King John Marc Morris.2015-10-15 King John is one of those historical characters who needs little in the way of introduction. If readers are not already familiar with him as the tyrant whose misgovernment gave rise to Magna Carta, we remember him as the villain in the stories of Robin Hood. Formidable and cunning, but also cruel, lecherous, treacherous and untrusting. Twelve years into his reign, John was regarded as a powerful king within the British Isles. But despite this immense early success, when he finally crosses to France to recover his lost empire, he meets with disaster. John returns home penniless to face a tide of criticism about his unjust rule. The result is Magna Carta - a ground-breaking document in posterity, but a worthless piece of parchment in 1215, since John had no intention of honoring it. Like all great tragedies, the world can only be put to rights by the tyrant's death. John finally obliges at Newark Castle in October 1216, dying of dysentery as a great gale howls up the valley of the Trent.

Assessment and Teaching of 21st Century Skills Patrick Griffin,Esther Care.2014-10-21 This second volume of papers from the ATC21STM project deals with the development of an assessment and teaching system of 21st century skills. Readers are guided through a detailed description of the methods used in this process. The first volume was published by Springer in 2012 (Griffin, P., McGaw, B. & Care, E., Eds., *Assessment and Teaching of 21st Century Skills*, Dordrecht: Springer). The major elements of this new volume are the identification and description of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. Features of the skills that need to be mirrored in their assessment are identified so that they can be reflected in assessment tasks. The tasks are formulated so that reporting of student performance can guide implementation in the classroom for use in teaching and learning. How simple tasks can act as platforms for development of 21st century skills is demonstrated, with the concurrent technical infrastructure required for its support. How countries with different languages and cultures participated and contributed to the development process is described. The psychometric qualities of the online tasks developed are reported, in the context of the robustness of the automated scoring processes. Finally, technical and educational issues to be resolved in global projects of this nature are outlined.

Successful Teaching 14-19 Warren Kidd,Gerry Czerniawski.2010-03-18 Are you looking for a complete training manual, to get you through your assignments, help you on your teaching practice and support you in your first teaching job? For trainee teachers studying to teach the 14 to 19 age group in secondary schools and colleges, this book is a practical guide covering the essential skills that must be acquired in order to successfully complete your course. Five sections cover education policy, professional skills, theory, practice and reflection. The authors provide teaching ideas that work, and that will help trainee teachers to improve their grades and lesson observation profiles. There is a clear explanation of the theoretical underpinning that must be grasped in order to pass written assignments, and Masters level debates are addressed throughout the book, with a dedicated chapter exploring academic themes and issues. The book is packed with ideas for classroom activities, and popular topics covered include: - essential educational theory - behaviour and classroom management - how to start off lessons - ideas for group work - setting homework - evaluating your own practice, and understanding how you can improve - revising for exams - working as part of a team - using technology All the chapters contain learning objectives, discussion points, examples from practice, Masters level extensions (for those studying at that level) and suggestions for further reading. Suitable for all those studying to teach the 14 to 19 age range, this book is ideal for those on Secondary PGCE, PGDE and GTP courses leading to QTS, those studying for the post-compulsory sector PTLs, DTLLs and CTLLs qualifications and those doing Overseas Teacher Training and Teach First courses. Warren Kidd and Gerry Czerniawski are former teachers with experience of working in diverse settings; they are both Senior Lecturers in the Cass School of Education, University of East London. Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Double-shift Schooling Mark Bray.2008 Double-shift schooling primarily aims to extend access and minimize unit costs. However, some systems only achieve those goals at the expense of educational quality. Policy-makers may be faced by difficult choices when designing systems. This book highlights the advantages and problems of double-shift systems.

Taking on the World Ellen MacArthur.2003-06-26 When Ellen finished the Vendee Globe, yachting's toughest race aged just 24 the nation took her to it's heart. The depth of the affection for Ellen is extraordinary - she makes people feel like they can do anything! This is her story, written in true Ellen style, in her own words, without the help of a ghost writer. Passionate, dramatic and and deeply affecting, her story will move and inspire all who read it.

A Queer Little History of Art Alex Pilcher.2017-10-10 Over the last century, many artists have made works that challenge dominant models of gender and sexuality. The results can be sexy or serious, satirical or tender, discreetly coded or defiantly outspoken. This book illustrates the wide variety of queer art from around the world -- exploring bodies and identity, love and desire, prejudice and protest through drawing, painting, photography, sculpture and installation. *A Queer Little History of Art* features a wide selection of artists who subverted the norms of their day via bold new forms of expression, as 70 outstanding works reveal how queer experiences have differed across time and place, and how art has been part of a story of changing attitudes and emerging identities from 1900 to the present.--Publisher's website.

Tools and Mathematics John Monaghan,Luc Trouche,Jonathan M. Borwein.2016-04-18 This book is an exploration of tools and mathematics and issues in mathematics education related to tool use. The book has five parts. The first part reflects on doing a mathematical task with different tools, followed by a mathematician's account of tool use in his work. The second considers prehistory and history: tools in the development from ape to human; tools and mathematics in the ancient world; tools for calculating; and tools in mathematics instruction. The third part opens with a broad review of technology and intellectual trends, circa 1970, and continues with three case studies of approaches in mathematics education and the place of tools in these approaches. The fourth part considers issues related to mathematics instructions: curriculum, assessment and policy; the calculator debate; mathematics in the real world; and teachers' use of technology. The final part looks to the future: task and tool design and new forms of activity via connectivity and computer games.

Chemistry for the Gifted and Talented Tim Jolliff,Royal Society of Chemistry (Great Britain).2007 Chemistry for the Gifted and Talented is a refreshingly challenging educational book containing a wide range of differentiated activities for use in school and college. A Passage To Africa George Alagiah.2008-09-04 'One of Britain's most respected television journalists, with a reputation built up over many years of covering world events' Guardian 'Tributes will rightly be paid to a fantastic journalist and brilliant broadcaster - but George was the most decent, principled, kindest, most honourable man I have ever worked with' Jon Sopel As a five-year-old, George Alagiah emigrated with his family to Ghana - the first African country to attain independence from the British Empire. *A Passage to Africa* is Alagiah's shattering catalogue of atrocities crafted into a portrait of Africa that is infused with hope, insight and outrage. In vivid and evocative prose and with a fine eye for detail, Alagiah's viewpoint is spiked with the freshness of the young George on his arrival in Ghana, the wonder with which he recounts his first impressions of Africa and the affection with which he dresses his stories of his early family life. A sense of possibility lingers, even though the book is full of uncomfortable truths. It is a book neatly balanced on his integrity and sense of obligation in his role as a writer and reporter. The shock of recognition is always there, but it is the personal element that gives *A PASSAGE TO AFRICA* its originality. Africa becomes not only a group of nations or a vast continent, but an epic

of individual pride and suffering.

Assessing 21st Century Skills National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on the Assessment of 21st Century Skills.2011-10-16 The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as 21st century skills, these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning

Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.
