The Modern History of Iraq Phebe Marr.2018-05-15 The Modern History of Iraq is a remarkably readable account of contemporary Iraq, placing in historical perspective the crises and upheavals that continue to afflict the country. This text weaves together several important themes, including the search for a national identity, the struggle to achieve social and economic development, the changes in political dynamics, and the impact of foreign interventions, to provide readers with a holistic understanding of modern Iraq. Revised and updated throughout, the fourth edition features more discussion of cultural identity and media and society. In addition, this edition includes two new chapters on the events and shifts in the country of the early twenty-first century-the US intervention and withdrawal, the stabilization and subsequent unraveling of the Maliki government, the effects of the Arab uprisings, and the rise of ISIS-and their political, economic, and social consequences. Written by noted Iraq scholar Phebe Marr with new co-author Ibrahim al-Marashi, this text is essential reading for readers who seek to understand modern Iraq in the context of historical perspective.

Social Media, Parties, and Political Inequalities Kristof Jacobs,Niels Spierings.2016-01-05 This book examines how social media have transformed politics in established democracies. Specifically, the authors examine the influence of the unique qualities of social media on the power balance between and within parties. They present a general theory as well as an in-depth case study of the Netherlands and compare it to the US and European democracies. The authors show how and why social media's introduction leads to equalization for some and normalization for others. Additional to national politics, Jacobs and Spierings investigate often-overlooked topics such as local and European politics and the impact on women and ethnic minorities.

East-West Asia Relations in the 21st Century Rotem Kowner,Yoram Evron,P.R. Kumaraswamy.2023-10-02 This book examines the changing relations between the Asian part of the Middle East and the rest of the continent during the 21st century. Written by leading experts, this ground-breaking volume utilizes a comprehensive and multi-dimensional perspective to offer a novel and unique outlook on the evolving shape of East-West Asia relations and their global impact. Critically, it demonstrates that the intensification and diversification of East-West Asia relations since the 1990s have altered them from a set of separated bilateral ties into complex interregional relations. The book presents a nuanced, comparative look at Asian countries' responses to global developments, and China's rise in particular, and offers a new perspective on the very concept of Asia itself. It will be of interest to scholars, students, and practitioners working in the fields of International Relations, Asian Studies, and Middle Eastern Studies.

**Triple-Axis** Ariane Tabatabai,Dina Esfandiary.2018-07-30 The most significant challenge to the post-Cold War international order is the growing power of ambitious states opposed to the West. Iran, Russia and China each view the global structure through the prism of historical experience. Rejecting the universality of Western liberal values, these states and their governments each consider the relative decline of Western economic hegemony as an opportunity. Yet cooperation between them remains fragmentary. The end of Western sanctions and the Iranian nuclear deal; the Syrian conflict; new institutions in Central and East Asia: in all these areas and beyond, the potential for unity or divergence is striking. In this new and comprehensive study, Ariane Tabatabai and Dina Esfandiary address the substance of this `triple axis' in the realms of energy, trade, and military security. In particular they scrutinise Iran-Russia and the often overlooked field of Iran-China relations. Their argument - that interactions between the three will shape the world stage for decades to come - will be of interest to anyone looking to understand the contemporary international security puzzle.

**Building Sustainability in East Asia** Vincent S. Cheng,Jimmy C. Tong.2017-03-22 Building Sustainability in East Asia: Policy, Design and People illustrates the holistic approaches and individual strategies to building sustainability that have been implemented in construction projects in Asia. Top-down and bottom-up approaches (from formulating policy to constructing individual buildings) are effective in terms of the sustainable development of cities, and this book covers both, illustrated with a range of case study developments.

**Vital Signs** Institute of Medicine,Committee on Core Metrics for Better Health at Lower Cost.2015-08-26 Thousands of measures are in use today to assess health and health care in the United States. Although many of these measures provide useful information, their usefulness in either gauging or guiding performance improvement in health and health care is seriously limited by their sheer number, as well as their lack of consistency, compatibility, reliability, focus, and organization. To achieve better health at lower cost, all stakeholders - including health professionals, payers, policy makers, and members of the public - must be alert to what matters most. What are the core measures that will yield the clearest understanding and focus on better health and well-being for Americans? Vital Signs explores the most important issues - healthier people, better quality care, affordable care, and engaged individuals and communities - and specifies a streamlined set of 15 core measures. These measures, if standardized and applied at national, state, local, and institutional levels across the country, will transform the effectiveness, efficiency, and burden of health measurement and help accelerate focus and progress on our highest health priorities. Vital Signs also describes the leadership and activities necessary to refine, apply, maintain, and revise the measures over time, as well as how they can improve the focus and utility of measures outside the core set. If health care is to become more effective and more efficient, sharper attention is required on the elements most important to health and health care. Vital Signs lays the groundwork for the adoption of core measures that, if systematically applied, will yield better health at a lower cost for all Americans.

