The Dean and Canons' Houses of St George's Chapel, Windsor John Crook.2022-12-31 The College of St George at Windsor Castle was founded by Edward III in 1348 to support the newly created Order of the Garter, and to this day fulfills the same primary purpose. The domestic buildings provided for the Warden, Canons and Priest-Vicars – now the Deanery and Canons Cloister – are an astonishing survival: despite enlargement and alteration over the centuries, a significant amount of the mid-fourteenth-century fabric survives, though often hidden from view. A recent program of refurbishment and conservation revealed much hitherto unknown evidence for the way the buildings were constructed, their fittings and decoration and their subsequent evolution. The author maintained a continuous 'watching brief' throughout the refurbishment works, the results of which are published here for the first time. The archaeological evidence is supplemented by the excellent survival of documentation, both for the initial construction of the buildings and their subsequent development: we know the precise date of each stage of construction, the cost and even the names of the workmen involved. The post-medieval history of the buildings is also highly significant, and for this period we have the benefit of knowing more about the deans and canons who influenced the ways their dwellings developed, and of a continued wealth of documentary evidence.

Medicolegal Issues in Obstetrics and Gynaecology Swati Jha, Emma Ferriman.2018-06-26 This book highlights minimum standards relating to the management of different conditions in the

practice of Obstetrics and Gynaecology. The editors explore clinical governance issues, common causes of as well as ways to avoid litigation. The UK is experiencing a dramatic increase in medico-legal claims. The 4 main reasons for litigation are: accountability, the need for an explanation, concern with standards of care and compensation. However the decision to take legal action is determined not only by the original injury, but failure to provide information, an explanation and an apology. Insensitive handling of an injury and poor communication after the original incident increases the risk of litigation and erodes the patient-doctor relationship. Doctors almost never deliberately cause harm to patients, however increasingly claims are being defended successfully. This book is invaluable to clinicians and lawyers alike and raises awareness of how to avoid facing clinical negligence claims in our day to day practice.

Charles Robert Cockerell, Architect in Time Dr Anne Bordeleau.2014-09-28 Speed, acceleration and rapid change characterize our world, and as we design and construct buildings that are to last at least a few decades and sometimes even centuries, how can architecture continue to act as an important cultural signifier? Focusing on how an important nineteenth-century architect addressed the already shifting relation between architecture, time and history, this book offers insights on issues still relevant today-the struggle between imitation and innovation, the definition (or rejection) of aesthetic experience, the grounds of architectural judgment (who decides and how), or fundamentally, how to act (i.e. build) when there is no longer a single grand narrative but a plurality of possible histories. Six drawings provide the foundation of an itinerary through Charles Robert Cockerell's conception of architecture, and into the depths of drawings and buildings. Born in England in 1788, Cockerell sketched as a Grand Tourist, he charted architectural history as Royal Academy Professor, he drew to build, to exhibit, to understand the past and to learn from it, publishing his last work in 1860, three years before his death. Under our scrutiny, his drawings become thresholds into the nineteenth century, windows into the architect's conception of architecture and time, complex documents of past and projected constructions, great examples that reveal a kinetic approach to ornamentation, and the depth of architectural representation.

St George's Chapel, Windsor, in the Fourteenth Century Nigel Saul.2005 A definitive look at the early history of St George's Chapel, one of the most important medieval buildings in England.

Developed and improved by Edward III, the Chapel became the spiritual home of his newly-instigated Order of the Garter and, in the process, a new Camelot for the English monarchy. St George's Chapel, Windsor, is one of the most famous ecclesiastical foundations in Britain.

Established in 1348, its origins are closely bound up with those of the Order of the Garter, which was founded by Edward III at the sametime. The collection of essays in this volume sets Windsor in its context, at the forefront of the political and cultural developments of mid-fourteenth-century England. They examine the early history of the Chapel, its ties with Edward III's chivalric ambitions, the community of canons who served it, and its place in the institutional development of the English Church. Major themes are the role of the Chapel in the early history of the Order and its influence on other collegiate foundations of the late middle ages; and much attention is devoted to the mighty building campaign at the Castle started by Edward III which made Windsor the grandest royal residence of its day.

The Patristic Witness of Georges Florovsky Georges Florovsky.2019-09-19 Georges Florovsky (1893-1979) was one of the most prominent Orthodox theologians and ecumenists of the twentieth century. His call for a return to patristic writings as a source of modern theological reflection had a powerful impact not only on Orthodox theology in the second half of the twentieth century, but on Christian theology in general. Florovsky was also a major Orthodox voice in the ecumenical movement for four decades and he is one of the founders of the World Council of Churches. This book is a collection of major theological writings by George Florovsky. It includes representative and widely influential but now largely inaccessible texts, many newly translated for this book, divided into four thematic sections: Creation, Incarnation and Redemption, The Nature of Theology, Ecclesiology and Ecumenism, and Scripture, Worship and Eschatology. A foreword by Metropolitan Kallistos Ware presents the theological vision of Georges Florovsky and discusses the continuing relevance of his work both for Orthodox theology and for modern theology in general. The introduction by the Editors provides a theological and historical overview of Florovsky theology in the context of his biography. The book includes explanatory notes, translation of patristic citations and an index.
