier.2015-03-02 "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky Your cell phone provider tracks your location and knows who's with you. Your online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.

Reputation Capital Joachim Klewes,Robert Wreschniok.2009-10-13 • ... release reputation bearers from the burden of being constantly monitored and reduce the likelihood of government or public supervision and control. • ... strengthen client trust, ease the recruitment and retention of capable employees and improve access to capital markets or attract investors. • ... legitimate positions of power and build up reserves of trust which - lowed companies and politicians - but also researchers and journalists - to put their issues on the public agenda, present them credibly and mould them in their own interests. But a fear of loss is not the only reason for the steadily increasing - portance of reputation in corporate management today (or

more especially, in the minds of top management). Rather, the main reason is that corporate reputation has shifted from being an unquantifiable 'soft' factor to a measurable indicator in the sense of management control. And it is a variable that is obviously relevant to a company's performance: recent studies by the European Centre for Reputation Studies and the Ludwig-Maximilians-Universität of Munich compared the stock market performance of a portfolio of the top 25% of reputation leaders (based on regular reputation measurements in the wider public) with that of the German DAX 30 stock market index. The results show that a portfolio consisting of reputation leaders 1 outperformed the stock market index by up to 45% - and with less risk. Fig. 1. Performance of 'reputation portfolios' vs.

Linguistic Construction of Ethnic Borders Peter Rosenberg, Konstanze Jungbluth, Dagna Zinkhahn Rhobodes. 2015 This volume focuses on the linguistic constructs involved in ethnic borders. Ethnic borders have proven themselves to be surprisingly long-lived: in nearly all European countries and beyond, border demarcation, exclusion of foreigners, and minority conflicts are some of the most persistent challenges for nations and societies. Which linguistic factors play a role in the formation of these borders, especially those drawn along ethnic lines? Which linguistic constructs contribute to the negotiation, establishment and maintenance of ethnic groups and identities? Under which conditions can processes of linguistic convergence, hybrids, or transcultural identities be observed?

Cybermohalla Hub Nikolaus Hirsch, Shveta Sarda. 2012 The Cybermohalla project takes on the meaning of the Hindi word mohalla (neighborhood) in its sense of alleys and corners, relatedness and concreteness, as a means for talking about one's place in the city. Initiated by the Delhi-based research institute Sarai/CSDS and Ankur, Nikolaus Hirsch and Michel Müller developed a project that involves approximately seventy young practitioners, the Cybermohalla Ensemble, who engage with their urban contexts through various media. Cybermohalla Hub, a hybrid of studio, school, archive, community center, library, and gallery is a structure that moves between Delhi and diverse art contexts including Manifesta 7 and, most recently, the Louisiana Museum of Modern Art in Denmark. The Cybermohalla experiment has been engaged in rethinking urban life, and reimagining and reanimating the infrastructure of cultural and intellectual life in contemporary cities. The book not only documents the architecture of the project, which functions as an attempt to build knowledge, but also publishes insights that have emerged from the project as a whole. Contributors Can Altay, Cybermohalla Ensemble, Rana Dasgupta, Hu Fang, Naeem Mohaiemen, Hans Ulrich Obrist, Jacques Rancière, Raqs Media Collective, Superflex, et al.

This volume is an exhaustive collection that includes her novels, essays, reviews, films and interviews. Each entry is accompanied by an annotated bibliography.

Musicology and Dance Davinia Caddy, Maribeth Clark. 2020-08-27 Long treated as peripheral to music history, dance has become prominent within musicological research, as a prime and popular subject for an increasing number of books, articles, conference papers and special symposiums. Despite this growing interest, there remains no thorough-going critical examination of the ways in which musicologists might engage with dance, thinking not only about specific repertoires or genres, but about fundamental commonalities between the two, including embodiment, agency, subjectivity and consciousness. This volume begins to fill this gap. Ten chapters illustrate a range of conceptual, historical and interpretive approaches that advance the interdisciplinary study of music and dance. This methodological eclecticism is a defining feature of the volume, integrating insights from critical theory, film and cultural studies, the visual arts, phenomenology, cultural anthropology and literary criticism into the study of music and dance.

The Saints of Salvation Peter F. Hamilton.2020-11-17 With refreshing determination and hopeful grit, humanity activates a bold endgame against an alien invasion in the finale of a series heralded as “a modern classic” (Stephen Baxter) from “one of the finest writers the genre has produced” (Gareth L. Powell). Humanity is struggling to hold out against a hostile takeover by an alien race that claims to be on a religious mission to bring all sentient life to its God at the End of Time. But while billions of cocooned humans fill the holds of the Olyix’s deadly arkships, humankind is playing an even longer game than the aliens may have anticipated. From an ultra-secret spy mission to one of the grandest battles ever seen, no strategy is off the table. Will a plan millennia in the making finally be enough to defeat this seemingly unstoppable enemy? And what secrets are the Olyix truly hiding in their most zealously protected stronghold? With his trademark optimism about humanity’s tenacity and capacity for greatness, Peter F. Hamilton wraps up this brilliant saga with a bang—and reminds us why freedom of choice is the most important freedom there is.