**Survey of Economic and Social Developments in the Arab Region 2015-2016** United Nations Economic and Social Commission for Western Asia.2016-11-23 The economic and political uncertainty which has characterized the Arab region in the wake of the 2011 transitions and upheaval continues to restrain the region's prospects for growth, job creation and stability. Economic expansion remains stalled, with persistently low global oil prices adding a further burden to the regional economy and constraining the growth and fiscal balances of those countries that had been top-performers due to energy exports. While some progress on social indicators such as gender representativeness can be noted, countries in and affected by political transition and conflict have regressed on a plethora of socioeconomic indicators. These trends can be noted for the past five years, and with this in mind, the 2015-16 Survey will utilize recent data in order to take stock of the impact of instability and conflict, and address the foregone growth and output and destructive effects of this period. It also draws on recent research of ESCWA regarding migration, social developments, the impact of conflict, women's empowerment, and specific country-level analysis.

**South Africa and the Case for Renegotiating the Peace** Pierre du Toit,Charl Swart,Salom, Teuteberg.2016-11-11 South Africa is awash with policy failures, and policy confusion. We argue firstly, that our current discord over policy details has its origin in the (celebrated) negotiated transition. We hold that the vote count of an 85% majority in the Constituent Assembly in 1996 obscured the reality that the Constitution meant different things to different negotiators. The result was that South Africa, from the very start of the democratic era, lacked a national consensus on how to go about consolidating democracy. We keep on failing to build

a proper roof over our democracy because the constitutional foundations are weak.ÿ

**Low-carbon, Sustainable Future in East Asia** Soo-Cheol Lee, Hector Pollitt, Seung-Joon Park. 2015-08-27 East Asia is a key region in the global economy, including both the second and third largest global economies already and, led by China, continuing to expand at a rapid rate. This economic growth has led to unprecedented gains in prosperity in the region but it has also led to increasing environmental pressures and energy issues. This book assesses ways in which East Asia can continue or even increase existing rates of economic growth while at the same time reducing greenhouse gas emissions and other environmental degradation. Using advanced modelling approaches, future scenarios for four East Asian countries are assessed in detail, including analysis of particular challenges in each country (e.g. coal power in China, nuclear power in Japan). Prospects for each country's energy system are assessed in detail and the potential effects of various types of Environmental Tax Reform in the four countries are also considered carefully. The final section of the book explores the interaction between trade liberalization, a key driver of growth, and emission levels in the East Asia region.

**Reforming China's Healthcare System** China Development Research Foundation. 2017-10-16 Although China's new healthcare reform, launched in 2009, has achieved remarkable results in improving China's medical and healthcare system, it is recognised that there is still room for further improvement. This is especially important as China's population ages, the prevalence of chronic diseases increases and environment-related health risks worsen. This book reports on a major international research project which examined health trends, modes of health promotion, health finance systems, medical and healthcare innovations and environment-related health risks in China. For each of these key areas, the book considers the current situation in China and likely future trends, explores best practice from a wide range of foreign countries and puts forward proposals for improvements. Overall, the book provides a major assessment of China's medical and healthcare system and how it should be reformed.

**Routledge Handbook of Contemporary Taiwan** Gunter Schubert. 2016-05-20 The Routledge Handbook of Contemporary Taiwan offers a comprehensive overview of both contemporary Taiwan and the Taiwan studies field. Each contribution summarises the major findings in the field and highlights long-term trends, recent observations and possible future developments in Taiwan. Written by an international team of experts, the chapters included in the volume form an accessible and fascinating insight into contemporary Taiwan. Up-to-date, interdisciplinary, and academically rigorous, the Handbook will be of interest to students, academics, policymakers and others in search of reliable information on Taiwanese politics, economics, culture and society.