Novel Translations Bethany Wiggin.2011-06-15 Many early novels were cosmopolitan books, read from London to Leipzig and beyond, available in nearly simultaneous translations into French, English, German, and other European languages. In *Novel Translations*, Bethany Wiggin charts just one of the paths by which newness—in its avatars as fashion, novelties, and the novel—entered the European world in the decades around 1700. As readers across Europe snapped up novels, they domesticated the genre. Across borders, the novel lent readers everywhere a suggestion of sophistication, a familiarity with circumstances beyond their local ken. Into the eighteenth century, the modern German novel was not German at all; rather, it was French, as suggested by Germans' usage of the French word *Roman* to describe a wide variety of genres: pastoral romances, war and travel chronicles, heroic narratives, and courtly fictions. Carried in large part on the coattails of the Huguenot diaspora, these romans, nouvelles, amours secrets, histoires galantes, and histories scandaleuses shaped German literary culture to a previously unrecognized extent. Wiggin contends that this French chapter in the German novel's history began to draw to a close only in the 1720s, more than sixty years after the word first migrated into German. Only gradually did the *Roman* go native; it remained laden with the baggage from its French origins even into the nineteenth century.

Fictions of Home Martin Mühlheim.2018-04-23 This study aims to counter right-wing discourses of belonging. It discusses key theoretical concepts for the study of home, focusing in particular on Marxist, feminist, postcolonial, and psychoanalytic contributions. The book also maintains that postmodern celebrations of nomadism and exile tend to be incapable of providing an alternative to conservative, xenophobic appropriations of home. In detailed readings of one film and six novels, a view is developed according to which home, as a spatio-temporal imaginary, is rooted in our species being, and as such constitutes the inevitable starting point for any progressive politics.

Violence and Trolling on Social Media Sara Polak,Daniel Trottier.2020-10-30 'Trolls for Trump', virtual rape, fake news - social media discourse, including forms of virtual and real violence, has become a formidable, yet elusive, political force. What characterizes online vitriol? How do we understand the narratives generated, and also address their real-world - even life-and-death - impact? How can hatred, bullying, and dehumanization on social media platforms be addressed and countered in a post-truth world? This book unpicks discourses, metaphors, media dynamics, and framing on social media, to begin to answer these questions. Written for and by cultural and media studies scholars, journalists, political philosophers, digital communication professionals, activists and advocates, this book makes the connections between theoretical approaches from cultural and media studies and practical challenges and experiences 'from the field', providing insight into a rough media landscape.

Absolute Value Itamar Simonson,Emanuel Rosen.2014-02-04 Going against conventional marketing wisdom, Absolute Value reveals what really influences customers today and offers a new framework—the Influence Mix, a totally new way of thinking about consumer decision making and marketing, and about developing more effective business strategies. How people buy things has changed profoundly—yet the fundamental thinking about consumer decision-making and marketing has not. Most marketers still believe that they can shape consumers' perception and drive their behavior. In this provocative book, Stanford professor Itamar Simonson and bestselling author Emanuel Rosen show why current mantras are losing

their relevance. When consumers base their decisions on reviews from other users, easily accessed expert opinions, price comparison apps, and other emerging technologies, everything changes. Absolute Value answers the pressing questions of how to influence customers in this new age. Simonson and Rosen point out the old-school marketing concepts that need to change and explain how a company should design its communication strategy, market research program, and segmentation strategy in the new environment. Filled with deep analysis, case studies, and cutting-edge research, this forward-looking book provides a totally new way of thinking about marketing.

Globalistics and Globalization Studies: Aspects & Dimensions of Global Views Arkadi D. Ursul,Endre Kiss,Alexander N. Chumakov,Olga G. Leonova,Tu Weiming,Peter G. Kirchsclaeger,Anthony Howell,Hae Kim,Jim Sheffield.2014-04-30 Nowadays globalization processes have become all-embracing. But at the same time, despite the ever-increasing flow of publications on globalization, our understanding and knowledge of it still leaves much to be desired. Especially it concerns the global processes in general, of which globalization is a part. We also need to systematize our ideas about globalization and Global Studies to somehow fit the realities. In particular, this concerns the education process, because the current state of education will determine the way people will perceive reality in the forthcoming decades. This yearbook aims at contributing to the solution of these important tasks. It is the third in the series of yearbooks titled Globalistics and Globalization Studies. This year it has the following subtitle: Aspects & Dimensions of Global Views. Its authors consider globalization and Global Studies in different dimensions and aspects: philosophical, methodological, and pedagogical, in terms of various processes, problems and perspectives. Of course, to some extent this means that this yearbook presents rather diverse materials. But globalization itself is very diverse. And its comprehension may proceed in the framework of different theoretical approaches and points of view. In the present yearbook one can find perceptions of globalization and Global Studies by a number of scholars from different countries of the world and learn rather peculiar visions of globalization by the Russian scientists and educators. The yearbook will be interesting to a wide range of researchers, teachers, students and all those who pay attention to global issues.