**The Lonely Century** Noreena Hertz. 2021-02-02 A bold, hopeful, and thought-provoking account by "one of the world's leading thinkers" (The Observer) of how we built a lonely world, how the pandemic accelerated the problem, and what we must do to come together again "A compelling vision for how we can bridge our many divides at this time of great change and disruption."—Arianna Huffington, founder and CEO of Thrive Global "An important new book."—The Economist NEXT BIG IDEA CLUB NOMINEE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY WIRED (UK) AND THE DAILY TELEGRAPH Loneliness has become the defining condition of the twenty-first century. It is damaging our health, our wealth, and our happiness and even threatening our democracy. Never has it been more pervasive or more widespread, but never has there been more that we can do about it. Even before a global pandemic introduced us to terms like "social distancing," the fabric of community was unraveling and our personal relationships were under threat. And technology isn't the sole culprit. Equally to blame are the dismantling of civic institutions, the radical reorganization of the workplace, the mass migration to cities, and decades of neoliberal policies that have placed self-interest above the collective good. This is not merely a mental health crisis. Loneliness increases our risk of heart disease, cancer, and dementia. Statistically, it's as bad for our health as smoking fifteen cigarettes a day. It's also an economic crisis, costing us billions annually. And it's a political crisis, as feelings of marginalization fuel divisiveness and extremism around the world. But it's also a crisis we have the power to solve. Combining a decade of research with firsthand reporting, Noreena Hertz takes us from a "how to read a face" class at an Ivy League university to isolated remote workers in London during lockdown, from "renting a friend" in Manhattan to nursing home residents knitting bonnets for their robot caregivers in Japan. Offering bold solutions ranging from compassionate AI to innovative models for urban living to new ways of reinvigorating our neighborhoods and reconciling our differences, The Lonely Century offers a hopeful and empowering vision for how to heal our fractured communities and restore connection in our lives.

**Geographies of Mobility** Mei-Po Kwan, Tim Schwanen. 2018-10-11 This book seeks to bring together different philosophical, theoretical, and methodological approaches to the study of human mobility within the discipline of geography. With five thematic sections – conceptualizing and analyzing mobility, inequalities of mobility, politics of mobility, decentering mobility, and qualifying abstraction – and 27 substantive chapters by leading researchers in the field, it provides a comprehensive overview of the latest thinking about human mobility and related issues. The contributors discuss mobility issues as diverse as everyday mobilities of young people, migrants and refugees, and sex workers; the relationships between citizenship and mobility; and the potential and pitfalls of big data for understanding mobility. This, coupled with a broad international focus, means that Geographies of Mobility will not only encourage and enrich dialogue on a theme that is of major importance to varied geographic research communities, but will also be of great interest to students and researchers across the wider social sciences. This book was originally published as a special issue of Annals of the American Association of Geographers.

**Science, Technology, Innovation, and Development in the Arab Countries** Omar Bizri. 2018-01-02 Science, Technology, Innovation, and Economic Growth in Arab Countries explores fresh approaches to STI policy formulation and implementation in the region, with applications to developing countries elsewhere. Developing useful contexts for studying Arab policies about science, technology, and innovation requires trustworthy data and judgment. Omar Bizri brings together both in this book. Data from sources such as the World Bank, UNESCO, the International Telecommunication Union, Nature, Science and recent surveys and policy formulation initiatives anchor this study among national initiatives that focus on essential needs, including safe water and food production, renewable energy utilization, and job and enterprise creation. For those eager to understand the challenges of STI capacity building, this book explores the many connections between technological change and economic growth. Presents and analyzes data about past, current and proposed efforts aimed at STI capacity building in Arab countries Emphasizes demand-driven policies for promoting rapid infrastructure and endogenous STI capacity building, as well as job creation Explores ways to enhance STI capacity building efforts through community-based and national initiatives Includes data from sources such as the World Bank, UNESCO, the International Telecommunication Union, Nature, Science and recent surveys

**Beyond Technonationalism** Kathryn C. Iбата-Arens. 2019-04-16 The biomedical industry, which includes biopharmaceuticals, genomics and stem cell therapies, and medical devices, is among the fastest growing worldwide. While it has been an economic development target of many national governments, Asia is currently on track to reach the epicenter of this growth. What accounts for the rapid and sustained economic growth of biomedical in Asia? To answer this question, Kathryn Iбата-Arens integrates global and national data with original fieldwork to present a conceptual framework that considers how national governments have managed key factors, like innovative capacity, government policy, and firm-level strategies. Taking China, India, Japan, and Singapore in turn, she compares each country's underlying competitive advantages. What emerges is an argument that countries pursuing networked technonationalism (NTN) effectively upgrade their capacity for innovation and encourage entrepreneurial activity in targeted industries. In contrast to countries that engage in classic technonationalism—like Japan's developmental state approach—networked technonationalists are global minded to outside markets, while remaining nationalistic within the domestic economy. By bringing together aggregate data at the global and national level with original fieldwork and drawing on rich cases, Iбата-Arens telegraphs implications for innovation policy and entrepreneurship strategy

in Asia—and beyond.

**Money By Fiat** Dean Bonkovich.2016-04-23 Using the British, U.S. and New Zealand monetary systems, and the Bank for International Settlements among others, to describe the operations of every central bank throughout the world, Money by Fiat explains the dangers of fiat money not only in terms of these four entities, but also in terms of every fiat currency that has ever existed. Beginning from 1694 and the incorporation of the Bank of England, and then moving into the modern age, Money By Fiat delves into the world of the biggest theft in human history.

**ECAI 2016** G.A. Kaminka,M. Fox,P. Bouquet.2016-08-24 Artificial Intelligence continues to be one of the most exciting and fast-developing fields of computer science. This book presents the 177 long papers and 123 short papers accepted for ECAI 2016, the latest edition of the biennial European Conference on Artificial Intelligence, Europe's premier venue for presenting scientific results in AI. The conference was held in The Hague, the Netherlands, from August 29 to September 2, 2016. ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems (PAIS) 2016, and the Starting AI Researcher Symposium (STAIRS). The papers from PAIS are included in this volume; the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications (FAIA) series. Organized by the European Association for Artificial Intelligence (EurAI) and the Benelux Association for Artificial Intelligence (BNVKI), the ECAI conference provides an opportunity for researchers to present and hear about the very best research in contemporary AI. This proceedings will be of interest to all those seeking an overview of the very latest innovations and developments in this field.

*Challenged Hegemony* Steve A. Yetiv,Katerina Oskarsson.2018-01-23 Few issues in international affairs and energy security animate thinkers more than the classic topic of hegemony, and the case of the Persian Gulf presents particularly fertile ground for considering this concept. Since the 1970s, the region has undergone tumultuous changes, with dramatic shifts in the diplomatic, military, and economic roles of the United States, China, and Russia. In this book, Steve A. Yetiv and Katerina Oskarsson offer a panoramic study of hegemony and foreign powers in the Persian Gulf, offering the most comprehensive, data-driven portrait to date of their evolving relations. The authors argue that the United States has become hegemonic in the Persian Gulf, ultimately protecting oil security for the entire global economy. Through an analysis of official and unofficial diplomatic relations, trade statistics, military records, and more, they provide a detailed account of how U.S. hegemony and oil security have grown in tandem, as, simultaneously, China and Russia have increased their political and economic presence. The book sheds light on hegemony's complexities, and challenges and reveals how local variations in power will continue to shape the Persian Gulf in the future.

*Stochastic Models, Statistics and Their Applications* Ansgar Steland,Ewaryst Rafajłowicz,Krzysztof Szajowski.2015-02-04 This volume presents the latest advances and trends in stochastic models and related statistical procedures. Selected peer-reviewed contributions focus on statistical inference, quality control, change-point analysis and detection, empirical processes, time series analysis, survival analysis and reliability, statistics for stochastic processes, big data in technology and the sciences, statistical genetics, experiment design, and stochastic models in engineering. Stochastic models and related statistical procedures play an important part in furthering our understanding of the challenging problems currently arising in areas of application such as the natural sciences, information technology, engineering, image analysis, genetics, energy and finance, to name but a few. This collection arises from the 12th Workshop on Stochastic Models, Statistics and Their Applications, Wrocław, Poland.

*Did You Just Call Me Old Lady?* Lillian Zimmerman.2016-10-20T00:00:00Z Did You Just Call Me Old Lady? is an upbeat look at aging and the impacts of Canada's increasingly aged population through the eyes of a ninety-year-old woman. Far from seeing older citizens as a burden and a strain on our public health care system, Lillian Zimmerman gracefully, and often humourously, argues that long-livers are able to live fulfilling lives and make valuable contributions to society. Zimmerman illustrates how prevalent ageism - the dislike and prejudice against old people - is in society, media and popular culture, showing how language, advertisements for products to alleviate bodily failings, and jokes about memory loss and sexual infirmity are all examples of ageism, inevitably framing and fuelling negative attitudes towards older people. Ageism, much like sexism and racism, needs to be part of the conversations around social justice and anti-oppression. Zimmerman also recognizes that there are huge challenges to aging, some of which she has experienced herself, and that serious illnesses, mental deficiencies, low income and isolation are realities for some seniors. However, Zimmerman's analysis shows that many of these problems result from inefficient management and poor policies.

**Singapore Malay/Muslim Community, 1819-2015** Hussin Mutalib,Rokiah Mentol,Sundusia Rosdi.2016-06-29 Singapore's Malay (Muslim) community, constituting about 15 per cent of the total population and constitutionally enshrined as the indigenous people of Singapore, have had its fair share of progress and problems in the history of this country. While different aspects of the vicissitudes of life of the community have been written over the years, there has not been a singularly substantive published compendium specifically about the community - in the form of a Bibliography - available. This academic initiative fills this obvious literature gap. The scope and coverage of this Bibliography is manifestly comprehensive, encompassing the different sources of information (print or non-print) about the many facets of life of the Republic's Malays/Muslims - such as education, economy, politics, culture, history, health, language, religion, arts, and more. The result is a Bibliography that is arguably the most expansive, if not exhaustive treasury collection about the community, ever available anywhere. Scholars and researchers in particular and the public in general should find this Bibliography a highly valuable, indispensable source of information about the rich and varied life of Singapore's Malay/Muslim community, stretching a period of two centuries - from the time of Stamford Raffles in 1819 until today. The Editors - Hussin Mutalib, Ph.D. (a senior academic with the National University of Singapore), Rokiah Mentol, and Sundusia Rosdi (former senior librarians with Singapore's National Library Board) - are assisted by professional and experienced librarians.

**Finance and Development, June 2014** International Monetary Fund. External Relations Dept..2014-05-27 This chapter highlights various ways Asia's growth has affected the world economy. The chapter also shows that if currency trends continue, the Asian economy is expected to be larger than that of the United States and Europe combined. Some Asian countries offer sophisticated financial markets and are centers for technological innovation, while others are largely agricultural. The study shows that the region is home to 700 million poor people, about 65 percent of the world's poor—a figure that stands in stark relief against Asia's economic strength and growing prosperity. The chapter also references the inquiry by the managing editor of the Journal of Economic Perspectives into the rich and sometimes tortured relationship between economics and virtue.

Handbook of Research on Big Data Storage and Visualization Techniques Segall, Richard S.,Cook, Jeffrey S..2018-01-05 The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries. Challenges associated with the analysis, security, sharing, storage, and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data. The Handbook of Research on Big Data Storage and Visualization Techniques is a critical scholarly resource that explores big data analytics and technologies and their role in developing a broad understanding of issues pertaining to the use of big data in multidisciplinary fields. Featuring coverage on a broad range of topics, such as architecture patterns, programing systems, and computational energy, this publication is geared towards professionals, researchers, and students seeking current research and application topics on the subject.

American Political Discourse on China Michelle Murray Yang.2017-06-14 Despite the U.S. and China's shared economic and political interests, distrust between the nations persists. How does the United States rhetorically navigate its relationship with China in the midst of continued distrust? This book pursues this question by rhetorically analyzing U.S. news and political discourse concerning the 2008 Beijing Olympic Games, the 2010 U.S. midterm elections, the 2012 U.S. presidential election, and the 2014-2015 Chinese cyber espionage controversy. It finds that memory frames of China as the yellow peril and the red menace have combined to construct China as a threatening red peril. Red peril characterizations revive and revise yellow peril tropes of China as a moral, political, economic and military threat by imbuing them with anti-communist ideology. Tracing the origins, functions, and implications of the red peril, this study illustrates how historical representations of the Chinese threat continue to limit understanding of U.S.-Sino relations by keeping the nations' relationship mired in the past.

**Contemporary Logistics in China** Ling Wang,Shao-ju Lee,Ping Chen,Xiao-mei Jiang,Bing-lian Liu.2016-06-20 This book is the sixth volume in a series entitled "Contemporary Logistics in China," authored by researchers at the Logistics Center, Nankai University. In the spirit of the five preceding volumes, published annually in previous years, this book carries on the ideal of providing a systematic exposition on the development of logistics in China to the English-speaking community. Specifically, this volume captures China's logistics development at a crucial turning point. On the one hand, it echoes the new horizon advocated by the Government's One-Belt-One-Road Initiative for global cooperation; on the other, it resonates with the new blueprint of implementing the main contents of the 13th Five-year Plan on logistics development. Subjects covered include the macro-factors pertaining to logistics development, region-specific plans, industry-wide transformation, globally oriented moves, and current hot topics. Expositions and analyses on these subjects are based on the latest available sources and statistical data. As with the previous volumes, the ultimate aim of this book is to present a timely portrait of the rapid growth of China's logistics market and the status of its logistics industry's evolution. In so doing, this book offers an in-depth analysis of the critical issues and dilemmas amid the ongoing, dynamic and multi-faceted development, and presents a valuable reference source for interested readers in the academic and professional fields.
